AN EPI CLUTCH KIT FOR EVERY STYLE OF RIDING!

For over 25 years The Clutch Guys at EPI have been developing performance enhancing Clutch Kits for both racers and enthusiasts alike. Our kits are developed in real-world riding environments, resulting in truly "dialed-in" kits that are ready to bolt in and perform. They come with detailed instructions for easy installation, and The Clutch Guys are always here to answer your call if you need some guidance.

Sport Utility Kit

- Our best all around use kit
- If you do a little bit of everything with your machine this is the kit for you
- Great for trail riding, occasional mud and sand riding, plowing and hauling
- Makes up for the power loss and slow response of adding oversized tires
- Better low end and midrange acceleration
- Quicker backshift which results in crisp throttle response
- Reduces belt slip and clutch heat
- Kits designed for stock or oversized tires

Mudder Kit

- Designed for machines with 28" or larger tires
- Helps restore power loss due to addition of larger tires
- Allows for easier turning of larger tires in the mud
- Better low end power and torque
- Quicker backshift which results in crisp throttle response
- Reduces belt slip and clutch heat

Sand Dune Kit

- Designed and tested specifically for sand dune applications
- Different kits for stock and paddle tires
- Helps hold peak power RPM when dune riding and climbing hills
- Helps restore power loss due to addition of paddle tires
- Better low end power and torque
- Quicker backshift which results in crisp throttle response
- Reduces belt slip and clutch heat

Rock Crawler

- Designed and tested specifically for rock crawling applications
- Calibrated to provide a low engagement rpm to support technical maneuvers
- Added belt squeeze to eliminate belt slip
- Slow shifting phase that provides a smooth rock crawling/technical driving experience
- For low-mid range speeds only, not for high speed riding

Competition Stall

- Works with any tire size
- Raises the engagement/stall of the clutches for a hard-hitting competition style launch
- Great for mud racing, competition pulls, drag racing, or aggressive trail riding
- Harder hole shot for off-the-line advantage
- Doesn't effect top RPM or speed

Economy Kit

- For general trail riding
- Spring kit only, no clutch weights are included
- Works with any tire size
- Improves belt grip and backshift

EPI VALUE LINE PRIMARY CLUTCHES

Tested and validated by The Clutch Guys, these Value Line replacement clutches are a cost effective bolt on replacement for your worn out Polaris primary clutch.

We tested these clutches on our own machines for performance and durability and found them to be a solid replacement option at a great price. These clutches come without the spring or weights (just like the OE clutches), you can reuse your existing components or purchase new ones from EPI.

POLARIS OEM PRIMARY CLUTCHES

- Replace your worn or damaged Polaris Primary clutch with a new stock unit
- Clutches DO NOT come with weights and spring. Purchase an EPI Clutch Kit and The Clutch Guys will pre-install the components
- Prices subject to change

The Original EPI Severe Duty Belt

CVT belts and clutching go hand in hand. No other belt can compete with the Original EPI Severe Duty Belt. It's designed to withstand the high heat and stress that today's high-horsepower machines dish out. EPI is world-famous when it comes to tuning CVT systems so trust the experts.

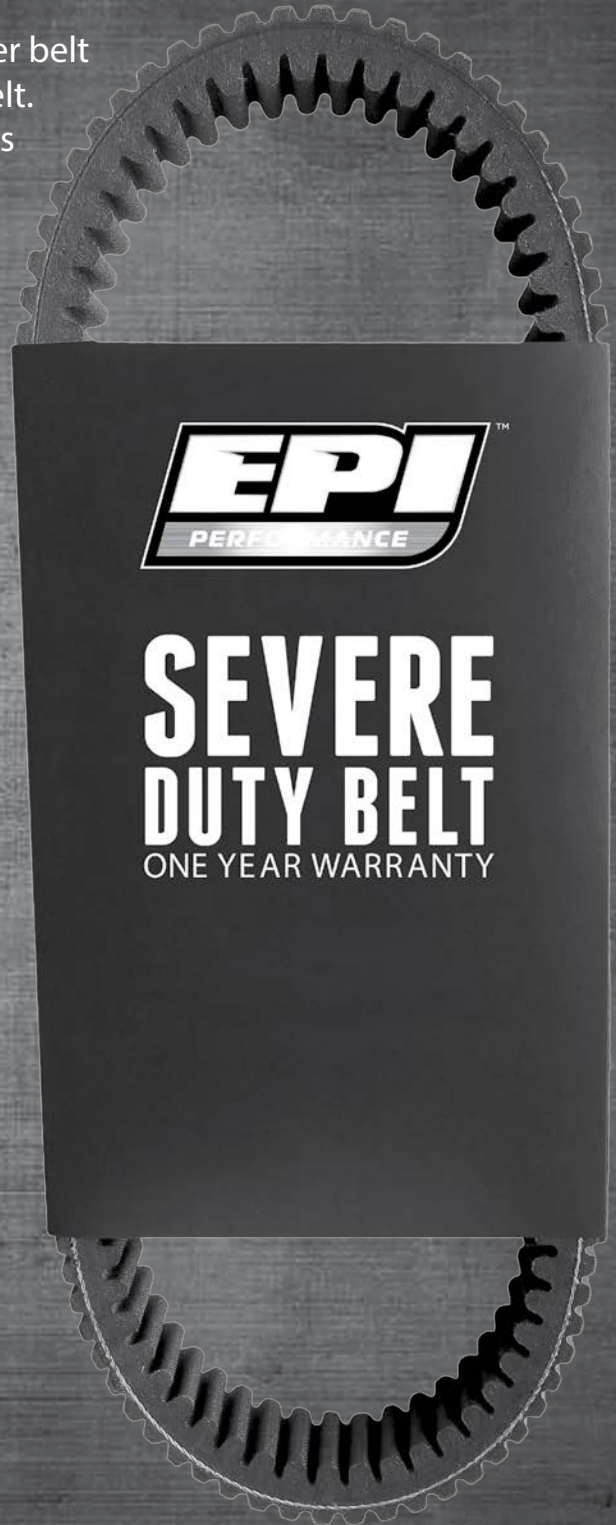

Super Duty Belt

- Designed as a durable stock replacement belt for powerful off-road machines
- Higher tensile strength and heat rating than stock belts
- Close tolerance construction to ensure proper fit, efficiency and durability

Standard Duty Belt

- Great value replacement belt for moderate power and usage
- Comparable to stock belt specifications
- Close tolerance construction to ensure proper fit, efficiency and durability

CLUTCH WEIGHTS

EPI Performance Clutch Weights have been the choice of Racers and Tuners for over 25 years. All of our flyweights are CNC machined from 4140 Billet Steel, then heat treated and nickel plated for extended wear. Each style of flyweight is tested with several different designs before arriving at the optimum profile that provides a smooth engagement and an aggressive shift-out of the clutches. When you're looking for clutch weights that are designed for maximum performance, call The Clutch Guys at EPI Performance!

ARCTIC CAT / TEXTRON

BELLY BUSTER WEIGHTS

- Aggressive shift design
- Produces stronger low and mid-range pull and dynamic upshift
- Made from billet tool steel, heat treated and plated for extended life
- Bushing included

CAN-AM PRIMARY CLUTCH REBUILD KITS

- Restore your primary clutch to like-new efficiency
- Primary Rebuild Kit includes: 12 buttons, 6 rollers, 6 roller pins and 12 washers
- Primary Button Kit includes: 12 buttons
- Primary Roller Kit includes: 6 rollers, 6 roller pins and 12 roller washers

The rollers in this kit were designed by The Clutch Guys to replace the stock composite rollers. They are CNC machined and hardened for a long service life. They can also be used to replace earlier model Can Am metal rollers.

PRO SERIES EXTREME SECONDARY CLUTCH ROLLERS

- WE213226 includes 2 rollers for the QRS clutch
- WE213227 includes 3 rollers for the QRS-X clutch
- Replaces OE 420629211 and 417127016

- Made with Fibermaxx, which is a proprietary EPI material that uses the latest technology to combine a self lubricating polymer with wear resistant fibers
- While developing this new material we found that it greatly outlasted the competitors rollers before showing any signs of wear during a 25,000 cycle load test
- Provides superior wear and heat resistance
- Allows the clutch to upshift and backshift more efficiently with less binding and reduced clutchwear.

*Due to the wide range of wear issues occurring with RZR 900 & 1000 model primary clutches, these rebuild components may provide varied results. We've seen extremely worn clutch towers and out of spec tolerances on RZR primary clutches of all mileages. Rebuilding a clutch that is beyond acceptable tolerance will result in premature failure of these rebuild kit components. Due to this, no warranty on these rebuild kits is provided.

**Will replace the square slider on the outside of the clutch and the round roller on the inside of the clutch.

*** Will also work on the OE Polaris updated spider part #1323400

PRO SERIES EXTREME SECONDARY CLUTCH ROLLERS

- Designed to replace your stock square sliders on 2016 and newer Polaris secondary clutches
- Replaces the square sliders on the outside of the clutch (OE 3514926) AND the internal round roller (OE 3514929)
- Sold in pairs

- Made with Fibermaxx, which is a proprietary EPI material that uses the latest technology to combine a self lubricating polymer with wear resistant fibers
- While developing this new material we found that it greatly outlasted the competitors rollers before showing any signs of wear during a 25,000 cycle load test
- Provides superior wear and heat resistance without damaging your clutch like the OEM sliders
- Allows the clutch to upshift and backshift more efficiently with less binding and reduced clutch wear.

PRIMARY CLUTCH VESPEL WASHERS - 7556335

- These genuine Polaris washers are located on both sides of the primary clutch needle bearing and should be replaced whenever you replace the needle bearing.
- 2 required

Polaris Part #
7556335

PRIMARY CLUTCH NEEDLE BEARING - 3514609

Fits many Sportsman, Ranger, and RZR models without EBS (Engine Braking System). Over time, dirt and debris can get in this bearing causing it to drag and eventually seize up.

The symptoms of a dragging clutch bearing include:

- Difficulty shifting between gears
- Creeping at idle
- Squealing belt at idle
- Worn flat spots on inner belt cogs

Whenever you rebuild your primary clutch with new rollers, bushings and buttons it's a great idea to replace this inexpensive bearing also.

CV JOINT KITS

EPI™ replacement CV Joints are designed as a high quality, heavy duty joint that will meet or exceed the original manufacturers joint performance specifications. Our CV Joint kits include a custom heavy duty boot, grease and clamps. We back them with a 1 year warranty, so feel good about saving some money compared to buying an OEM CV Joint!

- Meet or exceed OEM specs & performance
- Includes boot, grease and clamps

LT = Left Side
 RT = Right Side
 HDS = Visco Lok System
 BTB = Stamped BTB on outboard housing
 USA = Stamped USA on Outboard housing

WHEEL BEARING KITS

- All the bearings and seals required to refit a wheel in one convenient package.
- Premium high-speed bearings feature low drag, double lip seals on both sides to provide superior exclusion of water and dirt and improve grease retention.
- High performance grease features special rust inhibitors for the most demanding applications.
- Wheel seals specifically designed to keep out water and dirt. The rubber coated outside diameter creates an optimum seal at the hub.
- Complete line of wheel bearings and seals with excellent inventory to ship your order fast.

HUB/STRUT BEARINGS & SEALS

- EPI™ Quality replacement bearings
- Manufactured as direct OE replacements
- Sold each, front or rear
- 2 required per vehicle

Note: On some applications you will notice a note in the front wheel bearing kit "see front strut". This is because the front wheel bearing is located in the front strut and there is no bearing set in the wheel.

BALL JOINTS

• Sloppy Ball Joints are an early indication of bad times ahead. Check your ball joints periodically for excessive play and replace them proactively. Lift your front end, grab the top and bottom of the front wheel and check for movement in the ball joints.

• EPI Ball joints are designed for free and clear articulation throughout the range of steering and suspension travel while withstanding the highest impact loads. And they come with all the small parts like cotter pins, snap rings, etc. And as always, you get our 1 year warranty!

KING PIN KITS

- Components vary by model
- Includes all the spacers, pins and bushings required to replace worn components
- 2 required per vehicle

Kick some serious snow with an EPI Clutch Kit!

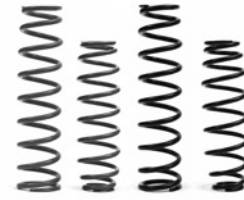

Make your sled feel new again

Whether you want to breathe new life into that low mileage XLT or ZR you've had for years or you want to give your new Rush or MX-Z the winning edge, EPI has snowmobile clutch kits available for most models built in the last 15 years. An EPI clutch kit is the best performance value for your dollar. - We guarantee it!

SUSPENSION SPRINGS

- Heavy duty springs are 25% heavier than stock
- Ideal for use with accessories that add weight, such as plows, winches, cabs, trailers, etc.
- High quality chrome silicon
- Available in black or red
- Sold each

LIFT KITS

An EPI Lift Kit will safely enable you to increase ground clearance and provide the necessary clearance to frame and body components if you've added larger tires to your machine. Designed by a team of riders who really know what lifted machines and big tires are all about, our Lift Kits will give you an additional 2-3" of clearance.

Kit components vary by model.

- * If running factory wheels with this lift kit 1.5" Front and Rear wheel spacers are required – part # EPIWS012 (2 required)
- ** This lift will not work on stock rear axles. High Lifter Pro Series axles or Gorilla axles are required for 2011-15 models.
- *** If running factory wheels with this lift kit 1.5" Front and Rear wheel spacers are required – part # EPIWS012 (2 required). This lift will not work on stock rear axles. High Lifter Pro Series axles or Gorilla axles are required for 2011-14 models.
- **** If running factory steel wheels with this lift kit 1.5" Front and Rear wheel spacers are required – part # EPIWS022 (2 required)
- ¹ This lift will not work on stock rear axles. High Lifter Pro Series axles or Gorilla axles are required for 2011-15 models. Depending on factory wheel option, wheel spacer may be required.
- ² If Running factory wheels with this lift kit 1.5" wheel spacer are required.
- ³ Does not work on DYNAMIX models due to the length of the factory shock. Starting with the 2018 Turbo Fox Edition, the customer will need to swap the rear shocks form left to right. The reservoir is mounted on the body for the Fox Edition models, causing interference from the reservoir to CVT pipe on the turbo. Starting with the 2018 Turbos equipped with Walker Evans Shocks, for the rear shocks, the customer will need to rotate the reservoir around to get clearance from the CVT pipe.
- ⁴ Will not work with stock axles with build date 8/26/16 and newer

How to Measure Bolt Pattern

For a 4-LUG Wheel:
 Measure from the middle of two studs or holes directly across from one another.

Example:
 4/110 bolt pattern will measure 110mm as shown on left

STANDARD BRAKE PADS

- OE replacement quality
- Sold per caliper

HEAVY DUTY BRAKE PADS

- Heavy duty sintered metal pads
- Increased density for longer life
- Recommended for mud, sand and utility use
- Sold per caliper

EXTREME BRAKE PADS

- Our highest quality brake pad
- Longest lasting, sintered metal pads available
- Designed for prolonged use in extreme conditions such as mud, sand dunes and water
- Provides more braking power for bigger tires
- Sold per caliper

ATV's & UTV's tend to get driven through some nasty stuff that increases the wear on your brake pads & rotors, so be safe and check them periodically. EPI™ offers a complete line of brake pads, shoes and replacement rotors.

ATV's & UTV's tend to get driven through some nasty stuff that increases the wear on your brake pads & rotors, so be safe and check them periodically. EPI™ offers a complete line of brake pads, shoes and replacement rotors.

THE ORIGINAL EPI™ SEVERE DUTY BELT

CVT belts and clutching go hand in hand. No other belt can compete with the Original EPI Severe Duty Belt. It's designed to withstand the high heat and stress that today's high-horsepower machines dish out. EPI is world-famous when it comes to tuning CVT systems so trust the experts. We wouldn't back our belts with a 1 year warranty if we didn't know they were the best!

SEVERE DUTY BELT

- Maximum Aramid Fiber loading for incredible tensile strength. Aramid Fiber provides massive strength while still allowing the flexibility needed for efficient CVT operation.
- Special adhesive compounds result in high heat tolerance. The adhesive compound used in our belt will withstand much higher temperatures than normally encountered.
- Aggressive top cog design provides cross-sectional strength for aggressive clutch calibrations and allows the belt to accommodate tight radius turns with reduced friction.

SUPER DUTY BELT

- Designed as a stock replacement belt on larger displacement machines
- Higher tensile strength and heat rating than stock belts
- Close tolerance construction for consistent sizing
