TUNDRA

2007 TOYOTA TUNDRA CREWMAX
 • 6" PERFORMANCE SYSTEM
 • 35/12.50R18 TIRES
 • 18X9 WHEELS W/ 5" BACK SPACING

6" BASIC SYSTEM

The Basic System features a heavy duty shock spacer system that retains the stock coilover shocks without disassembly which provides a factory like ride. Rear lift is accomplished with a 3" block and u-bolt system and is available with rear Performance or Dirt Logic Shocks.

6" PERFORMANCE SYSTEM

The Performance System features Dirt Logic 2.5 Coilovers for a superior ride on and offroad. The factory lower control arms are relocated with high arched 1/4" thick steel crossmembers with an integrated differential skid plate for protection against offroad obstacles. Rear lift is accomplished with a 3" block and u-bolt system and is available with rear Performance or Dirt Logic Shocks.

6" PERFORMANCE SYSTEM

- Integrated Lower Control Arm Crossmembers with Differential Skid Plate included.
- Ductile Iron Steering Knuckles retain stock like turning radius with minimal track width change.
- No disassembly of factory strut assembly required for installation.
- Rack and Pinion is retained in stock position.
- Full lift height for proper clearance of 35/12.50R17 tires.
- Rear system includes Coil Spring Spacers with upper and lower tubular link arms and trac bar relocation bracket.

BASIC ADJUSTABLE COILOVER

This system features our Performance shock absorber with a replacement coil spring and adjustable coil seat for a good highway and offroad ride.

DIRT LOGIC 2.5 ADJUSTABLE COILOVER

Built for aggressive offroad driving, this Coilover features a 2.5" OD take-apart shock with height adjustability coming from the threaded body and performance coil spring. Offroad dampening capacity is so superior with this coilover we caution drivers to not drive past the limits of the stock components of the vehicle.

3" UPPER CONTROL ARM & 2.5 COILOVER SYSTEM

Obtain increased height and wheel travel for late model 4WD Tacoma's with our Upper Control Arm systems. The tubular Upper Control Arms feature 1.25" OD, .120" wall thick chromoly tube construction with 1" diameter Teflon lined uniballs that attach to the factory spindle without drilling. The replacement UCA's have been designed to work in conjunction with our Dirt Logic 2.5 Coilover shocks providing 10" of wheel travel for a complete front suspension system upgrade. Vehicle offroad suspension performance will be greatly increased due to the extensive ride tuning of the Dirt Logic 2.5 Coilovers and rear Dirt Logic 2.25's. The stance of the vehicle will become level as compared to stock and will provide additional clearance for oversized tires.

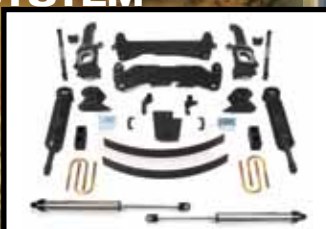

6" BASIC SYSTEM

Our 6" Basic Systems include steel coilover shock spacers that utilize the stock front coilover shocks for a factory like ride. This system includes our proven IFS technology with extended length ductile iron steering knuckles and arched crossmembers for exceptional suspension ground clearance with a 1/4" thick differential skid plate, impact struts, heavy duty tie rods, rear add-a-leaves and more.

6" PERFORMANCE SYSTEM

Our 6" Performance Systems features our Dirt Logic 2.5 adjustable coilover shocks providing superior offroad dampening capacity with a good highway ride. This system includes our proven IFS technology with extended length ductile iron steering knuckles and arched crossmembers for exceptional suspension ground clearance with a 1/4" thick differential skid plate, impact struts, heavy duty tie rods, rear add-a-leaves and more.

6" PERFORMANCE SYSTEM

Our 6" Performance System features specially valved extended length front shocks that utilize the stock coil springs for a factory like ride. Massive extended length ductile iron steering knuckles attach to high arched lower control arm crossmembers for superior strength. A 1/4" thick steel skid plate protects the front differential. Included in this system are preinstalled wheel bearings, seals and ball joints for a quick installation. Please note that this is a "bolt on" system that requires precision hydraulic press work to install.
