EXHAUST PACKING

Stainless Steel Wool is the first choice for muffler packing by many muffler manufacturers and professional racers world wide. **International Steel Wool** is a leading US manufacturer for custom stainless steel wool tubes.

When do you repack?

If your muffler's exhaust tone is starting to sound louder or "raspy" and if you are losing a little "bottom end power", it is time to replace. Repacking should always be carried out as per your manufacturer's reccomended intervals.

Why use stainless steel wool?

It is a high temperature resistant material that provides great sound attenuation. It is aldo highly resilient to turbulent exhast flows. It's also used to continuously meet maximum DB sound restrictions and mufflers will last up to 4 to 5 times longer than using fiberglass alone!

ATHENA

For the true racer. Racers depend on reliability, performance and of course affordability, that's exactly what you get in Athenas new race gasket kits. Kits include a multi-layer head gasket and a choice of two base gaskets, one stock and one High Compression! These kits use the same quality gaskets as our top end and complete kits! Valve cover gaskets are sold separately to make them convenient and affordable. No reason to pay for gaskets you don't need!

HOT CAMS CAMSHAFTS

HIGH PERFORMANCE RACING CAMSHAFTS. Stage 1 and stage 2 camshafts are drop in cams that are designed to be used with stock valve springs. In most applications stage 1 cams deliver more tourque while stage 2 cams provide more peak horsepower. Gold series cams are designed to provide extra tourque and horsepower and require stiffer valve springs. New builder series cams offer engine builders a multitude of options for different engine configurations.

REED CAGES

Snap-together cage uses symmetrical reed petals, eliminating the need for different "inner" and "outer" replacement petals. New reed tip shape accelerates air mixture, ensuring increased airflow for increased horsepower. Innovative design completely eliminates need for screws. When ordering replacement reeds, order one set per reed cage.

PIVOT WORKS SWING ARM KITS

THE ORIGINAL Pivot Works BEARING & SEAL KITS

An ill-performing swing arm can lead to a loss of action and handling in your rear suspension. However, Pivot Works can restore that handling and action in one, complete swing arm kit. Each kit features all of the needle bearings, pins, seals, caps, collars and bushings your ride requires for a smooth traveling swing arm. All parts are of OE quality or better and at a fraction of the OE price.

EXHAUST PACKING

Stainless Steel Wool is the first choice for muffler packing by many muffler manufacturers and professional racers world wide. **International Steel Wool** is a leading US manufacturer for custom stainless steel wool tubes.

When do you repack?

If your muffler's exhaust tone is starting to sound louder or "raspy" and if you are losing a little "bottom end power", it is time to replace. Repacking should always be carried out as per your manufacturer's reccomended intervals.

Why use stainless steel wool?

It is a high temperature resistant material that provides great sound attenuation. It is aldo highly resilient to turbulent exhast flows. It's also used to continuously meet maximum DB sound restrictions and mufflers will last up to 4 to 5 times longer than using fiberglass alone!
