- 4** Max Airflow Front Vents

RPHA 10 JORGE LORENZO GRAFFITI

MC-2

Jorge Lorenzo "Graffiti"

Jorge Lorenzo draws attention wherever he goes; that is just a fact of life for the defending MotoGP World Champion. Earlier this season, Jorge and HJC Helmets found themselves with even more eyes on us than normal.

For Round 6 of the 2013 MotoGP season, Jorge and HJC partnered up with Spanish artist Anna Vives to design a one off helmet to benefit Anna's charity. Anna has become a famous artist in Spain recently, Jorge had this to say immediately following his win with the helmet, "The girl who designed my helmet, Anna Vives, is famous in Spain; she is a symbol that people with Down syndrome are capable of a lot more than some people think. I think it was very original and colourful so I was very proud and happy to have her on the podium to share the win with me."

The helmet that Jorge used en route to his victory recently sold for over 35,000 dollars which was donated to Anna's charity, and as a result HJC will begin selling limited edition replicas in October 2013. Proceeds from each sale will be donated to the charity.

RPHA 10 CAGE

- **Max Air-flow Top Vent:** Variable air flow is adjusted by glove-friendly dials on each intake vent.
- **Advanced P.I.M. (Premium Integrated Matrix) Construction:** A matrix of Carbon Fiber, Aramid, Fiberglass and Organic Non-Woven Fabric create a remarkably strong yet extremely lightweight shell designed for superior fit and comfort using advanced CAD technology.
- **RapidFire™II Shield Replacement System:** Simple and secure shield ratchet system provides ultra-quick, tool-less removal and installation for efficient operation.
- **Optically-superior Pinlock®-prepared 2D Flat-Racing Shield:** Pinlock® fog-resistant lens included.
- **Our innovative Center one-touch open/close locking system:** is designed for an extremely secure seal.
- **"ACS" Advanced Channeling Ventilation System:** Full front to back airflow flushes heat and humidity up and out. Countless hours of development and testing conducted inside of our advanced wind tunnel have resulted in absolute smooth air flow both inside and outside. The reward is low wind resistance and maximum ventilation.
- **SilverCool Plus™ Interior:** Premium soft feel with Ginkgo Extract, moisture-wicking and odor-free interior with advanced silver anti-bacterial fabric. Crown and cheek pads are fully removable and washable.
- **Breath Guard and Chin Curtain Included**
- **SNELL/DOT Approved**
- **Sizes: XS-XXL**

RPHA X NATE ADAMS REPLICA

"I love it. From the moment I put on my new HJC RPHA X helmet I knew it was good and I wanted to go ride in it. It has a complete coverage and snug fit to my dome, no loose spots, no wiggling of the helmet while riding, no dirt getting in through the sides of my goggles due to helmet movement, none of that. This is a great helmet!" — **Nate Adams**

RPHA X AIRAID

MC-1

- **Advanced P.I.M. (Premium Integrated Matrix) Construction:**
A matrix of Carbon Fiber, Aramid, Fiberglass and Organic Non-Woven Fabric create a remarkably strong yet extremely lightweight shell designed for superior fit and comfort using advanced CAD technology.
- **For the perfect and compact dimensions, RPHA X comes in 3 different shells:** 1st shell: XS-S, 2nd: M-L and 3rd: XL-2XL.

- **COOL4EVER™ interior:** Lightweight, moisture wicking, odor free and anti bacterial, premium soft feel with Ginkgo extract. Innovative new fabric offers self-cooling proper ties. It cools down faster than other major fabrics. Extremely important for long hot rides. Crown and cheek pads are removable and washable.
- **SNELL/DOT Approved**
- **Sizes:** XS-XXL
- **5-YEAR Limited Warranty**

RPHA X FACTOR

"The first thing I noticed was how light it was. That was really important. Then I put the helmet on, and noticed how good the fit was. I gave HJC some input before the helmet was finalized, but honestly there wasn't much to change. It was already really good. The padding, the liner, the venting—it's really good." - Kyle Chisholm

SUNSHIELD OPERATION

There are three positions for the sun shield sliding lever.

Stage 1-Standard position: works best for leaned forward riding position-(sportbikes) and when more nose clearance is desired.

Stage 2-Lower position: works best for more upright riding position (cruisers and touring bikes).

Stage 3-Lowest position: Used primarily for sun shield removal and replacement. Release button must be held down to get to Stage 3.

OPTIONAL TINTED SHIELDS ARE AVAILABLE

TEAR-OFF SHIELDS

❑ SELECTING THE RIGHT HELMET

⚠ WARNING Never buy a used helmet or borrow someone else's helmet. Over time the protective foam in helmets will adjust to the contours of a user's head. A used or borrowed helmet may not offer as much protection as a new helmet.

⚠ WARNING Wearing the wrong size helmet can increase your risk of serious injury or death in an accident. A helmet that is too large for your head may be dislodged or knocked off in an accident. To select the right size helmet for your head, follow these instructions:

- 1. Measure your head.** Wrap a tape measure around your head about one inch (2.5 cm) above your eyebrows.
- 2. Use the sizing chart** to select the helmet size that corresponds most closely to your head measurement. If your head size falls between two helmet sizes, try on the larger helmet first and then the smaller size.
- 3. Try on the helmet** by grasping both chin straps to pull the helmet completely onto your head, ensuring that the top of your head is in contact with the top of the helmet interior.
- 4. Check for a proper fit.** To make sure your helmet is the right size, check that:
 - The helmet inner lining fits snugly around your head.
 - The top pad presses firmly on your head.
 - There is no space around your brow under the inner lining. Test this by trying to insert your fingers.

If the helmet does not fit snugly, try on a smaller size.

- 5. Check your field of vision when trying on a helmet.** Some helmets may obstruct or block your vision when looking left, right, up, or down.

⚠ WARNING Always make sure you can see well enough to safely operate your motorcycle.

- 6. Test the helmet fit** by placing your hands on each side of the helmet. While holding your head as motionless as possible, try rotating your helmet from left to right then up and down. If you can feel the helmet padding sliding on your head, it is too big, try a size smaller. You should feel the helmet move the skin on your head and face as you try to move the helmet.

- 7. Fasten the retention system (chin strap)** as tight as possible under your jaw without causing pain. There must be no slack in the strap, and the strap must be tight up against your jaw. See page 5-6.

- 8. Test the retention system (chin strap)**

- Put your hands on the back of the helmet and try to push the helmet off by rotating it forward.
- Put your hands on the front of the helmet above your forehead (or on the chin guard) and try to push the helmet off by rotating backward.

⚠ WARNING If helmet comes off, try another size or another model or brand.

Repeat steps 3 through 8 until you find a helmet that fits your head snugly and securely.
