JUSTIN BRAYTON

F2 CARBON MIPS®

Helmets

Carbon fiber, Kevlar®, titanium, Multi-directional Impact Protection System (MIPS®), Drylex Microfiber ... the F2 Carbon in its standard form is as close to a factory race bike as a helmet can get. Used by top FLY racers Trey Canard, Andrew Short, Weston Peick, and Justin Brayton, this helmet is out-of-the-box and on-to-the-racetrack ready.

INTEGRATED TECHNOLOGY

F2 CARBON MIPS® Helmet

INTEGRATED TECHNOLOGY

People love to be active. Let's keep it that way!

There are now many styles of helmets to choose from, old and new, but only the new generation of helmets is equipped with the MIPS® (Multi-directional Impact Protection System). MIPS® is a revolutionary technology, adding more protection. To identify the new generation of helmets, look for the little yellow MIPS® logo.

How you fall if you fall –

Most helmets are tested only by dropping them vertically onto a flat surface. MIPS® technology is the hard-earned result of over 19 years of studies and testing by some of the world's leading researchers and brain surgeons, based on a different principle – reality. Because in reality when you fall, your head usually hits the ground at an angle, creating a rotational force that leads to strain in the brain. With MIPS®, the helmet can absorb more of that rotational force, adding better protection than helmets not equipped with MIPS®.

Mimicking the brain –

The secret behind MIPS®, patented technology derives from the human brain. The brain is surrounded by a low-friction cushion of cerebrospinal fluid that protects it by allowing it to slide slightly on impact. MIPS® imitates the brain's way of protecting itself by giving the helmet its own low-friction layer between the outer shell and the liner, which also slides to absorb a portion of the energy created by an angled blow to the head. This can reduce the rotational force otherwise transmitted to your brain. The combination of the brain's own protection and MIPS® therefore provides more protection than a helmet without MIPS® technology. Very simple and very effective. MIPS® mirrors the brain's own intelligent protection system and provides an additional element to helmet safety.

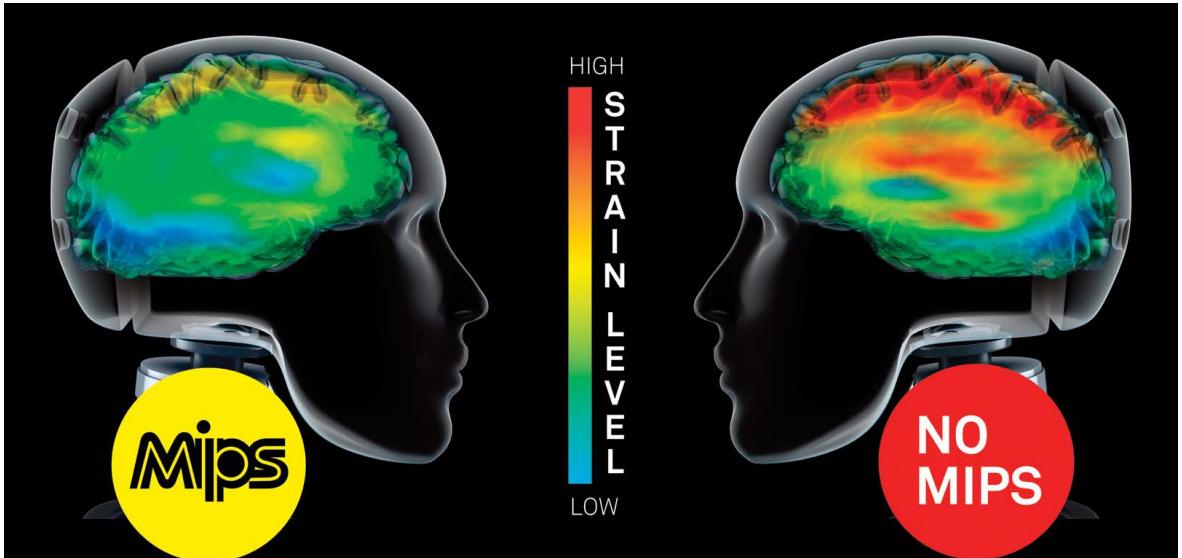

Land on your feet, even when you don't.

The MIPS® patented technology was developed by some of the world's leading researchers in biomechanics and neuroscience at the Royal Institute of Technology (KTH) and the Karolinska Institute in Sweden. You can see for yourself the difference in an angled impact between helmets with and without MIPS®. With exactly the same speed and angle, the results are very different. The pictures speak for themselves – the more red areas, the more strain in the brain. Gain peace of mind by helping to protect your brain with a new standard of technology currently on the market, MIPS®.

MIPS® integrated layer

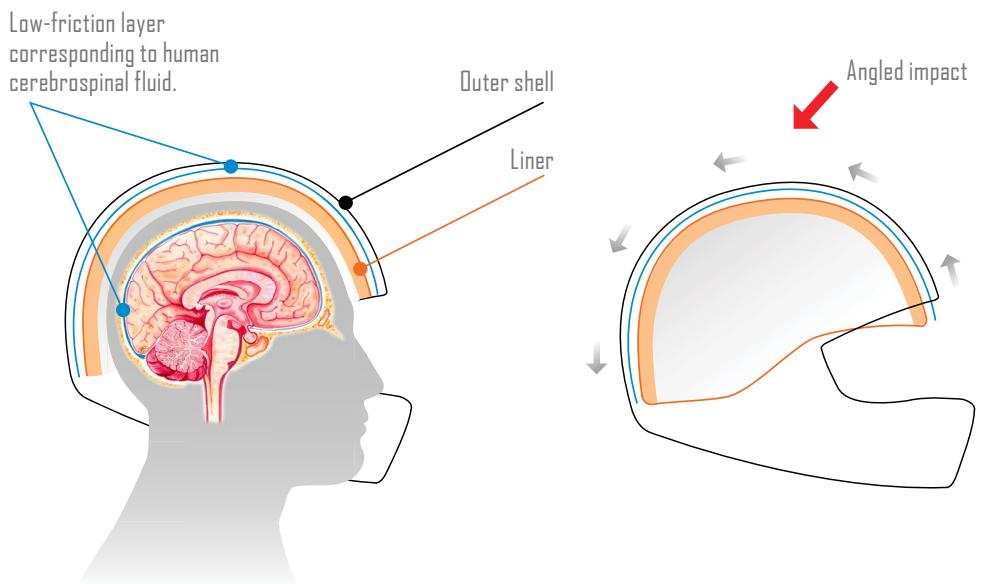

When it comes to safety, a helmet with MIPS® is the obvious choice.

● Deformation of the Brain from an Angled Impact

This helmet is equipped with MIPS® – a unique technology developed to reduce brain injuries. Conventional helmets are tested by dropping them vertically onto a flat surface. MIPS® is constructed to deal with how most accidents occur, with angled impacts to the head. MIPS® sets a new standard in helmet safety.

Figures Left: Finite Element Model of the human head. Developed by Dr Svein Kleiven, KTH. Software: LSDYNA by courtesy of ERAB, Sweden.

The Invention

MIPS® imitates the brain's way of protecting itself by giving the helmet its own low-friction layer between the outer shell and the head, to absorb much of the rotational violence created by an angled blow. Very simple and very effective.

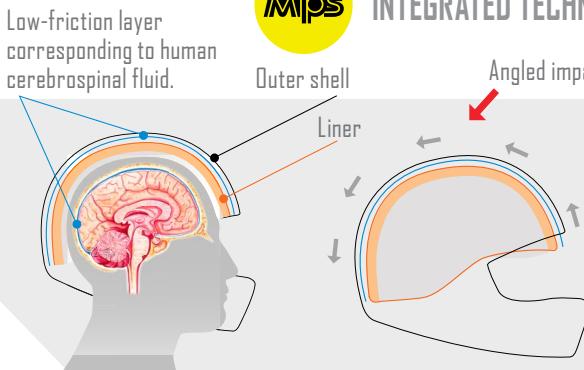

F2 CARBON MIPS® Helmet

XS - 2X

1. Meets or exceeds the toughest safety standards on the market. Snell 2015, DOT approved for USA. Other standards include: ECE and AS (Australian).
2. Shell is constructed using state-of-the-art, aircraft grade woven carbon fiber and Kevlar® composite materials, which create superior strength while remaining extremely light
3. New MIPS® low-friction layer can absorb more of the rotational force of impacts, adding more protection than other helmets can offer
4. Dual density EPS liner combines two layers of EPS (Expanded Polystyrene), one softer, one slightly harder to provide more progressive impact absorption for different levels of impact
5. Multi-port air induction cooling system includes 11 intake and 4 exhaust vents that create massive airflow to keep your head cool
6. Quad-vent goggle anti-fog vents above goggle eye port draw air from goggle to help clear away fog
7. Custom molded rubber trim with integrated nose guard helps keep rocks and debris away from your nose
8. New Quick Release washable COOLMAX® comfort liner & cheek pads absorb sweat, provide plenty of ventilation, and are easy to remove
9. Flow through EPS (Expanded Polystyrene) and comfort liner air system align to maximize airflow
10. Helmet is constructed using super-strong, lightweight machined aluminum screws, rivets, and stainless steel D-rings for superior strength and years of worry free use
11. Optional carbon fiber intake vent wing can be added to the helmet for increased direction of airflow on the front vents

TREKKER

Helmets

Capture the spirit of adventure with this crossover design ideal for dual sport and adventure riding. The Trekker offers the versatility of riding with a shield or goggles; and just like the trail ahead, the direction you choose is up to you.

TREKKER Helmet XS - 2X

1. New redesigned shield comes equipped with a new shield lock system
2. Side plate covers are now included and can be used when the visor is removed for the full face street look
3. New and improved fully removable and washable Coolmax® interior helps keep your helmet clean
4. D.O.T. & ECE approved advanced Poly Alloy shell construction combines high-strength poly materials to create an aggressive design that is durable and lightweight
5. Revised modern style visor allows the shield to be fully hidden when raised
6. New mouthpiece allows for consistent air flow
7. Dual-Density EPS liner helps reduce the shock of impact by creating a more progressive impact absorption zone
8. Unique visor shape allows for use of goggles when the shield is in the open or closed position
9. 3M Highly visible reflective stickers included for increased visibility and safety
10. 16 total vents (8 intake, 8 Exhaust) circulate large volume of airflow to help keep your head cool
11. Adjustable vents include: 1 mouthpiece, 2 brow, and 2 rear

LITE HYDROGEN

Racewear

The original stretch-fabric racewear, our third generation Lite Hydrogen continues to lead the way in lightweight minimalist racewear design. With input from FLY professional team riders, our designers created non-restrictive, minimalist racewear that eliminates non-essential features and replaces them with high-end breathable elastic woven fabric. The result is the lightest, most flexible and breathable gear on the market.

LITE HYDROGEN JERSEY

S - 2X

1. Multi-panel construction for maximum performance and a comfortable fit
2. Low profile multi-directional mesh collar for comfort, function and increased airflow
3. Open zero-cuff with mesh helps reduce arm pump and increase airflow
4. Mesh ventilation panels integrated into the jersey in key areas to help dissipate unwanted heat
5. Tagless printed collar for added comfort
6. Sublimated graphics are the highest quality in powerful detailed graphics
7. Athletic fit: fits close to the body with minimal excess

LITE HYDROGEN PANT

28 - 38

1. Patent pending 2d Buckle System® is the flattest buckle system ever made in MX pants. Built for safety, strength, and maximum adjustability. Invented by Fly Racing, and the first of its kind on the market
2. 90% stretch panel construction using an all new material giving maximum comfort and allowing the pants to move with your body like skin
3. Leather heat shield panels with Kevlar® stitching located on the inside of each leg for durability and heat resistance
4. Ratcheting Fly closure allows for adjustability and positive closure for a secure fit
5. Exclusive zipper lock system creates a fail-safe & keeps pants closed and secure
6. Stretch-rib panels for flexibility and function, where you want it most
7. Ergonomically pre-shaped knee generously contoured to accommodate all types of knee braces and guards
8. Strategically placed mesh panels on back of knee and lower leg, helps keep you cool
9. Full-floating seat surrounded by stretch-rib material, designed to move with you
10. Customizable Leg Cuff Design: low profile stretch cuffs with access to remove elastic band
11. Sublimated graphics are the highest quality in powerful detailed graphics

EVOLUTION 2.0

Racewear

Because of the sheer amount of the horsepower and torque created by the modern dirt bike, today's racewear must withstand tremendous forces. It must be lightweight, and yet still be durable. Racing Evolution 2.0 racewear with integrated closure system race pant designed to provide comfort, smooth even closure, no pressure, simple one-handed adjustment. Evolution 2.0 next racerwear built to withstand the rigors created by the modern dirt bike.

Boa® Closure System

EVOLUTION 2.0 JERSEY

YX - 2X

1. Low profile multi-panel construction for maximum performance and a comfortable fit
2. Multi-directional Lycra® stretch collar for comfort and function
3. Open zero-cuff with Lycra® gusset reduces arm pump and provides a non-restrictive feel
4. Full mesh back, plus mesh integrated into key areas to dissipate heat and help keep you dry
5. Reinforced laser-cut perforations in key areas for advanced ventilation
6. Tagless printed collar for complete comfort
7. Sublimated graphics are the highest quality in powerful detailed graphics
8. Silicone printed tail helps keep the jersey tucked in
9. Pro fit with ergonomic arms and slightly slim cut

JUSTIN BRAYTON

KINETIC

Racewear

Our Kinetic line is the new standard for what a rider expects from racewear. This is a pant and jersey combo that complements a rider's movements on the motorcycle, eliminates unnecessary distractions, is on trend and at the same time affordable.

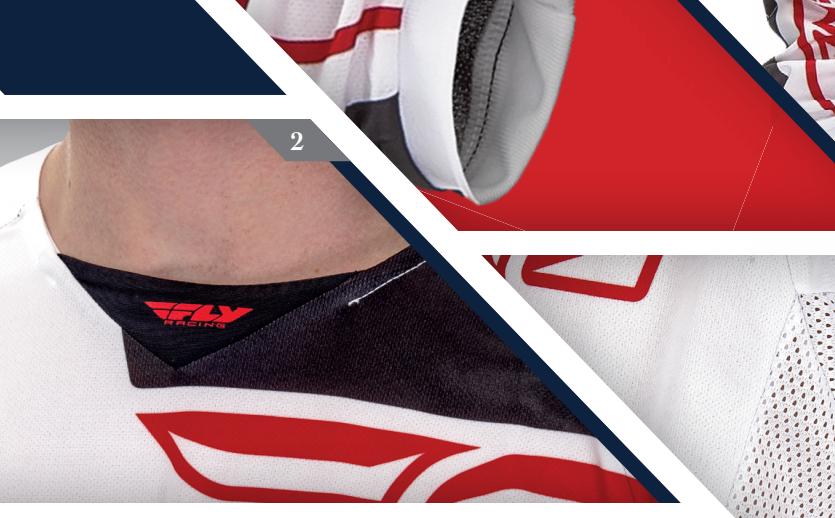

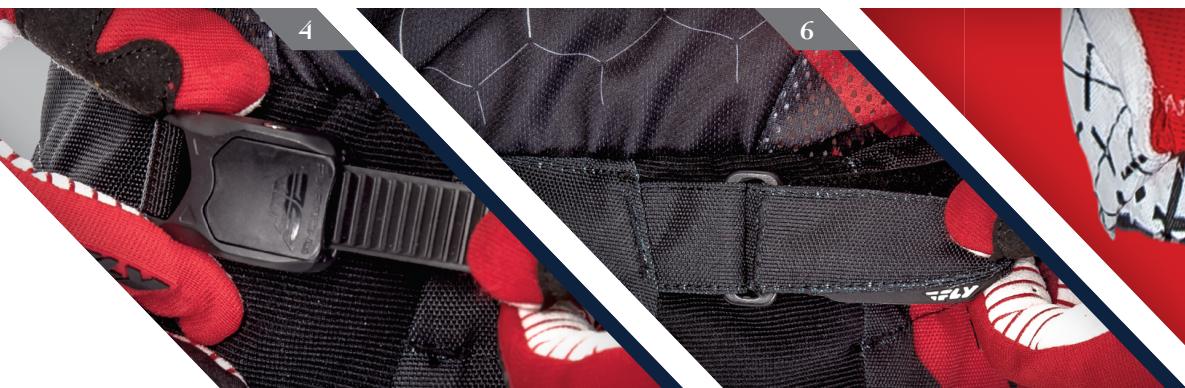

KINETIC JERSEY

YS - YL
YX - 2X

1. Multi-panel Construction for maximum performance and comfortable fit
2. Comfort-Stretch collar
3. Shorty cuffs with elastic sleeves reduce unwanted arm pump
4. Mesh ventilation panels integrated into the jersey in key areas to help dissipate heat
5. Tagless printed collar for added comfort
6. Sublimated graphics are the highest quality in powerful detailed graphics
7. Extended tail helps keep jersey tucked in
8. Standard fit – not too loose, not too tight

KINETIC PANT

18 - 26
28 - 44

1. Ultra-durable multi-panel 900D construction to withstand the rigors of track and trail while providing extra breathability
2. Leather heat shield panels with Kevlar® stitching located on the inside of each leg for durability and heat resistance
3. Ergonomically pre-shaped and fully vented knee generously contoured to accommodate all types of knee braces and guards while a massive air-intake system cools and protects
4. Ratcheting Fly closure allows for adjustability and positive closure for a secure fit
5. Exclusive zipper lock system keeps pants closed and secure
6. Adjustable waist belt for maximum fit and adjustability on the go
7. "Soft-Flex" protective rubber badging ventilated for increased airflow, mechanically integrated
8. Stretch-rib panels strategically placed for flexibility where you want it most
9. Comfort mesh liner keeps you comfortable and cool
10. Full-Floating seat surrounded by stretch-rib material, designed to move with you
11. Customizable leg cuff design: low profile stretch cuffs with removable elastic band
12. Internal pocket located inside the waistband
13. Sublimated graphics are the highest quality in powerful detailed graphics

KINETIC MESH

Racewear

Fully vented jersey and mesh paneling on the pants where ventilation is needed the most, yet still as durable as the standard Kinetic gear. The Kinetic Mesh line has also been expanded to help you make the most out of the long summer heat in the great outdoors.

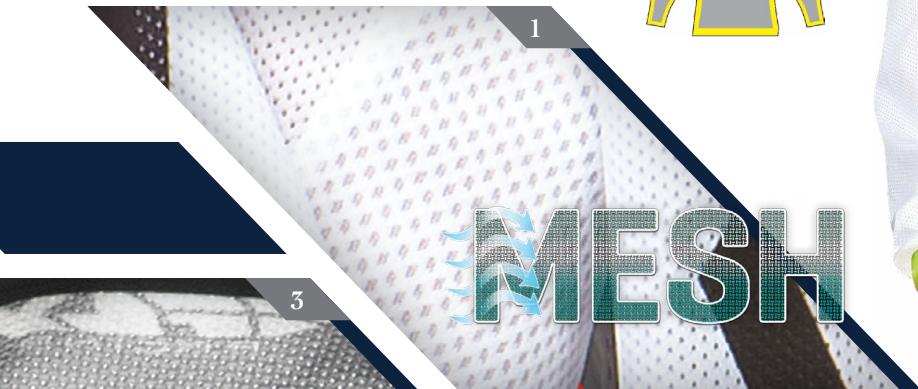

KINETIC MESH JERSEY

YX - 2X

1. Integrated Mesh-tech panel design allows massive airflow to help keep you cool
2. Multi-panel construction for maximum performance and a comfortable fit
3. Comfort-Stretch collar constructed of thermoplastic rubber, Lycra® and stretch-rib materials for increased function and fit
4. Shorty cuffs with elastic sleeves reduces unwanted arm pump
5. Mesh ventilation panels integrated into the jersey in key areas helps dissipate unwanted heat
6. Tagless printed collar for added comfort
7. Sublimated graphics are the highest quality in powerful detailed graphics
8. Extended tail helps keep jersey tucked into pants
9. Standard fit – not too loose, not too tight

RORY SULLIVAN

PATROL XC

Offroad

Versatility, adjustability, and customization: words that describe our Patrol and Patrol XC offroad gear; with the end goal being to make your time in the saddle more enjoyable. The Patrol line includes products designed to adapt to the varying temperatures and riding conditions experienced out on the trail; as well as for custom on-the-fly adjustments that make a big difference when riding for extended periods of time.

PATROL XC JERSEY

S - 2X

1. Abrasion resistant thick mesh arm panels for added arm protection and breathability
2. Zippered pockets located on the lower back with left and right side access
3. Strategically placed padding on the shoulder and elbow to increase protection
4. Multi-panel construction for maximum performance and comfortable fit
5. Low profile multi-directional Lycra® stretch collar
6. Mesh ventilation panels integrated into the jersey in key areas to help dissipate unwanted heat
7. Tagless printed collar
8. Minimal cuff reduces arm pump, provides a non-restrictive feel
9. Lycra® gusseted thumbhole allows you to cover your wrists
10. Extended tail helps keep jersey tucked in
11. Sublimated graphics
12. Standard Fit – not too loose and not too tight

PATROL XC PANTS

30 - 40

1. Two zippered and padded pockets help carry all your extra goods and are angled for easy access
2. Ultra-durable multi-panel 900D construction to withstand the rigors of the trail while providing extra breathability
3. Leather heat shield panels with Kevlar® stitching located on the inside of each leg for durability and heat resistance
4. Large zippered vents strategically located on the front and back of the upper leg to allow for massive airflow and cooling
5. Ergonomically pre-shaped & fully vented knee generously contoured to accommodate all types of knee braces and guards while a massive air-intake system cools and protects
6. Exclusive zipper lock system keeps pants closed and secure
7. "Soft-Flex" protective rubber badging ventilated for increased airflow, mechanically integrated
8. Stretch-rib panels strategically placed for flexibility where you want it most
9. Comfort mesh liner helps keep you comfortable and cool
10. Full-floating seat surrounded by stretch-rib material, designed to move with you
11. Internal pocket located inside the waistband

JARROD SCHLAPIA

PATROL

Offroad

The ability to adapt to varying temperatures and riding conditions as well as custom on-the-ride adjustments was imperative when we designed the Patrol line. No matter if it's trail, dual sport or adventure. Patrol Offroad gear is designed for performance and versatility.

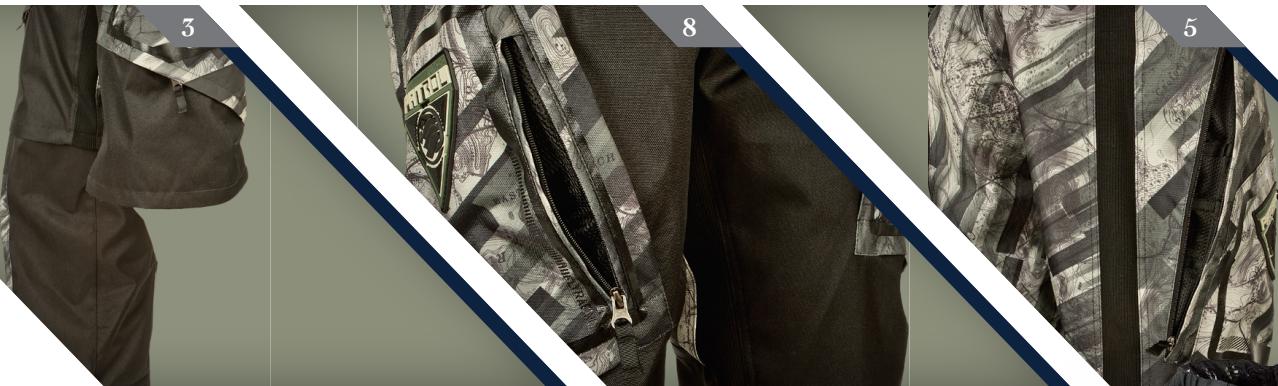

PATROL JERSEY

S - 3X

1. Multi-panel construction for maximum performance and comfortable fit
2. Reflective print in key areas for increased visibility
3. Comfort-stretch collar Lycra® and stretch-rib materials for increased function and great fit
4. Mesh ventilation panels integrated into the jersey in key areas to help dissipate unwanted heat
5. Tagless printed collar for added comfort
6. Shorty cuffs with elastic sleeves reduces unwanted arm pump
7. Extended tail helps keep jersey tucked in
8. Sublimated graphics are the highest quality in powerful detailed graphics
9. Standard fit – not too loose, not too tight

PATROL PANT

30 - 48

1. Multi-design and function – can easily be converted into a variety of configurations to provide all day comfort and performance.
2. Over-boot style provides a comfortable fit over most boots
3. Zip off lower legs allow the pant to quickly convert to short without removing your boots
4. Velcro® adjustable cuff & calfs help keep the lower leg secure and in position
5. 6 large zippered vents strategically located on the front and back of the upper leg to allow for massive airflow and cooling. Plus, knee zip can be opened for additional airflow.
6. Ratcheting Fly closure allows for adjustability and positive closure for a secure fit
7. Patent pending 2D Buckle System® – flattest buckle system ever made in MX pants. Built for safety, strength, and maximum adjustability. Invented by Fly Racing, and the first of its kind on the market
8. 2 zippered pockets help carry all your extra goods and are angled for easy access on bike
9. Reflective tape for increased visibility
10. Exclusive zipper lock system keeps pants closed and secure
11. Stretch-rib panels strategically placed for flexibility where you want it most
12. Internal pocket located inside the waistband
13. Sublimated graphics are the highest quality in powerful detailed graphics

PATROL JACKET Offroad

S - 3X

1. Can easily be converted into a variety of configurations to provide all day comfort and performance.
2. Ultra-durable nylon construction with ballistic nylon reinforcement panels in key areas
3. Zip-off sleeves easily convert the jacket to a vest
4. Massive ventilation can be customized via the two large tuck away chest vents, and full back rear vent folds away into rear cargo compartment
5. Reflective tape increases visibility
6. Rear cargo compartment is great for storing the sleeves when in vest mode, and storing larger items
7. Self-Storage jacket can be stored inside the rear cargo compartment when turned inside out and easily carried with the attachment waist belt
8. Zippered main entry with Velcro® storm flap helps keep the elements out of your jacket
9. Heavy-duty elbow panels provide excellent abrasion resistance
10. Internal bungee volume adjusters give the jacket a custom and secure fit
11. Ventilated mesh liner helps keep you comfortable
12. Hydration tube loops allow you to easily route your drink tube over the shoulder

13. Adjustable, gusseted, hip relief with Velcro® waist adjustment for added comfort
14. Adjustable Velcro® and neoprene cuffs
15. Neoprene stretch collar is fleece lined for added comfort with adjustable shock cord
16. Pockets include: 2 lower front cargos, 2 zippered hand warmers, 2 zippered upper chests, 1 rear cargo.

5'11" - 6'	181 - 183		S/M or L/XL *	L/XL
6' - 6'1"	183 - 185		S/M or L/XL *	L/XL
6'1" - 6'3"+	185 - 190+			L/XL

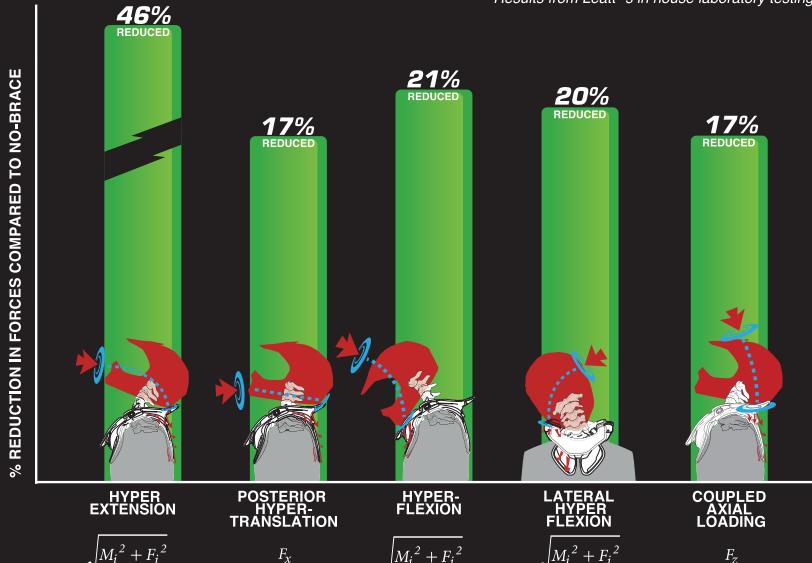

ft cm

* Size recommendation S/M or L/XL refers to either a S/M in the largest setting or a L/XL in the smallest setting.

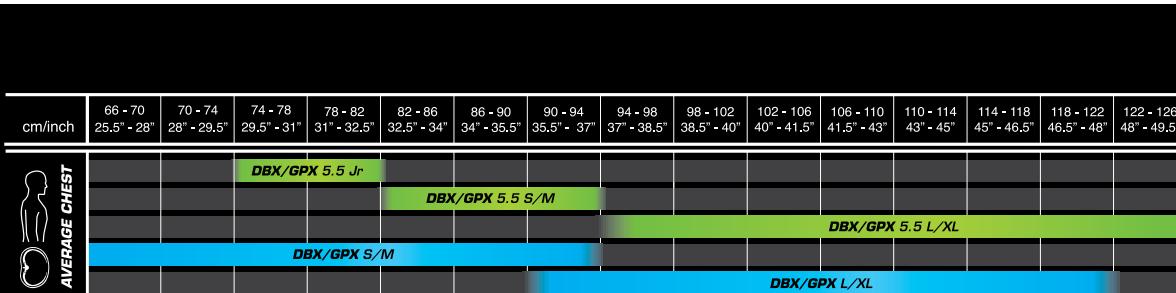

NECK BRACE VS. NO BRACE

Results from Leatt's in house laboratory testing

Hyperextension: Over-bending of the head in rearward direction. Posterior Hypertranslation: Extreme movement of head and helmet, rearward on the neck. Hyperflexion: Over-bending of the head in forward direction. Lateral Hyperflexion: Over-bending of the head to one side. Coupled Axial Loading: Helps prevent axial loading only when the axial forces act in combination with other mechanisms.

- To determine the correct size: locate the correct brace based on your chest circumference indicated along the top line
- Chart applies to riders with average proportions. If you have a flat/barrel shaped chest you can refer to the complete sizing chart at www.leatt.com.
- Chest measurement: measure just under the arms, across the fullest part of the chest, around the shoulder blades holding the tape firm and level

- If the chest measurement is on the borderline between two sizes, go to the higher size for a better fit.
- The chart is based on the fact that the brace will be worn directly on the body. If the brace will be worn with other protective gear this size change must be taken into consideration.

CONVERTIBLE II DEFLECTOR Protection

With everyone using larger neck braces these days you need a convenient chest protector that fits over your brace quickly. We've developed our "Quick Release" system to solve this problem so you can totally open and close the neck on demand. This is the most versatile chest protector on the market. Adjustable enough to fit a huge range of body shapes. Plastic is strong and beefy so you can ride with confidence that you have quality on your back. Not to mention it can attach to our Hydropack water system for long hot rides.

1. Quick release neck strap so you can easily use with or without a neck brace and allows for quick and easy adjustment
2. Removable plastic shoulders allow for more options whether using it under a jersey or improving neck brace mobility
3. High-impact plastic construction with vented front and back panels for maximum airflow and protection
4. Quick-snap removable Lycra® foam allows for easy cleaning and even a color change of interior foam panels
5. Shields your arm from the bushes on a trail ride and offers additional protection no matter where you ride
6. Anatomically correct design offers comfort, movement and protection. Fully adjustable with aluminum hardware

FLY BASE LAYERS HEAVY WEIGHT Protection

1. FLY's heavyweight base-layers are perfect for those colder days, for extra warmth that still wicks moisture fast and dries quick
2. Flat-Lock stitch seam construction for added comfort
3. Ergonomic panels are form fitting (non-compression)
4. Multi-Direction stretch fabric allows for un-restricted range of motion
5. UPF 40+ sun protection
6. Odor control

TREY CANARD

SECTOR PREMIUM RACE BOOTS

Protection

The Sector represents FLY Racing's entry into the premium offroad boot segment and is packed with the features and technology you've come to expect from every FLY Racing product. Key premium features include the Sector's Torsion Control Protection System, easy-to-use positive latch buckles, and super-comfortable slip-on inner bootie system. The Sector provides an exceptional level of protection and comfort that's designed for motocross and offroad competition at the highest levels.

SECTOR PREMIUM RACE BOOTS *Protection*

1. Torsion Control System® is a unique structure, which reduces the risk of ankle injury by restricting excessive backwards, forwards and sideways foot torsion while allowing necessary freedom of movement
2. Slip-on inner bootie constructed from breathable materials for increased comfort and includes gel inserts for extra protection of the malleolus (ankle) bones
3. Positive latch aluminum buckles ensure your buckles stay cinched, yet remain easy to close and easy to open
4. Adjustable strap system allows for micro-adjustments by shortening or lengthening straps to accommodate rider calf/leg sizes
5. Breathable 3D mesh comfort lining throughout the boot interior provides an extra level of comfort
6. Microfiber upper gator construction provides a high level of abrasion and water resistance
7. Reinforced shin plate with polyurethane ankle, rear heel, and toe box provides added protection from impacts and debris
8. Preformed removable foot bed cradles and supports the heel while enhancing stability and support
9. Single compound replaceable rubber sole
10. Inner rubber heat guard
11. All buckles and straps are replaceable
12. CE certification

WHITE

MAVERIK MX BOOTS

Protection

Just like your hands, your feet are one of the most important aspects of riding a motorcycle. When you think about how often you shift gears and work the rear brake pedal you begin to realize the importance of good riding boots. FLY riding boots combine protection, durability, and value to keep you grabbing gears for years to come.

BLACK

HI-VIS

MAVERIK MX BOOTS *Protection*

1. Adult, youth & mini sizes adult (four-buckle), youth (three-buckle) and mini (two-buckle) designs to accommodate kids to adults
2. 3D shin protection pre-shaped molded plastic adds impact protection and comfort
3. Adjustable quick lock buckles with a solid locked in feel and an open design keeps dirt from clogging the function
4. 3D molded shift protection this plastic molded panel saves your boot from premature wear. Don't miss a shift with the added grooves and texture to aid in grabbing the shift lever
5. Elastic gaiter provides a comfortable rim around your calf while sealing the opening from debris
6. Steel toe guard gives that finished look and protects the front of the sole from delaminating
7. No more burnt plastic with this boot's leather heat shield. Leather is long lasting and won't melt
8. Articulated rear ankle gives the subtle flexibility to bend your foot down, yet still remains supportive
9. Inner ankle protection made of durable and flexible plastic, this panel keeps you close to the bike with a protective shield between your foot and the elements
10. Race sole w/steel internal shank is laminated into the length of the sole. Steel provides the rigid strength needed during the impact and stress of motocross
