RACING ABSOLUTE LEATHER SUIT -TECH-AIR® COMPATIBLE

//// RACING/ PERFORMANCE RIDING / SIZE: 44-58

TECH-AIR®
RACE_AIRBAG_SYSTEM
COMPATIBLE

High level race suit incorporating MotoGP-derived technologies.

Designed with body mapped race fit and pre-curved sleeves for optimum riding performance.

Premium full kangaroo leather construction for lightness, flexibility and optimum levels of protection.

Highly durable, flexible kangaroo leather features anatomical panels for high levels of movement and a superior fit.

Strategically positioned accordion stretch panel inserts have been designed to accommodate Alpinestars airbag system, allowing expansion when the airbag inflates but also offering a high level of anatomical performance and a superior fit when riding without the system fitted.

Tech-Air® compatible; Tech-Air® is the world's first completely electronic, self-contained, full independent upper body motorcycle airbag system with no bike-to-rider set-up configurations required.

An LED display on the sleeve indicates the airbag's operational status, while an internal housing located in the CE-certified

back protector accommodates the system vest's ECU.

Patented leather bonded aramid grid reinforcements on the arm, back, seat, thigh and elbow areas to reduce heat transfer and prevent the skin from burning when sliding. This also gives more strength to the leather against tear and abrasion.

New aramid reinforced stretch fabric panels on crotch, back of the leg and underarms to guarantee excellent levels of lightness, flexibility and breathability.

Large perforated kangaroo leather panels are strategically placed to offer excellent levels of cooling airflow and comfort.

Alpinestars CE-approved, race-derived protectors on the elbow, shoulder, knee and tibia.

Alpinestars new exclusive GP Dynamic Friction Shield (DFS) on knee and further DFS protection on the elbow and shoulder.

Innovative new RR elbow slider is anatomically contoured and features a removable screw-mounted insert slider.

Chest pad compartment (designed to take the CE-certified

Nucleon chest pads).

Comes fitted with the CE-certified Nucleon hip protector.

Ergonomically designed AR (Abrasion Resistant) Shield reinforcement with aramid fiber and polyamide construction in the limb flexion zones to protect the exposed seams against abrasion.

Removable inner stretch mesh liner with multi-panel construction and 3D back panel.

Soft 3D textured fabric comfort collar construction.

New GP aerodynamic back hump improves stability and airflow at speed. Ventilated and designed to incorporate a hydration pack, it comes complete with an opening which can accommodate a hydration hose.

Internal waterproof wallet pocket for peace-of-mind storage.

Printed logos reduce weight and improve the flexibility of the leather, thus enhancing comfort and performance.

Fully CE-certified riding garment to CE - Category II prEN17092 draft standards - AAA class.

GP TECH v3 LEATHER SUIT -TECH-AIR® COMPATIBLE

//// RACING/ PERFORMANCE RIDING / SIZE: 44-58

TECH-AIR
RACE AIRBAG SYSTEM
COMPATIBLE

Racing leather suit designed with a body mapped race fit and pre-curved sleeves, legs and body for optimal riding performance.

Tech-Air® compatible; Tech-Air® is the world's first completely electronic, self-contained, full independent upper body motorcycle airbag system with no bike-to-rider set-up configurations required.

An LED display on the sleeve indicates the airbag's operational status, while an internal housing located in the CE-certified back protector accommodates the system vest's ECU.

Strategically positioned accordion stretch panel inserts have been designed to accommodate Alpinestars airbag system, allowing expansion when the airbag inflates but also offering a high level of anatomical performance and a superior fit when riding without the system fitted.

Kangaroo and bovine multi-panel construction for strength and flexibility.

Patented leather bonded aramid

grid panels placed in the most exposed areas which offer excellent additional resistance to tear and abrasion, and highly efficient insulation against the build-up of frictional heat.

Hyper Resistant Stretch Fabric (HRSF) panels on the crotch, back of leg and underarms ensure lightness and high levels of flexibility and breathability.

Perforated premium full-grain leather panels are strategically positioned to offer excellent levels of cooling airflow and comfort.

Alpinestars race-derived, CE-approved protectors on the elbow, shoulder, knee and tibia.

Alpinestars new exclusive knee GP Dynamic Friction Shield (DFS) slider, with additional GP DFS on the shoulders.

Innovative new RR elbow slider is anatomically contoured and features a removable and replaceable screw-mounted insert slider.

Chest pad compartment designed to take the CE-certified

Nucleon chest pads.

Comes fitted with the CE-certified Nucleon hip protectors.

Ergonomically designed AR (Abrasion Resistant) Shield reinforcement with aramid fiber and polyamide construction in the limb flexion zones to protect the exposed seams against abrasion.

Removable inner stretch mesh liner with multi-panel construction and 3D textured fabric on the collar for comfort.

Aerodynamic back hump is ventilated and designed to incorporate a hydration pack. Comes complete with an opening which can accommodate a hydration hose.

Internal waterproof wallet pocket for peace-of-mind storage.

Printed logos reduce weight and improve the flexibility of the leather, thus enhancing comfort and performance.

Fully CE-certified riding garment to CE - Category II prEN17092 draft standards - AAA class.

//// ALL WEATHER RIDING/TOURING / SIZE: S - 4XL

Full mesh construction for optimized levels of airflow and breathability with a laminated Drystar® membrane for superior performance in all weather conditions.

'Two jackets in one' design; jacket and outer shell can both be worn as standalone items.

The jacket has a handy back pocket for storing the shell.

Waist adjustment for an improved riding fit.

Cuff adjustment closure system for a tailored fit.

Large utility pocket and two front hand pockets for real-world practicality.

Multiple reflective prints to make the rider more visible

to other road users.

Low profile collar construction for comfort and to prevent chafing.

Pre-curved sleeve construction reduces riding fatigue.

Waterproof front inner pocket for peace-of-mind storage.

Chest and back compartments are designed to accommodate the Alpinestars Level 1 CE- certified Nucleon chest and Level 2 CE-certified back inserts, available as an accessory upgrade.

Waist connection zipper allows quick and easy attachment to Alpinestars riding pants.

Level 2 CE-certified Bio Air shoulder and elbow protectors for high levels of protection against impacts.

Outer jacket has a laminated Drystar® membrane for superior performance in all weather conditions.

Shock cord waist adjustment for an improved riding fit.

Two front hand pockets for real-world practicality.

Cuff adjustment closure system reduces material bunching.

High collar profile with liner for enhanced rider comfort.

Foldable hood with shock cord adjuster.

Pre-curved sleeve construction reduces riding fatigue.

Fully CE-certified riding garment to CE - Category II prEN17092 draft standards - A class

HYPER DRYSTAR® JACKET

//// ALL WEATHER SPORT RIDING / SIZE: S - 5XL

Multi-panel, multi-material construction incorporating 450D Polyfabric main shell and 600D reinforcement for durability.

Fixed Drystar® membrane with taped seams offers guaranteed waterproof and breathable performance in all weather conditions.

Removable long sleeve thermal liner (100g on body, 80g on sleeves) for warmth in cold conditions.

Excellent fit thanks to the innovative volume control adjustment system on the chest, bicep and sleeves, which ensures a tight, improved riding fit.

Adjustment system ensures a personalized riding fit and

offers enhanced safety by keeping the protection in place in an impact or slide.

Pre-curved sleeve ensures a comfortable fit while a hook system allows the material to be adjusted, thus preventing the sleeve riding up the arm during riding.

Newly developed shoulder protection features over-molded advanced TPU guard layered under the outer fabric for superior impact protection.

Alpinestars race-derived, CE-approved internal elbow and shoulder protectors.

Chest pad and back compartments can accommodate the Nucleon chest and back inserts (available as an accessory upgrade).

Strategically positioned four-way stretch inserts on inside arms, side torso and rear shoulder for freedom of movement and an improved comfort fit.

Multiple ventilation system features zippered vents and exhaust ports for effective internal cooling.

Extensive reflective details on arms and back to make the rider more visible to other road users.

Full circumference waist connection zipper on the inside for attachment to Alpinestars riding pants.

Fully CE-certified riding garment to CE - Category II prEN17092 draft standards - A class.

T-FUSE SPORT SHELL WATERPROOF JACKET

//// ALL WEATHER SPORT RIDING / SIZE: S - 4XL

Technical softshell constructed with a water-resistant main material to provide superior levels of wet weather protection.

Fixed waterproof membrane for excellent 100% waterproof performance in wet conditions.

Hook and loop strap on waist adjustment plus snap adjusters on chest and sleeves for improved riding fit.

Zippered air intake vents are strategically positioned for optimized airflow when opened.

Two zippered hand pockets and a chest zippered pocket for real-world practicality.

Low profile collar construction with fabric on inner collar lining for enhanced rider comfort.

Pre-curved sleeve construction reduces riding fatigue.

Reflective details to make the rider more visible to other road users, especially when riding at night.

Chest and back compartments are designed to accommodate Alpinestars Level 1 CE-certified Nucleon chest and Level 2 CE-certified Nucleon back inserts, available as an accessory upgrade.

Waterproof front inner pocket for peace-of-mind storage.

Removable thermal liner with insulated front flap for versatility.

Waist connection zipper allows quick and easy attachment to Alpinestars riding pants.

Level 2 CE-certified Bio Air shoulder and elbow protectors for protection against impacts.

Dynamic Friction Shield (DFS) external dual density TPU sliders on shoulders for protection against abrasion.

Fully CE-certified riding garment to CE - Category II prEN17092 draft standards - A class.

STELLA **MISSILE LEATHER SUIT -TECH-AIR® COMPATIBLE**

//// WOMEN'S PERFORMANCE RIDING / SIZE: 38-50

Anatomically profiled for a fully optimized female fit and constructed with premium 1.3mm genuine bovine leather.

Large accordion stretch panels help movement and comfort on the bike.

Strategically positioned accordion stretch panel inserts have been designed to accommodate Alpinestars airbag system, allowing expansion when the airbag inflates but also offering a high level of anatomical performance and a superior fit when riding without the system fitted.

Tech-Air® compatible; Tech-Air® is the world's first completely electronic, self-contained, full independent upper body motorcycle airbag system with no bike-to-rider set-up configurations required.

An LED display on the sleeve indicates the airbag's operational status, while an internal housing located in the CE-certified back protector accommodates the system vest's ECU.

Hyper Resistant Stretch Fiber

(HRSF) fabric panels on sleeves and crotch further improve fit and feel.

Ergonomic back hump, designed specifically for the female form and sculpted for better airflow and performance at high speed.

Pre-curved sleeves and legs construction to reduce rider fatigue when riding.

Large perforated leather panels for maximum ventilation.

Localized perforations highly improve ventilation.

Stitched leather graphic details.

Calf expansion gusset.

Integrated padding for increased levels of rider comfort.

Chest compartments are designed to accommodate the Alpinestars Stella Nucleon chest pads, available as an accessory upgrade.

Knee multi-layer reinforced construction with grip texture on the bike contact area.

Removable mesh inner liner for convenience and breathability.

Waterproof inner wallet pocket

for peace-of-mind storage.

Multiple snap button system to integrate the Level 2 CE-certified Alpinestars Nucleon Back protector.

3D textured fabric collar construction aids comfort and prevents chafing.

Innovative inner cuff and calf adjusters allow riders to tailor the fit.

CE-certified Alpinestars GP-R protectors on the shoulder, elbow, knee.

Innovative new elbow slider is anatomically contoured and features a removable and replaceable screw-mounted insert slider.

Dynamic Friction Shield (DFS) external dual density TPU sliders on the shoulder and knee for high levels of abrasion resistance.

Sport knee slider.

Fully CE-certified riding garment to CE – Category II prEN17092 draft standards – AAA class.

VIKA v2 WOMEN'S LEATHER JACKET

//// WOMEN'S URBAN / SIZE: 38-52

Women's jacket designed to blend fashion and function.

Part of a full set of jacket, pants, gloves, and boots, this body contouring, ultra-comfortable protective jacket is inspired by runway trends from the top design houses and engineered to women's needs.

The design pattern visually and physically thins, lengthens, and flatters the female figure.

Buttery soft full-grain leather

combines with generous ergonomic stretch zones for optimized fit, comfort, and freedom of movement for many body types in a full range of positions.

Removable CE-certified heat-and-impact-sensitive shoulder and elbow protection hardens on collision; especially chosen for Vika because of its softness and thinness.

Single-piece soft leather collar provides a seamless

construction around the neck for a highly comfortable fit.

Pre-curved sleeves to reduce fatigue when riding.

Lower back extended for riding comfort and coverage.

Internal waist connection zipper for connection to Vika pants.

Fully CE-certified riding garment to CE - Category II prEN17092 draft standards - A class.

SMX PLUS v2 BOOT

//// PERFORMANCE RIDING / PRODUCED SIZES: 36-48 EUR / CORRESPONDING TO: 3.5-12.5 US

SPORT FIT

Advanced microfiber upper construction for lightweight high performance protection and superb levels of flexibility.

Front flex area is constructed with a soft microfiber for improving abrasion resistance and natural forwards and backwards movement.

Flexible accordion microfiber on Achilles gives enhanced natural movement.

Strategically positioned ventilation area in heel and shin TPU for breathability and airflow.

Outside entry/exit has stretchable accordion panel for a close fit and ease of entry and removal. Contoured high modulus shin plate protector gives

superior impact and abrasion resistance.

An evolution of Alpinestars unique Multi-Link Control system provides advanced external protection and support for ankle articulation, limiting hyper-torsion, hyper-extension and hyper-flexion as well as providing Achilles and ankle impact protection.

Wide heel counter with lateral ventilation extends to the ankle and is combined with a shock absorbing padded insert and self-molding ankle protectors.

Dual density TPU replaceable toe slider with screw-in assembly providing protective coverage around the outer toe area.

Replaceable heel slider and external side heel slider are positioned to dissipate and absorb shock and promote sliding during an accident.

Large front and rear asymmetrical accordion zones are optimized to maximize flexibility for maximum comfort and improved safety.

Micro adjustable ratchet top closure stows tab end.

Advanced synthetic forefoot lining, laminated with open cell foam for shock absorption and highly breathable lining in ankle and leg areas for comfort.

Alpinestars anatomical and replaceable countered EVA footbed provides arch support and forefoot pedal feeling.

Durable sole, designed for improved riding feel, features evenly textured rubber for consistent grip.

Inner instep speed lacing closure and unique lateral zipper offer precise and secure fit.

Alpinestars Lace-Lock System is constructed from an advanced polymer resin to guarantee a quick, precise and secure closure.

Hook and loop tap locks the zip pull close, keeping in flat and safe.

SMX Plus v2 boot is CE-certified to EN 13634:2017.

SMX 6 v2 BOOT

//// PERFORMANCE RIDING / PRODUCED SIZES: 36-50 EUR / CORRESPONDING TO: 3.5-14 US

SPORT FIT

Newly designed boot upper incorporates innovative front, rear bellow and rear calf zones for superior levels of flexibility.

The upper is constructed from microfiber for durability and abrasion resistance.

Ergonomic last for forefoot streamlining to enable greater control of the bike's controls and for superior, wide-ranging foot profile, fit and comfort.

Alpinestars innovative TPU lateral ankle brace protection provides a bio-mechanical support between lateral top calf/shin and ankle and offers improved

structural integrity, protection against impact shocks, repeated abrasion resistance and flex support.

Air vents on the heel counter and shin plate plus breathable mesh inserts improve comfort and reduce fatigue on short and long rides.

High modulus TPU injected shin guard, calf protector, heel counter, shift pad, ankle brace and toe slider for improved shock protection and durability.

Double density ankle protector on medial side layered under the upper offers protective performance in key area.

Innovative instep and Achilles accordion

flex zone construction for superior comfort, extension, control and support.

Internal insole with the shank reinforcement integrated for support to the arch area and foot protection.

Medial side entry opening/closure system features elastic-mounted zipper with wide hook and loop closure for flexibility and secure fit.

The aperture opening is large to promote easier in/out.

Internal toe box protection is layered under the upper for durability, improved feel and performance.

Breathable textile interior lining features anti-sliding microfiber suede reinforcement on heel area help keep foot in position while riding.

New, removable anatomic footbed includes EVA and Lycra for performance, comfort and support.

Alpinestars new and exclusive compound rubber sole promotes improved feel and grip, water dispersion and durability.

HOW TO MEASURE

A. Chest - Measure around the fullest part, under the armpits, keeping the tape horizontal.

B. Waist - Measure around the natural waist line, inline with the navel, keeping the tape horizontal.

C. Hip - Measure around the fullest part of your hips, about 20cm below waist line, keeping the tape horizontal.

D. Thigh - Measure around the thigh just below the crotch, keeping the tape horizontal.

E. Inseam - Stand against a wall, ask someone else to measure from the crotch to the bottom of your leg.

F. Arm Length - Measure from shoulder (Humerus) to wrist.

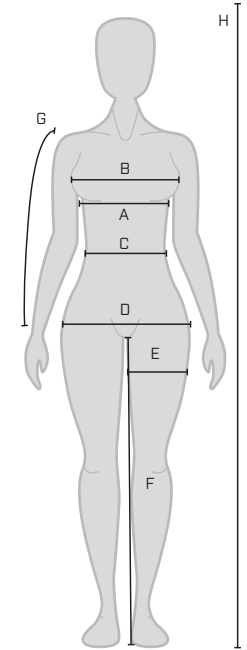

G. Height - Stand against a wall, ask someone else to measure from the floor to the top of your head, keeping the tape vertical.

ALPINESTARS CLASSIFICATION LEVEL

THE TECHNICAL STANDARD PREN 17092:2018 PROVIDES THAT GARMENTS DESIGNED TO PROVIDE PROTECTION FOR MOTORCYCLE RIDERS ARE TESTED AND CERTIFIED ACCORDING TO THE CLASS OF PROTECTION THEY AFFORD.

The performance requirements for the classes of protection are detailed by this specific standard according to the different parts of the technical standards prEN 17092-1, prEN 17092-2 (= class AAA garments), prEN 17092-3 (= class AA garments), prEN 17092-4 (= class A garments), prEN 17092-5 (= class B garments), or prEN 17092-6 (= class C garments). Adhering to these standards, there are three possible classification levels applicable to Alpinestars garments.

TECH

Corresponding to Class AAA garments for which the most exposed areas (i.e. shoulders, elbows, hips, knees) have been tested for impact-abrasion resistance at 120 km/h (75 mph).

PRO

Corresponding to Class AA garments for which the most exposed areas (i.e. shoulders, elbows, hips, knees) have been tested for impact-abrasion resistance at 70 km/h (43 mph).

PLUS

Corresponding to Class A garments for which the most exposed areas (i.e. shoulders, elbows, hips, knees) have been tested for impact-abrasion resistance at 45 km/h (28 mph).

GLOSSARY

4-IN-1 SYSTEM – An interchangeable system incorporating the removable, waterproof and breathable Drystar® liner and removable thermal liner. The 4-in-1 system enables the jacket to be used with the Drystar® and thermal liners together; the Drystar® or thermal liner by themselves; or without either liner, allowing the jacket to be configured in four different ways to suit any climatic condition.

AIRSHIELD REINFORCEMENT – Fabric made of polyamide/Kevlar blend to give protection against abrasion at key impact points.

BONDED LEATHER WITH ARAMIDIC FABRIC – Leather bonded with aramidic fabric to improve abrasion and tear resistance performance and reduce heat transmission in the event of a slide on Tarmac.

CE-CERTIFICATION – Protection and protectors that are CE-certified have met the strict performance standards and requirements of the European Union.

CLARINO® – This highly durable material provides great feel for the palm. Machine washable, Clarino® remains soft and supple even after repeated exposure to water.

CLIMATE CONTROL SYSTEM – A system of zippered air intakes and exhausts that allow precise control of airflow while riding for superior body temperature regulation.

COOLMAX® – This unique material wicks moisture away from the skin and quickly transfers it to the outer surface to speed up evaporation.

CORDURA® – This textured nylon is durable, lightweight and abrasion resistant.

DENIER – Denier is a measurement which denotes the thickness and the diameter of a fiber material.

DRYSTAR® – Alpinestars waterproof and breathable membrane for all-weather comfort and performance.

DRYSTAR® PERFORMANCE – Alpinestars exclusive sealed triple layer construction technology which bonds all layers in glove, thereby affording a highly reduced material chassis to promote good levels of sensitivity of bike controls.

E.V.A. – This comfortable and lightweight material provides superior shock absorption and impact protection.

GORE-TEX – This waterproof and breathable membrane features pores that are smaller than water to keep rain out, but larger than water vapor, allowing perspiration to escape.

GORE-TEX PRO SHELL – The optimum solution for outdoor professionals and serious enthusiasts who need to face extreme weather and tough conditions. Made with the most rugged, most breathable, durable waterproof and windproof fabrics.

GORE-TEX PACLITE® SHELL – Combines extreme breathability and durable wind and waterproofness with minimum weight and pack volume.

GORE-TEX SOFT SHELL – Constructed with soft and warm fabrics, they are designed for reduced layering and improved freedom of movement in colder conditions.

GORE-TEX WITH GORE GRIP TECHNOLOGY – Sealed triple-layer material construction from Gore-Tex for improved dexterity, grip and control sensitivity.

HRSF – Hyper Resistant Stretch Fabric; a stretch fabric with high abrasion and tear resistance

PERFORMANCE SHELL – Designed to provide comfort and durable waterproof protection.

DUPONT™ KEVLAR® – Used as a reinforcement, this high strength fiber is cut and tear resistant.

NEOPRENE – Comfortable and flexible, this water resistant material provides great insulation in cold and damp conditions and excellent windstopping performance.

SCHOELLER® KEPROTEC® – This stretchable and vented material features Dupont™ Kevlar® reinforced thread for maximum tear and abrasion resistance.

SUBLIMATED GRAPHICS – Utilizing a pressure and heat process, this system of design transfer produces fade-free graphics, even after extensive washing.

TAPED SEAMS – Seam tape is applied along the stitch line of the garment, which prevents water intrusion at these small but critical areas.

TASLAN – A durable and water repelling nylon fabric.

THINSULATE® – Lightweight, breathable, moisture resistant and quick drying, Thinsulate® provides superior insulation for cold weather riding.

PRIMALOFT® – A lightweight, breathable insulation that repels moisture to offer superior performance for cold-weather riding.

PE – Polyethylene – Thermoplastic material composed of polymers of ethylene. It is light, strong, water resistant and flexible at low temperatures.

PU – Polyurethane; a polymer containing urethane. Used in plastics, rubber, foam, etc.

PU – a thin layer of film applied to the backside of the fabric to give strength, structural integrity and water resistance.

TPU – Thermoplastic polyurethane. A hybrid material – a mixture between hard plastic and soft silicone. A very dense and smooth rubber.

WINDSTOPPER® – Laminated membrane offering total windproof performance and maximum breathability for complete comfort.

A scenic landscape featuring a winding asphalt road that curves through rolling hills. The hills are covered in dry, golden-brown grass and some green shrubs. In the foreground, a stone wall runs along the edge of the road, topped with a wire fence. To the left, a waterfall cascades down a rocky cliff. The sky is overcast and hazy, creating a soft, atmospheric light. The text "GO AHEAD." is centered in the middle of the image in a bold, black, serif font.

GO AHEAD.

When it comes to quality motorcycle body armor and protection, Alpinestars is the brand you can depend on.
