SUPERTECH R BOOT

RACING / PERFORMANCE RIDING

222 0015 // PRODUCED SIZES: 39-48 EUR / CORRESPONDING TO: 6-12.5 US

- × Durable and technical microfiber upper construction offering superb levels of flexibility.
- × Front flex area is constructed with a redesigned soft TPU over inject on breathable mesh with shaped reliefs for improve abrasion resistance and natural forward and back movements.
- × Flexible accordion microfiber stretch at Achilles allows natural movement.
- × Top gaiter follows leg contour and is made of flexible high-grade synthetic leather reinforced with PU for maintaining shape.
- × Full length suede microfiber panel on inner side of the boot provides a smooth surface for excellent grip and feel against the bike and protects from abrasion and heat.
- × Flexible, lightweight toe shifter allows feel for changing gears.
- × Strategically positioned ventilation in heel and shin TPU guides air through the boot, on vented version.
- × Extremely protective, flexible and comfortable with excellent aerodynamics.
- × Separate internal bio-mechanical ankle brace works with the outer structure of the boot to form a protective system allowing full and free movement of the foot, ankle and leg.
- × New External TPU shin protection

wraps around to outer calf and is engineered to spread and dissipate impact energy across the entire surface while remaining compact. Replaceable Clip-on Shin-slider improves protection from abrasion - Vented sections promote airflow into the boot.

- × Integrated replaceable co-injected TPU/aluminum Toe slider features new easy screw fixing concept provides feel and protects the outer toe box structure from abrasion.
- × Replaceable nylon heel plate slider protects from impact and reduces friction in the event of a crash.
- × Outside entry/exit has stretch accordion panel for a close fit and ease of entrance and removal.
- × Zip mounted on soft TPU stretch panel gives easy closure with excellent fit - additional TPU Zip slider reduces friction in the event of a crash. Hook and loop tab lock the zip pull closed, keeping it flat and secure.
- × Micro adjustable redesign ratchet top closure stows tab end.
- × New redesigned lightweight rubber compound sole offers excellent grip and feel and allows for natural flex as the rider changes position and pressure on the foot-peg.
- × Supertech R boot is CE certified to EN 13634:2010.

INNER ANKLE BRACE SYSTEM

- × Separate internal bio-mechanical ankle brace works with the outer structure of the boot to form a protective system allowing full and free movement of the foot, ankle and leg. New research has produced re-profiled double hinged inner and outer torsion bars to give greater impact protection of the ankle and progressively absorb flex and rotation stress, reducing pressure and hyper-extension injury to the lower leg joints.
- × The inner ankle brace is constructed with a fiberglass re-inforced polyamide compound and ergonomically designed closed cell padding to give protection and comfort.
- × Alpinestars exclusive lasting process has developed the Supertech R's fit and feel characteristics to an even greater level, ensuring the inner structure allows the rider maximum feedback from the bike.
- × Specially developed polyamide compound moldings give impact protection while retaining the ease of natural skeletal movement.
- × Main upper material constructed from breathable mesh and microfiber chassis supported by an inner ankle soft padding for maximum comfort
- × Metal eyelet closure ensures rapid and accurate entry and exit and with micro-adjustability, ensures perfect fitting and security.
- × Removable anatomic footbed is sculpted for precision fit.

TECH-AIR®

AIRBAG SYSTEM

- x Alpinestars' Tech-Air® is the world's most technologically advanced electronic airbag system for street motorcycle riders. Following years of R&D, hundreds of thousands of miles of road testing and a multitude of full-scale crash tests, the Tech-Air® system's innovative design and sensor positioning provides active safety performance in a wide variety of situations.
- x Tech-Air® is the world's first fully

self-contained airbag system to function independently of the motorcycle, with its sensors, electronic control unit and full upper body airbag system incorporated into an airbag vest worn with an outer jacket.

- x The Tech-Air® system's sensors detect a rider's impending loss of control with the greatest of precision and, once fired, the airbag will fully inflate within

25 milliseconds. The system's sensors are not required to be fitted to the motorcycle, meaning Tech-Air® can be worn in a variety of riding situations, both on and off-road.

- x Interchangeable with a choice of Alpinestars' compatible riding jackets for all-weather and everyday use, the Tech-Air® street airbag system offers you the highest levels of protection and versatility, combined with

true convenience and usability.

- x Switching the system on before your ride is as simple as zipping up your jacket and regardless of motorcycle or scooter type, age or model – Alpinestars' Tech-Air® is there to protect you all the time; whatever the bike, season or surface.

× TECH-AIR® STREET VEST ×

TOURING / ROAD RIDING

SIZE: S-3XL - WOMEN'S SIZE: S-M / CODE: 650 8015

- x Designed to be used in conjunction with airbag-compatible outer jackets
- x Comprehensive inflatable upper body protection for back, shoulders, kidney area, chest and upper abdomen.
- x Electronic sensors are securely and unobtrusively incorporated within the system's chassis, meaning the vest is completely self-contained and allows it to be worn interchangeably between compatible jackets.
- x Constructed from a strong and durable mesh main shell with stretch poly-fabric on shoulders and torso for a compact and secure fit that is close to the rider's body while allowing freedom of movement.
- x Removable inner mesh and elastic hook and loop waistband to position airbag system to customize fit and improve adjustability.
- x Full internal back lining constructed from 3D mesh for optimized levels of ventilation and breathability.
- x The Airbag Control Unit (ACU) of Tech-Air® is incorporated within strong, lightweight polymer back protector, which features an ergonomic plate construction for structural strength and a fit to follow the natural contours of the back.
- x Tech-Air® ACU is seal-protected within vest to ensure its all-weather performance.
- x ACU has been homologated to ECE R10 04, which ensures the electromagnetic integrity and stability of the unit.

- x Tech-Air® uses an integrated, certified lithium ion battery, with a battery life of 25 hours and a recharge time of approximately 6 hours. Micro USB charger allows convenient recharging of system, with one hour of charging time giving four hours of riding coverage.

CERTIFICATIONS

- x Argon inflator cartridges are CE certified to ISO 14451 standard, meaning that they will only fire if commanded by the electronic unit. It also certifies that the cartridges can be safely handled, assembled and transported.
- x System's firmware is upgradable and external service record will be managed by a custom-made data portal.
- x Tech-Air® is Category II CE Certified to the 686/89/EEC European PPE Directive, using a version of EN1621-4:2013, which guarantees impact protection performance from 25 milliseconds to 5 seconds.
- x Certified to function at -10°C and +50°C to guarantee system's use in wide range of weather conditions.
- x Tech-Air® design and manufacture is CE certified to the 2007/23/EC pyrotechnic directive, guaranteeing it has been assembled following all pyrotechnic handling and safety regulations, which means the system can be transported by car, ship, train or airplane.

THE AIRBAG CONTROL UNIT (ACU)

INFLATORS

× **TECH-AIR® RACE VEST** ×

RACING / PERFORMANCE RIDING

SIZE: M-2XL / CODE: 650 8016

- × System's firmware is upgradable and can be configured to run the Tech-Air® Street airbag settings for non racing use in road and off-road situations.
- × Ergonomically profiled, performance fit airbag vest optimized for use with compatible racing/performance riding airbag leather suit.
- × Airbag Control Unit incorporated within strong, lightweight, ergonomic polymer back protector, specially optimized for race and track use.
- × Electronic sensors incorporated in the system's chassis, meaning vest is completely self-contained and allows it to be worn interchangeably with compatible garments.
- × Advanced multi-material main shell incorporates Lycra®, 2D mesh and Cordura.
- × Interior comprises of perforate Lycra, 3D mesh and comfort edging for high levels of comfort.
- × Specially designed, race-developed back protector.
- × Comprehensive inflatable upper body protection for back shoulders, kidney area, chest and upper abdomen.
- × Incorporates removable inner mesh and elastic hook and loop waistband to position airbag system to customize fit and improve adjustability.
- × Argon inflator cartridges are CE certified to ISO 14451 standard.
- × ACU is seal-protected within vest to ensure its all-weather performance and the vest and componentry are certified.
- × ACU has been homologated to ECE R10 04, which ensures the electromagnetic integrity and stability of the unit.
- × System uses an integrated, certified lithium ion battery, with a battery life of 25 hours and a recharge time of approximately 6 hours. Micro USB charger allows convenient recharging of system, with one hour of charging time giving four hours of riding coverage.
- × Color coded front YKK zippers allow for vest to be easily and securely attached to outer jacket.
- × Category II CE Certified to the 686/89/EEC European PPE Directive, using a version of EN1621-4:2013, which guarantees impact protection performance between 45 milliseconds to 5 seconds.
- × Design and manufacture CE certified to the 2007/23/EC pyrotechnic directive.

× HOW TO MEASURE

A. Chest - Measure around the fullest part, under the armpits, keeping the tape horizontal.

B. Waist - Measure around the natural waist line, in line with the navel, keeping the tape horizontal.

C. Hip - Measure around the fullest part of your hips, about 20cm below waist line, keeping the tape horizontal.

D. Thigh - Measure around the thigh just below the crotch, keeping the tape horizontal.

E. Inseam - Stand against a wall, ask someone else to measure from the crotch to the bottom of your leg.

F. Arm Length - Measure from shoulder (Humerus) to wrist.

G. Height - Stand against a wall, ask someone else to measure from the floor to the top of your head, keeping the tape vertical.

× GLOSSARY

- × **4-in-1 System** - Interchangeable system incorporating the removable, waterproof and breathable Drystar® liner and removable thermal liner. The 4-in-1 system enables the jacket to be used with the Drystar® and thermal liners together; the Drystar® or thermal liner by themselves; or without either liner, allowing the jacket to be configured in 4 different ways to suit any climatic condition.
- × **Armacor™** - Product Technology it's a patented lattice structure with an integrated Dupont™ Kevlar® fiber core. This technology offers extreme tear and abrasion resistance yet lighter weight. Incorporated into a Gore-Tex® Pro Shell motorcycling jacket, it will protect enthusiastic motorcyclists in the event of a fall. This means safety and enhanced comfort – in ALL-WEATHER conditions.
- × **CE certification** - Protection and protectors that are CE-certified have met the strict performance standards and requirements of the European Union.
- × **Clarino®** - This highly durable material provides great feel for the palm. Machine washable, Clarino® remains soft and supple even after repeated exposure to water.
- × **Climate Control System** - System of zippered air intakes and exhausts that allow precise control of airflow while riding for superior body temperature regulation.
- × **Coolmax®** - This unique material “wicks” moisture away from the skin and quickly transfers it to the outer surface to speed up evaporation.
- × **Cordura®** - This textured nylon is durable, lightweight and abrasion resistant
- × **Denier** - Denier is a measurement which denotes the thickness and the diameter of a fiber material.
- × **Drystar®** - Alpinestars' waterproof and breathable membrane for all-weather comfort and performance.
- × **Drystar® Performance** - Alpinestars' exclusive sealed triple layer construction technology which bonds all layers in glove, thereby affording a highly reduced material chassis to promote good levels of sensitivity of bike controls.
- × **E.V.A.** - This comfortable and lightweight material provides superior shock absorption and impact protection.
- × **Gore-Tex®** - This world renowned waterproof and breathable membrane features pores that are smaller than water to keep rain out, but larger than water vapor, allowing perspiration to escape.
- × **Gore-Tex® Pro Shell** - It is the optimum solution for outdoor professionals and serious enthusiasts, who need to face extreme weather and tough conditions. Made with the most rugged, most breathable, durably waterproof and windproof fabrics.
- × **Gore-Tex® Paclite® Shell** - Combines extreme breathability and durable wind and waterproofness with minimum weight and pack volume.
- × **Gore-Tex® Soft Shell** - Constructed with soft and warm fabrics, they are designed for reduced layering and improved freedom of movement in colder conditions.
- × **Gore-Tex® with Gore Grip technology** - Sealed triple layer material construction from Gore-Tex® for improved dexterity, grip and control sensitivity.
- × **Performance Shell** - Designed to provide comfort and durable waterproof protection.
- × **Dupont™ Kevlar®** - Used as a reinforcement, this high strength fiber is cut and tear resistant.
- × **Neoprene** - Comfortable and flexible, this water resistant material provides great insulation in cold and damp conditions and excellent wind stopping performance.
- × **Outdry®** - Innovative heat-bonded membrane construction which provides an impenetrable layer with no seams, preventing water collecting between the layers for a lightweight improved fit, greater dexterity and comfort.
- × **Pittards® digital leather** - Supple and quick drying leather which provides excellent grip in all-weather conditions.
- × **Schoeller® Keprotec®** - This stretchable and vented material features Dupont™ Kevlar® reinforced thread for maximum tear and abrasion resistance.
- × **Sublimated graphics** - Utilizing a pressure and heat process, this system of design transfer produces fade free graphics even after extensive washing.
- × **Superfabric®** - Flexible, ceramic reinforced fabric that is extremely abrasion, puncture and cut resistant making it ideally suited for application on exposed areas such as knees and elbows.
- × **Taped seams** - Seam tape is applied along the stitch line of the garment, which prevents water intrusion at these small but critical areas.
- × **Taslan** - Durable and water repelling nylon fabric.
- × **Thinsulate®** - Lightweight, breathable, moisture resistant and quick drying, Thinsulate® provides superior insulation for cold weather riding.
- × **Primaloft®** - A lightweight, breathable insulation that repels moisture to offer superior performance for cold-weather riding.
- × **PE - Polyethylene**. Thermoplastic material composed of polymers of ethylene. It is light, strong, water resistant and flexible at low temperatures.
- × **PU Polyurethane**. Polymer containing urethane used in plastics, rubber, foam, etc.
- × **PU Coating** - A thin layer of film applied to the backside of the fabric to give strength, structural integrity and water resistance.
- × **TPU** - Thermoplastic polyurethane. A hybrid material - a mixture between hard plastic and soft silicone. A very dense and smooth rubber.
- × **Windstopper®** - Laminated membrane offering total windproof performance and maximum breathability for complete comfort.
