## UK EXCLUSION OF LIABILITY

Ariete, ARI and Harri's products, while being of very high quality, may be subject to damage in case of impact or accident. Before using Ariete, Ari or Harri's products, please carefully read the instructions for use and installation. Sandro Mentasti Srl makes every effort to ensure that the information contained in this catalogue is correct and easy to understand, with some information specific to individual products, but accepts no responsibility for any misinterpretation. In any event, Sandro Mentasti Srl is not liable for any damage to property and/or persons caused during the use of its products, and neither for any damage resulting from incorrect use and/or use other than that for which the product was originally intended, and damage resulting from assembly errors and/or incorrect installation.

Sandro Mentasti Srl manufactures its products directly, and markets them with the ARIETE, ARI and HARRI'S brands. The use contained within the catalogues of any original product codes bearing brands other than those mentioned above is intended as merely descriptive, as well as the possible use of trademarks and / or names of other manufacturers (for example, PIAGGIO®, HONDA®, YAMAHA®, SUZUKI®, KAWASAKI®, BMW®, VESPA®, KYMCO®) which Sandro Mentasti Srl is in no way connected. The only purpose of this use is to describe the accessory and/or the part.

## UK CERTIFICATIONS

Our Quality is the result of 70 years of work

The quality starts and progresses into a management system that integrates checks on products and processes.

The full control over all the manufacturing steps allows us to fully comply with the Client's requirements, but more importantly, enables us to offer the guarantee of a flawless service, at any moment.

Sandro Mentasti Srl has received the certification issued by the **TUV THURINGEN e.V** Certification Body, for its own Quality and Safety Management System.

#I\_AM\_ARIETE\_ORIGINAL

**UK |** Be assured that the original ARIETE® products guarantee compliance with the highest measures of quality and Environmental protection set by the strict standards of Sandro Mentasti Srl.

Recently, many imitations of our Ariete® products have been put on the market, also imitations of our HARRI'S® and ARI®-the original fork oil seals. These low-quality models pose a risk to the user's safety both on the road and off-road.

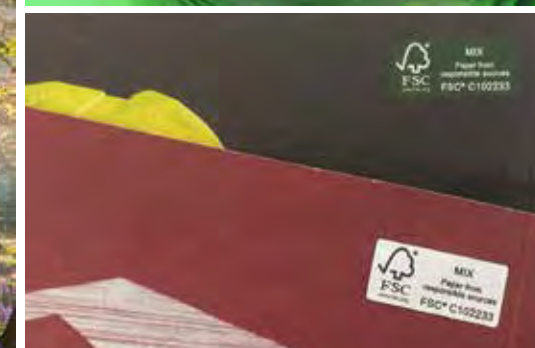

**WARNING: DO NOT BUY COUNTERFEIT and NON-ORIGINAL PRODUCTS**

In order to find out whether the purchased item is original by Ariete® or is counterfeit, we apply a hologram to the original packaging to check its authenticity in a few easy steps.

# WE HAVE A GREEN HEART

Sandro Mentasti Environmental Protection Program. This project, founded in 2007, is born out of the desire to promote and apply a more environmentally friendly business culture based on the compatibility between our industry and environmental protection. The commitment aims at reducing energy consumption in production, at eliminating toxic materials, and looks at a proper development of research and technological innovation with the goal of respecting the natural environment. All of our products marketed with Ariete, Harri's and ARI brands are the expression of our philosophy of dialogue between ecology and industry. Concrete results have already been achieved in the company's energy saving through ecologically certified electrical transformers, in the management of special waste disposed of in compliance with law by specialized and homologated companies, in the management of recycling, in the drastic reduction in water consumption by means of a closed loop system for the thermo-conditioning of presses and equipment, in the optimization of the heating system of the departments and offices thanks to new thermal condensing boilers with almost zero emissions in the atmosphere, in the considerable saving of paper for internal use (forms, photocopies, e-mail prints, etc.), and the adoption of packaging of ecologically classified products, with catalogs printed strictly on "certified" recycled paper.

### **RACE-BASED DEVELOPMENT**

**UK** Each project is refined and tested by Ariete riders in relevant off-road world championship events. Rider feedback is agreed and incorporated into the final design before this is submitted to the certifying authority for approval.

### **ERGONOMICS AND AVANT-GARDE DESIGN**

**UK** The shape of Ariete goggle frames was born from experience under extreme conditions. Ariete technicians have focused on the ergonomics of the frame to ensure that it perfectly fits the rider's face.

### **HIGH TECHNOLOGY**

**UK** Ariete goggle frames and ancillary components are made with the best technology available. The quality of the tooling ensures that the finish achieved is exemplary.

## FINE MATERIALS

**UK** The search for new materials is never-ending. Ariete has for years worked with the world's best-known petro-chemical companies. The materials used are the result of research carried out by these companies, and are the best we can find.

## SAFETY

**UK** The ARIETE lens will withstand a 6 mm. steel ball hitting it at 135 miles per hour!  
The anti-fog treatment withstands more than twice the minimum requirement of standard 168: 2001.16

## CERTIFICATIONS & MARKING

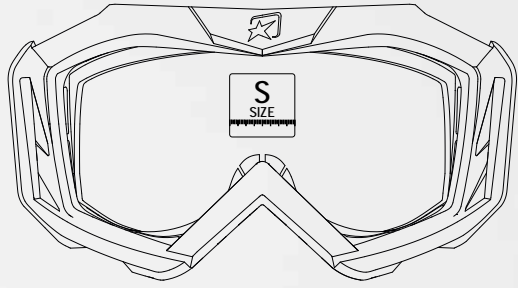

**UK** Ariete goggles and lenses are certified according to European standards EN 1938:2010; they are provided with Anti-fog treatment, which is optional under European standard EN 1938:2010; they pass the "High Mass" and "High velocity" impact tests provided for by American ANSI standard Z87.1-2003; they meet the requirements of American standard VESC-8. The label on the goggles provides the transparency categories of Ariete lenses.

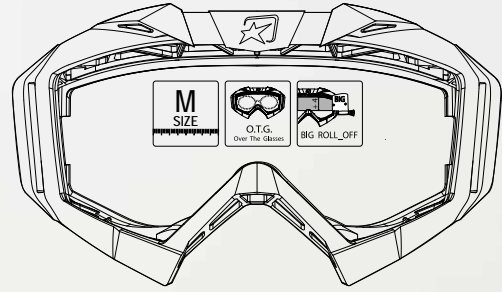

The Ariete Ventilation System uses carefully chosen areas for the intake and exhaust of cooling air. Airflow from the goggles, whose upper front profile is specially lowered to aid this process, enters the collecting vents at the front of the helmet, flows across the rider's head, and leaves the back of the helmet in a continuous process.

**UK Antistatic - Bacteriostatic - Heat regulating and moisture transfer - Natural - Reflective**

- High Performance
- Heat regulating and moisture transfer - Speeds up the evaporation process of perspiration and slows down the formation of humidity on the skin to help keep the temperature constant.
- Antistatic - Reacting to natural conductivity in nature, the fiber absorbs and disperses electric charges accumulated from the environment or during physical exercise, to prevent shock and the attraction of dust particles to the product.
- Bacteriostatic - Protects the skin from bacteria and pollutant dusts, eliminating the risk of annoying allergies.
- Natural - 100% natural, non-toxic and does not contain chemicals.
- Reflective - Protects the body from absorbing static energy, electrosmog, and UV rays.

### 1 FRAME

- Medium Fit
- Enhanced vision field on the lower lens for downhill riding
- Comfortably Fits Glasses (O.T.G.)
- Tough PUR frame for low-temperature flexibility
- Anti-UV colours
- Compatible with BIG/XL Roll-Off Kit 12962-RCRO

### 2 LENS

- Mirrored multi-layer lens cat.2
- No optical distortion
- Best anti-fog treatment
- UV radiations total protection

### 3 VENT SYSTEM

- A.V.S. Ariete Ventilation System
- Extra Ventilation
- Open filters

### 4 FOAM

- Three-layer face foam specification composed of :
  - 1st layer is technical foam with closed cells
  - 2nd layer is super-soft technical foam with open cells
  - 3rd layer of red hypo-allergenic CARBON X in contact with the skin

### 5 ELASTIC STRAP

- 45 mm height elastic strap with anti-slip silicone
- Pin to suit tear-off
- Double buckle for quick adjustment

### INCLUDED ACCESSORIES

- Lexan® clear lens, CE, anti-scratch treatment, cod.12961-RCCH equipped with clips
- Microfibre bag with internal pocket for a spare lens

# MUDMAX RACER

## 1 FRAME

- Medium Fit
- Enhanced vision field on the lower lens for downhill riding
- Comfortably Fits Glasses (O.T.G.)
- Tough PUR frame for low-temperature flexibility
- Anti-UV colours
- Compatible with BIG/XL Roll-Off Kit 12962-RCRO
- CE approved

## 2 LENS

- Mirrored smoked lens "Plus" cat. 1 cod.12961-SCPL
- Best anti-fog treatment
- No optical distortion
- UV radiations total protection

## 3 VENT SYSTEM

- A.V.S. Ariete Ventilation System
- Extra Ventilation
- Open filters

## 4 FOAM

- Three-layer face foam specification composed of:
  - 1 super-soft technical foam layer with open cells
  - 1 medium density foam layer
  - 1 hypo-allergenic foam layer in contact with the skin

## 5 ELASTIC STRAP

- 30 mm height elastic strap with 1 anti-slip silicone
- Double buckle for quick adjustment

# VULCAN GRIPS

- 1 -Pyramid shapes with a triangular base in varying height:
  - micro Pyramids in the thumb/index finger area
  - large Pyramids for extra grip in the palm area
  - contoured Pyramids in the outer palm area, for extra comfort and support through corners and turns
- 2 The principle pressure point areas of the grip are reinforced for longevity;
- 3 Chassis in semi-rigid torque-limited elastomer;
- 4 Outer flange pre-marked for piercing with a cutting guide for use with all-round hand guards;
- 5 -four grooves for steel wire give extra security

# TRINITY GRIPS

- 1 Chassis in semi-rigid torque-limited elastomer
- 2 Palm in legendary Supersoft, critical finger-grip area with half-waffle surface
- 3 Anatomically profiled cot-out on the right side for thumb and forefinger
- 4 Four grooves for steel wire give extra security
- 5 The fourth groove is situated at the extreme outer end of the grip to prevent grit from being trapped between bar and grip or bar and twist grip when used with hand guards
- 6 Outer flange pre-marked for piercing with a cutting guide for use with all-round hand guards
- 7 Pronounced inner flange with internal reinforcement, coated in extra-soft XTouch

# ARI THE ORIGINAL FORK OIL SEALS

**Ariete** fork oil-seals are the best you can get. This claim is justified by the quality of the materials used, and attention to detail in their design and manufacture. The **ARI** range has more than 170 different seal sizes. These cover more than 35,000 different motorcycle models with both traditional and upside-down forks. We have seals for classic 1960s telescopic forks extending through to the air forks now common both on- and off-road.

# ARI THE ORIGINAL FORK OIL SEALS **XNBR**

## **ARIETE FORK OIL SEALS, custom-made for your fork**

Ariete fork oil seals are different! The quality of their execution is matched by the unique nature of the material used: the carboxylated elastomer known as **XNBR**.

This compound offers unique characteristics of resistance to abrasion, to high temperatures, and to the complex lubricants with numerous additives, which are used in modern forks as fitted to motorcycles and scooters. The reciprocating action of the fork tube against the seal subjects it to a notable degree of abrasion, which is complicated by the heat generated as a result of hydraulic displacement within the fork, plus the friction of the components involved. This mechanical wear and tear leads to accelerated ageing of the rubber which is also obliged to deal with the chemical action of the various additives in the lubricant. Oil seals are normally made from a nitrile rubber, known as NBR. This is used because it is cheap, and plentiful, not because NBR is the best material for the job. Our technical staff have accumulated 70 years of experience in the rubber industry, and have spent many years looking for a better material for the manufacture of oil seals. In our view, the carboxylated elastomer known as **XNBR** has the following major advantages when compared with NBR:

Although the cost of **XNBR** is almost twice that of NBR, the sophisticated technology used to make our oil seals enables us to put them on the market at highly competitive prices. In this way, the Ariete Customer enjoys the benefits of a very high quality product, which satisfies the most demanding requirements, at a competitive price.

# ARI THE ORIGINAL FORK OIL SEALS

ARISIL special oil seal lubricant. ARI fork oil seals are made from a rubber compound specifically developed to work with the lubricants used in front forks, with all their various additives. This compound is completely different from that normally used for rotating shaft seals, since the physical environment inside a fork with its reciprocating movement, and the specialist lubricants, are completely different. We have designed ARI oil seals with a variety of lip profiles to make them longer lasting, while reducing to a minimum the friction effect against the moving shaft. Over the years, we have discovered the key role of a separating lubricant between the fork tube and the rubber of the oil seal to reduce to a minimum the surface friction, without affecting the function of the oil seal. After exhaustive testing, we have chosen a lubricant which is produced in the USA, and devised specifically as a rubber/metal lubricant for mechanical components used in the NASA space program. The advantage of this special grease, which we call ARISIL, is that it extends the life of the oil seal, and helps it retain its vital characteristics of flexibility and chemical resistance. For this reason, every set of ARI FORK OIL SEALS contains a single dose sachet of ARISIL, sufficient to lubricate the two oil seals supplied.

## TYPICAL CHARACTERISTICS

Product type:	<b>GREASE</b>
Colour:	<b>WHITE</b>
Composition:	<b>SILICONE LUBRICANT WITH ADDITIVES</b>
Temperature range	<b>-65° degrees c =&gt; +175° degrees c</b>
Coefficient of friction	<b>0.003 - load 6.3 n at 10 mm per second 24h</b>
USA military specification	<b>G-4343 C</b>

**10945** 1 gr. - 0,03527 ounces

**12950** 100 gr. - 3,527 ounces

# ARI THE ORIGINAL FORK OIL SEALS

The Split fork seal driver is a tool used for changing the fork seals on conventional and upside down forks. Available for fork seals in 35 mm thru 51 mm configurations. Manufactured from plated carbon steel, featuring split design and weighted body. Weight range from 800 to 1.000 gr. Sold individually.

# TECHNICAL ACCESSORIES

MASTER CYLINDER SEAL KITS

Brake Master-cylinders Seal Kit

**EPDM HP**  
*Special Compound*

The rubber brake seals in this kit are made in Italy by Ariete. After final grinding of the working surfaces, they are individually tested to guarantee their efficiency once fitted to the user's vehicle.

**⚠ WARNING**  
Use only DOT3 or DOT4 brake fluid

Brake calipers Seal kit

BRAKE CALIPERS SEAL KITS

**Ariete** introduces a new line of seal kits to suit brake calipers and master-cylinders for motorcycles and scooters. These are after-market replacements which fit many of the most popular models on the market.

The material used for the seals is a special compound of EPDM HP, developed by Ariete and fully compatible with the most common brake fluids (DOT3 and DOT4).

**Ask for our special catalogue covering applications for different models of motorcycles and scooters.**

# DOT3 - DOT4 FLUID PIPE

Low-pressure hydraulic pipe to fit between remote reservoir and master cylinder, suits DOT3 - DOT4
