

2018

Brad Binder

We work for the underdogs, the hard chargers, the privateers and the pioneers. The ones who know the difference between trying hard, working hard and playing hard. The ones who clear their own trails, turn their own wrenches and define their own win.

We know that a legacy must be built, not bought. Behind every broken record is a story of broken bones, bloody knuckles, busted rides and epic moments. A spot on the podium is earned with the grit to keep grinding, courage to hang it all out, and the focus to win when it counts.

Time spent in our helmets is a precious escape from the day to day. The name of the game is seizing the moment, going hard and having fun. Our job is to help protect them, to inspire them, to cultivate confidence and to get out of the way.

We work for the boundary breakers. We empower them to set records—and break them. We inspire them to lean in, to go all out and to have a good time doing it.

We dare them to LIVE WIDE OPEN.

PURPOSE-BUILT PERFORMANCE

THE STAR SERIES.

GAME CHANGED. AGAIN.

Since its introduction back in 1967, the Bell Star has long represented the standard in head protection. Revered as the first full-face helmet on the market, the Bell Star inspired an industry to pursue the science of head protection. That obsession with helmet innovation continues today.

The Bell Star is more than an evolution of its predecessor. It's a complete rethinking of what a race helmet should be, driven by the essential needs of the modern racer.

WARNING: Motorcycling is a dangerous sport which may result in serious injury or even death. For proper use of your helmet, please refer to the owner's manual.

UNDER THE HOOD

THE STAR. RE-IMAGINED PERFORMANCE FROM START TO FINISH.

The latest carbon fiber technology allows us to provide the lightest and strongest shells we've ever produced

Our patented Flex™ impact liner offers best-in-class energy management

The Panovision™ viewport's dropped corner offers outstanding visibility to lateral field of view

REINVENTED FIELD OF VIEW

The Star offers an entirely new viewport creating better vertical and lateral field of view and even greater head-check visibility

FIELD TESTED AND DEVELOPED

Working with professional riders on the track is the best way to understand the challenge and generate solutions quickly

OPTIMIZED AERODYNAMICS

Using our state-of-the-art wind tunnel, we fine-tuned the Star's aerodynamics with advanced riding simulations

MORE SIZES. MORE PERFORMANCE.

Offering 6 EPS and 6 shell sizes allows a more proportional fit and improved performance, especially at high speeds

BROADEN YOUR HORIZON

PANOVISION™ VIEWPORT INCREASES FIELD OF VIEW

No matter what or how you ride, one factor remains constant: the need for maximum visibility. Whether racing or going on a simple ride in the mountains, the ability to make safe headchecks and see obstacles clearly is critical.

The Panovision viewport in the Star offers riders additional vertical and lateral visibility over the previous Star and more traditional viewports. This allows the rider to see better in a tight or tucked position and make safer lane changes and head-checks.

VERTICAL INCREASE IN FIELD OF VIEW

--- TRADITIONAL FIELD OF VIEW
- - - STAR FIELD OF VIEW

LATERAL INCREASE IN FIELD OF VIEW

PURPOSE BUILT: RACEVIEW VS STREETVIEW

The Star features two unique profile shapes for two distinctly different types of riding. The Raceview profile used on the Pro Star and Race Star uses an orientation specifically optimized for a tucked, more compact position. Conversely, the Streetview profile used for the Star is designed for a more upright, sport or touring position.

RACEVIEW

Requires a higher brow line and chin.

STREETVIEW

Features a dropped brow and different collar profile.

PICK THE RIGHT HELMET FOR YOUR RIDING

The Raceview profile is for a rider that enjoys a tight position and pushing their skills. The Streetview profile is designed for a less aggressive rider.

PROSTAR RACEVIEW

RACESTAR RACEVIEW

STAR STREETVIEW

ProFIT

PURPOSE-BUILT SIZING FOR HIGH-SPEED RACING.

6 SHELLS. UNLIMITED PERFORMANCE.

By offering 6 shell sizes instead of the traditional 2-3, and 6 impact liner sizes, we enable riders to experience the performance of a near-custom fit. *However you ride, fit matters.*

1 EXTRA SMALL	2 SMALL	3 MEDIUM	4 LARGE	5 EXTRA LARGE	6 XXL
53-54 CM	55-56 CM	57-58 CM	59-60 CM	61-62 CM	63-64 CM

PLUS, 6 IMPACT LINER SIZES

We engineered 6 unique impact liners, based on the headforms of each major size, to provide a pro-level fit and helmet.

FOR COMPARISON'S SAKE

The Traditional 2 OR 3-SHELL FIT SYSTEM

While it works for many applications, this more typical offering requires additional padding to compensate for the shell sizing variance.

XS 53-54 CM
S 55-56 CM

MD 57-58 CM
L 59-60 CM

XL 61-62 CM
XXL 63-64 CM

The All New BELL ProFIT SYSTEM

The ProFIT system's 6 shells ensure that riders experience a more proportional fit that's optimized for weight, size, and stability.

XS: 53-54 CM

S: 55-56 CM

M: 57-58 CM

L: 59-60 CM

XL: 61-62 CM

XXL: 63-64 CM

SMALLER. FASTER. PERIOD.

A MORE COMPACT, PROPORTIONATE FIT EQUATES TO A LIGHTER AND FASTER HELMET.

SMALLER PROFILE

This allows riders to achieve a tighter, tucked position with improved aerodynamics.

LESS NOISE

A better fitting helmet will quiet wind noise and reduce buffeting.

BETTER STABILITY

Without the added size and material, it's steady on the head and reduces fatigue.

*"IT JUST DISAPPEARED ON MY HEAD."
Cameron Beaubier in the Star*

Q & A

Q: I've always worn a medium. According to this, I'm now a large. Can you please explain how this is smaller?

A: That's because you've always based your size on a 3 shell system. The Star Series uses the ProFIT's 6 shell system which has a unique liner for every major size. Overall, the profile will be more proportionate.

Q: When i put the helmet on, it seemed tight. Is that normal?

A: Yes. The performance fit of a ProFIT helmet will be light and snug as it's optimized for size, weight and stability.

LEARN MORE ABOUT THE NEW ProFIT SYSTEM AT BELLHELMETS.COM/STAR-SERIES

PRO STAR

ONE OF THE MOST ADVANCED RACE HELMETS ON THE MARKET, PACKED WITH CUTTING EDGE TECHNOLOGY TO EARN THE TOP SPOT ON THE PODIUM.

THE FEATURES

FLEX IMPACT LINER

A first-of-its kind, three-layer impact liner designed to manage energy from three potential impact scenarios: low, mid and high-speed

TeXTREME® CARBON SHELL

Using TeXtreme® ultra-thin carbon fiber weave, we engineered one of our lightest and strongest shells ever

VIRUS® COOL JADE POWER MESH LINER

Designed to withstand the rigors of hard use in extreme conditions, the Virus liner allows athletes to stay cool, keep comfortable and beat the funk

MAGNEFUSION™ MAGNETIC CHEEK PADS

Allows for easy removal of the pads for washing and enables emergency responders to easily remove the cheekpads first before removing the helmet following an impact

PRO STAR
FLEX

TeXtreme® CARBON FIBER

THE NEXT GENERATION OF SHELL INNOVATION

This ultralight and incredibly strong carbon fiber technology is currently used in today's most advanced Formula 1 cars and racing boats and now, in the Pro Star. It's 20% lighter than conventional carbon fiber and reduces weight without sacrificing strength or stiffness.

TeXtreme®'s Patented Formula

Straighter fibers with reduced crimp optimize and strengthen the composite

The Spread tow structure makes it possible to achieve thinner laminates

Lower crimp reduces the amount of excess plastic, thereby minimizing weight

THE PROGRESSIVE PROTECTION OF THE FLEX IMPACT LINER

The Pro Star and Race Star feature our revolutionary Flex impact liner. Designed to manage energy from impacts big and small, the Flex liner uses 3 unique materials at different densities to manage low, mid and high energy impacts. Using expanded polyolefin (EPO), a soft and flexible low-density polymer for low-speed impacts, with EPP and EPS layers for mid to high-speed impacts, we have a progressive impact liner that works incredibly well to manage impacts across the spectrum of crash types.

EPS
Expanded Polystyrene

EPO

RACE STAR

THE RACER WITH A DAY JOB, THE RACE STAR PROVIDES THE SAME LEVEL OF RIDER PROTECTION IN A MORE AFFORDABLE PACKAGE.

THE FEATURES

FLEX IMPACT LINER

A first-of-its kind, three-layer impact liner designed to manage energy from three potential impact scenarios: low, mid and high-speed

VIRUS® COOL JADE POWER MESH LINER

Designed to withstand the rigors of hard use in extreme conditions, the Virus liner allows athletes to stay cool, keep comfortable and beat the funk

3K CARBON SHELL

The proven 3K carbon fiber on the Race Star gives this helmet the look, performance, and feel of a true race helmet

MAGNEFUSION™ MAGNETIC CHEEK PADS

Allows for easy removal of the pads for washing and enables emergency responders to easily remove the cheekpads first before removing the helmet following an impact.

RACE STAR
FLEX

VIRUS® COOL JADE POWER MESH LINER

TECHNICAL FABRICS DESIGNED FOR ACTION SPORTS

Pro Star and Race Star feature the most technically advanced liner on the market. CoolJade fabric from Virus has been infused with recycled jade to create a natural cooling effect. The ultra-wicking construction combined with CoolJade infused yarn decreases your skin surface temperature up to 10° F – keeping you comfortable, dry and cool.

PROGRESSIVE LAYERING *

Pro Star and Race Star feature the Flex impact liner, designed to perform across a range of crash scenarios. It does this by using three different materials at three different densities. As the impact becomes greater, higher density layers are engaged to manage energy.

* Patent pending

STAR NOW WITH MIPS

BUILT FROM THE PRO STAR PEDIGREE, THE STAR DELIVERS PERFORMANCE AT A PRICE POINT THE EVERYDAY RIDER CAN APPRECIATE.

THE FEATURES

TRI-MATRIX COMPOSITE SHELL

A proprietary mix of Aramid, carbon fiber, and fiberglass delivers all the strength of carbon fiber in a more budget-protecting package

X-STATIC® XT2 SILVER LINER

A leader in antimicrobial fabric technology, X-Static material is clinically-proven to provide bacteria and odor protection throughout the life of the liner

EYEWEAR COMPATIBLE

Using prescription glasses or a preferred pair of shades is now possible with eyewear arm pockets woven right into the interior liner

MIPS® MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

MIPS® is a leading slip-plane technology inside the helmet designed to reduce rotational forces that can result from certain impacts

STAR

THE POWER OF SILVER

X-STATIC DELIVERS PERFORMANCE WITHOUT FUNK

X-Static fibers are permanently bonded with a layer of 99.9% pure metallic silver. This silver layer is the key to X-Static's powerful antimicrobial properties, as it creates an ionic shield that permanently inhibits the growth of bacteria and fungi.

Fabrics made with X-Static fibers are flexible, with the natural look and feel of traditional textiles, while offering all the benefits of pure silver.

A CLOSER LOOK AT THE TRI-MATRIX COMPOSITE SHELL

Woven synthetic fibers have long been proven to be some of the most practical solutions where lightweight strength is required. Our Tri-Matrix shell utilizes the combined power and superior characteristics of these race-proven synthetics, offering unmatched strength and durability.

COMPREHENSIVE PROTECTION WITH MIPS

MIPS SLIP PLANE

This low-friction slip plane is designed to reduce rotational force during certain impacts by allowing movement in all directions.

ELASTOMETRIC RETENTION

Four elastomeric bands interact with the slip plane to ensure the slip plane is in correct position before an impact.

HOW DOES IT WORK?

There are three main components to a MIPS-equipped helmet:

In an impact, the foam liner dissipates force. Additionally, the elastomeric attachment system stretches to allow the foam liner to rotate independently around the low-friction liner and your head.

Although the MIPS system only rotates a few millimeters, that movement may reduce the amount of rotational force that could be transferred to your brain.

WHAT IS MIPS?

MIPS is a leading slip plane technology inside the helmet designed to reduce rotational forces that can result from certain impacts.

WHY IS IT IMPORTANT?

We believe that helmets equipped with MIPS technology can provide an additional measure of protection in certain impacts.

CLICKRELEASE SHIELDS

CLICK RELEASE SHIELDS

Bell Transitions™ Adaptive Shield

Bell and photochromic pioneers Transitions Optical have come together to create the Transitions® ClickRelease shield which automatically adapts to light conditions, darkening when exposed to sunlight and clearing in low light. (Compatible with Bell ClickRelease helmets only.)

FEATURES

- Shield tints automatically and quickly adapts to lighting conditions
- Shield is clear at night and in low light and tints darker as light brightness increases
- Darkens from fully clear to dark tint in about 10 seconds in bright sunlight
- Bell NutraFog II™ anti-fog coating reduces fogging
- Anti-scratch and UV-protected coatings block 100% percent of UV rays
- Compatible with the RS-2, Qualifier and Qualifier DLX

MX/OFF-ROAD

Eli Tomac

MOTO-9 FLEX.

SETTING THE STANDARD FOR RIDER PROTECTION

FLEX 

THE CORE TECHNOLOGIES

PROGRESSIVE LAYERING

A first-of-its kind, three-layer impact liner designed to manage energy from three potential impact scenarios: low, mid and high-speed.

ADAPTIVE FIT

Segmented construction, automatically conforming to a rider's head for a better fit and more predictable energy management.

ROTATIONAL ENERGY MANAGEMENT

A "slip zone" within the impact liner allows for subtle movement between the inner layers and works to reduce rotational energy transfer from angular impacts.

VENTILATION

With the new segmented and flexible liner in the Moto-9 Flex, we were able to add to the proven Velocity Flow Ventilation system to make an even cooler helmet.

HOW IT ALL WORKS

EPO: THE SOFTER SIDE OF HEAD PROTECTION

Designing a progressive, layered impact liner requires a special material for managing low speed impacts. Working with the Advanced Concepts Group at BRG Sports, we discovered Expanded Polyolefin or "EPO". Unlike EPP or EPS, EPO is a soft and flexible low-density polymer that, when placed between the EPP and EPS layers, works incredibly well to dampen low-threshold impacts. By combining these 3 unique materials at varying densities, we've created an energy management system that excels in low, mid, and high-speed impacts.

EPO
Expanded Polyolefin

EPP
Expanded Polypropylene

EPS
Expanded Polystyrene

PREPARING RIDERS FOR THE REAL WORLD

In motocross and off-road racing, the types of terrain and the risks involved are many. Riders today need a helmet that delivers pro-level protection across the board, at any speed. The progressive layering in the Moto-9 Flex uses a specific material at a particular density to manage the force of the impact. And as the impact becomes greater, higher density layers are engaged to manage energy.

PROGRESSIVE LAYERING BREAKDOWN

EXPERIENCE IS THE DIFFERENCE

When you've been around as long as Bell, it's safe to say you've done a couple of things right. To evolve the Moto-9's fit, we drew inspiration from Bell Bike's segmented liner to create an all new, moto-ready, flexible liner that adapts to different head proportions. The result is a better fitting, more ventilated helmet.

Whether you're hitting the trails in a convoy, or taking to the hot desert for an epic journey with the family, Bell's feature-packed side-by-side helmets, the Qualifier and Qualifier DLX Forced Air, deliver. Our premium dust skirt will ensure you keep the annoying dust out, while the forced air inlet will keep you cool and breathing fresh, clean air all day. Ride or Race, enjoy yourself in style and experience a whole new way to adventure.

QUALIFIER DLX FEATURES

- Large forced air top vent feature allows you to hook up with all popular fresh air systems
- Premium dust skirt allows you to seal bottom of helmet to keep annoying dust out
- Lightweight Polycarbonate/ABS Shell Construction
- Transitions® Adaptive ClickRelease™ Shield Included
- Transitions® Anti fog and UV protection
- Integrated communication port accommodates Sena and Cardo Bluetooth® stereo headset and intercom systems.
- Removable/washable anti-bacterial interior
- Velocity Flow Ventilation™ system with FlowAdjust™
- Padded Wind Collar drastically reduces wind and road noise
- Contoured cheek pads
- Integrated speaker pockets
- Padded chin strap with D-ring closure
- Industry-leading Five-year warranty

FEATURES

- Lightweight polycarbonate/ABS shell
- 3 EPS sizes for maximum comfort and size range
- Velocity Flow Ventilation™ creates the most ventilated helmet in the open face category
- Accommodates the Bell-specific Sena SMH10 Bluetooth® and Cardo Scala Rider Q1/Q3 stereo headset and intercom
- If you already have a Sena SMH10 unit, a Bell-specific clamp and boom will be necessary to install
- If you already have a Cardo Scala Rider Q1/Q3 unit, a Bell-specific adapter will be necessary to install
- Helmet can be run in multiple configurations: with or without shield and with or without visor
- Fast and easy tool-free shield changes
- Drop-down sunshield offers "on the fly" protection from the sun
- Removable and washable interior for maximum comfort
- Contour cheekpads for superior fit and comfort
- Convenient speaker pockets make it easy to set up the Mag-9
- Industry-leading Five-year warranty

SENA

cardo

Qualifier DLX & Mag-9 feature intergrated Bluetooth ports for specific SENNA & Cardo models. An adapter is required.

SENA SMH10 CLAMP AND BOOM MIC

7021592

CARDO SCALA RIDER Q1/Q3 ADAPTER

7064393

BOOM vs. WIRE Mic

"Wire" Mic may only be used with full face helmets with chinbars. "Boom" Mic will work on flip-up & open face helmets, as well as full face.

**WIRING w/neck curtain

VORTEX, RS-1 & RS-2 have neck curtain padding that will require wiring to go over padding, not under.

*SPEAKER RECESS

NOTE: Most BELL street helmets have built in speaker recess. This ensures riders comfort will not be comprosied when speakers are added * ARROW does not have speaker recess

CHEEK PAD SPEAKER POCKET

NOTE: Most BELL Helmets have built in speaker pockets. (Some older models not have this feature)

*WIRING w/ Mag-9

MAG-9 has a bottom rubber gasket that will require the clamp to go over the gasket.
