Transmission Gaskets

Why trust your expensive transmission to some flimsy paper gasket? Keep your transmission fluid and gear lube where it belongs with our Aluminum Foamet Material (AFM) Gaskets. AFM consists of an aluminum core and features a foam rubber coating bonded to both sides. Ideal for sealing less than perfect surfaces and can be installed without the use of additional sealers!

Valve Cover Gaskets & Sets

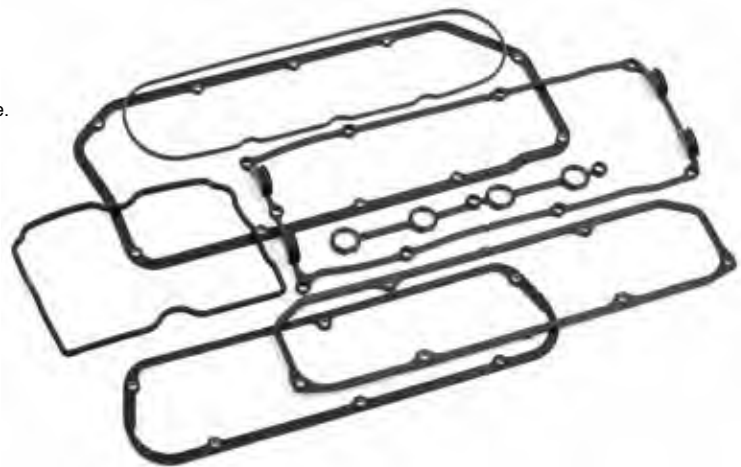

Race inspired designs and materials ensure that these valve cover gaskets will perform well above the OE standard. Cosmetic valve cover gaskets surpass the quality and ability of typical cork or paper gaskets offered by other manufactures. Withstands blowing out, over tightening, and high vacuum all at an affordable price.

TABLE OF CONTENTS

MLS Gaskets are comprised of multiple embossed layers of both AMP (Advanced Multi-Polymer Coating) and uncoated stainless steel. The embossed outer layers of the gaskets meet the demands of a variety of harsh sealing environments, load conditions and surface finishes.

This design requires less clamp load creating less bore distortion and conforms load distribution across the sealing area. The center or shim layer is an uncoated stainless steel layer which can be varied to accommodate multiple thickness requirements. No sealants or re-torque required.

Product Development

Cometic provides our customers with quality products, born of exhaustive research and development. Cometic's new Superflow 902S dynamometer positions us at the forefront of gasket design and technology. Our state-of-the-art testing facilities and processes provide Cometic with the resources necessary to analyze gasket designs and materials in the most extreme conditions, ensuring that your gasket won't fail when you need it the most.

Gasket contact pressure is validated by Fuji film at our in-house research and development center.
