# KNEE BRACES

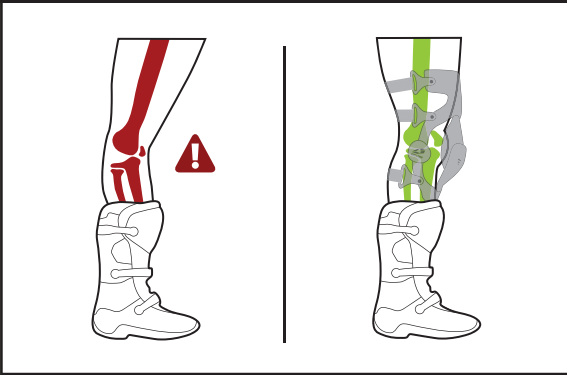

# WHY

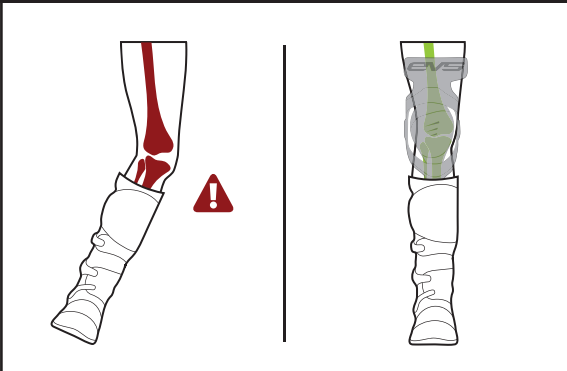

## WEAR THE AXIS PRO ?

A knee brace is designed to prevent potential injuries, both new and reoccurring, while providing stability and strength to the knee and leg. They also limit lateral torsion and hyperextension and in the event of a crash they will provide superior impact protection.

### HELP PREVENT HYPEREXTENSION

### HELP PREVENT TWISTED KNEE

### HYBRID CARBON FIBER FRAME

Hybrid carbon fiber and aluminum construction creates an incredibly strong frame while simultaneously offering a rigid and lightweight brace.

### DUAL DEFENSE KNEE CUPS

Two interactive knee cups slide with your knee's flexion and extension to provide full coverage knee protection.

### COMFORT CUFF

This neoprene compression cuff is designed to wrap around your calf to limit lower leg migration.

### TRU-MOTION 2.0 HINGE

The hinge mimics knee movement giving the rider a natural feel while riding.

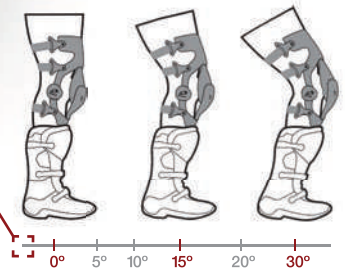

### SHARK SKIN LINER

This antimicrobial liner provides a soft cushion support and textured surface to limit migration.

### MAX EXTENSION LOCKOUT 30

To accommodate the variety of knees and riding styles you're able to adjust the max extension lockout from 0°-30°.

# AXIS PRO <sup>CE</sup>

CE-1621-1

## ALUMINUM CARBON FUSION FRAME

An aluminum lower frame fuses to a carbon fiber upper cuff, allowing for a lightweight and incredibly strong knee brace.

## TRU-MOTION 2.0 HINGE

The hinge mimics knee movement giving the rider a more natural stance.

## HYPEREXTENSION LOCKOUT 30

To accommodate a variety of knees and riding styles, you're able to adjust the hyperextension lockout from 0°-30°.

## STRETCH FIT THIGH STRAP

Stretch Fit technology is an elastic material that expands and compresses providing a comfortable and secure fit.

## SHARK SKIN LINER

This antimicrobial liner provides a soft cushion support and textured surface to limit knee brace migration.

## DUAL DEFENSE KNEE CUPS

Two interactive knee cups slide with your knees flexion and extension to provide full coverage knee protection.

# AXIS SPORT <sup>CE</sup> CE - 1021-1

## FORM FIT FRAME

Built from a proprietary blend of Polyfusion polymer, the Form Fit Frame provides a strong base that is also flexible. The Form Fit Frame bends to the contours of the riders thigh, allowing for a comfortable fit.

## DUAL DEFENSE KNEE CUPS

Two interactive knee cups slide with your knees flexion and extension to provide full coverage knee protection.

## TRU-MOTION 2.0 HINGE

The hinge mimics knee movement giving the rider a more natural stance.

## HYPEREXTENSION LOCKOUT 30

To accommodate a variety of knees and riding styles, you're able to adjust the hyperextension lockout from 0°-30°.

## STRETCH FIT THIGH STRAP

Stretch Fit technology is an elastic material that expands and compresses providing a comfortable and secure fit.

## SHARK SKIN LINER

This antimicrobial liner provides a soft cushion support and textured surface to limit knee brace migration.

# WEB PRO CE CE - 1621-1

## TWIN WALL CARBON FIBER FRAME

The Web Pro consists of a composite material fully encased in a thick shell of carbon fiber designed to be strong enough to endure significant amounts of force and torsion.

## DUAL ALLOY TRU-MOTION 3.0 HINGE

The hinge mimics knee movement giving the rider a more natural stance. To endure significant amounts of force the hinge is attached using a 2 layer composite of carbon fiber and aluminum.

## HYPEREXTENSION LOCKOUT 30

Designed to prevent hyperextension, the most common knee injury in action sports. Adjustable hyperextension lockout from 0°-30°.

## STRETCH FIT THIGH STRAP

Stretch Fit technology is an elastic material that expands and compresses providing a comfortable and secure fit.

## SHARK SKIN LINER

This antimicrobial liner provides a soft cushion support and textured surface to limit knee brace migration.

## DUAL DEFENSE KNEE CUPS

Two interactive knee cups slide with your knees flexion and extension to provide full coverage knee protection.

#### FORM FIT FRAME

Built from a proprietary blend of Polyfusion polymer, the Form Fit Frame provides a strong base that is also flexible. The Form Fit Frame bends to the contours of the riders thigh, allowing for a comfortable fit.

#### CLICK TECH BUCKLE

The Click Tech Buckle utilizes a quick release buckle system allowing for an easy gear up and gear down.

#### TRU-MOTION 2.0 HINGE

The hinge mimics knee movement giving the rider a more natural stance.

#### HYPEREXTENSION LOCKOUT 30

To accommodate a variety of knees and riding styles, you're able to adjust the hyperextension lockout from 0°-30°

#### STRETCH FIT THIGH STRAP

Stretch Fit technology is an elastic material that expands and compresses providing a comfortable and secure fit.

#### FLOW VENTS

Exterior venting provides additional air circulation.

KNEE &  
ELBOW  
PROTECTION

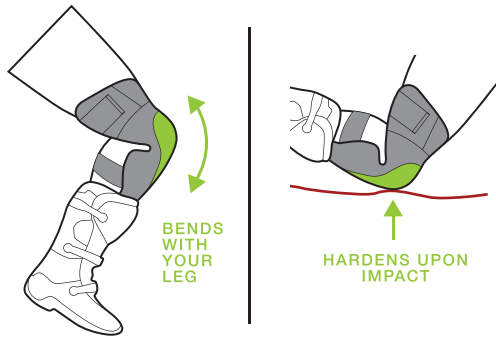

# WHY

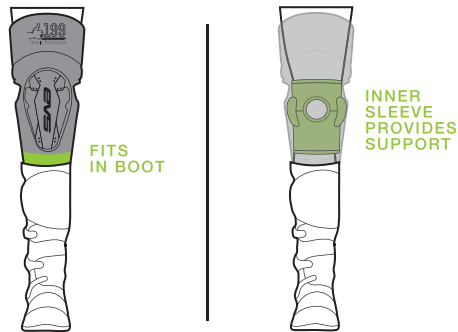

## WEAR THE TP199 KNEE PAD?

Designed specifically for Travis Pastrana, the official TP199 Knee Pad is for the rider looking for complete support but does not want to wear a knee brace.

### REACTIVE MEMORY FOAM

### A SUPERIOR FIT

### REACTIVE MEMORY FOAM

The RMF knee cup is soft and pliable at its natural state, but when impact force is applied it instantly hardens to meet the force being applied against it, allowing a comfortable ride without sacrificing protection.

RMF KNEE CUP

### SHIN GUARD

The shin guard extends protection down the front of the leg. Designed to fit inside the boot, the shin guard also helps keep the brace in the correct position.

### FLOATING INNER SLEEVE

The floating inner sleeve of the TP199 keeps it in place and prevents migration while you ride. Additionally, the sleeve features impact gel inserts for added comfort and protection.

# TP199 <sup>CE</sup>

CE - 1621-1

## POLYFLEX SHIN GUARD

A form fitting polymer material provides added protection to the shins.

## AIR MESH

Perforated fabric allows air to flow unimpeded, while still providing protection from abrasion and sun light.

## STRETCH FIT STRAP

Stretch Fit technology is an elastic material that expands and compresses providing a comfortable and secure fit.

## RMF

Reactive Memory Foam is soft and pliable in its natural state but hardens when force is applied to it, providing a protective barrier.

# TP199 LITE

**AIR MESH**

**STRETCH FIT STRAP**

Stretch Fit technology is an elastic material that expands and compresses providing a comfortable and secure fit.

**RMF**

Reactive Memory Foam is soft and pliable in its natural state but hardens when force is applied to it, providing a protective barrier.

## **OPTION AIR** <sup>CE</sup> KNEE PAD

The Option Air kneepad provides enhanced functionality & airflow. With an Innovative raised compression technology that provides improved venting and comfort.

## **OPTION AIR** <sup>CE</sup> ELBOW PAD

The Option Air elbow pad provides enhanced airflow and impact protection. As with our Option Air kneepad the Innovative raised compression technology provides improved venting and comfort.

## EPIC <sup>CE</sup> KNEE PAD

The Epic Knee Pad uses design elements from our high end knee brace technology, offering complete shin and patella coverage. The Epic Knee is positioned between a knee brace and the traditional knee pad.

## EPIC ELBOW PAD

The Epic Elbow Pad offers lightweight, breathable, with flexible material enhances comfort and protection between forearm and elbow.

## OPTION <sup>CE</sup> KNEE PAD

The best selling and cost conscientious knee pad of choice. With its hard molded polypropylene shell and perforated bio-foam liner, the Option Knee Pad provides protection and breathability.

White

Hi-Viz

## OPTION <sup>CE</sup> ELBOW PAD

Proven elbow protection at a great price point. With hard molded polypropylene shell and Tri-Y forearm strapping system, the Option Elbow Pad provides great support and migration reduction.

# ROOST DEFLECTORS

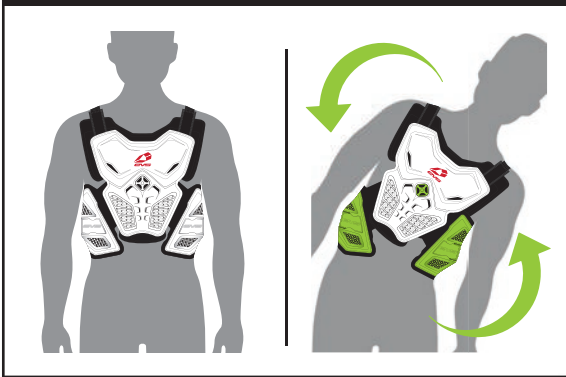

# WHY

# WEAR THE F2 ?

Getting hit in the chest by a rock flung from the back tire of the rider you are chasing will hurt. For this reason, Roost Deflectors are a necessary part of every riders gear set.

## PIVOT SYSTEM

## ROOST DEFLECTION

## RACE COLLAR COMPATIBLE

Built with Race Collar compatibility in mind, the F2 is designed to fit the shape of a race collar. In addition, loop straps on either shoulder negate the need for an additional X-Strap to hold a Race Collar in place.

## PIVOT SYSTEM

The Pivot System attaches the front plate of the Roost Deflector to the side pieces with a pivot bolt. This allows the Roost Deflector to move with the rider as he or she leans left or right, allowing for a comfortable, snug fit.

## FLYTE LINER

A grid of impact dampening pads lift the F2 off the skin, allowing for increased air flow.

## FLOW VENTS

Exterior air vents provide additional air circulation.

# F2<sup>CE</sup>

Black

### FLYTE LINER

A grid of impact dampening pads lift the protective gear off the skin, allowing for increased air flow.

### FLOW VENTS

Exterior venting provides additional air circulation

### PIVOT SYSTEM

The two-piece chest plate articulates with the Rider's lateral leans to provide enhanced fluid movement and a comfortable, snug fit.

### IMPACT SHIELD

An exterior of high-impact tested polymer provides optimum protection against debris and collisions.

# F1<sup>CE</sup>

### FLOW VENTS

Exterior venting provides additional air circulation

### RACE COLLAR COMPATIBLE

This product is strategically designed to fit all EVS race collars and most neck braces. Integrated loop straps ensures any EVS race collar stays in place during use.

### IMPACT SHIELD

An exterior of high-impact tested polymer provides optimum protection against debris and collisions.
