 Edition 2016  
 Supersedes 431-2020 [2013]

## PASSENGER CAR + LIGHT TRUCK APPLICATIONS

Includes 2001 + Newer Passenger Cars + Light Trucks  
 For 2000 + Older Passenger Cars + Light Trucks,  
 See Catalog #431-2050

OUR WORK IS OUR BOND

---

## CENTURY SERIES MICRO-V® BELTS

The culmination of a century of hard work is embodied by Gates Century Series. We've taken the best belt technology and advanced it with superior construction, exceptional fit, durability and value. Century Series is our commitment that we've created the right belt for the right application. Our work is our bond.

## Warning

Be safe! Do not use Gates belts, pulleys or sprockets on any aircraft propeller or rotor drive systems or in-flight accessory drives. Gates products are not designed or intended for aircraft use.

## Caution

Use Gates products only on applications specified in Gates literature. Install and maintain products according to the vehicle manufacturers' recommended procedures and with recommended tools. Failure to follow these instructions could result in injury or property damage. Gates disclaims all liability due to failure to follow these instructions.

## Limited Warranty for the Life of the Merchandise

Goods are warranted to be free from defects in material or workmanship for the life of the Goods (or the published recommended replacement interval specified by Gates). Gates will replace or repair, at its option, any Goods proved defective in material or workmanship during the warranty period. This is the sole remedy for breach of warranty. Color fade and color difference is not warranted. This warranty is void if the defect is caused by improper installation, use or maintenance of the Goods, or used for racing or competition. Goods are not warranted to comply with laws that may apply to uses of the Goods not stated in related materials, e.g., use in manned or unmanned aviation or life support applications.

ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSLY DISCLAIMED. FAILURE TO REPLACE TIMING BELTS OR OTHER GATES PRODUCTS AS SPECIFIED MAY RESULT IN CATASTROPHIC ENGINE OR EQUIPMENT DAMAGE FOR WHICH GATES DISCLAIMS ALL RESPONSIBILITY, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

## Gates Engineered Solution Kits

**Solution Kits are precision engineered by Gates – the world’s most experienced designer and manufacturer of premium quality parts.**

### **Audi/VW “Master Kits,” 1998-2005**

**Part numbers 38192MK1, 38193MK1 + 38193MK2**

- Application specific kits created for high labor applications where the front end module (bumper, grille, radiator, etc.) must be pulled forward for access to accessory and timing belt systems.
- Kit reduces overall labor time and expense when repairing accessory or timing belt systems.

### **Dodge Caliber, Dakota, Durango + Jeep Compass, Patriot, Chrysler Passenger Cars, 2000-2012**

**Part number 32948K1**

- Standard maintenance procedures can damage the upper hose filler neck.
- Permanent and inexpensive fix for damaged filler neck.

### **Ford Crown Victoria 4.6L V8 (fleet), 2003-2011**

**Part numbers 38189K1 + 38189K2**

- Kits allow complete service of accessory drive, including Alternator Decoupler Pulley (ADP), without replacing expensive alternator.
- Installation of the kit will ensure longer durability and less costly repair for the accessory drive.

### **Toyota Corolla, Celica + Matrix 1.8L (1ZZ-FE) 4-Cyl., 1998-2008**

**Part numbers 39068K1 + 39068K2**

- Chronic noise issue [squealing or rattling noise from engine particularly at low speeds] with accessory belt drive system.
- Reduces comebacks and is a permanent solution for noise issues.
- Reference Technical Service Bulletin: TSB EG014-01, TSB EG015-01, and TSB EG021-07.

**From belt jump off to chronic belt noise, we offer a line of specially engineered solutions to enhance Original Equipment designs so customer vehicles are better than when they left the showroom. At Gates, we understand what you need to make your customers happy.**

**Chrysler, Dodge + Plymouth Mini-Van 3.0L-3.8L V6, 1993-2000**  
**Part numbers 38342K, 38379K + 38398K**

- Under rain or snow conditions, the serpentine belt could come off leaving your customer stranded.
- Delivers the proper tension and performance to the belt drive system making it virtually impossible for the belt to jump off.
- Reference Technical Service Bulletin: TSB 07-01-99 and 07-02-94.

**Toyota Camry, Solara, Highlander + RAV4 2.4L 4-Cyl., 2001-2004**  
**Part number 38216K**

- Noise from engine compartment during vehicle operation, especially after cold soak.
- Provides proper tension and belt surface to correct problem.
- Reference Technical Service Bulletin: TSB E6040-04.

**Ford F-Series Trucks 7.3L Diesel, 1999-2003**

**\* Part numbers 22434K - April 28, 2001 + 22690K - April 29, 2001-2003**

Before

After

\* Lower hose differs after April 28, 2001.

- Kit designed to correct OEM situation where upper radiator hose must be removed to replace the serpentine accessory drive belt.
- OE upper radiator hose is routed through accessory drive belt system [left photo]. To replace belt, cooling system must be drained and upper hose removed, adding additional cost and labor.
- Kit designed to route upper hose around accessory drive system, allowing belt to be replaced without draining cooling system and removing radiator hoses [right photo] reducing labor by up to 50% on future belt replacement.

**Honda Civic 1.8L 4-Cyl., 2006**  
**Part number 39054K**

- Accessory drive belt routing produces excessive force on tensioner causing tensioner misalignment, belt noise and possible tensioner bolt failure.
- New belt length and construction allow for new belt routing, reducing force on tensioner and tensioner bolt.
- Reference Technical Service Bulletin: 09-007.

**- Continued on next page**

## Gates Engineered Solution Kits

### **Honda Odyssey 3.5L V6, 1999-2001**

**Part number 38327K**

- Buzzing or humming sound from accessory drive, particularly at the alternator.
- Provides proper pulley friction and tension to eliminate noise.
- Reference Technical Service Bulletin: TSB 03-052.

### **Mazda 6 2.3L 4-Cyl., 2003-2005**

**Part number 38408K**

- Squeaking or rattling may emit from engine compartment during normal driving conditions.
- New tensioner design prevents tensioner spring-to-housing contact while new belt reduces overall noise.
- Reference Technical Service Bulletin: 01-018/05.

### **Nissan Frontier, Pathfinder + Xterra 4.0L V6, 2005-2008**

**Part number 38378K**

- OE tensioner does not provide proper tension to serpentine belt, causing belt squeal.
- Delivers required tension and belt grip to correct problem.
- Reference Technical Service Bulletin: TSB NTB06-072A.

**Dodge + Chrysler Mini-Van 3.3L-3.8L V6, 2001-2007**

**Part number 38185K**

- OE-exact match of all OEM serpentine drive components.
- Solution kit consists of five parts [one belt, one tensioner, one bolt, one decoupler pulley, and one dust cap]

**Ford E450 Super Duty Trucks 5.4L V8, 2008-2013**

**Part number 38274K1**

- Solution kit consists of four components [one belt, one tensioner, and two idlers].
- Exclusive, Gates-only coverage.
- Belt, tensioner and pulleys all included for maximum service life.

**GM Caprice + Impala SS 5.7L V8, 1989-1996**

**Part number 260349756K**

- OE-equivalent to former GM power steering reservoir hose solution kit.
- OEM part discontinued, and no competitive aftermarket part offered.
- Solution kit consists of three components [one molded power steering hose, and two Super Hex clamps].

# Timing Belt System

**Today, Gates is the world's largest manufacturer of Timing Belts and Timing Component Kits (TCKs). Import or Domestic, for nearly every make and model, Gates covers all of your automotive applications with Timing Belts and TCKs that are OE-equivalent or better in service life and performance. As the Original Equipment Manufacturer (OEM) for virtually every vehicle manufacturer worldwide, you can be confident every time you install Gates. Restore your customers' drive system to factory original condition with Gates Timing Belts and Timing Component Kits.**

## Automotive Timing Belts

Gates is the largest global manufacturer of OE timing belts. This means Gates is able to cover the Aftermarket with timing belts that are OE-equivalent, or better, in service life and performance. Our timing belts are manufactured using the same high grade materials and processes as the OE to ensure superior heat and contamination resistance. Import or domestic, Gates timing belts provide the most extensive coverage in the industry.

- Aramid reinforced nylon jackets and back side jackets for longer wear.
- High grade HNBR rubber for superior heat and contamination resistance.
- Unlike some competitors, Gates does not substitute inferior belt constructions for premium constructions specified by the OEM on any application.
- Premium high strength tensile members.
- Most extensive coverage in the industry. Import or Domestic.

## Timing Component Kits

Why take a chance? With Gates TCKs, you can avoid warranties and comebacks by replacing all critical system components at the same time.

- Popular kits covering both Import and Domestic vehicles include OE Exact or OE Performance tensioners and idlers.
- Kits for virtually every timing belt-driven Import and Domestic application.
- Total solution for any application, including belts, idler(s), tensioners, supporting hardware, instructions and Technical Service Bulletins for troublesome applications.
- Great convenience. Ease of parts sourcing. Reduced customer comebacks.

## Timing Belt Component Kits with Water Pump

Gates Timing Belt Component Kits with Water Pump offer customers the best and most complete repair solution by including the same OE components as our TCKs: timing belts, pulleys and tensioners as well as a water pump. Timing belt driven water pumps should always be replaced at the same time as the timing belt. Don't take chances. With Gates TCKWPs, you can avoid returns by replacing all critical system components at the same time.

- Water pumps are designed and built for long-lasting, efficient cooling.
- Hydraulic tensioners included, where available.
- Everything you need to do the job right, all in one box.

# Timing Belt System

## Hydraulic Tensioners

For applications with high loads and/or angular vibrations, where a mechanical automatic tensioner cannot provide sufficient damping or tensioner movement.

- Market-leading application coverage.
- All parts are either OE sourced or engineered by Gates to meet/exceed OE performance standards.
- Gates tensioner pin set tool [Part No. 91010] for securing piston.

## PowerGrip® Individual Timing Components

Gates PowerGrip timing components for those who want to replace individual parts.

- Components include automatic, manual and hydraulic tensioners and idler pulleys.
- Only OE components for the most popular and problematic applications.

# Timing Belt System

## Racing Performance Timing Belts

No other belts help protect your engine investment while delivering high performance like Gates Racing Performance Timing Belts.

Gates Racing Performance Timing Belts are incredibly strong and extremely heat-resistant. Constructed of HNBR elastomeric composites, Gates Racing Performance Timing Belts are as much as 300% stronger than stock belts and deliver up to three times the heat resistance. You can count on them to hold up to the rigors of high horsepower, which is extremely important with interference engines.

- Superior construction provides up to three times the heat resistance.
- Gripping teeth reinforced with aramid and nylon rubber minimize wear.
- As much as 300% stronger than the standard aftermarket belt.
- Withstand the rigors of high horsepower applications.

## Racing Timing Component Kits

Gates covers your racing application needs with Racing Timing Component Kits [TCKs]. Protect your investment with components that are OE Equivalent or better in service life and performance. With Gates Racing TCKs, you can replace all critical system components at the same time.

- Popular kits for racing applications.
- Most kits include actual OE tensioners and idlers.
- Total solution for any application, including specially formulated Gates Racing Performance timing belts, idler[s], tensioners, and supporting hardware.

## Racing Timing Component Kits with Water Pump

Gates Racing Timing Component Kits with Water Pump [TCKWP] offer the same OE components as our Racing TCKs - with the addition of a water pump. Timing belt driven water pumps should always be replaced at the same time as the timing belt. Protect your investment. With Gates Racing TCKs, you can replace all critical system components at the same time.

- Everything you need to do the job right, all in one box, including formulated Gates Racing Performance timing belts, idler[s], tensioners, a water pump, and supporting hardware.
- Water pumps are designed and built for long-lasting, efficient cooling.
- Hydraulic tensioners included, where available.

# Accessory Belt Drive System

## Micro-V® Component Kits

Gates belt and tensioner kits make it easy to service front-end accessory drives. Eliminate customer comebacks by fixing the vehicle the first time by servicing the entire serpentine drive. Neglecting to replace the tensioner and pulley[s] at the same time you replace the belt can ultimately shorten the life of the belt as well as other front-end accessory components.

- Broad vehicle coverage
- Included multi-ribbed belt with premium EPDM construction and related tensioners and idlers.

## Century™ Series Micro-V® Belts

Import or domestic, car or truck, every vehicle can depend on the superior quality of Gates precision fit Century Series Micro-V belts. With advanced technology that matches the OE size, construction and materials Century Series Micro-V ensures optimal vehicle performance. Micro-V belts provide peak operating performance while delivering the highest value available.

- Meets or exceeds all specifications from the Original Equipment Manufacturer.
- Designed for small diameter pulleys, backside idlers, and for use with [or without] automatic tensioners.
- Special belt constructions eliminate belt noise, reduce tension loss, and solve problem drive applications.
- Utilizes advanced materials like Aramid Fiber found in bullet-proof vests and crack and heat resistant EPDM materials.
- Unique form grinding of each individual belt assures precise dimensional control.
- Meets or exceeds SAE J1459, SAE J2432, and SAE J1596 specifications.

**Gates also offers Century™ Series Micro-V® Green Stripe® belts with greater load-carrying capacity designed for demanding, heavy-service drives.**

## Century™ Series Aramid Belts

Gates, the leader in automotive Serpentine belt drive systems, collaborates with OE manufacturers globally to continually evolve the performance and durability of belt drives. Certain vehicle engines require specific belt constructions, such as aramid tensile cord, to provide long belt life, and eliminate noise and vibration that are inherent on these drives. Utilizing this same technology for the Aftermarket, Gates offers Century Series Aramid cord belt for specified vehicles. This construction matches the OEM to assure a quiet and smooth functioning belt, with the same performance and durability as the OEM part. For guaranteed OE performance, use Gates Century Series Aramid Serpentine Belts.

- Exact OEM aramid cord construction replacement – superior to polyester tensile cords as most serpentine belts come with.
- Essential for specific demanding accessory belt drives (Turbo, Diesel, high RPM).
- Reduces noise and vibration.
- Extends life of the belt and other accessory drive components.

## Accessory Belt Drive System

### Century™ Series Micro-V® Dual-Sided Belts

For replacing original equipment belts on serpentine drives that require a higher degree of efficiency when transmitting power. Designed for small diameter pulleys and for use with or without automatic tensioners.

- V-ribbed on both sides of the belt.
- Specially designed to resist wear and cracking due to overall reduced thickness in construction.
- Broad coverage on unique applications.
- Custom setup for Gates specialized solution kits for Serpentine drives that cause problems from the OEM.

### Century™ Series Stretch Fit® Belts

Gates Century Series Stretch Fit Belts, with exclusive self-tensioning technology, were the first aftermarket belts engineered to fit like a glove and perform properly on these unique stretch fit drive systems and Gates continues to add coverage to this growing market segment.

- Patented highly engineered EPDM belt ribs are extremely resistant to oil leaks, wear and pilling.
- Gates engineered tensile cord has the needed combination of strength and flexibility using advanced polyamide tensile cord.
- Specially formulated adhesive literally locks on to the cord - allowing the cord to elongate and stretch, but never lose tension.

Prior to installation, Stretch Fit belts are shorter than the actual working length, but once installed they automatically tension - maintaining the proper tension over the life of the belt and ensuring optimum load-carrying capacity.

### Racing Performance Muscle (RPM) Belts

Specially-engineered to deliver optimum boost from supercharged engines, these belts feature the most advanced technology.

- Nylon-fiber reinforced undercord
- High-modulus, low stretch aramid or polyester cord
- Advanced, exact-fit, precision-ground belt profile
- Strict OEM dimensional tolerances
- Two layers of adhesion for increased durability

These features result in lower heat, noise, vibration, and belt slip, for increased durability, improved power transmission, and unsurpassed boost.

### XL® V-Belts

Replacement belt for the most demanding engine drives. Due to thermal forces, this variable notched belt tightens on the drive as it gets hot. This results in improved belt performance by reducing tension decay and noise.

- Fiber-loaded rubber stock puts more flexibility along the length of the belt, yet gives the belt greater lateral stability in the pulley.
- Thermally active tensile cords for maintenance-free performance when properly installed and tensioned.
- Form ground to ensure precise top width and sidewall dimensional control for proper fit in pulley as well as a smoother, quieter running belt.
- Meets or exceeds SAE J636C specifications.

**Gates also offers Green Stripe® XL® V-belts as a premium-quality replacement for heavy-duty engines.**

# Accessory Belt Drive System

## DriveAlign® Automatic Belt Tensioners

Gates is a global leader in Original Equipment (OE) System Design. With a full line of tensioners and international manufacturing locations, you can count on Gates to supply premium quality DriveAlign Automatic Belt Tensioners. Gates ensures that every tensioner they manufacture is built to rigid tolerances and specifications that guarantee OE fit, form and function.

- Full line coverage for Import, Domestic and Heavy-Duty applications.
- Manufactured using the same technology as Original Equipment Manufacturer (OEM) part, assuring a factory match.
- Patented vibration damping system improves tensioners, belts and accessory life.
- Torsional round spring design provides consistent tension and does not allow contamination.
- Comprehensive line includes parts to fit cars, vans, SUV's and light trucks.

## DriveAlign® Idler Pulleys

Built to last by resisting dirt, salt, and other under-hood contaminants and are designed for use on passenger cars and light trucks as a locked center tensioning pulley, an automatic belt tensioner pulley or an idler pulley.

- Steel or thermoplastic construction provides high durability for long life.
- Bearing meets or exceeds OE and is designed for application specific speed and load requirements.
- Reliable operation under severe conditions.
- Applied for Import and Domestic vehicles.
- Mounting hardware included on some popular applications.

## Alternator Decoupler Pulleys (ADP)

Gates Alternator Decoupler Pulleys provide vibration isolation within the Accessory Belt Drive System resulting in smoother engine performance and efficiency and increased belt and component life. The line consists of overrunning alternator decoupler pulleys and one way clutches (not interchangeable).

- Exact OE replacement.
- Patented design unmatched by any other supplier.
- Torsion spring absorbs engine vibration for quieter, smoother ride.
- Chosen by OEM to reduce noise, vibration and harshness.
- Need tools? See the ADP Tool Kit [Part No. 91024].

## Accessory Belt Drive System

### EuroGrip® OE Drive Couplers

Gates is the only manufacturer in the Aftermarket offering EuroGrip Original Equipment (OE) Drive Couplers. That's because Gates designed, engineered and produced new technology for European Original Equipment Manufacturers (OEM) to help drive accessories in compact engine compartments.

Using Gates proven synchronous belt technology, the flexible coupling connects the drive pulley to the decoupler pulley on the alternator and air conditioning compressor, working to dampen engine vibration and increase performance. Our high quality OE replacement couplings guarantee a perfect fit every time.

- Designed for specific VW and Volvo vehicles.
- Lubricated jacket minimizes coupling and end piece wear and retains tooth integrity during operation.
- Glass fiber cord provides excellent dimensional stability at high rotational speeds.
- Fiber-loaded construction maximizes torque capability, controls damping and provides excellent age resistance.
- Coupling's flexibility tolerates misalignment in components.
- Predictable shear properties allow for component protection.

**Gates also offers EuroGrip Coupler Kits, allowing you to replace the drive coupler and decoupler pulley at the same time.**

### Fan Pulley Brackets

OE-exact fan pulley brackets are constructed from high-quality materials for maximum durability and strength.

- High-quality bearings and casting materials withstand vibrations and imbalances for maximum service life.
- OE-exact design provides a precise fit to ensure easy installation.
- Designed to provide the proper structure and support for the fan clutch.

# Cooling Systems - Water Pumps

## Water Pumps for Virtually Every Hybrid Application

- Coverage includes Toyota Prius, Honda Civic, Ford Escape and more.
- Pumps manufactured to ISO/TS 16949 standards.
- 100% fully tested unitized bearings/seals.
- Quality packaging ensures intact delivery of all components.
- 100% inline quality tested.
- Limited lifetime warranty.

## Water Pumps for Import Vehicles

- Over 95% coverage for import vehicles.
- Metal impeller pumps Available where applicable.
- Computerized machined surfaces for proper fit/sealing.
- Precisely balanced impeller for OE fit/function.

## Water Pumps with Back Housings

- Allows the technician to replace both pieces with one pre-assembled unit.
- Order one part number and receive the water pump and back housing.
- Reduces installation time and ensures trouble-free operation with reduced warranty claims and comebacks.

## Electric Water Pumps

- OE-exact replacement ensures an exact fit and easy installation.
- Main engine electric water pumps come with gaskets or rubber seals to eliminate leaks.
- Auxiliary electric water pumps are sealed to prevent leaking.
- Electromagnetic power drives the impellers, thus eliminating the need for bearings and weep holes.

## Water Pumps for Heavy-Duty Applications

- Our heavy-duty water pump offering is designed to handle rugged Fleet standards.
- Pumps manufactured to ISO/TS 16949 standards.
- 100% fully tested unitized bearings/seals.
- Gates heavy-duty water pumps, represented as a part number with an HD suffix, carry a warranty of 18 months or 150,000 miles / 5,400 hours, whichever comes first.
- Computerized machined surfaces for proper fit/sealing.

# Coolant Systems - Hose

## Hose Shelf Life

*Storage environment, along with rubber materials, can vary the shelf life limit. Shelf life is difficult to quantify as many variables affect the hose. Proper storage precautions can result in three to five years of shelf life. Beyond this time, there can be a significant service life decrease, depending on storage environment variables.*

**Some variables include:**

*Hose should be stored in a cool, dry area never exceeding +100°F [+38°C]. If stored below freezing, pre-warming may be required prior to handling, testing and placing into service. Store hose in original container. Never stack hose too high, as its weight can crush hose at the bottom of the stack. Gates recommends hose in extended storage be visually inspected and tested prior to use. Hose judged marginal should be replaced to avoid potential failure, property damage or bodily injury. Store hose on a first-in/first-out basis. Unusually long storage, or poor storage environment can deteriorate hose, reduce performance and may lead to premature failure.*

## Molded Coolant Hose

Gates molded coolant hose is manufactured to fit specific applications. Equivalent in design to OEM specifications. Approved for marine applications.

- Recommend for upper, lower, by-pass, heater and other coolant hose applications.
- Heat and ozone resistant cover.
- Engineered to resist electrochemical degradation - the leading cause of hose failure.
- Re-engineered materials resist vacuum collapse, this reduces the need for internal springs in many applications.
- Meets SAE 20R4 and 20R3 Type EC Class D-1 and D-2 specifications.
- Temperature rating: -40°F to +275°F [-40°C to +135°C] in coolant hose applications.

**Note:** Gates recommends replacing standard worm drive and spring loaded clamps with Gates PowerGrip® SB clamps each time a new coolant hose is installed.

**Caution:** Do not use for fuel or oil transfer applications.

## Branched Radiator Hose

Molded to fit specific applications. Factory quality connections are durable and eliminate coolant leaks.

- Engineered to resist electrochemical degradation - the leading cause of hose failure.
- Heat and ozone resistant cover.
- Meets SAE 20R4 and 20R3 Type EC Class D-1 and D-2 specifications.
- Temperature rating: -40°F to +275°F [-40°C to +135°C] in coolant hose applications.

**Note:** Gates recommends replacing standard worm drive and spring loaded clamps with PowerGrip® SB clamps each time a new coolant hose is installed.

**Caution:** Do not use for fuel or oil transfer applications.

# Coolant Systems - Hose

## Small Inside Diameter Molded Coolant Hose

Specially designed, OEM style factory-molded hose to fit today's smaller, tighter-fitting engine compartments. Can be used for coolant and water applications. Approved for marine applications.

- Equivalent in design to OEM specifications and all the quality features of Gates molded coolant hose.
- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Inside diameters range from 1/4" to 1".
- Meets SAE 20R3 Type EC Class D-1 and D-2 specifications.
- Temperature rating: -40°F to +275°F [-40°C to +135°C] in coolant hose applications.

**Note:** Gates recommends replacing standard worm drive and spring loaded clamps with PowerGrip® SB clamps each time a new coolant hose is installed.

**Caution:** Do not use for fuel or oil transfer applications.

## Vulco-Flex® II Coolant Hose

Gates Vulco-Flex II hose will bend in almost any direction. It easily replicates the angles and planes of a wide variety of expensive original equipment coolant hose, for quick, easy replacement.

- Improved sealing surface for greater leak resistance and increased flexibility for easier installation.
- Heat and ozone resistant cover.
- Rated for SAE 20R5 Class D-2 performance.
- High temperature rating up to +257°F [+125°C].

**Note:** Gates recommends replacing clamps each time a new coolant hose is installed.

**Caution:** Do not use for fuel or oil transfer applications.

## Green Stripe® Vulco-Flex® Coolant Hose

Heavy-duty flexible hose designed to replace straight or curved coolant hoses. The benefit is maximum coverage with minimum inventory. Hose inside diameter remains constant from end to end. No convolutions inside hose so tube is smooth, allowing free coolant flow. Approved for marine applications.

- Excellent flexibility, yet collapse and kink resistant.
- Extra strength fabric reinforcement with helical steel wire spiral molded between tube and cover.
- Heat-resistant construction throughout.
- EPDM tube and neoprene cover for extended service life.
- Performs to SAE 20R5 Type EC Class D-2 specifications.
- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].
- Working pressure 40 psi maximum.

**Caution:** Do not use for fuel or oil transfer applications.

# Coolant Systems - Hose

## Vulco Straight Coolant Hose

Specially engineered stick hose is ideal for straight coolant/air connections in automotive, stationary engine, industrial and home applications.

- Heat-resistant cover.
  - Meets SAE 20R1 Standard Wall Class D-2 requirements.
  - Cover marked in one-inch increments for easy measuring and cutting allows "custom fit" light-duty coolant installations.
  - Temperature rating: -40°F to +257°F [-40°C to +125°C].
- Caution:** Do not use for fuel or oil transfer applications.

## Wire-Inserted Green Stripe® Coolant Hose

Provides the ability to replace many sizes of tailor-made curved hoses. Results in maximum coverage with minimum inventory. Approved for marine applications.

- Heavy-duty fabric reinforcement with helical carbon steel wire.
- Bends easily to make curved connections.
- Cuts easily with knife and wire cutters to reduce installation time.
- Exceeds SAE 20R2 Type EC [Class D2 Tube and cover] except in vacuum applications.
- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

**Note:** Long spans must be supported every 3 feet.

**Caution:** Do not use for fuel or oil transfer applications.

# Coolant Systems - Hose

## Green Stripe® 4-Ply Coolant Hose

For severe operating conditions found on stationary engines, construction equipment and off-road vehicle applications. Nitrile tube specially compounded to handle common coolants and additives.

- Four-ply woven, heavy-duty fabric reinforcement.
- Neoprene cover resists heat, abrasion and oil.
- Handles higher temperatures and resists petroleum additives.
- Exceeds SAE 20R1 [Class B Tube, Class C Cover, Heavy Wall].
- Reduces water loss from water permeating the hose wall and cover, a distinct advantage over silicone.
- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Temperature rating: -40°F to +212°F [-40°C to +100°C], intermittent to +257°F [+125°C].

**Caution:** Do not use for gasoline or diesel transfer applications.

## Green Stripe® 2-Ply Straight Coolant Hose

Stick hose designed for demanding heavy-duty coolant/air applications. Approved for marine applications.

- Two-ply bias fabric construction to maximize flexibility and strength.
- Resists “cold water leaks” due to advanced EPDM tube and cover that stay soft and pliable, even under adverse operating conditions.
- Exceeds SAE 20R1 Type EC [Class D-1 Tube, and cover, Standard Wall].
- Cover marked in one-inch increments to facilitate approximate cut lengths, allows “custom-fit” installations.
- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

**Note:** For a maintenance free connection, use PowerGrip® SB clamps.

**Caution:** Do not use for fuel or oil transfer applications.

# Coolant Systems - Hose

## Green Stripe® Vibraflex® Coolant Hose

For heavy-duty applications requiring short length hose that must absorb vibration and/or fitting misalignment. High flexibility reduces installation time and provides lower cost-per-mile operation.

- Oil and heat-resistant nitrile tube.
  - Oil, abrasion and heat-resistant neoprene cover.
  - Exceeds SAE J20 [Class B Tube and Class C Cover].
  - Two-ply fabric reinforced.
  - Temperature rating: -40°F to +212°F [-40°C to +100°C].
- Caution:** Do not use for gasoline or diesel transfer applications.

## Silicone Coolant Hose

Extra long-lasting hose constructed with silicone rubber. Ideal for extremely high temperature service in radiator, heater and other coolant transfer hose applications.

- Excellent for extreme ambient and radiant temperature conditions.
  - Resists weathering, ozone, heat and coolant deterioration.
  - Silicone tube and cover resist prolonged exposure to under-hood and coolant heat.
  - Use PowerGrip® SB clamps or silicone hose clamps.
  - Exceeds SAE 20R1 [Class A Standard Wall].
  - Temperature rating: -70°F to +350°F [-56°C to +177°C].
- Caution:** Do not use for fuel or oil transfer applications.

# Coolant Systems - Hose

## FleetRunner® Hi-Temp Coolant Hose

Built to excel in the extreme conditions of modern heavy-duty engine compartments, FleetRunner Hi-Temp Straight Coolant Hose is the durable solution for extended use in heavy-duty trucks.

- Advance peroxide-cured EPDM rubber.
- Exceeds SAE 20R1 specifications.
- Resists electrochemical degradation.
- High working pressure rating.
- Temperature rating: -40°F to 300°F [-40°C to +149°C].

## Molded Silicone Coolant Hose

Heavy-duty engines with advanced emissions systems [from 2007 to current model year] produce higher under-hood temperatures, requiring the use of silicone coolant hose. In these low engine-air-flow and high-heat conditions, Gates Silicone Coolant Hose is the perfect product.

- Premium 4-ply construction.
- High-heat resistance material meets or exceeds OE specifications.
- Industry standard blue cover for easy identification.
- Used when hose routing passes near turbo or hot side of the charged air system.

**Gates also offers application-specific molded silicone coolant hose for exact dimensional specifications.**

# Coolant Systems - Hose

## 90° Molded Heater Hose

Especially designed for difficult heater hose applications requiring sharp 90° bends in the hose. Eliminates the need for extensive inventory of OE type curved heater hose. Just 22 sizes handle thousands of applications.

- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Resists water permeation.
- Similar to heater SAE 20R3 Type EC Class D-2.
- Use with heater hose connectors and bulk heater hose for virtually complete molded heater hose coverage.
- Temperature rating: -40°F to +275°F [-40°C to +135°C].

**Caution:** Do not use for fuel or oil transfer applications.

## Green Stripe® Heater Hose

Heavy-duty construction assures dependable operation in truck, bus and off-road equipment heater systems. For a maintenance free connection, install with PowerGrip® SB clamps. Approved for marine applications.

- Green Stripe construction provides best cost-per-mile economics.
- Cover is abrasion resistant.
- Advanced EPDM tube, cover and reinforcement withstand high under-hood and coolant temperatures. Designed for extended use without cracking or hardening.
- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Exceeds SAE 20R1 Type EC, Standard Wall Class D-1.
- Reduces water loss from water permeating the hose wall and cover, a distinct advantage over silicone.
- Temperature rating: -40°F to +275°F [-40°C to +135°C].

**Caution:** Do not use for fuel or oil transfer applications.

# Coolant Systems - Hose

## Firewall® Heater Hose

Extra heavy-duty hose designed for maximum durability. Easily recognized by its red cover.

- Unaffected by most coolants and non-oil based coolant additives.
- Unaffected by high cooling system pressures.
- Good resistance to high temperatures for extended periods of time.
- Similar to SAE 20R3 Class D-2.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

**Caution:** Do not use for fuel or oil transfer applications.

Part No.	I.D. [In.]	Length [Ft.]	Working Pressure [psi]

## Safety Stripe® Heater Hose

EPDM hose constructed for extra-long service life.

- Unaffected by most coolants and non-oil based coolant additives.
- Unaffected by high cooling system pressures.
- Good resistance to high temperatures for extended periods of time.
- Similar to SAE 20R3 Class D-2.
- Not recommended for heavy-duty truck, bus and off-road construction equipment; use Green Stripe® heater hose for these applications.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

**Caution:** Do not use for fuel or oil transfer applications.

## Silicone Heater Hose

Constructed with silicone rubber. Ideal for extremely high temperature service in radiator, heater and other coolant transfer hose applications. Approved for marine applications.

- Reinforced with tough, high temperature resistant polyester textile cords.
- Exceptionally flexible.
- Highly resistant to weathering, coolant deterioration, ozone and temperature extremes.
- Exceeds SAE 20R3 Class A Tube and Cover.
- Can be used for emission hose applications.
- For proper installation, use Gates PowerGrip® SB clamps or Gates silicone hose clamps.
- Temperature rating: -70°F to +400°F [-57°C to +204°C].

**Caution:** Do not use for fuel or oil transfer applications.

# Coolant Systems - Hose

## Charter® Heater Hose

Economically priced heater hose – yet affords long service life. Tested by Gates to assure reliability.

- Good resistance to high temperatures.
- Moderate resistance to oil and grease contamination.
- Good resistance to non-oil based coolant additives.
- Similar to SAE 20R3 Class D-2.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

**Caution:** Do not use for fuel or oil transfer applications.

## Heater Hose Assemblies

All-inclusive assemblies reduce labor time and hassle of ordering multiple parts.

- Designed and constructed for long service life in tough weather conditions.
- Pipe welds are superior to the OE-equivalent.
- Weighs less than the OE-equivalent.

## Fan Control Modules

Most of today's vehicles are equipped with electric cooling fans that keep the engine coolant within a constant temperature range. On several applications, these fans are controlled by an engine cooling fan module that precisely regulates fan speed to minimize energy loss and maximize fuel economy.

- Gates offers engine cooling fan modules that fit popular applications covering millions of vehicles in operation.
- OE-exact design ensures precise, "plug and play" fit for easy installation.
- On certain applications, the module is not available separately from the dealer.
- Reduce repair costs by only replacing the module versus the complete fan assembly.

# Coolant Systems - Components

## Dual I.D. Heater Hose

Specially designed for heater hose applications requiring changes in diameter.

- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Meets SAE 20R4 Type EC Class D-2.
- Use with hose connectors and bulk heater hose for virtually complete molded heater hose coverage.
- Temperature rating: -40°F to +275°F [-40°C to +135°C].

**Caution:** Do not use for fuel or oil transfer applications.

## Plastic Heater Hose and Fuel Line Connectors

Unique single-barb design provides greater sealability between single or dual inside diameter hoses. Fuel Hose Connector Kit Part No. 91174. Reducer Connector Assortment Kit Part No. 91177.

- Almost any hose configuration can be constructed using straight, elbow and tee shapes.
- Glass reinforced nylon resists chemicals, gasoline, diesel fuels and temperatures from -40°F to +480°F [-40°C to +250°C].
- Bulkheads assure proper insertion depths.
- Anti-rotation device prevents hose twisting.

## Heater Hose Quick-Lok® Connectors

Quick-Lok connectors provide a fast, easy way to connect replacement heater hose assemblies on cars and light trucks. The design retains O-rings so they cannot fall out or get damaged.

### Straight Connectors

## Aluminum Hose Connectors

Superior aluminum cooling system connectors which carry coolant from the tensioner to the engine. Precision sized ends, with high quality EPDM O-rings, to create a perfect seal. Developed to replace the failure prone plastic connectors which become brittle and crack from the high heat of the engine. Manufactured by the OEM tensioner supplier.

## PowerGrip® SB Clamps

Maintenance-free clamps that retain dynamic tension and never need retightening. These clamps stop leaks, even on out-of-round applications. Clamp down better in all conditions and temperature extremes. Environmentally friendly by eliminating antifreeze leaks and ground water contamination.

- Easy to install with ordinary heat gun.
- Wider sealing area entraps connector bead.
- Conform to any shape of hose and housing, even out-of-round fittings.
- Made from a heat-sensitive thermoplastic with a memory to prevent over- or under-tightening.
- Can be used with all brands of silicone hose.
- Temperature rating: -40°F to +302°F [-40°C to +150°C].

## Green Stripe® Stainless Steel Clamps

Ideal for applications where corrosion is a problem, or for industrial use.

- Housing and 9/16" wide band constructed of heavy-gauge stainless steel.
- Screw is 400 series stainless steel.
- Rounded band edges.
- Hex shaped screw with deep slot – tightens with screwdriver, nutdriver or socket wrench.
- Tighten to 35 in./lbs.

## Super Hex/Minex Clamps

Top quality clamp with extra-strength construction features. Super Hex features a 1/2" wide band, while the Minex band is 5/16".

- Durable 200 series stainless steel band and screw housing.
- One-piece screw housing is interlocked onto band for extra strength.
- Solid head forged from one piece of steel, cadmium plated.
- Hex shaped screw with deep slot – tightens with screwdriver, nutdriver or socket wrench.
- Tighten to 30 in./lbs.
- Meets SAE J1508.

## Silicone Hose Clamps

Designed to provide an extra-tight seal on silicone hose and prevent hose cover extrusion.

- 300 series stainless steel band, screw and housing resist corrosion.
- Four-piece construction and 100% mechanical interlock for added strength and torque capability.
- Combination 5/16" hexagon, deep slot screw head makes installation easy-tightens with screwdriver, nutdriver or socket wrench.
- One piece band and liner.
- Inner-liner band eliminates hose cover extrusion.
- Wide 9/16" band gives 12-1/2% more compression than 1/2" band.
- Tighten to 35 in/lbs.

## Green Stripe® and Green Stripe® Heavy-Duty Constant Tension Clamps

Green Stripe constant tension clamps provide the reusable, self-adjusting band needed for a dependable seal, even in the coldest conditions. Applications include auto, truck and bus cooling systems and turbo chargers.

Green Stripe and Green Stripe Heavy-Duty constant tension clamps feature:

- Larger, heavier gauge precision-formed spring washers with higher rates of band tension and adjustability for a more dependable seal.
- All stainless steel construction for maximum corrosion resistance. Band and Housing – 9/16" wide – GSCT 301 and GSHD 304 stainless steel. Hex-Head Screw – 410 stainless steel GSCT 5/16" and GSHD 3/8" wide.
- A uniform 360° seal.
- Clamping diameters – GSCT 9/16" to 3 1/2" and GSHD 1" to 9 1/8".
- Tighten Green Stripe clamps to minimum of 50 in./lbs. and maximum of 85 in./lbs.
- Tighten Green Stripe heavy-duty clamps to minimum of 75 in./lbs. and maximum of 125 in./lbs.

# Coolant Systems - Thermostats

## Thermostats

Gates only partners with prime OE thermostat manufacturers to provide OE Exact or OE Type construction.

### OE Exact

- Designed for customers that demand the exact OEM thermostat as a replacement product.

### OE Type

- Quality controlled factory calibration assures accuracy of opening and closing, regardless of pressure changes.
- Matches the OEM product fit, function and design.
- Features including jiggle pins and check valves for air venting, seals, and gaskets make these thermostats equivalent to the original equipment parts

## Integrated Thermostat Housings

There are two types of integrated thermostat housings, MAP controlled and standard. Both improve temperature regulation and control, helping engines operate more efficiently. A large number of vehicles equipped with integrated thermostat housings are just now starting to show up in shops. As the opportunity grows, go with Gates, the high quality alternative to OE dealerships.

### Standard

- All-in-one, bolt-on solution that includes everything needed for a complete job:
- Includes thermostat, insert, seal and housing.
  - Easy, one step fit and installation.
  - No special tools required.
  - Category leading coverage.

### Map Controlled

- Bolt-on solution with included sensor that links to the engine control unit:
- Same easy installation as standard ITH.
  - Allows ECU to regulate engine temperatures.
  - Provides adaptive, on-demand engine cooling.
  - Lowers emissions and fuel consumption.

## Coolant Outlets

Gates coolant outlets feature superior construction and design compared to competitive parts.

- All-in-one and simple bolt-on solutions.
- Easy, one-step fit and installation.
- No special tools required.
- Top-quality materials and improved seal design provide leak-free service.
- Advanced weld process guarantees consistent, long-lasting performance.

# Coolant Systems - Thermostats

## Thermostat Gaskets

Cuts installation time in half. Adhesive-backed gasket material helps prevent breaking of water outlet. Gasket cement is not needed. Approved for marine applications.

- Self-adhesive backing holds thermostat in place while water outlet is being installed.
- Rubber thermostat seals also available.

## Green Stripe® Heavy-Duty Thermostats

Quality controlled factory calibration assures accurate heat control under extreme variations in temperature, load and engine vibrations. Approved for marine applications.

- Heavy-gauge brass and stainless steel with positive piston heat motor.
- Available in Choke type, Top By-Pass, Bottom By-Pass, Side By-Pass, Normally Open and other types to meet heavy-duty cooling system designs.

**Note:** Seal should always be changed when new thermostat is installed.

## Green Stripe® Heavy-Duty Thermostat Seals

Fits securely around thermostat valve to prevent leakage. Approved for marine applications.

- Corrosion-resistant steel construction.
- Specially constructed to assure accurate fit.

# Coolant Systems - Radiator Pressure Caps

**All Gates radiator pressure caps are constructed of corrosion-resistant, heavy-gauge metal. This assures long service life and accurate control of pressure.**

1.0 Bars = 14.5 psi

## Spinlok Caps

Can be used for applications with or without coolant recovery systems. Inventory requirements are dramatically reduced.

- Unique eight-sided, scalloped crown allows for a firm grip for easy installation and removal.
- Neoprene upper and lower seal.
- Body rotates independently of crown – customer merely pushes down and twists.
- Safe and reliable.

## Safty-Vent Pressure Release Caps

Can be used for applications with or without coolant recovery systems. Inventory requirements are dramatically reduced.

- Safety release lever.
- Protects against accidental burns by releasing steam through overflow tube.

## Standard Caps

- Covers a wide range of pressures.

## Cool Control Caps

Diverts pressurized coolant to a reservoir rather than to an overflow valve.

- Constant pressure-type cap for use on closed cooling systems.
- Increases cooling system efficiency by eliminating air from the cooling system.

## Coolant Systems - Racing Radiator Caps

*The racing radiator caps are specialty parts for use on high performance cooling systems. Caps are available in 18 to 22, 21 to 25 and 28 to 32 pound ranges. Caps are available for mini (32mm ID, 16 mm deep), and standard SAE "A" size (2 1/8" OD, 3/4" deep) filler necks.*

### **31551 (19-21 pounds), 31552 (22-24 pounds)**

These two caps fit the mini (32mm ID, 16 mm deep) filler neck. They include lower and upper gaskets so they can be used on both open (no recovery bottle) and closed (recovery bottle) cooling systems.

### **31553 (18-22 pounds), 31554 (21-25 pounds), 31555 (28-32 pounds)**

These caps fit a standard SAE "A" size (2 1/8" OD, 3/4" deep) filler neck. These do not include an upper gasket, making them for use on open cooling systems only.

### **31556 (18-22 pounds), 31557 (21-25 pounds)**

These are Safti-Vent™ style racing radiator caps that fit the standard SAE "A" size (2 1/8" OD, 3/4" deep) filler neck. They both include both lower and upper gaskets so they can be used on open or closed cooling systems.

### **31558 (18-22 pounds), 31559 (21-25 pounds), 31560 (28-32 pounds)**

These are Spinlok design caps that fit the standard SAE "A" size (2 1/8" OD, 3/4" deep) filler neck. The caps include both lower and upper gaskets so they can be used on open or closed cooling systems.

**WARNING** – These are high pressure radiator caps made for use on race cars only. Do not use them on a passenger car. Pressure test the complete cooling system to the maximum level of pressure indicated on the box. Failure to test the cooling system to the proper pressure prior to installing the cap may result in damage to the cooling system or bodily injury.

## Coolant Systems - H.D. Radiator Caps + Kits

### Heavy-Duty Radiator Caps

For use on heavy-duty trucks, buses and tractors.

- Fits applications with 3/4" deep filler necks.

### Heavy-Duty Cool Control Caps

Diverts pressurized coolant to reservoir instead of an overflow tube.

- Corrosion-resistant, heavy-gauge metal construction assures long life and accurate control of pressure.
- Atmospheric type valve allows cooling system to pressurize as needed, resulting in less strain on system components.

### Radiator Cap and Cooling System Analyzer Kit

Contains all components needed to check cooling systems and radiator caps.

- Lightweight, impact-resistant analyzer.
- Pressure release button on easy-to-read gauge allows for safe venting of system during testing.
- Complete Kit — Includes Part No. 31425, 31413 and carrying case. Kit Part No. 31367 replaces old Part No. 31365.

# Fuel System - Hose

## Diesel Emission Fluid (DEF) Hose Assemblies

Diesel Emission Fluid (DEF) Hose Assemblies are specially designed and manufactured to convey Diesel Emission Fluid (DEF). Because DEF freezes at +11°F [-12°C], the hose and couplings are electronically heated using Gates revolutionary carbon fiber heating system.

- Patent-pending carbon fiber heating system provides faster thaw times, lower amp draw and more uniform heating than OE heated-wire designs.
- Dense, closed-cell EPDM cover resists cuts and abrasion better than typical OE replacements, for longer life in harsh environments.
- Over-molded quick connects keep dirt and grime out of critical connections to prevent premature system failure.
- Heating and electrical connection per OE specifications.

## Diesel Emission Fluid (DEF) Tank Fill Hose

DEF Tank Transfer Hose are manufactured for the specific filling functions of DEF tanks. They feature the highest quality construction to meet the demands of DEF handling and transfer.

- 3/4" and 1" standard I.D. sizes.
- Temperature rating: -40°F to +212°F [-40°C to +100°C].
- Non-zinc, peroxide-cured EPDM.
- Gates DEF hose can be used with PVC fittings and stainless steel clamps, but Gates stainless steel coupling line provides a more durable and permanent solution

Part No.	Description
DEF750025	3/4" DEF Hose 25'
DEF750300	3/4" DEF Hose 300'
DEF100025	1" DEF Hose 25'
DEF100300	1" DEF Hose 300'

## Gas Pump Hose 24B (Retractable Cable) For Service Stations and Marine Applications

For dispensing gasoline, diesel and gasohol from stand-up or retractable cable type pumps requiring soft wall hose. Also ideal for fuel or oil transfer applications.

- Nitrile tube and cover provide excellent resistance to oil and petroleum products.
- One (3/4" I.D.) and two (1" I.D.) plies of reinforcement with built-in static wire.
- Coupled with male, NPT, brass with chrome plate couplings.
- Underwriters Laboratory Listed. Meets UL 330.

**Caution:** Not recommended for reel type dispensers.

Part No.	I.D. [In.]	Length [Ft.]	Work Press. [psi]	Thread Size [In.]	Min. Bend Radius
27452	3/4	12	125	3/4	6.0

27454	3/4	17	125	3/4	6.0
27460	1	12	125	1	8.0
27461	1	14	125	1	8.0

## Fuel System - Hose

### Barricade® Fuel Injection Hose (MPI)

Low-permeation, premium hose for use on all fuel systems, including fuel injection (MPI). Approved for use with gasoline, diesel, bio-diesel including soybean methyl ester (SME), rapeseed methyl ester (RME), palm methyl ester (PME) per ASTM D6751, E-85, methanol, ethanol, ethanol extended gasoline, gasohol fuels and 100% alcohol. Patented five-layer Greenshield® barrier technology keeps fuel out of the environment while delivering peak fuel efficiency.

- Exceeds SAE J30R14T2 (except for kink resistance) as well as low-permeation requirements for CARB.
- Aramid reinforcement spiral braid for superior burst strength.
- Thermoplastic barrier layer.
- Oil, heat, ozone and abrasion resistant cover.
- 225 psi working pressure rating.
- Recommended for any fuel injection applications for superior service life.
- Temperature rating: -40°F to +275°F [-40°C to +135°C] continuous, up to +302°F [+150°C] intermittent.

**Note:** Do not submerge in gasoline.

Packaging: I.D. (in.)	Working [psi]	2 Ft. retail Part No.	15 Ft. length Part No.	25 Ft. length Part No.	250 Ft. reel Part No.

1/2	225			27342	

### Barricade® Carburetion Fuel Line Hose

Low-permeation, premium hose for use on carbureted engines, PCV and EEC systems, and for fuel return hose on fuel injection systems. Not for use on the pressure-side of fuel injection systems or 2-stroke engines. Approved for use with leaded and unleaded gasoline, diesel, bio-diesel, E-85, methanol, ethanol, and gasohol fuels. Patented five-layer Greenshield® barrier technology keeps fuel out of the environment while delivering peak fuel efficiency.

- Meets SAE J30R14T1, EPA 40 CFR 1051.110, and CARB small engine off-road requirements for low permeation (except for kink resistance).
- Textile spiral layer (two spiral).
- Thermoplastic barrier layer.
- Oil, heat, ozone and abrasion resistant cover.
- Recommended for carbureted engines in cars, light trucks, off-road vehicles and small engines.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

**Note:** Do not submerge in gasoline.

**Caution:** Do not use on pressure lines on fuel injection systems or cooling system applications. Use MPI (4219D) or Barricade Fuel Injection (4219BF) hose for Multi-Port Injection systems.

Packaging: I.D. (in.)	Working [psi]	2 Ft. retail Part No.	25 Ft. length Part No.	250 Ft. reel Part No.

## Fuel System - Hose

### Safety Stripe® Return Fuel Line/PCV/Evaporative Emission Control Hose (1986 & older)

Multi-purpose hose for use on return fuel lines, PCV and EEC systems, and for fuel return hose connections on diesel fuel injection systems. Approved for use with leaded and unleaded gasoline, diesel and gasoline blends of ethanol (E85), methanol and ethers (up to the legal limits allowed by the EPA).

- Spiral reinforced construction.
- Nitrile tube.
- NBR-PVC cover.
- Oil resistant cover resists the effects of high heat and ozone found in engine compartments.
- Meets SAE 30R6 and 30R7.
- Vacuum rating of 24 In./Hg for sizes less than 1/2" I.D., and 10 In./Hg. for sizes 1/2" to 3/4" I.D. at ambient temperatures.
- Temperature rating: -40°F to +257°F [-40°C to +125°C] with gasoline blends.

**Caution:** Do not use for pressure lines on fuel injected engines or for cooling system applications. Use Barricade® Fuel Injection hose for fuel injection applications.

Intended for use with fuels where MTBE concentrations are no greater than 15% by volume.

### Packaged Safety Stripe® Return Fuel Line/PCV/Evaporative Emission Control Hose (1986 & older)

Convenient, popular two foot lengths of return fuel line, PCV and EEC hose in self-service, reusable, recyclable package. Can be stacked on shelf or hung on a pegboard display.

- Easy to follow instructions in each package.
- Handy hose diameter indicator helps customer select the correct size.

# Fuel System - Hose

## Fuel Fill Hose

Designed for transferring fuel from vehicle's filler neck to fuel tank. Works on passenger cars and light trucks, as well as on auxiliary fuel tanks on recreational vehicles. For use with most types of fuels – especially resistant to gasoline and diesel.

- Suitable for use with gasoline, gasohol blends of ethanol, methanol, ethers, diesel and bio-diesel to B20 (up to maximum concentrations allowed by the EPA).
- Features a high quality nitrile tube.
- Meets requirements of SAE 30R5.
- Cuts easily with knife and wire cutters.
- Temperature rating: -40°F to +212°F [-40°C to +100°C] with gasoline blends, -40°F to +125°F [-40°C to +51°C] with bio-diesel (B20).

**Note:** Use Gates Super Hex clamps for reliable installation.

## Fuel Filler Neck Hose

Designed specifically for auxiliary gas tanks on recreational vehicles. Excellent replacement for passenger cars and trucks where a straight hose with a minimal bend is required.

- Suitable for use with gasoline, gasohol blends of ethanol, methanol, ethers, diesel and bio-diesel to B20 (up to maximum concentrations allowed by the EPA).
- Smooth oil resistant cover, tough textile cord reinforcement and petroleum-resistant nitrile tube.
- Non-wire reinforced.
- Meets SAE 30R6 specifications.
- Temperature rating: -40°F to +212°F [-40°C to +100°C].
- Bio-diesel (B20) temperature rating: -40°F to +212°F [-40°C to +51°C].

**Caution:** Not recommended for marine gasoline applications.

# Fuel System - Hose

## Textile Covered Fuel Line Hose

Textile covered fuel line hose features a durable, oil resistant textile cover providing dependable and safe service on fuel circuits in passenger cars and light trucks.

- Braided textile cover reinforces the hose and is resistant to heat, ozone and weathering.
- Working pressure up to 87 psi.
- Temperature rating: -31°F to +212°F [-35°C to +100°C].
- Recommended for clamped hose applications on fuel systems in passenger cars and light trucks.

## Submersible Fuel Line Hose

Ordinary fuel line hose is designed to handle fuel on the inside only. The Gates Submersible Fuel Line Hose exceeds the SAE 30R10 rating and is capable of handling gasoline, alcohol-extended gasoline or diesel fuel in fully immersed, mobile, stationary and marine applications and E85 fuel.

- Engineered for constant contact with gasoline [and other liquid petroleum distillates] on the inside and the outside.
- Excellent for use on fuel pumps in the gas tank.
- Meets the SAE 30R10 specification for submersible fuel line hose applications.
- Fluoroelastomer [FKM] tubed cover resists gas permeation and retards aging.
- Aramid Fiber reinforcement—the same fiber used in bulletproof vests and is pound-for-pound stronger than steel.
- Maximum temperature rating: +302°F [+150°C].

# Fuel System - Fuel Cap

## Fuel Caps

Rugged, heavy-duty construction. Meet or exceed OEM specifications. Caps fit both shallow and deep cam filler necks - vented, non-vented and vented anti-surge.

### Fenderwell

- Sturdy metal construction throughout.

### Locking

- Comes with two keys. Keyed-alike caps available on special order.

### Exterior

- Attractive chrome-plated finish.

### Vapor Vent

- Designed for late model cars.
- Handy push button allows car owner to release pressure from fuel system prior to removing cap from the filler neck.
- Reduces the risk of fuel spray and vapor surge.

## Heavy-Duty Saddle Tank Caps

Heavy metal construction throughout. Meets I.C.C. requirements.

- Available for side or saddle tanks.
- Locking caps come with two keys. Keyed-alike caps available on special order.

# Fuel System - Fuel Cap

## Evaporative Emission Control Fuel Caps

Meet OEM specifications and Federal and State Emission Requirements. Two-way action pressure relief/vacuum relief valve allows fuel tank to “breathe” while preventing the escape of fuel fumes. Seals are compounded from fuel-resistant rubber. Available in three configurations. **Note:** Due to the critical nature of the EEC valves, it is necessary to keep these caps clean at all times.

### Fenderwell

- Zinc-plated and dichromate dipped for superior corrosion resistance.
- Some models are made from rugged plastic.

### Exterior

- Caps have chrome-plated finish.

### Locking

- Comes with two keys. Keyed-alike caps available on special order.

## Mechanical Fuel Cap Testers, Adapters and Replacement Parts

Economical, easy-to-use alternative to electronic testers.

- Compact, lightweight design.
- Easy-to-read pass/fail gauge.
- Convenient hand operation - needs no batteries.
- Set of two pass and fail calibration caps to confirm tester accuracy.
- Complete set of nine color-coded adapters with adapter application chart.
- Tester unit and adapters packaged in separate plastic carrying cases.

Part No.	Description	Pkg.	Part No.	Description	Pkg.

# Lubrication System

## Transmission Oil Cooler Hose

Provides a safe, heat and oil resistant connecting line between oil cooler and transmission.

- One fiber braid reinforcement over an oil resistant nitrile rubber tube.
- Oil and abrasion resistant black CSM cover.
- Meets or exceeds SAE J1019 requirements.
- Can be stacked on shelf or hung on pegboard.
- Easy-to-follow instructions in each package.
- Handy hose diameter indicator on package.
- Package is recyclable.
- Maximum temperature rating: +300°F [+150°C].

I.D. (In.)	Work. [psi]	Press. Burst	3 Ft.	25 Ft.	50 Ft.
			Length	Length	Length
5/16	400	1600	Part No. 27056	Part No. 27058	Part No. 27060
3/8	400	1600	Part No. 27057	Part No. 27059	Part No. 27061
1/2	400	1600	Part No. 27065	Part No. 27066	Part No. 27067

## PCV Oil Filler Caps

Meets requirements of emission control systems on late model cars and light trucks. Universal design offers maximum coverage with minimum inventory.

- Sealed construction prevents engine crankcase gases from escaping into the atmosphere.
  - Heavy-gauge steel construction resists under-hood heat and corrosion.
- Note:** To assure proper operation of PCV systems, oil filler caps should be cleaned or replaced every 12,000 miles.

## Oil Filler Caps

Durable construction assures long service life.

- Special finish resists rust and provides excellent protection against under-hood heat.

# Power Steering System

## OEM Type Power Steering Hose Assemblies

Gates extensive field examination and testing assure proper fit. Designed for passenger cars and light trucks. General instructions are packed with every assembly. Hoses and fittings are also available for tailor-made medium and heavy-duty truck applications.

- Comes complete with factory-installed, pre-bent zinc-dichromate plated end fittings, brackets, sensor ports, sheathing, bushings and grommets.
- Exceeds SAE J2050 performance requirements.

## Low Pressure Power Steering Return Line Assemblies

Assemblies come complete with factory-installed, pre-bent, coupled end fittings where required.

- Connection on uncoupled end is made with ordinary worm-drive clamps.

## PS188 Power Steering Hose

Recommended for power steering pressure lines.

- Synthetic rubber hose cover developed specifically to resist rugged under-hood environments Type CSM.
- Use with one-piece Gates PowerCrimp® power steering couplings [Refer to catalog 431-2080 for details].
- Meets SAE J2050 Type 1 performance requirements.
- 25 Foot Part No. 86049.
- 50 Foot Part No. 86050.

## Power Steering Return Line End Fitting

Furnished separately – for use with Return Line Power Steering Hose.

- Zinc-dichromate plated to resist corrosion.
- Coverage includes popular inverted flare threads.

# Power Steering System

## Bulk Power Steering Hose

Allows “custom fit” cutting and assembly for low pressure fluid return lines.

- Use with return line end fittings if required.
- Meets SAE J189 requirements.
- Temperature rating: -40°F to +275°F [-40°C to +135°C] [+300°F for CPE hose].

I.D. [In.]	Length [Ft.]	Description	Part No.

## Power Steering Repair Kits

Kit components are made of OEM quality materials and come with easy-to-read instructions.

Repair kits available for:

- Adjuster Plug Seal
- Power Cylinder Seal
- Control Valve Seal
- Pump Seal
- Piston Rod End Bushing
- Rack and Pinion Seal
- Pitman Shaft Seal [complete]
- Steering Gear Major Seal
- Pitman Shaft Seal [lower]
- And more

# Braking System

## Air Brake Hose Assemblies

Factory crimped assemblies meet the rigorous demands of the fleet and heavy-duty market.

- Extremely flexible and kink resistant.
- Two spiral construction meets SAE J1402 specifications.
- Complies with DOT FMVSS 106 requirements.
- Couplings meet SAE and DOT minimum pull-off requirements.
- High quality brass male pipe fitting on one end, female air brake swivel with male pipe adapter on other end.
- Temperature rating: -40°F to +212°F [-40°C to +100°C].

## Brake Line Abrasion Shields

The Federal Motor Carrier Safety Administration's Compliance Safety Accountability (CSA) program requires abrasion shields on brake lines that fall below the chassis and in circumstances where chafing, kinking or other mechanical damage can occur. Gates provides high-quality products that meet the rules and specifications for brake line protection.

### PolySleeve™ High Density Polyethylene Hose Wrap

Protects lines and hoses from chafing, rubbing, crushing, ultraviolet rays and other hazards that cause hose failures. Easy to install before or after assemblies are in place. Effective temperature range from -40°F to +280°F [-40°C to + 138°C].

### Nylon Sleeves

Nylon filament mesh forms a self-renewing shield that protects against abrasion for brake lines, hose and hose bundles. Extremely flexible, flame resistant and easy to install.

# Braking System

## SureLok™ Fittings

Recommended for compressed air connector on all nylon air brake tubing air brake systems at locations other than between chassis frame and axle or between towed and towing vehicle. Also recommended as a connector on all air operated systems as applicable to suspension, steering, engine, transmission and auxiliary mechanisms. Fittings and tubing comply to Department of Transportation Federal Motor Vehicle Safety Standard, [DOT FMVSS 106] [mandatory requirements for inch tube fittings in U.S.A.] Society for Automotive Engineers [SAE] J1131 [inch tube and fittings] and meet DIN 74324 and German TUV requirements [metric tube and fittings].

- Simple tube connection and disconnection.
- Fewer component parts – Internally machined form in body to secure collet.
- All collets marked with tube size.
- Ease of tube insertion in areas of restricted access.
- Total fittings system solution.

Maximum Working Pressure: 0 to 150 psi

Working Temperature: -40°F to +220°F [-40°C to +104°C]

Materials: Body, tube support, Collet – Brass; O-Ring – Buna N [Low Nitrile];

Thread Sealant – Precoat 5

Tubing: Tube should be to SAE J844 or DIN 74324

## Small Air Brake Assortment

This small SureLok™ assortment is a basic starter package for the jobber or fleet. The SureLok coupling allows for repairs or replacement of J844 nylon air brake lines without the need of tools. Part No. A33001.

Assortment contains:

- Four sizes of hose.
- 16 coupling configurations.
- 158 individual couplings.

## Large Air Brake Assortment

The large SureLok™ assortment is perfect for the jobber or fleet. SureLok couplings allow for repairs or replacement of J844 nylon air brake lines without tools. Along with the SureLok couplings, this assortment features brass field attachable couplings for SAE J1402 DOT All hose. Part No. A33002.

Assortment contains:

- Seven sizes of hose.
- 51 coupling configurations.
- 318 individual couplings.

# Braking System

## Compression Fittings

Recommended for compressed air connector on all nylon air brake tubing air brake systems at locations other than between chassis frame and axle or between towed and towing vehicle. Also recommended as a connector on all air operated systems as applicable to suspension, steering, engine, transmission and auxiliary mechanisms. Fittings and tubing comply to Department of Transportation Federal Motor Vehicle Safety Standard, [DOT FMVSS571.106] [Mandatory requirements for inch tube fittings in U.S.A.] Society for Automotive Engineers [SAE J246] and [SAE J1131] [inch tube and fittings].

- Maximum Working Pressure: 150 psi
- Working Temperature: -40°F to +200°F [-40°C to +100°C]
- Materials: Brass
- Tubing: SAE J844 or DIN 74324

**Component Functions:** The Gates compression coupling has four parts:

## Small Compression Assortment

Handy, small compression assortment is a basic starter package for the jobber or fleet. This assortment features brass compression couplings for J844 nylon air brake hose. Part No. A33003.

Assortment contains:

- Four sizes of hose.
- 31 coupling configurations.
- 211 individual couplings.

## Large Compression Assortment

The large compression assortment is perfect for the jobber or fleet. This assortment features both brass compression couplings for J844 nylon air brake hose and brass field attachable couplings for SAE J1402 DOT. Part No. A33004.

Assortment contains:

- Seven sizes of hose.
- 59 coupling configurations.
- 330 individual couplings.

# Braking System

## AB Series Air Brake Hose

Computer-controlled manufacturing process virtually insures product uniformity.

- Superior EPDM rubber resists damaging effects of ozone and heat, plus harmful grease and oil common to air brake systems.
- Four-spiral polyester construction, meets SAE J1402 specifications. Complies with DOT FMVSS 106 requirements.
- Flexible and kink-resistant.
- Designed to accept all styles of air brake couplings, including conventional brass and plastic couplings.
- Temperature rating: -40°F to +212°F [-40°C to +100°C].

I.D. [In.]	Length [Ft.]	Work. Press. [psi]	Part No.
3/8	50	225	27240
3/8	250	225	28760
1/2	50	225	27241
1/2	250	225	28761

## Green Stripe® Vacuum Brake Hose

Extra heavy-duty hose designed to fit most air brake systems on trucks, trailers and other heavy equipment.

- Wrapped hose construction with multiple plies of rubber-impregnated fabric.
- Resists collapsing or deforming even under high vacuum at elevated temperatures.
- Rated at 30 In./Hg.
- Exceeds SAE J1403, Type H requirements. Complies with DOT FMVSS 106VH requirements.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

I.D. [In.]	Work. Press. [psi]	Part No.
3/8	85	27210
1/2	85	27211
5/8	85	27212
3/4	85	27213

**Note:** Federal law requires registration with the Department of Transportation for anyone producing air brake hose assemblies with swaged or crimped fittings.

# Braking System

## Power Brake Vacuum Hose

Light-duty hose specially engineered for power brake applications on passenger cars and light trucks.

- Complies with DOT FMVSS 106VL. Meets SAE 1403 Type L.
- Ozone-resistant EPDM cover.
- Textile reinforcement.
- Vacuum rating 30 In. Hg.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

I.D. [In.]	Work. Press. [psi]	Part No. 3 Foot	Part No. 50 Foot
11/32	85	27232	27230
15/32	85	27233	27231

## Heavy-Duty Green Stripe® Air Brake Hose

Can be used as flexible connector between frame and axle.

- Compatible with standard air brake couplings.
- Neoprene construction is oil resistant.
- Two-braid rayon reinforced construction with smooth cover.
- Exceeds SAE J1402 and Bendix specifications.
- Complies with DOT FMVSS 106 requirements.

I.D. [In.]	Length [Ft.]	Work. Press. [psi]	Part No.
3/8	50	225	27220
3/8	250	225	28304
1/2	50	225	27221

## Nylon Air Brake Tubing

Recommended for truck, bus and mobile air brake, and service lines where heat and battery acids are not present. Conforms to SAE J844 specifications. Meets DOT FMVSS 106-74.

- Tube: Heat and light stabilized seamless extruded nylon.
  - Cover: Nylon. Available in black [NABTA], blue [NABTB], green [NABTG], red [NABTR], yellow [NABTY] and orange [NABTO] colors. Other colors available upon request.
  - Temperature rating: -40°F to +200°F [-40°C to +93°C].
  - Couplings: Use Gates DOT SureLok™ [G31] or Gates DOT compression. [G32]
- Type A: Non-reinforced in sizes 1/8", 5/32", 3/16", and 1/4".
- Note:** Sizes 1/8" and 5/32" are NOT recognized by DOT for air brake systems. These are for service lines only.
- Type B: Reinforced with one open ply of fibrous nylon in sizes 5/16", 3/8", 1/2", 5/8" and 3/4".

# Air Conditioning & Refrigeration Systems

## PolarSeal® Hose

Designed for environmentally safe R134a\* refrigerants in automotive air conditioning and industrial systems such as tractors, construction trucks, and mobile and stationary refrigeration units. Can be crimped with current AC die sets on MC4-20, PC707, 3000B and OmniCrimp 21 crimpers, or with the PolarSeal portable crimper.

- Minimizes permeation of both R134a and R12 refrigerants.
- Cover is black synthetic EPDM rubber.
- Nylon barrier inside black chloroprene rubber tube is reinforced with spiraled polyester.
- Meets or exceeds SAE J2064 Type C, Class II.
- Temperature rating: -22°F to +257°F [-30°C to +125°C], Class II.

**Note:** For a complete listing of PolarSeal Hose and Couplings, see Gates Hydraulic Catalog 431-2080.

\* Beginning in 1995, all new air conditioning systems in cars, light trucks and industrial applications manufactured in North America must use R134a refrigerant.

## PolarSeal® II Hose

PolarSeal II Hose is designed to be installed with PolarSeal II couplings and clamps. Meets SAE J2064 Type C, Class I - use with R12, R13A and R22 refrigerants. Recommended for air condition systems on school/transit buses, RV's, limos and other heavy equipment that has long run or hard to service AC lines. Elastomeric tube with fabric braid reinforcement. Cover is heat, moisture and ozone resistant.

- Temperature rating: -22°F to +257°F [-30°C to +125°C].
- Coupling Recommendation [See Crimp Data Manual 428-7365 or E.Crimp]: PolarSeal II Coupling.

**Note:** For a complete listing of PolarSeal II Hose and Couplings, see Gates Hydraulic Catalog 431-2080.

## PolarSeal® and PolarSeal® II Couplings and Accessories

OEM quality couplings in 64 configurations to fit most mobile refrigeration and air conditioning applications.

- Available in straight, 45° and 90° styles.
- Comes in male, female, flared, flareless and swivel ends to fit most popular applications.
- Four sizes of "O-Rings" especially compounded for R134a refrigerants.
- Five inline orifice tubes.

**Note:** For a complete listing of PolarSeal Couplings, see Gates Hydraulic Catalog 431-2080.

# Windshield Washer & Vacuum Systems

## Windshield Washer, Vacuum and Radiator Overflow Tubing

Ideal for windshield washers, vacuum-operated accessories and radiator over flow.

- Vacuum and kink resistant construction.
- Vacuum rated to 24 In./Hg. [610mm].
- Meets SAE J1037, J942b specifications.
- 25 psi working pressure.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

		50 Ft. Reel	250 Ft. Length			25 Ft. Length	50 Ft. Reel

## Windshield Wiper Hose

Ideal for windshield washers, vacuum-operated accessories and radiator overflow applications.

- Reinforced construction for pressure applications. Kink and collapse resistant.
- EPDM tube and cover resists splitting or cracking during stem insertion.
- Temperature rating: -40°F to +257°F [-40° to +125°C] to 26 In./Hg.

# Windshield Washer & Vacuum Systems

## High Temperature DPFE Hose Solution Kit

Specially formulated silicone rubber hoses designed as a solution for common DPFE failures. High temperature resistance assures long service life in harsh environments. Part No. 27079.

- Extremely flexible and kink resistant.
- Solves common failure issue on Ford/Lincoln/Mercury trucks and SUVs.
- Includes two sections of hoses so both can be replaced at the same time.

## Silicone Vacuum Tubing (EGR Hose) and DPFE

Specially formulated silicone rubber. High temperature resistance assures long service life in harsh environments.

- Extremely flexible and kink resistant.
- Also used to transfer air, water and coolant for exhaust gas recirculation.
- Orange color for easy identification.
- Temperature rating: +300°F (+149°C) to 25 In./Hg. Possible reduced capacity above +300°F; Maximum +400°F (+204°C).

I.D. (In.)	Nipple Size (In.)	Min. Bend Radius (In.)	Part No.

# Air & Defroster Systems

## Turbocharger Hose

Specially compounded for use as a short, flexible connector between the air intake and the turbocharger. Can also be used for turbocharger air discharge. Approved for Marine Applications.

- Silicone elastomer inner liner reinforced with woven fiberglass fabric and coated with orange silicone rubber.
- Resists high temperatures and pressures.
- Resists coolants, weathering and ozone.
- Highly visible orange color helps distinguish this hose from engine coolant hose.

## Molded Turbocharger Hoses

OE-Exact Turbocharger Hose features multi-layered construction with inner aramid reinforcement for maximum durability and strength.

- Resists high temperatures, high pressures and oil permeation.
- Absorbs and isolates vibrations and shock.

## Molded Heavy-Duty Turbocharger Hoses

Cold side CAC curved hose.

- Meets SAE 20R4 Class D1 with M-Aramid reinforcement and .17/.28" wall.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

## Molded Turbocharger Hose Kits

OE Improved Turbocharger Hose Kit for complete replacement in a single kit.

- Specially formulated fluorelastomer liner prevents oil permeation.
- Multiple layers of reinforcement for improved service life.
- High-quality silicone cover provides excellent heat resistance in high- temperature underhood conditions.
- T-bolt clamps with stainless steel band and bridge resist corrosion and provide higher torque for better sealing over traditional worm gear clamps.
- Hose is manufactured in the U.S.A.

# Air & Defroster Systems

## Green Stripe® Ring Retained Turbocharger Hose

Made for turbocharged Class 8 and heavy-duty diesel engines. Multi-hump design isolates vibration and absorbs rotational shock. Depending on application, hose is engineered with three or four rings to maintain design integrity.

- Four layer silicone construction with aramid fiber reinforcement for maximum durability.
- Meets or exceeds OEM specifications.
- Temperature rating: -60°F to +500°F [-51°C to +260°C].

## Defroster/Air Intake Hose

For defrosters, air ducts, air intakes, under-hood applications and other low pressure, low suction applications. Approved for marine applications.

- Flexible, heat-resistant materials and helical steel wire reinforced.
- Easily cut and formed to desired shape and length.
- Tear, abrasion and ozone resistant.
- Complies with DOT FMVSS 302.
- Temperature rating: -40°F to +200°F [-40°C to +93°C].

## Green Stripe® Heavy-Duty Air Vent Hose

Specifically designed for air cleaner-to-engine connections and other ducting applications.

- Heat and oil-resistant tube.
- Flexible, helical wire reinforced.
- Cover is heat, oil and abrasion resistant.
- Smooth interior offers minimum air resistance for maximum efficiency.
- Easily cut with knife and wire cutters.
- Temperature rating: -40°F to +257°F [-40°C to +125°C].

**Caution:** Not recommended for conveying liquids.

## Emission Control Duct Hose

Connects hot air from exhaust manifold shroud to air cleaner for efficient control of emissions. Helps eliminate carburetor icing and improves engine warm-up.

- Aluminum polyester construction for economy.
- Fiberglass aluminum (black) for greater strength and durability.
- Completely flexible and easily bent, yet retains shape after forming.
- Resists heat, cold, oil and water.
- Cuts with knife for easy installation.
- Install with or without clamps.
- Temperature rating: -40°F to +400°F [-40°C to +204°C].

# Air & Defroster Systems

## Emission Control Hose

OE Exact Crankcase Ventilation and Emission Control hose is constructed from high quality materials for durability and maximum service life. Replacement hose effectively restores the emission system to proper operation and performance.

- Meets SAE J30R7 specifications.
- Resistant to fuel vapors and oil.
- Temperature rating: -40°F to +275°F [-40°C to +135°C].
- Direct replacement ensures exact fit and easy installation

**mission Control Hose Kit also available.**

## Air Vent Hose

Light-duty hose for air cleaner-to-engine connections, defroster ducts and air or heater ducting.

- Extremely flexible.
- Helical wire construction.
- Heat and oil resistant tube.
- Temperature rating: -40°F to +212°F [-40°C to +100°C].

**Note:** For abrasive environments use Gates Green Stripe® Heavy-Duty Air Vent Hose.

**Caution:** Not recommended for conveying liquids.

# Service Hose

## Safety Stripe® Air Hose

Durable, premium hose for garage and service station air impact tools.

- High strength reinforcement.
- High flexibility is easy on wrists.
- Perforated EPDM red cover that resists ozone and abrasion.
- Bend restrictors for extended life.
- Factory assembled male couplings with 300 lb. minimum coupling pull.
- Temperature rating: -40°F to +200°F [-40°C to +93°C].

# Service Hose

## Hybrid Air Hose

Gates hybrid polymer air hose combines flexibility and strength together, making it the best hose for air service applications.

- Lightweight, extremely flexible construction.
- Zero memory, allowing hose to lay completely flat.
- Superior bend radius.
- High abrasion and chemical resistance.
- Kink resistant, even under pressure.
- Easy coiling after use.

### Fittings:

- Fittings and ferrules are 100% brass.
- Heavy-duty PVC bend restrictors on both ends.

Part No.	Description
27568	1/4" I.D. x 15/32" O.D. x 25 ft. [300 psi, 1/4" NPT Male, 1/4" NPT Male]

## Charter® Multi-Use Air/Water Hose

Ideal for air and water applications. Engineered for heat, abrasion and ozone resistance.

- EPDM rubber tube and cover.
  - Two layers of spiral synthetic reinforcement.
  - Gates Power Crimp® specifications available\*
  - Temperature rating: -40°F to +200°F [-40°C to +93°C].
- \*Contact your local Gates sales associate for specification information.

**Caution:** Do not use for oil, grease or fuel transfer.

# Service Hose

## Multi-Use Hose

For handling lower pressure air, water, agricultural spraying, oil or grease. Can also be used for air spray painting.

- Nitrile tube and cover provide high oil resistance.
- One braid polyester cord reinforcement.
- Temperature rating: 0°F to +212°F [-18°C to +100°C].

**Caution:** Not recommended for use as small I.D. by-pass, coolant and heater hose. Do not use for fuel transfer applications.

## Signal Call Tubing

Designed for driveway signal devices in service stations and garages.

- Long-lasting EPDM rubber tubing specially built to register under the slightest pressure.
- Withstands vehicle weight at temperatures up to +150°F [+66°C].
- Meets SAE J1037, J942b specifications.

Part No.	I.D. [In.]	Length [Ft.]
27539	3/8	50
28681	3/8	100
28686	3/8	300

## Hybrid Water Hose

Gates innovative Water Hose featuring premium hybrid polymer material for extreme flexibility.

Features:

- Zero memory, allowing it to lay-flat.
- Superior bend radius.
- High abrasion and chemical resistance.
- Kink resistant, even under pressure.
- Easy coiling after use.

Fittings:

- Heavy-duty nickel plated fittings and spring guard

# Exhaust System Hose

## Exhaust Hose (Hardwall) Wire Reinforced

Heavy-duty fabric-reinforced hose with a helical steel wire reinforcement to meet marine water and wet exhaust hose requirements.

- Features blue layline for easy identification.
- Resists heat and oil.
- Meets SAE J2006 requirements.
- Working pressure 100 psi for water application, 10 psi for exhaust application.
- May be used for engine water circulation, discharge lines, heat exchangers and wet exhaust connections.

## Fleet Accessories

### Heavy-Duty Hood Latch Kit

Universal hood latch kit for medium- and heavy-duty applications. Part No. 90350.

- Kit includes anti-rattle nub.
- Brackets are made from hot-rolled steel with clear zinc chromate plating for superior corrosion resistance.
- Hood latch is made of EPDM rubber which is specially formulated to resist ozone for long service life.

## Merchandisers & Sales Aids

### Interactive ABDS/SBDS System Display

Engage your customers with a hands-on display to facilitate conversations about the benefits of complete system repairs for the Timing and Serpentine belt drive systems. Part No. 91078.

- Dual-sided so it can be rotated to showcase either system.
- 3D unit has a real belt and moving system components.
- Compact countertop size:
  - o 18" tall x 10" wide x 3" deep.
  - o Footprint 10" x 12" (base is 7" x 12").
  - o Lightweight but durable construction.

### Belt Boards

Belt Board allows dealers to stock multiple belts per hook using less space. Part No. 91488

- Racks easily screw to the wall and then all you do is slide belt over hook.
- Includes: 6 metal hooks per board

### Belt Finger Rack

Display allows dealers to display more belts in less space. Part No. 91530

- Racks easily screw to the wall, then all you do is slide over the finger.
- Includes: [5] 3' metal finger racks [enough for 250 V-belts], mounting screws, and wall spacers.

### Hose Hangers

Convenient plastic hook hangers that can quickly be attached and detached from individual hoses for storage and/or display. Part No. 91999

- 50 per package.
- Will not damage hose.
- Works well with Gates belt boards [Part No. 91488].

## Merchandisers & Sales Aids

### Barricade® Fuel Line and Vacuum Tubing Merchandiser/Assortment

Attractive, metal cabinet comes assembled. Holds and dispenses 12 reels of fast-selling Gates Barricade Fuel Line, EEC and PCV hoses, or tubing for windshield washers and vacuum-operated accessories. Part No. 91184 and Part No. 91183 - display only.

- Contains 12 fast-selling hose sizes on individually mounted and replaceable reels.
- Handy measuring scale printed on lid makes it easy to measure exact size of hose needed.
- Can be displayed on counter or mounted on wall.
- Attached chain designed to hold hand-held hose cutter.
- Base dimensions are 16"D x 19 1/2"W x 18"H.

**Note:** Combine this merchandiser with the Heater Hose Merchandiser to create the modular Hose Center.

### Heater Hose Merchandiser

Attractive, yet rugged metal cabinet organizes and keeps stock neat. Designed to hold dispensing cartons, making it easy to pull hose out for measuring. Create a "Hose Center" by adding the popular Gates Fuel Line/PCV/EEC and Vacuum Tubing Merchandiser to the top of this unit. Part No. 91160.

- Holds one each 50 ft. cartons of 1/2", 5/8" and 3/4" heater hose.
- Handy 36" measuring scale printed on side makes it easy to measure the exact length of hose needed.
- Assembled unit measures 20 1/8" x 17 1/2" x 43".

**Note:** Merchandiser does not include hose.

### Create a "Hose Center"

Add the popular Gates Fuel Line/PCV/EEC and Vacuum Tubing Merchandiser to the Heater Hose Merchandiser, and all the popular small I.D. hoses will be located in one neat and convenient location. Part No. 91183 and 91160.

- Base dimensions are 20 1/8"D x 19 1/2"W x 61"H.

## Merchandisers & Sales Aids

### Fuel Line Hose Merchandiser

Attractive, metal cabinet that dispenses 3 types Gates Barricade® Fuel Line with storage for another 3 reels.  
Part No. 91127

- Can be displayed on counter or mounted on wall
- Can be attached to a second Gates merchandiser
- Base dimensions are 14 3/8" D x 18 3/4"W

### Hybrid Air Hose Display

Gates offers a hybrid air hose display with distinct signage identifying the product..

- Lightweight, extremely flexible.
- Zero memory, allowing it to lay completely flat.
- Superior bend radius, Kink resistant and easy coiling.
- High abrasion and chemical resistance.
- 100% brass fittings and ferrules with heavy-duty PVC bands on both ends.

Part No. 27571B includes: Full corrugated pallet box with opening, sign, [54] 27571.  
Part No. 27571H includes: Half corrugated pallet box with opening, sign, [36] 27571.

### Heater Hose Connector Assortment

Sturdy impact-resistant plastic case holds an assortment of 36 hose connectors for 1/4" through 3/4" I.D. hose.  
Part No. 91175.

- Case opens from either side.
- Handy plan-o-gram inside both lids identifies location of each type and size connector.
- Assortment contains two each elbow, straight, and "T" connectors.
- Provides convenient storage for complete line of connectors.

## Merchandisers & Sales Aids

### Heater Hose Quick-Lok® Connector Assortment

Purchase this assortment and save verses buying each component individually. Part No. 91166.

Each assortment includes:

- Disconnect tool and (6) Quick-Lok connectors.

### Fuel Hose Connector Assortment

Upgraded component range to match Gates heater hose offerings. Part No. 91174

- Inside cover plan-o-gram easily identifies the location of each type and size connector.
- Premium storage container can be connected to create a double-sided unit.
- Includes: Plastic box and 2 each of 28561, 28562, 28563, 28564, 28600, 28601, 28602, 28603, 28571, 28581, 28572, 28582, 28573, 28583, 28574, 28584, 28621, 28631, 28620, 28630, 28622, 28632, 28623, 28633.

### Reducer Connector Assortment

Upgraded component range to match Gates fuel line and heater hose offerings. Part No. 91177

- Inside cover plan-o-gram easily identifies the location of each type and size connector.
- Premium storage container can be connected to create a double-sided unit.
- Includes: Plastic box and 2 each of 28594, 28609, 28610, 28611, 28612, 28636, 28637, 28639, 28640, 28641, 28642.

### Hose Clamp Merchandiser

Appealing display holding the top 2 fuel line clamps, 2 heater hose clamps and 3 radiator hose clamps. Part No. 91192 and Part No. 91191 - display only.

- Easily mounts to counter, wall or isle
- Dimensions are 15" x 5 1/8" x 17 1/2"
- Includes: Display, (20) 32001, (10) 32007, (10) 32010, (20) 32012, (10) 32020, (20) 32028, (10) 32036

## Merchandisers & Sales Aids

### Air Brake Hose Product Merchandiser

This merchandiser holds air brake hose assemblies, PTFE assemblies and is packed with labels for both products. The merchandiser keeps assemblies organized, handy and ready to use. Part No. 91180.

- Mounts to the wall.

### Thermostat, Gasket and Radiator Cap Cabinet Fuel Cap Cabinet

Attractive displays keep products neatly organized. These cabinets are attractive and eye-catching, as well as rugged and durable. The thermostat cabinet comes with a wall mountable gasket board to organize your gaskets. Both cabinets have room to add part numbers beyond the basic 80 percent coverage, whether new numbers or for a specific need. Sturdy steel construction for prolonged life and durability.

- Part No. 91116 includes the thermostat, gasket, radiator cap cabinet and gasket display board.
- Part No. 91117 includes the fuel cap cabinet.

### PowerRated® "70" Belt Merchandiser

This eye-appealing merchandiser encourages self-service retailing. It takes up approximately four feet of gondola space and provides 78% coverage on applications in the three to 17 horsepower range. Part No. 91230 and Part No. 91234 - display only.

- Belt measuring device makes it easy to select the correct replacement belt.
- Complete application catalog also furnished.
- Six four feet metal racks.
- Belt number tags.
- Four feet header sign.
- One each in the top 70 sizes included.

**Note:** Pegboard and gondola not included.

## Professional-Grade Tools

### Timing Belt Tension Tester

Provides a precise method of testing timing belt tension on a variety of automotive applications. Part No. 91000.

- Gates tension tester will test any timing belt up to 30mm wide, replacing several expensive tools.
- Comes with adapters for varying belt thicknesses.
- Uses force deflection method to measure tension.
- Compact design works in tight engine compartments.
- Scale can be read in any position.

### Cam Gear Sprocket Tool

Gear holding tool provides safe, effective means for holding gear while removing and reinstalling belt or sprockets without damaging gears, cams or valves. Many engine-timing procedures require camshaft to be held in position while gear or belt is removed from shaft to re-align cam timing position properly. Part No. 91008.

- Tool can also be used to turn gears during timing alignment.
- Essential tool for many timing belt, pump adjustment and engine timing applications.

### Multi-Lock Tool

Multi-Lock tool “locks” twin camshafts in place during timing belt replacement or engine overhaul. Part No. 91009.

- Fits onto sprockets and extends to hold sprocket teeth. Incorporates “variable pitch” adjustable arms to fit various diameters and tooth pitches.
- Unique design is fully adjustable to fit numerous applications including diesel injector pump sprockets and sprockets that are positioned closely together, like those on Mitsubishi or GM EcoTec engines.
- Ratchet locking handle provides compact, strong lever action for secure positioning.
- Includes extension bar for wider spaced cams.

### Hydraulic Tensioner Pin Set

A Gates exclusive that is a must have for every technician. Hydraulic timing belt tensioners need to be compressed during service. Many technicians use a drill bit or allen wrench to hold tensioners in their compressed state, which can be dangerous and may bend or damage tools. Part No. 91010.

- Hardened spring steel to hold the strongest tensioners.
- Conveniently mounted on key chain with six different sizes to service a variety of applications.
- Holds certain serpentine belt tensioners and timing chain tensioners in place during service.

## Professional-Grade Tools

### Subaru Timing Belt Spacer Tool

The Subaru Timing Belt Spacer Tool allows proper clearance between belt and guide plate on 1997 and newer Subaru manual transmission equipped engines. Part No. 91052.

- Prevents excessive heat, belt wear, and eventual engine failure.

### Subaru Century™ Series Stretch Fit® Belt Installation Tool

The 2008-11 Subaru Impreza, Forester and Outback with 2.5L engines utilize Stretch Fit belt technology on the A/C compressor drives. Gates leads the way as the only U.S. aftermarket supplier to offer coverage for these vehicles. This tool is required for proper installation to avoid damaging the belt. Unlike the OE belt, this tool is available separately so that the technician isn't forced to buy a tool every time a belt is installed. Part No. 91031.

### Belt Wear Gauge

Like tires, EPDM V-ribbed belts wear out gradually, steadily losing rubber material. This unique tool is designed to help inspect serpentine belts for wear. EPDM belts, installed by original equipment manufacturers on new vehicles, typically do not show obvious signs of wear such as cracking.

### Serpentine Belt Installation Tool

Time-saving tool affords improved control and reach when installing serpentine belts. Also helps install V-belts and timing belts located in difficult-to-reach areas. Part No. 91209.

- Dual-pin design affords convenient belt push/pull capability.
- Tool's handle lends easy twisting control of belt in hard-to-reach places.

## Professional-Grade Tools

### Serpentine Ratcheting Wrench Set

Provides fast way of releasing tension on serpentine belt drives. Reversible, 21-tooth ratcheting heads on each end allow for better tool positioning and more swing than standard serpentine belt wrenches. Part No. 91011.

- Wrenches are 21 1/2" long, 6" longer than competitive designs for increased leverage.
- Includes eight sizes for maximum application coverage: 13mm, 14mm, 15mm, 16mm, 17mm, 3/8", 1/2" and 3/4."

### Serpentine Belt Tension Relief Tool

Ideal tool for removing and installing serpentine belts. Provides necessary leverage and clearance to release spring pressure and move tensioner pulley arm. Part No. 91015.

- Three-bar design includes seven sockets [13mm, 14mm, 15mm, 16mm, 18mm, 3/8" and 1/2"].

### DriveAlign® Laser Alignment Device

Exclusive, patented tool is compatible with all automotive serpentine belt drives. Quickly identifies two most common types of pulley misalignment – parallel offset and angular – that reduces belt and pulley service life and produce unwanted noise. Simply position tool within grooves of pulley and aim laser beam at opposite pulley. Part No. 91006.

- Lightweight, easy-to-use tool includes special laser enhancement glasses for easy viewing in all light conditions.
- Comes with high-impact resistant carrying case.

### Century™ Series Stretch Fit® Belt Installation Tool

Installation tool for Gates Century Series Stretch Fit belts. The belt can be damaged if the right tools are not used. Part No. 91030.

- Installation instructions online.

# Professional-Grade Tools

## V-Ribbed Belt Strap Pulley Wrench

Revolutionary tool allows technicians to easily remove stubborn drive pulleys. Part No. 910131.

- Specifically designed to grasp and hold automotive SAE V-ribbed belt driven pulleys.
- Simple to use, it is fabricated with a heavy-duty aluminum alloy handle, enabling plenty of gripping force on a pulley via the plastic composite locking head.
- The specially constructed V-ribbed strap, with its high coefficient of friction, settles into pulley grooves or flattens against the smooth surface of a pulley, providing the utmost grasping control and allowing the user to easily remove stubborn drive pulleys from accessories.

## Product Grabber (Telescoping Pole)

Allows easy product hanging and retrieval from belt boards that are installed high on walls. Part No. 91233.

- 4' pole, extends to 11'.
- Extra-long 8" hook for extended reaches.

## V-Ribbed Belt Length Finder

Handy tool measures every serpentine belt made to help determine replacement belt for cars, light trucks, buses, heavy trucks and other equipment. Part No. 91202.

- Telescopes out to measure up to 120" belts. Compact 3 ft. length when closed.
- Accurate, lightweight and easy to use.
- For specific applications and recommended replacement belt numbers, see Gates Catalogs and Owners' Manuals.

## V-Belt Number Finder

Versatile 88" device helps determine replacement belt numbers for cars, light trucks, heavy trucks, buses and Truflex®/PowerRated® light-duty belts, when the old belt is available. Part No. 91201.

- For automotive and light-duty belt applications, see Gates Catalogs and Owners' Manuals to verify recommended replacement parts.

## Truflex® and PowerRated® Belt Length Finder

Improved belt length finder measures FHP belts up to 107" to determine equivalent Truflex or PowerRated belt numbers. Part No. 91104.

- Instructions for using finder packed with unit.

# Professional-Grade Tools

## Krikit V-Belt Tension Gauge

This easy-to-use gauge is designed for tensioning all automotive V-belts up to, and including, 7/8" top widths. Part No. 91107.

- Scale reads in pounds and kilograms. Measures tension from 30 to 160 lbs., and 15 to 75 kg.
- Die-cast aluminum body, nylon indicator arm and pressure pad.
- Fits in pocket with stainless steel pocket clip.

**Note:** Not for use on timing belts.

## Krikit II Century™ Series (V-Ribbed) Belt Tension Gauge

Designed for tensioning V-ribbed belts on passenger cars, light trucks, heavy trucks and buses. Part No. 91132.

- Bright green pressure pad and indicator arm.
- Calibrated to measure tension from 100 to 320 lbs., and 50 to 150 kg.
- Measure belts up to eight ribs in width.

**Note:** Not for use on timing belts.

## Accessory Drive Hardware Kit

Kit contains assortment of bolts, dust shields, bearing inserts, and plastic elbows for GM vehicles. Part No. 91051.

- OE quality components at a discounted price.
- Covers over 60 million vehicles currently in operation.
- Perfect for the shop that needs hardware to finish the job.

Part No.	Size	Description	Qty. in Kit
91051	Hardware Kit	Tackle Box	1
91051-01	M10 x 15 x 35H	Bolt	5
91051-02	M10 x 15 x 65H	Bolt	5

# Professional-Grade Tools

## Alternator Decoupler Pulley (ADP) Tool Kit

This handy tool kit contains all of the tools required for ADP removal and installation. One kit eliminates the need to shop around for hard-to-find tools and reduces service bay downtime that can take a toll on dealer profits. Part No. 91024.

- Kit includes eight tools designed to repair all vehicles that utilize ADPs found on the road today.

Part No.	Description	Part No.	Description
91024-1	H22 x 33T	91024-5	1/2" Drive x H10 Adapter
91024-2	H21 x H28	91024-6	1/2" Drive x T50
91024-3	H17 x H19	91024-7	1/2" Drive x S10
91024-4	H10	91024-8	1/2" Drive x H8

## Coolant and Battery Refractometer

Measures concentration of coolant mixture in engine. Place small sample of coolant on lens, then hold lens up to light source. Light bends through liquid, providing an accurate reading on scale. Part No. 91001.

- Measuring coolant concentrations is essential to cooling system maintenance.
- Most technicians use hydrometers to test coolant concentration via gravity or floating ball scales.
- Hydrometers must be temperature corrected, and may give false readings when testing new, propylene-based coolants.
- Gates refractometer automatically corrects for temperature on both types of coolant [ethylene and propylene glycol] while measuring battery charge levels.

## Heavy-Duty PowerGrip® SB Clamp Removal Tool

Offers easiest method for removing Gates revolutionary shrink-to-fit PowerGrip SB clamps. Part No. 91215.

- Quickly removes clamps without damaging hose.

# Professional-Grade Tools

## PowerClean™ Flush Tool

Cooling systems can be difficult to flush completely due to accumulated debris. Inadequate flushing can ruin a newly installed water pump and result in warranty problems and frustrated customers. Make sure you perform a complete cooling system flush by using clean water and compressed air. The PowerClean Flush Tool “water hammers” accumulated sludge and scale deposits without the use of harsh chemicals or solvents. It cleans radiators, heat exchangers, hoses and engine blocks more effectively than conventional flushes, maintains system integrity and ensures warranty coverage on replacement parts, including water pumps. The PowerClean Flush Tool patented process uses fixed dimensional control of the air and liquid flow paths. The process allows air to pressurize the cleaning fluid to scrub deep into corners and crevices, eliminating trapped debris.

- Pulsating gun assembly with pre-set regulator.
- Water line backflow preventer.
- Large rubber tip for radiator necks and direct flushing of the engine block.
- Small rubber tip on whip hose for direct access to heater core tube stubs.
- 5/8" And 3/4" heater hose barbs for flushing heater cores or engine blocks.
- Durable protective storage case with room for additional items. Part No. 91002.

Part No.	Description
91002-1	Storage Case W/Foam Inserts
91002-2	Patented Flushing Gun
91002-3	Small Tip for Heater Core
91002-4	Large Tip for Radiators
91002-5	5/8" Heater Hose Connector

Part No.	Description
91002-6	3/4" Heater Hose Connector
91002-7	Whip Hose W/Quick Couplers
91002-8	Supply Hose Backflow Preventer
91002-9	4 1/2" Large Tip for Trucks

## Water Pump Spanner Wrench

Gates 2 1/2" spanner wrench adapts to a 3/8" ratchet or breaker bar to make water pump removal faster and easier. Part No. 91060.

- Lets the technician get a firm grip on the water pump to remove the clutch without scratching or galling the pulley.
- Fits several Gates water pump pulleys including part numbers 43034, 43037, 45005 and 45010 covering many Chrysler and GM applications.

## Hose Clamp Pliers Set

Quickly and easily reach, install, release, or even remove hard-to-reach hose clamps with this handy kit. Part No. 91067.

- Set includes: Remote action flexible hose clip tool with 600mm reach, large flat-band pliers [angled for access], and hose release hook.

## Professional-Grade Tools

### Quick-Lok® Coupling Removal Tool

For installation and removal of 5/8" and 3/4" heater hose with Quick-Lok connectors. Part No. 91204.

- Allows fast, easy way to connect replacement heater hose assemblies on passenger cars and light trucks.
- Helps retain connector O-rings so they don't fall out or get damaged.

### Power Steering and Alternator Pulley Kit

Designed to remove and install press-on-type belt driven accessory pulleys found on most vehicles. Part No. 91014.

- Kit includes components necessary to remove and install pulleys on pumps with common 3/8-16 threaded shaft.
- Includes unique interchangeable components to remove and install pulleys on GM Quad 4, 3.1L, and Ford 4.6L engines.
- Designed to be used with either hand tools or air impact gun.
- Kit includes special holding bar to stop housing from spinning during use with impact gun.

### Hose Cutters (Hand-Held) and Replacement Blades

Makes clean cuts with no ragged edges. Cuts most non-metal reinforced rubber hose. Excellent for cutting textile-reinforced hose.

#### Features Advantages:

- Blade closes into handle for safety.
- Cutter and blades packaged individually on shrink-wrapped cards.
- Lightweight with nylon handles.

Hose Cutter	Description	Replacement Blade	Cuts to Hose I.D.
91143	Large I.D. Hose Cutter	91144	3"
91153	Small I.D. Hose Cutter	91154	1½"

## Professional-Grade Tools

### PolarSeal® II Pliers

PolarSeal II Pliers are used to crimp clamps on PolarSeal II couplings. Any one of three pliers will get the job done. Each tool is designed with slightly different features.

#### Ratcheting Plier – Part No. 77953

- The ratcheting plier features a no-release function. Once a crimp is started the plier does not release until the crimp is complete. This guarantees a proper seal, with no guess work in the crimp.

#### Straight Jaw Plier – Part No. 77952

- The straight jaw plier is a low cost, no-frills plier. This plier works best when there are no obstructions to hinder gripping the clamp or completing the crimp.

#### Notched Jaw Plier – Part No. 77951

- The notched jaw plier is designed for the hard-to-reach places. If obstructions prohibit the use of straight jaw pliers this is the tool to use. Use either side or the front of this plier to make the crimp.

### SureLok™ Quick-Release Pliers

SureLok push-to-connect couplings are the easiest and quickest couplings to install. But disconnecting them can be another matter. Placement near obstructions, as well as age and road debris, can adversely affect your ability to quickly disconnect SureLok couplings. Many times getting hands into an area to remove a coupling is almost impossible. SureLok pliers allow for the quick removal of SureLok couplings from the tubing with just one hand. To help get into those tight spaces, SureLok pliers offer two different heads: one straight and one at a 90° angle. They also come in two sizes: small for tubing from 1/8" to 3/8"; and large for tubing from 3/8" to 3/4".

#### SureLok Plier Single Packs:

<b>Small Angle:</b>	Part No. 91021
<b>Small Straight:</b>	Part No. 91023
<b>Large Angle:</b>	Part No. 91020
<b>Large Straight:</b>	Part No. 91022

**SureLok Plier Four-Pack:** Part No. 91017

## Professional-Grade Tools

### Sonic Tension Meter

The proper way to check belt tension is to use a tension tester. The Sonic Tension Meter measures the vibration of the belt span and instantly converts the vibration frequency into belt static tension. This is the span vibration method of tensioning belts. Part No. 7420-0508.

At first glance, accessory belt systems appear much more complicated than they actually are. With a basic understanding of the system, and a few simple rules, serpentine belts are easy to install.

Most vehicle manufacturers have anticipated potential difficulties that may occur when installing a serpentine belt.

Such as:

1. Belt routing.
2. Which pulley moves to adjust belt tension.

Thanks to vehicle manufacturers, the installer will usually be able to find this information on a routing decal located on or near the engine. Belt routing can also be found in some owners' manuals. The decal diagrams belt routing around pulleys, and usually indicates direction of movement for the tensioner pulley.

**If routing decal is absent, these simple rules may be helpful to the installer.**

1. Make a drawing of belt routing before removing belt.
2. Most of the time the V-grooved side of the belt meshes with the pulley grooves.
3. The belt basically encircles the pulley system, and is drawn in and looped around smooth pulleys.

4. Usually there is only one pulley that can be threaded incorrectly. That pulley is always near the center of the pulley group, and is always a smooth pulley [no grooves].

**IMPORTANT:** This publication is designed strictly as a serpentine belt installation tool. The drives listed in the Routing Guide section of this publication are the same as those in the application catalogs designated as serpentine ...except Routing Diagrams are referenced rather than belt part numbers.

5. If the belt appears too short or long to be installed, it is probably threaded the wrong way around the pulley mentioned in step 3.

If this routing doesn't work...

try this.

6. Belt should be seated into all pulley grooves and belt spans free of contact with engine components. With belt routing solved, the tensioner must be located along with its direction and manner of movement. Serpentine belts are usually tensioned by a spring loaded idler pulley. The powerful spring that provides tension is located within a small cannister-like housing near the pulley. The pulley pivots around the spring housing. Spring loading on the tensioner pulley is sufficient to require a lever to pivot pulley away from belt. Manufacturers often provide a small square hole near the pulley or spring container so that a socket driver can be used to pivot pulley.

Rotate tensioner in direction of arrow to remove or install belt

If square hole is not present, tensioner pulley can sometimes be pivoted by using a socket wrench on the pulley centerbolt.

Rotate tensioner in direction of arrow to remove or install belt

**Belt Tension Ranges for Manual Tensioners**

Always use a belt tension gauge that indicates static tension, such as the Krikit Tension Gauge, Part Number 91132, to determine proper tension from the Installation Chart. Many Micro-V belts are automatically tensioned by a spring-loaded automatic tensioner, which does not require the tension to be set. **NOTE:** A belt is considered “used” once it has been “run-in”.

The tension ranges below are used for applications requiring manual tensioning.

- For drives with manual take-up on locked-center drives, position the belt and set tension to the prescribed Installation Tension.
- Run belt for five minutes
- If belt tension drops below Suggested Tension range, retighten belt to the Installation Tension. This will allow the belt to seat-in and run at Suggested Tension after it has operated under normal driving conditions.

Number of Ribs	Suggested Tension (lbs.) Ranges	Installation Tension (lbs.) Used Belts	Installation Tension (lbs.) New Belts
3	45-60	67.5	90.0
4	60-80	90.0	120.0
5	75-100	112.5	150.0
6	90-125	135.0	187.5
7	105-145	157.5	217.5
8	120-160	180.0	240.0
9	135-180	202.5	270.0
10	150-200	225.0	300.0
11	165-220	247.5	333.0
12	180-240	270.0	360.0
14	210-280	292.5	420.0

See Pages 113-124 for Micro-V® Belt Routing Diagrams.

If no routing decal is present in the engine compartment or there is no diagram in the vehicle owner's manual, the diagrams below can be useful in installing a new belt. Some other tips to keep in mind:

1) The V-grooved side of the belt meshes only with grooved pulleys. 2) The belt basically encircles the pulley system and is drawn inward by smooth pulleys to tension or increase belt wrap. The water pump is also generally run by a smooth pulley. 3) There is usually only one pulley that can be threaded incorrectly. In this case the belt will appear too short or long and most likely the belt has been routed on the wrong side of a smooth pulley; i.e., the grooved side of the belt is riding on a smooth pulley. 4) The belt should be seated into all pulley grooves and spans free of contact with engine components. Installing the belt off one rib on a pulley is a common mistake and will cause an early failure.

Serpentine belts are usually tensioned by a spring loaded automatic tensioner whose idler pulley comes into contact with the belt. Special tools are available for quick belt installation but a breaker-bar or socket wrench can generally be used to pivot the tensioner arm allowing the belt to be removed or installed. Always check the tensioner and system pulleys for wear or "play" and replace if necessary.

## Showing Belt Numbers with Corresponding Nominal Outside Lengths and Top Widths

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with "Vertical Flats"

Belt No.	Section	Length (in)	Length (mm)	Top Width (in)	Top Width (mm)	Belt No.	Section	Length (in)	Length (mm)	Top Width (in)	Top Width (mm)

## Showing Nominal Belt Top Widths and Outside Lengths with Our Corresponding Belt Numbers

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with "Vertical Flats"

Length (in)	Length (mm)	Belt No.	Length (in)	Length (mm)	Belt No.	Length (in)	Length (mm)	Belt No.

## Showing Belt Numbers with Corresponding Nominal Outside Lengths & Top Widths

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with "Vertical Flats"

## Showing Nominal Belt Top Widths & Outside Lengths with Our Corresponding Belt Numbers

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with "Vertical Flats"

## Showing Nominal Belt Top Widths Per Strand & Outside Lengths with Our Corresponding Belt Numbers

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Length (in)	Length (mm)	Template Color	Belt No.	Length (in)	Length (mm)	Template Color	Belt No.	Length (in)	Length (mm)	Template Color	Belt No.
<b>1/2" (13mm) Top Width Per Strand</b>				<b>1/2" (13mm) Top Width Per Strand</b>				<b>1/2" (13mm) Top Width Per Strand</b>

## Free Running or Interference Engine? You and Your Customers Need to Know.

Automobile engines can be classified as either Free-Running or Interference, depending on what occurs if piston/valve synchronization is lost.

As illustrated below, in the free-running engine with the crankshaft still moving, there is enough clearance between the valve and piston, even if the cam stops with a valve fully open.

However, interference engines usually sustain damage if synchronization is lost. As illustrated, disrupted synchronization allows the piston and valve to collide causing damage and very expensive repairs for the vehicle owner. Damage can occur to valves, pistons, or heads, and in some cases, completely ruin the engine. Most import (with higher compression engines) and most car and light truck diesel engines are interference. To avoid costly engine repairs, follow the auto manufacturers' mileage replacement recommendations or we recommend timing belt replacement at around 60,000 miles.

**Free Running**  
No Valve/Piston Interference

**Interference**  
Valve/Piston Interference

**NOTE:** For your convenience, interference engines have been footnoted with a star in the application listings of this publication. This lets you easily identify them, and pass that information on to your customers.

Since timing belts are inside the engine they tend to be an out-of-sight, out-of-mind item and are seldom thought of as a part of routine maintenance. Here are some questions to ask customers that will help sell belts and protect the customer from expensive repairs:

1. Did you buy the car new? If yes, they'll know if the belt has ever been replaced.
2. Did you buy the car used? If so, they won't know if the belt has been replaced. This is a flag for the customer to get the belt checked, replaced or at least be aware that he has a timing belt.
3. How many miles are on the vehicle? Generally belts should be replaced at around 60,000 miles or less. Our Timing Belt Replacement Recommendations Booklet is an excellent tool for determining replacement intervals.
4. Have you ever replaced the timing belt? If the answer is yes or no (and the customer knows the mileage) you can determine where the vehicle is in the replacement cycle.

Here's a helpful hint for customers with vehicles within a few thousand miles of the recommended replacement interval. If they are having any engine repair done, have the timing belt checked. If it needs replacing, do it along with the other repairs and save time and money
