

BRAND INTRO

Dear Fellow Riders,

In your hands is the 2017 FirstGear® catalog. We are proud of the line and how it has become one of the staples of the industry these past 28 years. We have built FirstGear products on a core of quality, technology and value. 2016 brought many exciting changes to FirstGear. To start, we have relocated to join our family of apparel brands in California. We then hired a Brand Manager, in-house Designers and Product Managers that all have their roots in riding and building riding apparel. We have worked very closely together to re-evaluate the entire line to ensure that we are focused on our core values. With all that in mind, you are going to see that 2017 is a transitional year for us.

While we're busy designing new lines to enhance the FirstGear brand, we still offer solid, reliable clothing that provides your customers a great value for quality gear. Last year we launched the new Kilimanjaro line and the super amazing 37.5® base layer systems. Our sell-through and reviews have been quite good and those items added more innovative technology to an already complete line.

As we move ahead, closing in on 30 years, we are working very hard to build a brand that reaches not only our existing riders, but allows FirstGear to speak to the next generation of riders. We firmly believe that we build some of the best products in the industry. And, we're stepping up our efforts to offer products that compete with any of the top brands in the world but with styles, features and fit that work for American riders without compromise. We look forward to seeing you on the road, in the shops and at events in 2017.

Thank you and safe riding from the FirstGear team!

With Kind Regards,

Jeffery T. Boaz

WORLD RECORD ON MAIDEN TRIP

TO SET A WORLD RECORD, YOU MIGHT AS WELL DO IT IN A BIG WAY.

Deena Mastracci walked out of the California Department of Motor Vehicles with a shiny new motorcycle license and the goal of setting her own long distance motorcycle record. Her inspiration? Her fiancé, Carl Reese, a professional endurance rider who had previously set the fastest time on a motorcycle from Los Angeles to New York. Mastracci was up for the challenge.

DEENA AND CARL

Sponsored by FirstGear®, a premier motorcycle apparel company, Mastracci is no stranger to setting world records. The endurance driver already held five world records prior to embarking on her journey to become the “Longest, Continuous Journey by a New Licensee” record holder. That journey that totaled more than 11,000 miles and was achieved on a F800GT BMW. The trip is also her way of bringing attention to the work of the Motorcycle Relief Project, a nonprofit charity that helps veterans suffering PTSD and other injuries. The group, who arrange multi-day rides and other events for veterans, also offer counseling services for vets. “My journey was the trip of a lifetime: a terrifyingly beautiful ride and an incredible learning experience all in one,” says Mastracci. “Everything about the voyage was a challenge for me. From navigating in traffic to maneuvering through mud and ice, it was very tough. However, this journey was nothing compared to the trials that our armed forces face on a daily basis, which is why the work that the Motorcycle Relief Project does is so important to me.” Mastracci hoped that her record ride would inspire other women to ride, helping them overcome any intimidation about getting on a motorcycle.

“My journey was the trip of a lifetime: a terrifyingly beautiful ride and an incredible learning experience all in one,”

37.5° KILIMANJARO TEXTILE JACKET

WOMAN'S WHITE/BLACK PG. 27

MEN'S DAY-GLO PG. 8

The FirstGear® 37.5° Kilimanjaro jacket is our newest, high-end, waterproof-breathable shell. Performance shell jackets are the perfect outerwear option to add to a rider's base layers to create an optimum microclimate. See more on pages 8 and 27.

FIRST TIME RIDING

The cross-country trip started in Santa Clarita, California, with the harrowing Los Angeles County freeways and flyovers. She traversed the wilds of Alaska and the Arctic Circle, and then braved the extreme weather and challenging terrain of the Yukon, British Columbia and Alberta, Canada. She returned to the lower 48 states via Montana and rode through Colorado and Michigan on her

way to the Pennsylvania finish line. Anyone interested in following her progress was able to track it on a live map that was hosted on Reese's website, Facebook and Instagram.

Previously, Mastracci, along with Reese and Rodney Hawk, set the Guinness World Record for the "Shortest Charging Time Cross-Country Trip in an Electric Vehicle."

She also helped Reese set the records for "Fastest Time for Crossing the USA in an Electric Vehicle (EV)" and for a "Double Transcontinental Trip (LA-NYC-LA)." Mastracci herself holds five other EV records that she set with a Tesla P85D.

Mastracci and Reese have made it their life's mission to accomplish new driving feats. She certainly did

so after leaving the Department of Motor Vehicles with no prior on-road experience other than what she needed to obtain her license. Paramedic Jeremy Fox and fiancé Reese followed her on separate motorcycles as a safety precaution.

"I am taking on this challenge to show women, veterans or anyone intimidated by something new that the best way to overcome that fear is to drive through it," said Mastracci. "It is empowering and freeing to accomplish something that seems like an adventure. And, record attained, I am energized to take on another."

ORIGINALS

ONE'S LEGACY IS THE REPUTATION OF
ACHIEVEMENT ESTABLISHED OVER TIME.

FirstGear® Originals, names like Kilimanjaro, Kathmandu and Rainier. At Firstgear we share your passion of exploration into parts unknown. Whether crossing a state down the interstate or crossing a continent on backroads and trails, we build these as we always have with Technology, Quality and Value. We have always been focused on the keeping riders being protected and comfortable on those journeys. The Originals are the pieces for that built solid, reliable and with a fit that takes American sizing as the rule not the limited exception. We stand behind it all with a five-year warranty.

TPG | TECHNICAL PERFORMANCE GEAR

TPG stands for Technical Performance Gear, the perfect outerwear option to add to a rider's base layers creating an optimum microclimate, and our top of the line TPG Rainier and Monarch jackets are waterproof and have breathable outer shells with high-tech features. The outermost fabric is a tough, yet supple, polyester laminate with a 375[®] waterproof and breathable barrier. This 375 laminate significantly improves the comfort and performance of our technical outerwear by using microparticles to accelerate the capture-and-release of moisture vapor, which keeps you cooler when it is warm, warmer when it is cool and, above all, dry. These jackets also have all the protection and details you've come to expect from FirstGear[®]. Crash protection

comes from D30[®] brand armor at the shoulders and elbows. This armor is CE-certified to the highest level of impact protection, EN 1621-1 Level 2, absorbing up to twice the impact energy of other CE-certified protectors. D30 brand EVO T5 back armor is supple, breathable and comfortable to wear while still being the most effective impact protection. A high level of abrasion protection comes from an internal aramid panel that starts at the top of shoulder and comes down all the way to the forearm. When the weather turns wet, you have 100% waterproof zippers and a hidden rain hood that fits under your helmet.

- Two-year crash replacement warranty
- Reflective piping from shoulders down to drop-tail
- Five interior pockets and five exterior pockets
- Inner cuff wrist gaiter
- D30 elbow and shoulder guards CE certified to EN 1621-1 Level 2
- D30 back protector CE-certified to EN 1621-1 Level 1
- YKK[®] waterproof zippers in strategic areas
- YKK two-way front zipper comfort and breathability
- 8 in. rear zipper for attaching to pants
- Five-year limited warranty

 **5 YEAR WARRANTY**

37.5[®] KILIMANJARO TEXTILE JACKET

GREY/BLACK

The FirstGear 37.5[®] Kilimanjaro jacket is our newest, high-end, waterproof-breathable shell. Performance shell jackets are the perfect outerwear option to add to a rider's base layers to create an optimum microclimate. Our 420-denier nylon outer fabric was chosen for its balance of lightweight, suppleness and outstanding abrasion resistance. Added to that, we have extra abrasion-resistant, 620-denier, nylon at the elbows, upper arms and shoulders. Durable stretch fabric at the shoulders makes for bind-free riding. The 37.5 Kilimanjaro jacket is named after the 37.5 waterproof-breathable barrier. This 37.5 laminate significantly improves the comfort and performance of this technical outerwear by using microparticles to accelerate the capture-and-release of moisture vapor, which keeps you cooler when it is warm, warmer

when it is cool and, above all, dry. Water is kept out by the chassis fabric, rolled neoprene collar with hidden, under helmet, hood, storm flaps, waterproof zippers, six arm/wrist adjustments and our drop-tail cut. Featuring D30[®] brand, CE-certified, armor padding at the shoulders and elbows as well as chest panels to provide additional impact protection. D30 brand EVOT5 back armor is supple, breathable and comfortable to wear while still being the most effective impact protection. D30 is light and flexible with extraordinary energy absorption properties. FirstGear[®] was one of the first to adopt D30, and we are proud to expand our use of this extraordinary technology in the Kilimanjaro.

- Three interior pockets, including an oversized cellphone pocket
- Five exterior pockets, including an under-flap, quick access pocket
- Adjustable slider, snap collar closure
- D30 brand elbow and shoulder guards CE-certified to EN 1621-1 Level 1
- D30 back protector CE-certified to EN 1621-1 Level 1
- Microadjustable armor pocket bags allow fine tuning of armor placement
- YKK[®] waterproof zippers in strategic areas
- YKK two-way front and cuff zippers add comfort and breathability
- Reflective patches, front and back, along the body and arms
- Adjustable waist strap facilitates fit with various layering
- Top shoulder vents with hold-open straps and huge, vertical back panel vents
- Articulated sleeves for optimal fit in the riding position
- Elasticized, draw-string hem seals out the elements as required
- Grommet in left-hand warmer pocket to route heated garment cords
- Five-year limited warranty

37.5[®] KILIMANJARO MEN'S PANTS

The 37.5[®] Kilimanjaro pant is named after the 37.5 waterproof-breathable barrier inside. This 37.5 laminate significantly improves the comfort and performance of this technical outerwear by using microparticles to accelerate the capture-and-release of moisture vapor, which keeps you cooler when it is warm, warmer when it is cool and, above all, dry. This pant is designed to be worn either as an overpant or a standalone pant and has all the features expected from a high-end technical riding pant for touring, adventure touring and sport touring. The 37.5 Kilimanjaro Pant utilizes the 420-denier nylon chassis with double layers at the knees, and the inside of the legs have an added abrasion and heat-resistant layer for

longer life. The knees are designed for the riding position and there is a detachable yoke and suspenders that help keep the pants fitting properly and comfortably. With yoke and suspenders removed, there is a special, built-in, pocket for the zipper connection leaving a smooth, clean interior. These pants are up-armored using top-of-the-line D30[®] brand, T5 EVO, knee and hip protectors and both the knee and hip protectors can be microadjusted to fit your body in your riding position. There is also an adjustable lower leg gaiter to help keep out the rain and the cold in extreme weather.

- D30 armor at hips and knees are impact tested and CE-certified to EN 1621-1 level 1
- 37.5 microparticle tech regulates temperature and humidity
- YKK[®] full-length, double, side zips for easy on and off and maximum venting
- YKK waterproof zippered thigh pocket
- YKK front zipper backed by waterproof gusset
- Timeless five-pocket design with belt loops
- Available in standard, tall and short leg lengths
- Five-year limited warranty

BASEGEAR

375[®] Basegear products derive their name from the patented 375 microclimate technology. This technology helps keep the rider warmer when it's cold, cooler when it's warm and reduces the humidity that, uncomfortably, builds up between you and your riding gear. 375 technology is a chemical free process that permanently embeds, naturally

derived, active particles in the product fibers. These particles increase the evaporative surface area by over 800% accelerating your body's own heat-regulating system. Additionally, 375 particles absorb and re-radiate infrared heat energy given off by your body. 375 Basegear is the perfect complement to all your riding gear, for all year, in all weather.

37.5® TECH LINER GLOVES

The 37.5® Tech Liner Gloves are the ideal layering piece for your riding gloves. With its extraordinary wicking properties, hands stay warm when it's cold and cooler when it's hot outside. They dramatically improve the performance of any waterproof-breathable gloves.

37.5 active particles enhance the performance of waterproof-breathable fabrics by increasing the surface

area and absorbing the energy your body produces to accelerate evaporation and breathability — keeping you dry on the inside and allowing you to stay out longer. Billions of active microporous 37.5 particles provide 800% the surface area to spread moisture. These active particles utilize body heat to speed up evaporation and accelerate breathability. By using the energy your body creates to speed up evaporation you stay drier and more comfortable.

WOMEN'S

With the largest growing segment in riding coming from women, FirstGear® remains committed to having quality products that are not just shrunken men's pieces. We strive for fit and fashion that is realistic and appealing without being over the top. At the same time, we offer the same level of protection and functions found in our men's line. Top to bottom we can get you kitted in the right gear for whatever and wherever your ride takes you.

37.5[®] KILIMANJARO TEXTILE JACKET

The iconic FirstGear[®] Kilimanjaro jacket is upgraded with cutting edge technologies, design and innovative features, including a nylon-shell exterior bonded with a waterproof-breathable laminate, that serve to further its reputation as “the one jacket to have if you could only have one.”

- Waterproof-breathable, 2.5-layer, PTFE laminate technology is durable and long-lasting
- PTFE laminate incorporates revolutionary 37.5[®] advanced, microparticle technology
- D30[®] armor padding, CE-standard at shoulders, elbows and back pad
- Adjustable waist strap facilitates fit with various layering
- Top shoulder vents with hold-open straps for maximum airflow regardless of riding position
- Five-year limited warranty

PANTS

Pants and overpants we have you covered. Our overpants are a staple for the rider who wants to ride protected but not have to stay in riding gear when arriving at their destination. Our dedicated pants offer top level armor in a style that is modern without being over bulky. Pack light by packing right. Riding pants make that possible.

KATHMANDU PANTS

The lower half to our amazing jacket of the same name. Includes many features you'd find on pants at 4x the cost. With tall and short sizes available, there are very few riders it cannot fit. Ride year round with Kathmandu.

- 300-denier, high-density nylon shell with Hypertex® treatment
- Fully removable full, salopette style suspenders
- D30® armor at knees and hips
- Removable insulated liner
- Sueded exterior inner knees for effective grip
- Five-year limited warranty

37.5[®] KILIMANJARO TEXTILE PANTS

The 37.5[®] Kilimanjaro pant is named after the 37.5 waterproof-breathable barrier inside. This 37.5 laminate significantly improves the comfort and performance of this technical outerwear by using microparticles to accelerate the capture-and-release of moisture vapor, which keeps you cooler when it is warm, warmer when it is cool and, above all, dry.

This pant is designed to be worn either as an overpant or a standalone pant and has all the features expected from a high-end technical riding pant for touring, adventure touring and sport touring.

The 37.5 Kilimanjaro Pant utilizes the 420-denier nylon chassis with double layers at the knees, and the inside of the legs have an added abrasion- and heat-

resistant layer for longer life. The knees are designed for the riding position and there is a detachable yoke and suspenders that help keep the pants fitting properly and comfortably. With yoke and suspenders removed, there is a special, built-in, pocket for the zipper connection leaving a smooth, clean interior.

These pants are up-armored using top of the line D30[®] brand, T5 EVO, knee and hip protectors and both the knee and hip protectors can be microadjusted to fit your body in your riding position. There is also an adjustable lower leg gaiter to help keep out the rain and the cold in extreme weather.

- D30 armor at hips and knees are impact tested and CE-certified to EN 1621-1 level 1
- 37.5 microparticle tech regulates temperature and humidity
- YKK[®] full-length, double, side zips for easy on and off and maximum venting
- YKK waterproof zippered thigh pocket
- YKK front zipper backed by waterproof gusset
- Timeless five-pocket design with belt loops
- Available in standard, tall and short leg lengths
- Five-year warranty

COLD WEATHER

We are the last of the original heated clothing makers, our partner Warm & Safe has a trusted reputation for reliable and consistent heated gear. We recommend wearing it as a mid-layer with just the outer shell jacket on top. It should fit snug but not tight. So just the long sleeve base layer or regular shirt is all you need. Ride all year as long as the roads are clear, or use it on your sled, ATV or SxS. Just check your vehicle specs to make sure you can power it properly.

HEATED 90-WATT

HEAT PUMP VEST

No batteries or external power source required. You are the heat source! With its revolutionary air chamber technology, the FirstGear® Heat Pump Vest provides passive heat retention that's totally customizable via the included Heat Pump actuator. The smooth outerskin of this vest allows you to easily layer any outerwear on top, providing warmth when you need it on or off the bike. Poly/bamboo inner lining wicks moisture, dries quickly and minimizes odor retention.

- Two-way front zipper
- Dual, zipper-secured hand warmer pockets
- No batteries or external power source required; you are the heat source
- Two-year limited warranty

GLOVES

Gloves are in many ways the experience that tells you about a brand. At FirstGear® our gloves are made to ride in and offer superior protection from cold, wind, rain and asphalt. We do all that while still maintaining the control and feel you come to expect from a good glove. Our sizing is generous and comes in women's specifics also so you are sure to find the glove that fits your need as well as your hand with no compromises.

SWAGMAN MEN'S GLOVES

Hands are one of the areas most affected when riding in cold, blustery weather. Extend your riding season with the windproof FirstGear® Swagman Gloves—designed for barrier protection and exceptional comfort. Constructed of a unique mix of breathable materials, with a gauntlet to block air from jacket sleeves, the Swagman Gloves keep your hands warm in the windiest conditions.

- Windproof, water-resistant barrier on top of hand with a hint of stretch for maximum comfort
- Nubuck-leather palm provides outstanding grip and resists wear
- Light anti-vibration padding on palm heel for added comfort without extra bulk
- Reinforced thumb-forefinger junction for longer wear
- Notched wrist-length gauntlet can be worn under or over jacket cuffs
- Pull tab for ease of entry
- Two-year limited warranty
