They come with detailed instructions for easy installation, and The Clutch Guys are always here to answer your call if you need some guidance.

Sport Utility Kit

- Our best all around use kit
- If you do a little bit of everything with your machine this is the kit for you
- Great for trail riding, occasional mud and sand riding, plowing and hauling
- Makes up for the power loss and slow response of adding oversized tires
- Better low end and midrange acceleration
- Quicker backshift which results in crisp throttle response
- Reduces belt slip and clutch heat
- Kits designed for stock or oversized tires

Mudder Kit

- Designed for machines with 28" or larger tires
- Helps restore power loss due to addition of larger tires
- Allows for easier turning of larger tires in the mud
- Better low end power and torque
- Quicker backshift which results in crisp throttle response
- Reduces belt slip and clutch heat

Sand Dune Kit

- Designed and tested specifically for sand dune applications
- Different kits for stock and paddle tires
- Helps hold peak power RPM when dune riding and climbing hills
- Helps restore power loss due to addition of paddle tires
- Better low end power and torque
- Quicker backshift which results in crisp throttle response
- Reduces belt slip and clutch heat

Competition Stall

- Works with any tire size
- Raises the engagement/stall of the clutches for a hard-hitting competition style launch
- Great for mud racing, competition pulls, drag racing, or aggressive trail riding
- Harder hole shot for off-the-line advantage
- Doesn't effect top RPM or speed

Economy Kit

- For general trail riding
- Spring kit only, no clutch weights are included
- Works with any tire size
- Improves belt grip and backshift

- Higher tensile strength and heat rating than stock belts
- Close tolerance construction to ensure proper fit, efficiency and durability

Standard Duty Belt

- Great value replacement belt for moderate power and usage
- Comparable to stock belt specifications
- Close tolerance construction to ensure proper fit, efficiency and durability

CLUTCH WEIGHTS

EPI Performance Clutch Weights have been the choice of Racers and Tuners for over 25 years. All of our flyweights are CNC machined from 4140 Billet Steel, then heat treated and nickel plated for extended wear. Each style of flyweight is tested with several different designs before arriving at the optimum profile that provides a smooth engagement and an aggressive shift-out of the clutches. When you're looking for clutch weights that are designed for maximum performance, call The Clutch Guys at EPI Performance!

*Due to the wide range of wear issues occurring with RZR 900 & 1000 model primary clutches, these rebuild components may provide varied results. We've seen extremely worn clutch towers and out of spec tolerances on RZR primary clutches of all mileages. Rebuilding a clutch that is beyond acceptable tolerance will result in premature failure of these rebuild kit components. Due to this, no warranty on these rebuild kits is provided.

PRIMARY CLUTCH VESPEL WASHERS - 7556335

These genuine Polaris washers are located on both sides of the primary clutch needle bearing and should be replaced whenever you replace the needle bearing. 2 required

PRIMARY CLUTCH NEEDLE BEARING - 3514609

This genuine Polaris part fits many Sportsman, Ranger, and RZR models without EBS (Engine Braking System). Over time, dirt and debris can get in this bearing causing it to drag and eventually seize up.

The symptoms of a dragging clutch bearing include:

- Difficulty shifting between gears
- Creeping at idle
- Squealing belt at idle
- Worn flat spots on inner belt cogs

Whenever you rebuild your primary clutch with new rollers, bushings and buttons it's a great idea to replace this inexpensive bearing also.

CV BOOTS - HEAVY DUTY

EPI is one of the industries largest suppliers of replacement CV Boots! Our CV Boots are designed as custom-fit OE replacements. They are guaranteed to fit properly and are made of high-strength, flexible Polychloroprene that withstands heat, cold and all the abusive hazards we encounter out on the trail. Our kits include the grease and clamps, but we highly recommend our BDT80 Clamping Tool (on page 126). You'll love it and your friends will want to borrow it!

BALL JOINTS

- Sloppy Ball Joints are an early indication of bad times ahead. Check your ball joints periodically for excessive play and replace them proactively. Lift your front end, grab the top and bottom of the front wheel and check for movement in the ball joints.
- EPI Ball joints are designed for free and clear articulation throughout the range of steering and suspension travel while withstanding the highest impact loads. And they come with all the small parts like cotter pins, snap rings, etc. And as always, you get our 1 year warranty!

KING PIN KITS

- Components vary by model
- Includes all the spacers, pins and bushings required to replace worn components
- 2 required per vehicle

FRONT A-ARM BUSHING KIT

Your suspension is designed with "wear-parts" that allow it to do its job of absorbing the bumps. These wear parts need to be checked and replaced periodically. EPI offers complete kits for rebuilding A-Arms, Swing Arms and Independent Suspensions.

CLUTCHES, BELTS & BRAGGING RIGHTS.

What happens when performance obsessed maniacs build a clutch kit and a severe duty belt? You find yourself out front breathing fresh, clean air. More importantly than clean lungs, you know you're ready for the toughest conditions with a set-up that puts every horse down to the ground. When you want more from your machine, you want EPI.

LIFT KITS

An EPI Lift Kit will safely enable you to increase ground clearance and provide the necessary clearance to frame and body components if you've added larger tires to your machine. Designed by a team of riders who really know what lifted machines and big tires are all about, our Lift Kits will give you an additional 2-3" of clearance.

THE ORIGINAL EPI™ SEVERE DUTY BELT

CVT belts and clutching go hand in hand. No other belt can compete with the Original EPI Severe Duty Belt. It's designed to withstand the high heat and stress that today's high-horsepower machines dish out. EPI is world-famous when it comes to tuning CVT systems so trust the experts. We wouldn't back our belts with a 1 year warranty if we didn't know they were the best!

SEVERE DUTY BELT

- Maximum Aramid Fiber loading for incredible tensile strength. Aramid Fiber provides massive strength while still allowing the flexibility needed for efficient CVT operation.
- Special adhesive compounds result in high heat tolerance. The adhesive compound used in our belt will withstand much higher temperatures than normally encountered.
- Aggressive top cog design provides cross-sectional strength for aggressive clutch calibrations and allows the belt to accommodate tight radius turns with reduced friction.

SUPER DUTY BELT

- Designed as a stock replacement belt on larger displacement machines
- Higher tensile strength and heat rating than stock belts
- Close tolerance construction for consistent sizing
