# KNEE BRACES

EVS designed, developed and produced the industry's first off-the-shelf motocross centric knee brace back in 1985. Over the last three decades, EVS has continued to innovate and lead knee brace technology. We are the industry leader in providing the widest range of knee brace designs for every rider in every riding situation.

# WHY WEAR KNEE BRACES?

MITIGATE FUTURE INJURY STABILIZE PRIOR INJURY PROTECT AGAINST IMPACT

A knee brace is designed to prevent potential injuries, both new and recurring, while providing stability and strength to the knee and leg. They also limit torsion and hyperextension and in the event of a crash will provide impact protection.

## 1. TWIN WALL CARBON FIBER FRAME

The Web Pro consists of a composite material fully encased in a thick shell of carbon fiber. The result being a knee brace frame that is strong enough to endure significant amounts of force and torsion.

## 2. TRU-MOTION HINGE

Modeled after orthopedic knee braces, the Tru-Motion Hinge bends and slides the same way as the knee, allowing for the Web Pro to sit and move comfortably on the rider, while limiting torsion and hyperextension.

## 3. DUAL KNEE CUP

The dual knee cup system provides CE level full patella coverage. When straight, the dual knee cups settle one on top of the other. When the leg is bent, the knee cups slide apart covering the upper and lower parts of the knee for complete protection.

## WEB PRO

The Web Pro Knee Brace was designed to be smaller, lighter and stronger than the original Web Knee Brace. Our patented Tru-Motion Hinges anatomically mimic the natural motion of the human knee for increased comfort and connectivity to the bike.

UPDATED

**RS9**

The RS9 offers comfort and protection. The knee brace is constructed of a lightweight, impact resistant, injection molded shell to increase airflow for added comfort.

- 1. Patented Tru-Motion 2.0 anatomically correct hinges
- 2. Dual Defense full coverage knee cup
- 3. Moisture wicking bio-foam molded liner
- 4. ClickTec quick release buckle system
- 5. FormFit frame
- 6. Adjustable hyperextension lockouts
- 7. Sizes: S, M, L, XL

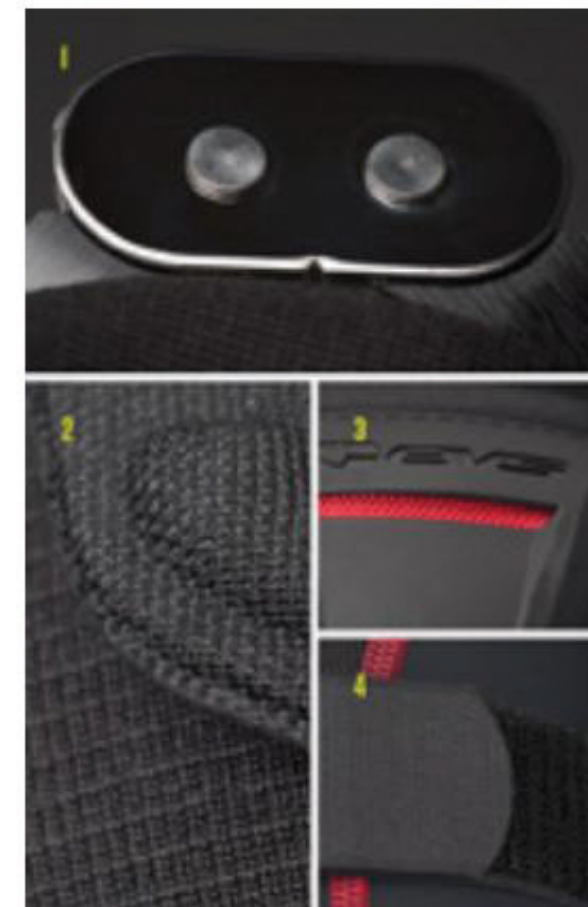

## SX02

The SX02 offers compression and support in a soft, form fitting pull on brace. Fully adjustable bilateral polycentric hinges offer strength and limit hyperextension.

1. Fully adjustable bilateral polycentric (6061 T6) aircraft grade aluminum hinges
2. Customizable 15° incremental flexion/extension stops
3. 3 compression straps for added support and comfort
4. Lightweight and breathable airprene construction
5. Removable knee cup
6. Sizes: S, M, L, XL

## SX01

The SX01 offers compression and support in a soft, form fitting pull-on brace. bilateral polycentric hinges offer strength and limit hyperextension.

1. Bilateral polycentric (6061 T6) aircraft grade aluminum hinges
2. Lightweight and breathable airprene construction for ultra comfort
3. Removable knee cup
4. 2 compression straps for support and comfort
5. Sizes: S, M, L, XL

## GEAR GUARD

1. Reduces wear and tear on your gear and bike
2. Attach to any knee brace to soften brace impact with your bike and protect the inner lining of your moto pants
3. Sold in pairs

## KNEE / ELBOW PROTECTION

Our full line of knee and elbow guards have you covered in every riding condition. Designed to be lightweight, breathable and comfortable, our knee and elbow guards have similar technologies to our knee braces, giving maximum protection to our riders in a technologically advanced line of products.

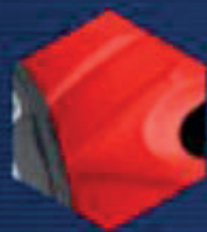

# WHY WEAR KNEE PROTECTION?

**STABILIZE** THE KNEE **SUPPORT** THE LEG **PROTECT** AGAINST IMPACT AND ABRASION

EVS believes every rider should wear knee protection. Regardless of your riding level, style or type, we have a knee pad/guard that will fit your needs and keep you protected while you ride.

## 1. REACTIVE MEMORY FOAM

The RMF knee cup is soft and pliable at its natural state, but when impact force is applied it instantly hardens to meet the force being applied against it. This is one of the features that makes the TP199 so comfortable.

## 2. FLOATING INNER SLEEVE

The floating inner sleeve of the TP199 keeps it in place and prevents migration while you ride. Additionally, the sleeve features impact gel inserts for added comfort.

## 3. SHIN GUARD

The shin guard extends the protection down the front of the leg. Designed to fit inside the boot, the shin guard also helps keep the brace in the correct position.

built in inner sleeve

# TP199

"They are perfect for MX, Off Road, BMX, MTB and SixS. If you like your knees, you need this guard."

- TRAVIS PASTRANA

## TP199

KNEE & SHIN GUARD

EN 1621-3

Designed specifically for Travis Pastrana, the official TP199 Knee Pad offers everything for the rider looking for complete support without the bulk of a traditional knee brace. They are perfect for both track and off-road riders.

1. Reactive Memory Foam (RMF) patella protection
2. Molded bio-foam upper for increased impact protection
3. Low profile, hard molded HDPE shin guard slips easily into your boot
4. Integrated internal floating knee sleeve gives continued support
5. Silicone strip on inner sleeve limits migration while riding
6. Fully breathable mesh backing
7. Sold in pairs
8. Sizes: S/M, L/XL

## TP199 LITE

KNEE PAD

EN 1621-3

Based off the ever popular TP199 Knee Pad, the TP199 Lite Knee Pad features a shorter overall profile making it ideal for MX, BMX and MTB usage. The molded bio-foam upper offers increased impact protection while the circular comfort gel donut on the inner knee helps limit migration and the fully breathable mesh backing helps with temperature control.

1. Reactive Memory Foam (RMF) patella protection
2. Molded bio-foam upper for increased impact protection
3. Silicone strip on inner sleeve limits migration while riding
4. Fully breathable mesh backing
5. Sold in pairs
6. Sizes: S/M, L/XL

## ■ EPIC KNEE

The Epic Knee Pad uses design elements from our high end knee brace technology, offering complete shin and patella coverage. The Epic Knee is a step up from your traditional knee pad.

1. Flex Frame Technology for a custom fit and feel
2. Floating patella system for full coverage protection
3. Asymmetrical Form Fit chassis & full flex hinge system
4. Plush contour molded bio-foam liner
5. Quick release positive locking buckles
6. Fully adjustable dry-suede straps
7. Sold in pairs
8. Sizes: S/M, L/XL

## ■ EPIC ELBOW

The Epic Elbow Pad offers lightweight, breathable, full elbow and forearm protection.

1. Flex enhances comfort and protection between forearm and elbow
2. Active compression sleeve reduces arm pump
3. Silicone grip cuff reduces migration
4. Sold in pairs
5. Sizes: S/M, L/XL

## OPTION KNEE

1. Hard molded polypropylene shell
2. Perforated bio-foam liner for increased breathability
3. Full knee to shin coverage
4. Reinforced TPR hinge system
5. Asymmetric design provides anatomical fit for left and right leg
6. Sold in pairs
7. Size: Adult

## OPTION ELBOW

1. Hard molded polypropylene shell
2. Perforated bio-foam liner for increased breathability
3. Tri-Y forearm strapping system provides greater support and reduces migration
4. Extended forearm protection pad
5. Asymmetric design provides anatomical fit for left & right arms
6. Sold in pairs
7. Size: Adult

**GLIDER  
KNEE**

1. Hard impact polyethylene knee cup sits on a flexible membrane
2. Sewn neoprene interior liner
3. TPR limiters keep the cup where you need it during impacts
4. Perforated soft neoprene inner layer offers maximum ventilation
5. Sold in pairs
6. Sold in Sizes: S, M, L

**GLIDER  
ELBOW**

1. Hard impact polyethylene elbow cup sits on a flexible membrane
2. Sewn neoprene interior liner
3. TPR limiters keep the cup where you need it during impacts
4. Perforated soft neoprene inner layer for maximum ventilation
5. Sold in pairs
6. Sizes: S, M, L

## GLIDER KNEE LITE

1. Semi-flexible outside shell sits on a flexible membrane
2. Combined TPR impact zone & molded bio-foam
3. TPR limiters keep the shell where you need it during impact
4. Perforated soft airprene inner layer for maximum ventilation
5. Sold in pairs
6. Sizes: S, M, L

## GLIDER ELBOW LITE

1. Semi-flexible outside shell sits on a flexible membrane
2. Combined TPR impact zone & molded bio-foam
3. TPR limiters keep the shell where you need it during impact
4. Perforated soft airprene inner layer for maximum ventilation
5. Sold in pairs
6. Sizes: S, M, L

## BURLY ELBOW

1. Low profile, lightweight design
2. Compression sleeve adds comfort while reducing pad migration
3. Strapless fit system greatly reduces arm pump
4. Molded foam liner with outer hard plastic cup
5. Sold in pairs
6. Sizes: S, M, L

## MX HELMETS

The T5 Helmet features a lightweight polycarbonate shell with striking graphics and functionality details that are generally found on an expensive premium helmet.

## WHY WEAR A HELMET?

**IMPACT PROTECTION** **PROVIDE VENTILATION** **RACE COLLAR INTEGRATION**

The T5 is a quality helmet at an affordable price, offering all of the extras that every rider is looking for.

### 1. VENTS

The T5 has 9 intake and 4 exhaust vents that work together to keep you cool while you ride.

### 2. COMFORT LINER

The T5's moisture wicking liner ensures that you can ride comfortably all day long.

**RMF**

### 3. RMF GASKET

Our gasket is built with impact resistant RMF and designed to work in collaboration with a Race Collar.

### 4. VISOR

The adjustable visor protects you from roost and is constructed with breakaway screws for a safe detachment during impact.

## RACE COLLARS

Our race collar collection has been developed and further refined utilizing testing data and feedback from test riders on the track and on the trails. Our collars are designed to minimize the risk of axial compression, hyperflexion, hyperextension and lateral hyperflexion.

# WHY WEAR A RACE COLLAR?

ABSORB IMPACT DEFLECT DOWNWARD FORCE DIFFUSE ENERGY

Race collars are often overlooked, but are an essential component to any rider's gear set and offer increased neck protection and confidence.

HYPEREXTENSION / AXIAL COMPRESSION / HYPERFLEXION / LATERAL HYPERFLEXION

## THREE LAYER PROTECTION

### 1. OUTER SHELL

The outer shell is the R4K's first line of defense. It protects the rider by deflecting downward impact force.

### 2. KORROYD

Korroyd's unique honeycomb structure is stronger and lighter than the materials used on most other race collars.

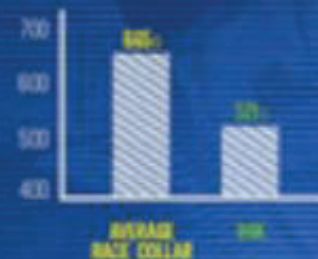

LIGHT WEIGHT

95% AIR

22% LIGHTER  
THAN THE AVERAGE RACE COLLAR

WEIGHT (G)

### 3. HIGH DENSITY EVA FOAM

The R4K's Korroyd core (A) is encased in high density EVA foam (B), and exterior impact shell (C) to provide optimal impact absorption.

# ROOST DEFLECTORS

Our roost deflectors are designed with performance and functionality in mind. They offer maximum chest, shoulder and back protection while minimizing weight and bulk. Many of them have a modular design, which allows for adjustment in fit and protection for every rider's needs.

# WHY WEAR A ROOST DEFLECTOR?

DEFLECT ROOST BLOCK ELEMENTS OF NATURE PREVENT PUNCTURE

A roost deflector acts like a hard exoskeleton, which provides the wearer with an additional layer of protection against roost, rocks and other abdominal and back impacts.

## 1. ENHANCED FLEXIBILITY

The F2 retention strap is attached to the roost deflector through a pivot bolt that provides enhanced lateral mobility. This means that the F2 fits comfortably even in aggressive riding positions.

## 2. ULTIMATE PROTECTION

The F2 is CE rated and is designed to resist puncture and give the rider ultimate protection while offering maximum comfort through its low profile design.

## 3. MAXIMUM MODULARITY

The F2 is designed with modularity in mind. Removable shoulder guards, back protection and upper chest piece fits any riding style and racewear sets.

■ **F2**  
CE

The F2 features a lightweight modular design that allows for a customized fit to suit a variety of riding situations.

- 1. Lightweight ventilated high impact polypropylene construction
- 2. Pivoting system eliminates darting for a snug, comfortable fit
- 3. Ventilated design for maximum breathability
- 4. Sublimated bio-foam molded liner
- 5. Neck brace compatible design
- 6. Sizes: M, L, XL

EN 1621-2  
2012 PJ Level 2

Removable sleeve

## COMP SUIT

The Comp Suit is an ultra-lightweight ballistic jersey offering full upper body protection and breathability for all day comfort.

1. Side zip design allows for full roost protection
2. Removable sleeves
3. Hard plastic chest, back, arm & shoulder protection
4. Full torso & elbow protection
5. Full articulating spine protection that moves with you
6. Lightweight ballistic fabric with mesh stretch panels for superior fit
7. Neck brace compatible
8. Built in compression belt for added lower torso protection
9. CE certified model offered to European market
10. Sizes: S, M, L, XL, XXL

■ **G6**

The G6 is a lightweight, breathable ballistic jersey designed for maximum upper body protection with all-day comfort and breathability in mind.

1. Full torso & elbow protection
2. Hard plastic chest, back, arm & shoulder protection
3. Innovative frontal impact absorption panels
4. Full articulating spine protection that moves with you
5. Lightweight ballistic fabric with mesh stretch panels for superior fit
6. Built in kidney belt for added lower torso protection
7. Neck brace compatible design
8. Fully machine washable
9. Sizes: S, M, L, XL, XXL, XXXL, XXXXL

**HYDRATION  
PACK**

■ **G6  
LITE**

The G6 Lite offers the same protection as the G6 minus the kidney belt. Designed as a lower profile option on the trail, the G6 Lite offers all day protection and comfort.

1. Full torso & elbow protection
2. Hard plastic chest, back, arm & shoulder protection
3. Innovative frontal impact absorption panels
4. Full articulating spine protection that moves with you
5. Lightweight ballistic fabric with mesh stretch panels for superior fit
6. Neck brace compatible design
7. Fully machine washable

## TUG BASE LAYERS

Technical Under Gear (TUG) products are designed to enhance overall rider experience. TUG products feature technical details designed to integrate seamlessly with protective riding gear for enhanced mobility and all day comfort. Soft touch KWIK-DRI® fabrics wick sweat from skin and help regulate core temperature.

## WHY WEAR TECHNICAL UNDER GEAR? IMPROVE COMFORT INTEGRATE GEAR STAY COOL

A moto specific base layer, the TUG line provides performance benefits such as cooling, moisture wicking, impact protection and integration with the functionality of race wear.

### 1. COOLING MATERIAL

The CTR Vest, when saturated with water, remains cool for a period of time, helping to regulate core temperature.

### 2. MESH VENTING

Mesh venting panels on the back promote airflow and helps keep the rider cooler.

### 3. HIP / TAIL PADS

Hip and tail pads provide additional layers of padding & protection.

### 4. SILICONE KNEE BRACE GRIPPER

Silicone strips strategically placed on legs to reduce knee brace migration.

## **IMPACT 3/4 PANT**

1. Compression fit lower for muscle recovery and brace support
2. Super soft elastic waistband
3. Low profile chamois pad acts as moisture wicking layer
4. Designed with fewer seams to reduce pressure
5. Removable tail bone pads and puncture resistant hip pads
6. Silicone gripper calf and thigh helps to keep knee brace in place
7. 3/4 length integrates with moto sock to reduce layers under boot
8. Boxer brief upper
9. Sizes: XS/S, M/L, XL/XXL

## IMPACT SHORT

1. Removable impact hip and tailbone pads
2. Super soft elastic waistband
3. Low profile chamois pad acts as moisture wicking layer
4. Designed with fewer seams to reduce pressure points
5. Sizes: XS/S, M/L, XL/XXL

## PADED SHORT

1. EVA molded impact hip pads for enhanced hip/thigh roost protection
2. Removable impact foam tailbone pad
3. Super soft elastic waistband
4. Low profile chamois pad acts as moisture wicking layer
5. Designed with fewer seams to reduce pressure points
6. Sizes: XS/S, M/L, XL/XXL

## VENTED SHORT

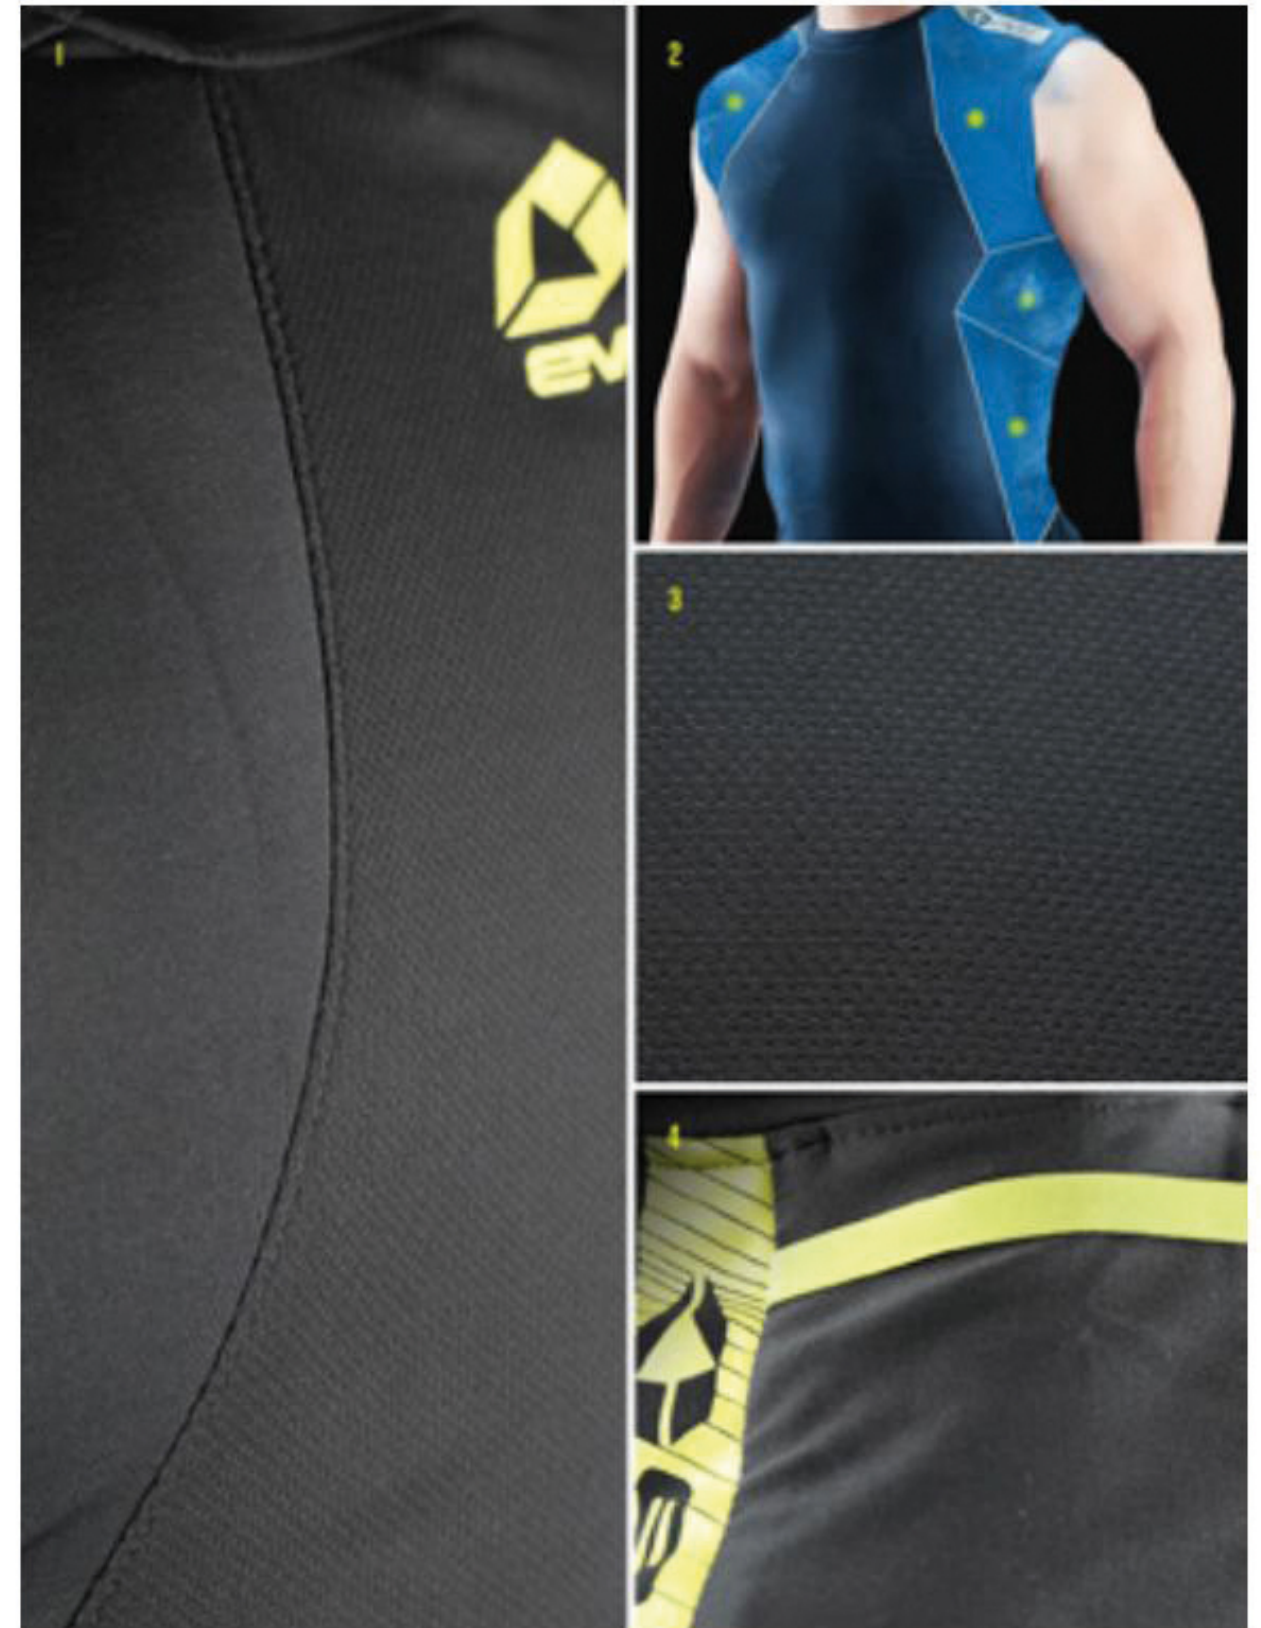

1. Lightweight, fully ventilated mesh short
2. Super soft elastic waistband
3. Low profile chamois pad acts as moisture wicking layer
4. Removable impact foam tailbone pad
5. Designed with fewer seams to reduce pressure points
6. Sizes: XS/S, M/L, XL/XXL

## MOTO BOXER

1. Super soft elastic waistband
2. Low profile microfiber liner acts as moisture wicking layer
3. Designed with fewer seams to reduce pressure points
4. Sizes: XS/S, M/L, XL/XXL

## CTR VEST

Once saturated with water the CTR Vest will remain cool for the duration of the moto, helping to regulate your core temperature.

1. Constructed of thin, strategically placed layers of super absorbent polymer
2. Once saturated with water, polymer retains cold temperature and slowly disperses to keep you cool
3. Strategic sections will keep your core temperature down longer helping to maximize your riding session
4. Elastic shoulder attachment loops for race collar compatibility
5. Sizes: XS/S, M/L, XL/XXL

## SLEEVELESS

Keeps you cool during warm weather riding.

1. Lightweight, breathable moisture wicking fabric
2. Ventilated Lycra mesh back panel for increased airflow
3. Elastic shoulder attachment loops for race collar compatibility
4. Provides rash protection
5. Sizes: XS/S, M/L, XL/XXL

## LONG SLEEVE

Base layer to keep you warm during cold weather riding.

1. Lightweight, breathable moisture wicking fabric
2. Ventilated Lycra mesh back panel for increased airflow
3. Elastic shoulder attachment loops for race collar compatibility
4. Provides rash protection
5. Sizes: XS/S, M/L, XL/XXL

## SHORT SLEEVE

1. Lightweight, breathable moisture wicking fabric
2. Ventilated Lycra mesh back panel for increased air flow
3. Elastic shoulder attachment loops for race collar compatibility
4. Provides rash protection
5. Sizes: XS/S, M/L, XL/XXL

## SWEAT BEANIE

1. Vented lycra with terry cloth sweat band
2. Keeps sweat out of your eyes
3. One size fits most

## FUSION SOCK

1. Reinforced heel & toe for durability
2. Extends to lower thigh for added comfort under knee protection
3. Vented Lycra construction keeps you cool
4. Gripper calf & thigh keeps braces in place
5. Fusion socks are sold in pairs
6. Sizes: S/M, L/XL

## BRACE SLEEVE

1. Prevents brace rub & secures fit
2. Fits under all types of braces
3. Brace sleeves are sold in pairs
4. Sizes: XS, S, M, L, XL

# MXGLOVES

Our MX gloves are designed to be low-profile and breathable. They offer increased abrasion resistance in high-wear areas while their form fitting design increases dexterity.

## WHY WEAR GLOVES?

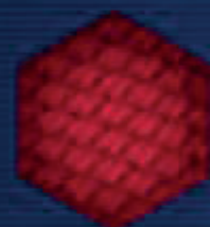

**PROTECT** YOUR PALM **SUPPORT** YOUR WRIST **DEFLECT** ROOST

MX gloves are designed to be low-profile, comfortable and provide essential protection for the rider's hands.

### 1. RMF FINGER & KNUCKLE PROTECTION

Provides the ultimate protection of the fingers from roost and impact. RMF's ability to flex and harden up when force is applied to it does not constrict movement.

### 2. BREATHABLE Q-SPAN

This breathable 4-way stretch nylon provides overall comfort and movement.

### 3. PADDED THUMB GUARD

An added layer to reduce blisters from the continuous friction between the thumb and bike grip.

## YETI GLOVE

The ultimate cold weather glove.

1. Reinforced palm and thumb
2. Fleece comfort liner
3. Silicone finger print
4. Water resistant Hypora® inner membrane
5. Sizes: S, M, L, XL

## WRISTER

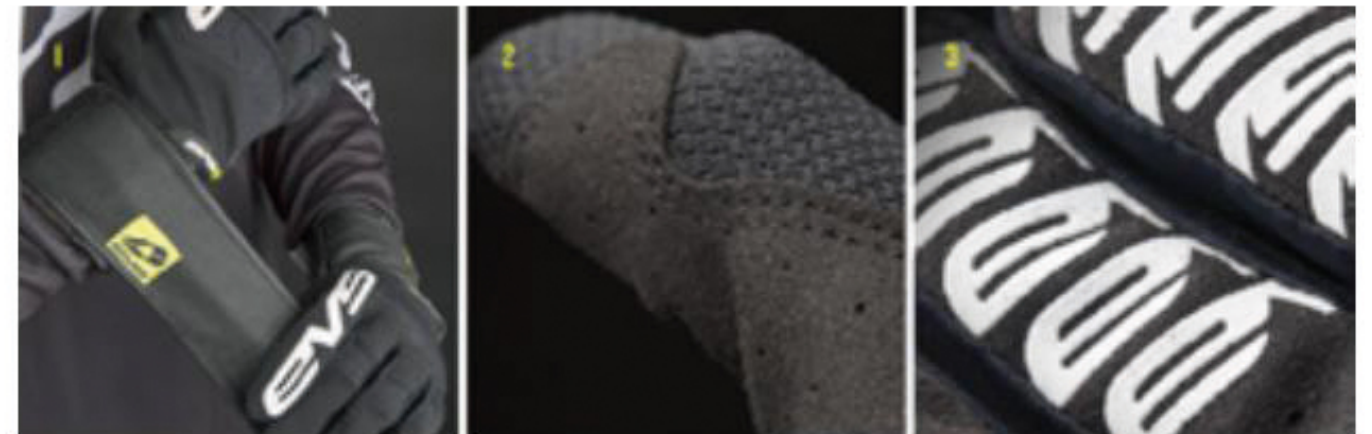

The Wrister Glove features an injection molded shock absorbing system that reduces hyperextension and compression related injuries.

1. Wrap around wrist support
2. Silicone infused fingers and palm for increased grip
3. RMF impact guards on knuckles
4. Sizes: S, M, L, XL

## WRAP

The Wrap Glove is designed to offer increased wrist support for those riders looking for mobility restriction.

1. High-abrasion PU leather wrap around wrist support
2. Synthetic leather thumb reinforcement
3. Silicone infused fingers and palm for increased grip
4. Sizes: S, M, L, XL

## PRO SERIES

1. Silicone infused fingers for increased grip

# SUPPORTGEAR

EVS offers a full line of technologically advanced support products ranging from ankle braces to kidney belts to bi-lateral shoulder supports. Our line of support products are designed to be worn both on and off the bike.

**SB05**  
SHOULDER  
SUPPORT

1. Provides superior compression & support for past shoulder injuries
2. Adjustable arm closure design eliminates underarm chaffing
3. Universal no snag design fit
4. Easy on / off design
5. Breathable air mesh construction with TPR gripper pull-tabs
6. X-Strap Stabilizer System provides double shoulder support
7. Sizes: S, M, L, XL, XXL

**SB03**  
SHOULDER  
SUPPORT

1. Provides superior compression & support for past shoulder injuries
2. Adjustable arm closure design eliminates underarm chaffing
3. Universal no snag design fits left & right shoulders
4. Easy on / off design
5. Breathable air mesh construction with TPR gripper pull-tabs
6. X-Strap Stabilizer System
7. Sizes: S, M, L, XL, XXL

**SB04**  
SHOULDER  
SUPPORT

1. Provides superior compression & support for past shoulder injuries
2. Heavy duty molded EVA shoulder cup with 1680D ballistic nylon
3. Adjustable arm closure design eliminates underarm chaffing
4. Universal no snag design fits left & right shoulders
5. Easy on / off design
6. X-Strap Stabilizer and Impact System
7. Sizes: S, M, L, XL, XXL

**SB02**  
SHOULDER  
SUPPORT

1. Provides superior compression & support for past shoulder injuries
2. Adjustable arm closure design eliminates underarm chaffing
3. Universal no snag design fits left & right shoulders
4. Easy on / off design
5. Breathable, 3mm perforated, Velcro compatible, neoprene construction
6. Sizes: S, M, L, XL, XXL

## KS61 KNEE STABILIZER

1. Reinforced compression sleeve with medial bilateral support straps
2. Provides compression for knee support & stability
3. 3mm neoprene open patella design for comfort
4. Slip on design
5. Sizes: S, M, L, XL, XXL
6. Sold individually, fits left or right knee

## AS06 ANKLE SUPPORT

1. Slip on design
2. Fits right & left feet
3. Sizes: S, M, L, XL
4. Sold individually, fits left or right ankle

## KS199 KNEE STABILIZER

1. Provides compression for knee support & stability
2. Fully breathable stretch mesh backing
3. Gel inserts support either side of the knee
4. Anti-slip gripper elastic
5. Sizes: S/M, L/XL
6. Sold individually, fits left or right knee

## WBO1 WRIST BRACE

1. 2 interactive density plates add support while allowing full range of motion
2. Size: One size fits most
3. Sold individually, fits left or right wrist

## AB07 ANKLE STABILIZER

1. Slip on design with elastic hook and loop closure
2. Full Ariaprene™ design that stabilizes the ankle with a breathable compression sleeve
3. Articulated ankle flex inserts for added support and protection
4. Dual webbing pull tabs for easy on and off
5. Sizing: S, M, L, XL
6. Sold individually, fits left or right ankle

## WS91 WRIST BRACE

1. Wrap around design
2. Size: One size fits most
3. Sold individually, fits left or right wrist

## ASI4 ANKLE STABILIZER

1. Slip on design
2. Elastic strap for added ankle stability
3. Sizes: S, M, L, XL
4. Sold individually, fits left or right ankle

## WS03 WRIST BRACE

1. Sold individually, fits left or right wrist

**BB04  
IMPACT**  
KIDNEY BELT

1. Injection molded shield for optimum impact protection
2. Lightweight breathable hex-foam construction
3. Ergonomically designed for maximum support and mobility
4. Provides support to kidneys and lower back area
5. Sizes: S, M, L, XL, XXL

**BBI  
CELTEK AIR**  
KIDNEY BELT

1. Slim, low profile design
2. Reinforced lower spine panel
3. Velcro adjustment system

# MX YOUTH

The EVS Youth Line is designed directly after our adult line while keeping the safety needs of young riders in mind.

## SX01

The SX01 offers compression and support in a soft, formfitting pull-on brace. Bilateral polycentric hinges offer strength and limit hyperextension.

1. Bilateral polycentric (6061 T6) aircraft grade aluminum hinges
2. Lightweight and breathable airprene construction for ultra comfort
3. Removable knee cup
4. Size: Youth
5. Sold individually

## TP199

Designed specifically for Travis Pastrana, the official TP199 Knee Pad offers everything for the rider looking for complete support without the bulk of a traditional knee brace. They are perfect for both track and off road riders.

1. Reactive Memory Foam (RMF) patella protection design utilizing advanced impact foam technology
2. Molded bio-foam upper for increased impact protection
3. Silicone strip on inner sleeve helps limit migration while riding
4. Integrated internal floating knee sleeve helps give continued support even during brace migration
5. Fully breathable mesh backing to help with temperature control
6. Low profile, hard molded shin guard slips easily into your boot
7. Sold in pairs
8. Size: Youth

## OPTION KNEE

The Option Knee Pad features a hard molded polypropylene shell with a perforated bio-foam liner for increased breathability and superior impact protection.

1. Hard molded polypropylene shell
2. Perforated bio-foam liner for increased breathability
3. Full knee to shin coverage
4. Reinforced TPR hinge system
5. Asymmetric design for left & right legs
6. Sizes: Mini (black only), Youth

## R4K

The R4K features a revolutionary Koroyd™ core with superior impact absorption and a reinforced nylon upper shell. The chassis has been completely redesigned to be lighter and more aerodynamic. In an impact, the head is pushed down on the race collar and the R4K effectively fills the gap between your helmet and shoulder with Koroyd, which absorbs impact energy better than standard race collar materials.

1. Koroyd® engineered core construction
2. Reinforced exterior impact shell
3. Rapid lock closure system for easy front entry
4. Integrated X-Strap cleats and compatible with redesigned TUG Tops
5. Polyurethane foam base
6. Weight: Youth – 308 grams
7. Size: Youth

## R4

1. Hard molded upper surface disperses energy to the PU core
2. Hi-tensile closed cell PU core absorbs impact energy
3. Bio-foam liner provides extra impact absorption
4. Rapid lock closure system for easy front entry
5. Adjustable rear strut for a customized fit
6. Weight: Youth – 386 grams
7. Size: Youth

UPDATED

## SLAM COMBO

1. Includes: Option Elbow Pad, Option Knee Pad and R2 Race Collar
2. Color: Black
3. Sizes: Mini, Youth
4. Sold as set

UPDATED

## R2

1. Low profile design
2. Easy front entry system
3. Removable / washable liner
4. Size: Youth

UPDATED

## R3

1. Protects against axial compression, hyperflexion, hyperextension & lateral hyperflexion
2. Easily connects directly to most chest protectors
3. Easy front entry system
4. Removable / washable liner
5. Size: Youth

## F2

CE

The F2 is a lightweight, modular design that allows for a customized fit to suit a variety of riding situations.

1. Lightweight ventilated high impact polypropylene construction
2. Full modular design with removable shoulder and back guards
3. Pivoting system eliminates darting for a snug, comfortable fit
4. Ventilated design for maximum breathability
5. Sublimated bio-foam molded liner
6. Neck brace compatible design
7. Size: Youth (S)

Black

White

## VEX

CE

The Vex is a lightweight, effective roost deflector offering protection in any riding situation.

1. Lightweight, durable polycarbonate construction
2. Ventilated design for maximum breathability
3. Low profile, lightweight design
4. Full chest and spine coverage
5. Adjustable front & back panels
6. Neck brace compatible design
7. Size: Youth (S)

Black

White

Clear

## F1

CE

The F1's lightweight, form fitting design hugs the rider's body.

1. Lightweight impact resistant injection molded construction
2. Adjustable shoulders & removable back plate
3. Click-Tec front closure system ensures adjustability and secure fit
4. Multiple vents and air channels offer maximum ventilation
5. Neck brace compatible design
6. Plush bio-foam liner
7. Size: Youth (S)

Black

UPDATED

## REVO 4

CE

The Revo 4 offers a minimalistic backless, lightweight, low profile, under-the-jersey design.

1. Molded cross-link bio-foam interior serves as a shock-absorbing barrier
2. Molded polycarbonate front plate provides impact, abrasion and puncture protection
3. Fully adjustable fit to provide protection for riders of all sizes
4. Neck brace compatible design
5. Size: Youth (S)

Black

UPDATED

White

## REVO 5

CE

The Revo 5 is the perfect choice for riders looking for roost deflection in a comfortable under-the-jersey design.

1. Molded cross-link bio-foam interior serves as a shock-absorbing barrier
2. Molded polycarbonate construction for maximum impact protection
3. Three part back plate offers flex points that move with your body
4. Fully adjustable fit to provide protection for riders of all sizes
5. Neck brace compatible design
6. Size: Youth (S)

# STREET HELMET

EVs Street Helmets are made from injection molded high impact ABS. They feature a quick release shield and interior drop-down sun visor with an adjustable ventilation system for increased breathability.

# WHY WEAR THE STRATUS HELMET?

IMPACT PROTECTION ENHANCED VENTILATION NOISE REDUCTION

The Stratus is an improvement to the traditional street helmet. Its aerodynamic construction, strategically placed air vents, channeled inner EPS and lens gasket allow for dual performance, enhanced ventilation and noise reduction.

## 1. ADAPTABLE VENTS

The Stratus has 3 intake and 5 exhaust vents that can be opened or closed depending on riding conditions.

## 2. DUAL VISORS

The interchangeable exterior visor and interior drop down sunshade ensures an optimal field of vision and protection from the wind and sun.

## 3. COMFORT LINER

The dual density liner is cut to provide supreme comfort. It is built with air mesh material and is designed to work in conjunction with the helmet's ventilation to allow unimpeded airflow.

# 17 SNOW GEAR

Our snow vests are designed to offer impact protection in the areas that snow athletes require. They are equipped with the Recco Avalanche Rescue System in case of emergencies.

## SVI RACE

RECCO®

The SV1 Race Vest is a race ready snow vest that covers all the bases. It's equipped with the RECCO Avalanche Rescue System and its modular design allows the shoulder and tail pads to be removed. The SV1 Race Vest also conforms to all ISR racing guidelines.

1. Hi-Viz materials meets racing requirements
2. Durable ballistic nylon outer shell construction
3. Embossed bio-foam exterior panels for increased roost and impact protection
4. Recco Rescue System
5. Adjustable / removable arm guards
6. Adjustable / removable padded tail
7. Ignition kill tether attachment
8. Sizes: XS/S, M/L, XL/XXL

## BREATH DEFLECTOR

1. Helps eliminate goggle fog
2. Secured in place through chin strap and Velcro attachment
3. Moldable nose for custom fit
4. Designed for the T5 helmet; fits most helmets with minor modifications

## SV2 PRO TRAIL

Explore in confidence with the SV2 Pro Trail Vest. Constructed from ballistic nylon and high density impact polymers, the SV2 is the perfect combination of comfort and protection.

1. Durable ballistic nylon outer shell construction
2. Puncture resistant panels with impact protection construction
3. Internal armor plating construction for lightweight all-over protection
4. Recco Rescue System
5. Hi-Viz reflective overlays keeps you visible in low-light conditions
6. Built-in kidney belt for lower torso protection
7. Removable fleece lined, water repellent collar
8. Ignition kill tether attachment
9. Sizes: XS/S, M/L, XL/XXL
