**4** WD **2"** KIT **6"** KIT

## 2" LEVELING SYSTEM

This kit bolts on top of the factory coilover shock which will retain the factory ride and makes for a simple & smooth installation. This kit will raise the front of the truck 2" and allow proper clearance for a 33" tall tire. Spacers are made of 6061 aluminum for added strength and durability.

## 6" BASIC SYSTEM

The Basic System utilizes a spacer with the factory coilover shock and features Fabtech's signature arched lower control arm crossmembers constructed of 1/4" thick steel, with integrated differential skid plate to provide strength and rigidity to the front frame and suspension. Crossmembers include adjustable eccentric cams for easy front end alignment and ability to hold alignment under offroad conditions. Fabtech's proprietary steering knuckles are built with the finest American made ductile iron and will allow use of an 18" or 20" diameter wheel. Also included in these systems are sway bar brackets, impact struts, blocks and a u-bolt kit.

## 6" PERFORMANCE SYSTEM

The Performance System uses Dirt Logic 2.50 Coilover shocks for outstanding damping capacity, and features Fabtech's signature arched lower control arm crossmembers constructed of 1/4" thick steel, with integrated differential skid plate to provide strength and rigidity to the front frame and suspension. Crossmembers include adjustable eccentric cams for easy front end alignment and ability to hold alignment under offroad conditions. Fabtech's proprietary steering knuckles are built with the finest American made ductile iron and will allow use of an 18" or 20" diameter wheel. Also included in these systems are sway bar brackets, impact struts, blocks and a u-bolt kit.

## 6" PERFORMANCE SYSTEM

This system offers a true 6" ride height increase without adjustment to the torsion bars and features high arch 1/4" thick crossmembers with an integrated steel differential skid plate. Also included are solid billet sway bar end links, tubular impact struts, and one piece torsion bar mounts. The factory steering centerlink and upper control arms are retained in the stock location and the rear system works with the factory coil spring or air bag suspension.

## FOOTNOTES

4. Larger tires cannot be installed on OEM wheels.
20. Does not fit standard cab models.
30. Will not work with factory full time 4 Wheel Drive models. Some models may experience rear driveline vibration. Order appropriate Rear Link kit listed under Accessories if driveline vibration occurs. Will not work w/ factory 4 wheel air adjust suspension models.

# SUPER DUTY

## About This Section

Fabtech has developed the highest quality, most extensive line of Super Duty suspension systems for over a decade. The pages in this section will provide in depth technical information about each system along with applications and associated part numbers. To aid you in finding your system and application the below chart will serve as a table of contents for the Super Duty and Excursion section of the catalog.

Height & System	Tire Size	Year	Page
2" Leveling	33"	05-11	61
3.5" Spring Hanger	33"	99-04	102-103
4" System	35"	08-11	62-63
5.5" System	35"	99-04	104
6" Systems	35"	08-11	64-71

10" Systems	40"	08-11	90-93
10" Systems	40"	05-07	94-95

## HEAVY WEIGHT COIL SPRINGS

Our Performance Coil Springs are American made and designed for heavy duty on and offroad use. In the manufacturing of each coil spring they are run through a "Preset" process. This ensures that every Performance Coil Spring has a specific set ride height right out of the box to properly clear big tires. No settling or sagging. When you have a beast of a truck like a Super Duty only Fabtech Performance Coil Springs are heavy enough to do the job.

## LEVELING SYSTEM

System features billet aluminum coil spring spacers that will typically level the stance of a stock truck. The coil spring spacer is installed between the axle and the bottom of the coil spring. This system maintains the OE coil spring for a factory like ride. Allows use of 33" tall tires.

**4 WD** **4" KIT** **RUN 35" TIRES**

### 4" BUDGET SYSTEM

To enhance our extensive line of Super Duty suspension systems we have developed an entry level 4" Budget System for 2008-11 models

The 4" Budget System utilizes the factory front coil springs with a steel upper spacer providing 4" of lift. Radius Arm drop brackets retain the factory arms with correct caster setting for the increase ride height. System includes a Trac Bar relocation bracket that has been designed to center the axle under the vehicle and still works properly with the factory Pitman Arm. This eliminates the need to replace the Pitman Arm resulting in a lower cost and faster installation time. Rear lift is accomplished with lift blocks and extended length u-bolts.

System allows installation of 35" tall tires with required inner fenderwell trimming for adequate tire clearance for street driving and light offroad use.

**2008 FORD F250**  
 • 4" BUDGET SYSTEM  
 • 35/12.50R18 TIRES  
 • 18X9.5 WHEELS W/ 4 3/4" BACK SPACING

### FEATURES & BENEFITS

- Retains factory front coil springs for a like stock ride
- Radius Arm drop brackets provide proper caster with the increased ride height
- Trac Bar is relocated to center axle under vehicle and work with the factory Pitman Arm
- Includes driveshaft carrier bearing spacer for smooth driveline operation
- Front bump stops are relocated to control suspension travel
- Performance Shocks provide a quality ride with extended durability compared to stock shocks
- Allows use of 35" tall tires with required fenderwell trimming

### RADIUS ARM SYSTEM

Our patented Radius Arms feature a full tubular structure strengthened by dimple die side plates, with an adjustable alignment cam at the axle to allow caster adjustment. This system is available with our replacement Coil Springs or Dirt Logic 4.0 Coilover Shock conversion and comes complete with a Trac Bar relocation bracket, Piman Arm, Sway Bar drops, and a rear Block & U-bolt kit.

#### Kit Configurations

##### Front

- Performance Coil Springs
- 4.0 Coilover Conversion

##### Rear

- Block & U-bolt Kit

### 4 LINK SYSTEM

At the top of our Super Duty line is our famous 4 Link System that provides unsurpassed articulation and wheel travel. Large 2" OD heavy wall links feature race style 1" Uniballs for superior strength. Thick 1/4" steel brackets secure the 4 Links to the frame without cutting or welding. This 4 Link system allows the use of our replacement Coil Springs or our Dirt Logic 4.0 Coilover Shock conversion. System also includes Billet Sway bar links, Trac Bar relocation bracket, Pitman Arm and more. Rear lift options include a rear Block & U-bolt kit.

#### Kit Configurations

##### Front

- Performance Coil Springs
- 4.0 Coilover Conversion

##### Rear

- Block & U-bolt Kit

### BASIC SYSTEM

This system features replacement front Performance Coil Springs with frame drop brackets that relocate the factory Radius Arms. This provides lift while retaining the proper amount of caster of the front suspension. Also included is a dropped Pitman Arm, Trac Bar and Bump Stop relocation brackets, Sway Bar Drops and a rear Block and U-bolt kit.

### COILOVER CONVERSION

For the ultimate Super Duty suspension upgrade Fabtech offers a Coilover Conversion. These Coilover conversion mounts directly replace the stock Coil Spring buckets with super stout gusseted 1 3/4" tubing for exceptional strength. Coilover conversion system allows use of the Dirt Logic 4.0 Coilover Shocks. To complete this high end Coilover conversion, opt for our hydraulic bump stops. This Coilover Shock System is compatible with our Radius Arm and 4 Link systems.

## F250/F350

### RADIUS ARM SYSTEM

Our patented Radius Arms feature a full tubular structure strengthened by dimple die side plates, with an adjustable alignment cam at the axle to allow caster adjustment. This system is available with our replacement Coil Springs or Dirt Logic 4.0 Coilover Shock conversion and comes complete with a Trac Bar relocation bracket, Pitman Arm, Sway Bar drops, and a rear Block & U-bolt kit, or replacement rear leaf springs.

#### Kit Configurations

- |                            |                                    |
|----------------------------|------------------------------------|
| <b>Front</b>               | <b>Rear</b>                        |
| • Performance Coil Springs | • Add-a-leaves, Block & U-bolt Kit |
| • 4.0 Coilover Conversion  | • Rear Leaf Springs                |

### 4 LINK SYSTEM

At the top of our Super Duty line is our famous 4 Link System that provides unsurpassed articulation and wheel travel. Large 2" OD heavy wall links feature race style 1" Uniballs for superior strength. Thick 1/4" steel brackets secure the 4 Links to the frame without cutting or welding. This 4 Link system allows the use of our replacement Coil Springs or our Dirt Logic 4.0 Coilover Shock conversion. System also includes Billet Sway bar links, Trac Bar relocation bracket, Pitman Arm and more. Rear lift options include a block and U-bolt kit, or replacement rear leaf springs.

#### Kit Configurations

- |                            |                                    |
|----------------------------|------------------------------------|
| <b>Front</b>               | <b>Rear</b>                        |
| • Performance Coil Springs | • Add-a-leaves, Block & U-bolt Kit |
| • 4.0 Coilover Conversion  | • Rear Leaf Springs                |

### BASIC SYSTEM

This system features replacement front Performance Coil Springs with frame drop brackets that relocate the factory Radius Arms. This provides lift while retaining the proper amount of caster of the front suspension. Also included is a dropped Pitman Arm, Trac Bar and Bump Stop relocation brackets, Sway Bar Drops and a rear Block and U-bolt kit.

#### Kit Configurations

- |                            |                                    |
|----------------------------|------------------------------------|
| <b>Front</b>               | <b>Rear</b>                        |
| • Performance Coil Springs | • Add-a-leaves, Block & U-bolt Kit |
|                            | • Rear Leaf Springs                |

### COILOVER CONVERSION

For the ultimate Super Duty suspension upgrade Fabtech offers a Coilover Conversion. These Coilover conversion mounts directly replace the stock Coil Spring buckets with super stout gusseted 1 3/4" tubing for exceptional strength. Coilover conversion system allows use of the Dirt Logic 4.0 Coilover Shocks. To complete this high end Coilover conversion, opt for our hydraulic bump stops. This Coilover Shock System is compatible with our Radius Arm and 4 Link systems.

- 10" 4 LINK COILOVER SYSTEM
  - 40/15.50R18 TIRES
  - 18X10 WHEELS W/ 5" BACK SPACING

### RADIUS ARM SYSTEM

Our patented Radius Arms feature a full tubular structure strengthened by dimple die side plates, with an adjustable alignment cam at the axle to allow caster adjustment. This system is available with our replacement Coil Springs or Dirt Logic 4.0 Coilover Shock conversion and comes complete with a Trac Bar relocation bracket, Pitman Arm, Sway Bar drops, a rear Block & U-bolt kit, and replacement rear leaf springs.

#### Kit Configurations

##### Front

- Performance Coil Springs
- 4.0 Coilover Conversion

##### Rear

- Rear Leaf Springs, Block & U-bolt Kit

### 4 LINK SYSTEM

At the top of our Super Duty line is our famous 4 Link System that provides unsurpassed articulation and wheel travel. Large 2" OD heavy wall links feature race style 1" Uniballs for superior strength. Thick 1/4" steel brackets secure the 4 Links to the frame without cutting or welding. This 4 Link system allows the use of our replacement Coil Springs or our Dirt Logic 4.0 Coilover Shock conversion. System also includes Billet Sway bar links, Trac Bar relocation bracket, Pitman Arm and more. Rear lift options include a rear block & U-bolt kit, and replacement rear leaf springs.

#### Kit Configurations

##### Front

- Performance Coil Springs
- 4.0 Coilover Conversion

##### Rear

- Rear Leaf Springs, Block & U-bolt Kit

### COILOVER CONVERSION

For the ultimate Super Duty suspension upgrade Fabtech offers a Coilover Conversion. These Coilover conversion mounts directly replace the stock Coil Spring buckets with super stout gusseted 1 3/4" tubing for exceptional strength. Coilover conversion system allows use of the Dirt Logic 4.0 Coilover Shocks. To complete this high end Coilover conversion, opt for our hydraulic bump stops. This Coilover Shock System is compatible with our Radius Arm and 4 Link systems.

## FRONT MULTIPLE SHOCK SYSTEMS

For increased dampening capacity we offer a front dual shock systems. The front system attaches to the factory coil bucket for an easy installation. This bolt on shock system allow the installation of our Dirt Logic 2.25 or Performance Shocks for outstanding offroad suspension performance. Our Multiple Shock System is compatible with our Radius Arm and 4 Link systems.

## Coilover Shock Conversion

These Coilover conversion towers directly replace the stock Coil Spring buckets with super stout gusseting. The conversion system is specifically designed for our Dirt Logic 4.0 piggyback adjustable coilover shock. To complete this high end conversion opt for the Dirt Logic Hydraulic Bump Stops. The Coilover system is compatible with both our Radius Arm and 4 Link systems.

## STEERING STABILIZERS

### Performance Steering Stabilizers

Obtain increased steering control and reduce front end shimmy from oversized tires and wheels with our Steering Stabilizer kit. Easy fit, heavy duty bracketry allows for quick installation.

### Dual Dirt Logic 2.25 Resi Steering Stabilizer

With the success of our Dirt Logic Dual Steering Stabilizers we now offer a remote reservoir design. This system provides increased control for Super Duty's with oversized tires while having the benefit of additional oil and nitrogen capacity in the remote reservoirs.

## PITMAN ARM

### 2005-11 Ford F250/F350

- 1 FTS92011 Ford Pitman Arm

## ADJUSTABLE TRAC BAR

Our Trac Bar has been designed for late model Super Duty's with lift heights between 6" and 10" over stock. This adjustable design allows the front axle to be centered directly under the vehicle in small increments. The heavy duty construction utilizes the factory lower axle mount while the upper is compatible with all Fabtech Trac Bar brackets.

### 2005-11 Ford F250/F350

- 1 FTS92031 6"-10" Adjustable Trac Bar

## HEAVY DUTY CARRIER BEARING KIT

### 2008-11 Ford F250/F350

- 1 FTS92023 Heavy Duty Carrier Bearing

## TRACTION BARS

Our Traction Bars are designed to reduce rear leaf spring axle wrap caused by lift blocks and oversized tires. Typically the travel cycle of the Super Duty rear axle is an arch. Fabtech's exclusive traction bar shackle system allows the bars to float with the arched travel of the rear axle. This provides a non-binding, smooth highway ride, while still providing positive resistance to torque loads, reducing axle wrap and increasing tire traction.

### 2005-10 Ford F250/F350 (88)(89)(90)

- 1 FTS62003BK Floating Traction Bars

## 1 1/2" REAR ADD-A-LEAF KIT

### 2008-11 Ford F250/F350

- 1 FTS216 1 1/2" Add-a-leaf kit

## FOOTNOTES

29. Rear leaf springs may reduce load carrying capacity.
38. Will not work on models with digital climate control.
40. Will not work with rear traction bar systems.
41. Will not work with Leveling or Basic system.
44. Will not work with factory rear sway bar, and requires exhaust modification.
82. For use with Coilover system only.
83. Will not work with Leveling system.
84. Replaces rear block in 6" systems.
85. Replaces rear block and add-a-leaf in 8" systems.
86. For use with 6"/8" Dual Shock systems only.
87. For use with rear spring hanger & long travel leaf spring.
88. Installation of traction bars may not eliminate carrier bearing vibration on some vehicles.
89. To use with Fabtech rear leaf springs or AMP steps order FTS92025 bracket kit.
90. Must have minimum 3" tall blocks for proper clearance.

- For V10 & Diesel models only.
- Will not fit 1999-00 models with  Measure this distance  
trac bar bolt head size of 5/8".
- May not fit trucks with factory overload springs. Call for U-bolt options.

**1**

### 5.5" PERFORMANCE SYSTEM

Our Performance systems offer more than just increased ride height. The progressive thin 10-leaf front spring pack rides on nylon glide pads for a superior ride. Front springs include military wrapped front eyes with 4 leaf clamps for exceptional strength. Rear lift is accomplished with a block and add a leaf or complete rear spring.

**2**

### 6" 4.0 COILOVER CONVERSION SYSTEM

This system replaces the front leaf springs with our famous 4 Link System that provides unsurpassed articulation and wheel travel. Large 2" diameter heavy wall links feature race style 1" Uniballs for superior strength. Thick 1/4" steel brackets secure the 4 Links to the frame without cutting or welding. This system also includes our Dirt Logic 4.0 Coilover Shock conversion.

## FOOTNOTES

- Non dually models only.
- Rear springs may reduce load carrying capacity.
- Ship Truck Freight Only.
- For V10 & Diesel models only.
- Will not fit 1999-00 models with  Measure this distance  
trac bar bolt head size of 5/8".
- The Front drive shaft must be modified. Call for details.
- May not fit trucks with factory overload springs. Call for U-bolt options.

**1**

## 8" PERFORMANCE SYSTEM

Our Performance systems offer more than just increased ride height. The progressive thin 10-leaf front spring pack rides on nylon glide pads for a superior ride. Front springs include military wrapped front eyes with 4 leaf clamps for exceptional strength. Rear lift is accomplished with a block and u bolt or complete rear spring.

**2**

## 8" 4.0 COILOVER CONVERSION SYSTEM

This 100% bolt on 8" 4 Link Coilover conversion system utilizes the same 2" OD Links with race style 1" spherical bearings as our late model Super Dutys system for superior strength. The 4 link arms attach to the frame with bolt on 1/4" thick steel brackets. The link arms are attached to the factory front axle housing with massive 1/4" thick steel brackets that surround the housing and secure the 4 Link Arms for heavy offroad use. Due to the increased side load of a 4 Link suspension we include a replacement 2" OD Trac Bar with 1-1/4" Heims to properly locate the front axle throughout the travel range. The Dirt Logic 4.0 Coilover shocks attach to the frame via a large hoop style shock bucket and to the axle, integrating into the 4 Link axle brackets. The factory sway bar is relocated with billet sway bar links while triple layer limiting straps control the extended wheel travel of the front suspension. This system will provide a substantial ride quality increase both on and offroad.

# FORD 00-05 EXCURSION

**4** WD   **3.5"** KIT   **5.5"** KIT   **6"** KIT

## 3.5" SPRING HANGER SYSTEM

Obtain 3.5" of front end lift without changing the front leaf springs. The super stout spring hangers replace the factory units without welding or cutting. Excursion models will require a 2" rear block kit to level off the ride height. 2001-05 Excursion systems include replacement front frame crossmember and bumper brackets.

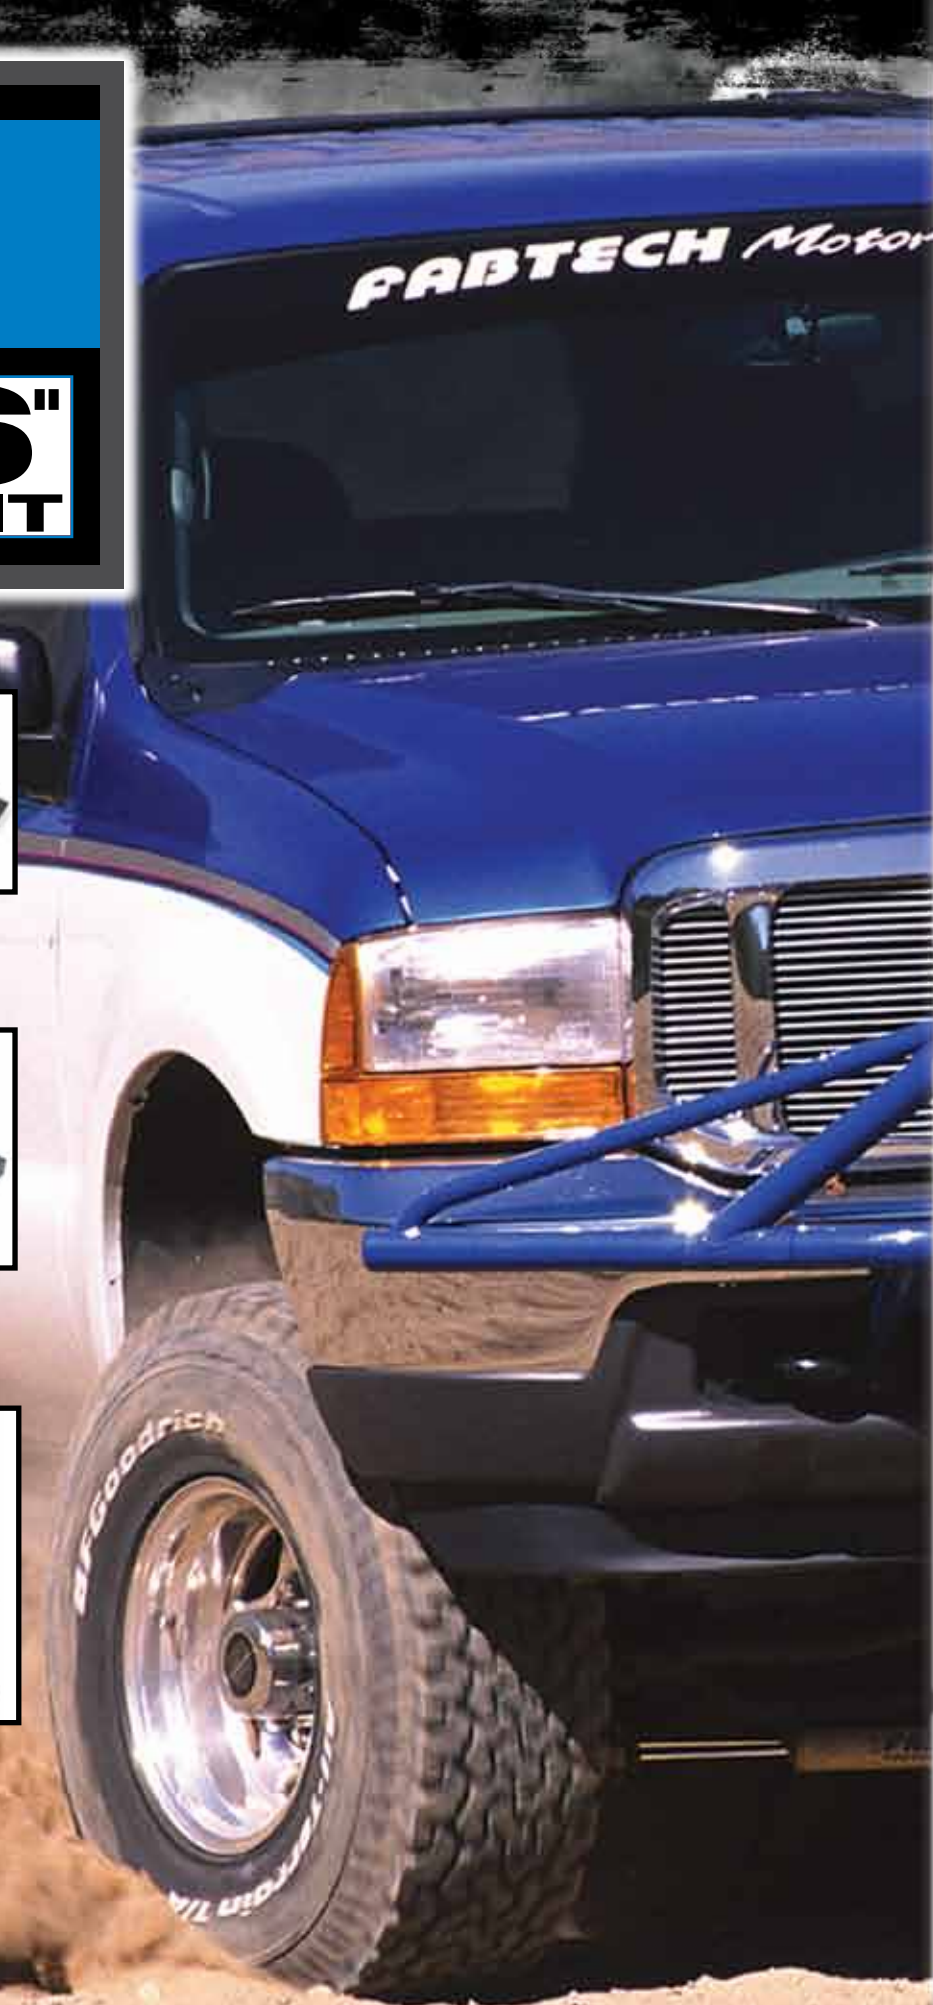

## 5.5" PERFORMANCE SYSTEM

Our Performance systems offer more than just increased ride height. The progressive thin 10-leaf front spring pack rides on nylon glide pads for a superior ride. Front springs include military wrapped front eyes with 4 leaf clamps for exceptional strength. Rear lift is accomplished with a block & u-bolt kit and complete rear leaf springs, not shown.

## 6" 4.0 COILOVER SYSTEM

This 100% bolt on 6" 4 Link Coilover conversion systems utilizes the same 2" OD Links with race style 1" spherical bearings as our 2005 Super Duty system for superior strength. The 4 link arms attach to the frame with bolt on 1/4" thick steel brackets. The link arms are attached to the factory front axle housing with massive 1/4" thick steel brackets that surround the housing and secure the 4 Link Arms for heavy offroad use. Due to the increased side load of a 4 Link suspension we include a replacement 2" OD Trac Bar with 1-1/4" Heims to properly locate the front axle throughout the travel range. The Dirt Logic 4.0 Coilover shocks attach to the frame via a large hoop style shock bucket and to the axle, integrating into the 4 Link axle brackets. The factory sway bar is relocated with billet sway bar links while triple layer limiting straps control the extended wheel travel of the front suspension. This system will provide a substantial ride quality increase both on and offroad.

## FOOTNOTES

- 29. Rear springs may reduce load carrying capacity.
- 35. Will not fit 1999-00 models with trac bar bolt head size of 5/8". Measure this distance
- 45. Spare tire must be relocated. Will not work with factory rear sway bar.
- 82. For use with 4.0 coilover system only.
- 84. Replaces rear block in 6" systems.
- 85. Replaces rear block and add-a-leaf in 8" systems.
- 88. Installation of traction bars may not eliminate carrier bearing vibration on some vehicles.
- 89. To use with Fabtech 10" system, long travel leaf springs, or AMP steps order FTS92025 bracket kit.
- 90. Must have minimum 3" tall blocks for proper clearance.
- 91. Must use OEM steering stabilizer bracket.
