J&M Bluetooth®

NEW BT-04 Wireless Helmet Headsets

J&M's Exciting NEW BT-04 Bluetooth Helmet Headsets With aptX™ Digital Stereo and SmartBlu™ Technology.

We are proud to introduce the new J&M Bluetooth wireless helmet headsets.

J&M's new model elite series BT-04 helmet headsets offer THE BEST audio performance available. With build quality, features and on-highway performance to directly challenge the competition. Whether purchasing your first Bluetooth wireless helmet headset or replacing an existing model, you can now step up to J&M.

J&M's new BT04 Elite Series Bluetooth headsets take another significant step forward in performance, functionality and ease of use, with all new J&M propriety internal firmware.

- Custom Bluetooth 4.3 software package with profiles HSP, HFP, A2DP, AVRCP, JMAHP w/aptX digital stereo, along with J&M's "private" helmet-to-helmet intercom, using the simple secured pairing (SSP) linking mode to another J&M BT-04, BT-03 or other brand of Bluetooth helmet headset.
- Utilizes J&M's new SmartBlu™ linking technology, for easy pairing to most standard Bluetooth enabled audio devices, along with direct headset linking to specific Bluetooth compatible motorcycle audio systems like the new 2018-2019 Honda Gold Wing, 2014-2019 Harley WHIM Dongle, 2001-2017 GL1800 with J&M BluHub® custom dongle44, 2006-2019 Harley with J&M BluHub custom dongle44, 2017-2019 Indian Chieftain, 2018-2019 CanAm Spyder and others yet to be released.
- Easy to install clip-on mount Bluetooth control head, 45mm or 40mm high-intensity helmet speakers with both boom and chin-bar versions of our high-output AeroMike VI microphone available.
- Versatile, easy to install component design to allow removal of the control head for in-house charging away from the helmet.
- Control head is powered by a rechargeable Lithium power cell providing 14-18 hours of use from a full charge.
- Easy-to-download software updates to add additional features and improve performance are available from this page of the J&M website.

You will not find a better performing Bluetooth helmet headset anywhere, you have our name on it.

HSBT-04EL-FFS

Dual-Module aptX Stereo Bluetooth® Dongle Systems

These are J&M's brand new Blu->Hub® dual-module Bluetooth Dongle kits loaded with our exclusive JMAHP software profile.

This latest version of the JMAHP profile from J&M provides low-latency aptX™ digital stereo to the headset, (aptX decoding active with BT-03+/BT-04 or later model J&M headset) with simultaneous and continuous microphone signals back to the dongle audio source, allowing full stereo music, private driver/passenger intercom and CB radio transmissions.

Now you can finally "Cut-The-Cord" between your helmet headset and the factory audio system WITHOUT sacrificing that great J&M sound!

These new J&M Blu->Hub dongles will also link to most other brands of Bluetooth helmet headsets available and provide mono audio to the headset with simultaneous and continuous mike signals back to the audio system, for full intercom, cell phone and CB radio communications.

The factory handlebar & dash-knob volume controls will raise and lower the music, intercom & CB volume levels inside each Bluetooth headset, once linked and adjusted.

Either driver or passenger can also link their own cell phone to their individual J&M Bluetooth headsets, simultaneously with this Blu->Hub dongle, for automatic switching back & forth between stereo music/intercom/CB and individual cell phone conversations.

With this J&M Blu->Hub dongle system installed, CORDED helmet headsets can still be used at any time thru the standard headset connection plugs, simultaneous with either of the Bluetooth headset links.

The Blu->Hub dongle will turn on and off automatically with the motorcycle ignition and there are NO BATTERIES EVER, to charge or replace.

JBLU-DNG44-GL18

- The audio performance of J&M's elite series Bluetooth headsets will rival that of our best corded headsets, so you don't have to sacrifice good sound when going wireless.

- Our elite series features both the boom and chin-bar mount style AeroMike VI microphones for the very best in wind and ambient noise cancelling at highway speeds.

- Easy to feel and operate external controls for volume up/dn, helmet to helmet linking, multifunction button call answer/initiate/linking and on/off.

- Control head features the CSR Bluecore8 module, for easy pairing to most Bluetooth enabled audio devices, including iPhone, Android & Windows Smartphones, Bluetooth enabled GPS units, Bluetooth enabled MP3 and iPod type music devices.

- Multifunctional Bluetooth 4.1 software package includes standard profiles of HSP, HFP, A2DP Stereo & AVRCP, along with the J&M Exclusive helmet to helmet intercom profile.

- Versatile, easy to install component design to allow removal of the control head for in-house charging away from the helmet.

- Control head is powered by a rechargeable Lithium power cell providing 14-18 hours of use from a full charge.

- Up to four headsets can be paired together for crystal clear intercom communications at distances of up to 1/2 mile.

IMPORTANT

How to Fit Your HJC IS-MAX2 Helmet

How well your helmet fits your head is one of the most important factors in the ability of the helmet to protect your head in the event of an accident or impact.

Please measure the circumference of your head just above your eyebrows and choose the correct size from the size chart below. (3X-Large thru 5X-Large for IS-MAX2 only).

Head measurement.... You will need size (hat size)

20 ¹ / ₄ " – 20 ⁷ / ₈ "X-Small	(6 ¹ / ₂ – 6 ⁵ / ₈)
21" – 21 ⁵ / ₈ "Small	(6 ³ / ₄ – 6 ⁷ / ₈)
21 ³ / ₄ " – 22 ³ / ₈ "Medium	(7 – 7 ¹ / ₈)
22 ¹ / ₂ " – 23 ¹ / ₈ "Large	(7 ¹ / ₄ – 7 ³ / ₈)
23 ¹ / ₄ " – 24"X-Large	(7 ¹ / ₂ – 7 ⁵ / ₈)
24 ¹ / ₈ " – 24 ⁷ / ₈ "XX-Large	(7 ³ / ₄ – 7 ⁷ / ₈)
25" – 25 ⁵ / ₈ "3X-Large	(8 – 8 ¹ / ₈)
25 ⁷ / ₈ " – 26 ¹ / ₂ "4X-Large	(8 ¹ / ₄ – 8 ³ / ₈)
26 ⁵ / ₈ " – 27 ¹ / ₄ "5X-Large	(8 ¹ / ₂ – 8 ⁵ / ₈)

All of us at J&M want to insure that you receive a helmet that fits properly and if it does not, to make sure that it is promptly exchanged for a size that does.

If you should need to exchange your helmet for one of another size or color, simply return it to J&M via common carrier pre-paid within 5 days of receipt, with instructions as to which size or color you wish to substitute.

To insure a high standard of quality control, no exchange will be honored if the helmet is returned with its finish scuffed or scratched, any parts missing or the Arai carton is broken or damaged.

2018-19 HONDA GL1833 GOLDWING

Audio Products

J&M's Exciting NEW BT-04 Bluetooth Helmet Headsets w/ SmartBlu™ Technology.

The audio performance of the NEW BT-04 model is outstanding and will rival that of our best corded headsets, so you don't have to give up good sound when going wireless.

- Featuring both the boom-style and chin-bar AeroMike VI microphones, along with our high-intensity mount-in-helmet speakers for the very best performance on the new Wing.
- Bluetooth 4.3 software package with profiles HSP, HFP, A2DP, AVRCP, JMAHP w/aptX digital stereo, along with J&M's private helmet-to-helmet intercom, using the simple secured pairing (SSP) linking mode to another J&M BT-04, BT-03 or other brand of Bluetooth helmet headset, including Sena.

- Control head features the CSR Bluecore8 module, for easy pairing to most Bluetooth enabled audio devices, along with J&M's new SmartBlu™ technology for direct headset linking and operation with the new Honda GoldWing GL1833.
- Compatible with the Wing's dual-zone audio system allowing separate music streams for driver and passenger with easy to activate "private" rider/passenger intercom.
- Control head is powered by a rechargeable lithium power cell providing 14-18 hours of use from a full charge.
- Versatile easy to install component design allowing removal of the control head to provide for easy in-house charging away from the helmet.

J&M Custom BluHub® Bluetooth® CORDED Helmet Headset Adapter Kit for the 2018-2019 Honda Gold Wing GL1833

This new J&M BluHub® CORDED helmet headset adapter kit will link directly to the Wing's main audio system and provide ALL of the audio system functions that are standard on the new Wing, to one or two corded helmet headsets.

WHILE at the same time providing a constant and continuous "private" driver/passenger intercom system with simple to operate volume control on the face of the BluHub component.

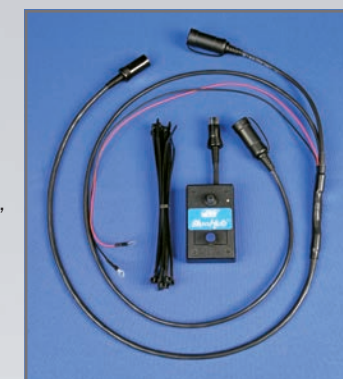

ALL standard handlebar levers/buttons and system functions from the new Wing, will control everything going to the corded helmet headsets, including stereo music from all sources, cell phone, navigation and 40-CH CB radio.

Supplied headset cable jacks are the standard 5-pin configuration that have been used on all Gold Wings from 1980-2017.

If rider and/or passenger decide to use Bluetooth headsets instead of corded at any given time, they can link their Bluetooth headsets to the Wing's system, instead of the BluHub and all systems will function normal, with NO interference from the BluHub.

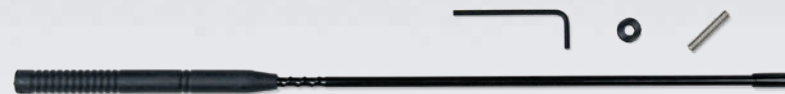

This is an easy to install, totally plug-n-play CORDED helmet headset solution for the 2018-2019 Honda Gold Wing GL1833 that is 12v powered, turns on/off with the ignition and there are NO BATTERIES to charge.

Shorty CB Antenna Staff Upgrade for 2018-2019 Honda® Gold Wing GL-1833

This new shorty antenna model from J&M comes out of the package pre-tuned for all 40-channel CB radio frequencies.

Installation is a snap as you simply unscrew by hand the stock Honda CB antenna, screw in the included SS antenna stud, slide over the molded trim bushing and then screw on the new J&M shorty CB staff.

With total overall length at approximately 17", this new shorty CB antenna option looks great and compliments the lines and contours of the new Wing.

NEW

Blu<>Hub® Dual-Module Driver/ Passenger Bluetooth® Dongle Kit with aptX™ Digital Stereo 2001-2017 Honda® GL1800/F6B

This is J&M's brand new Blu<>Hub® dual-module Bluetooth Dongle kit with J&M's exclusive JMAHP software profile.

This latest version of the JMAHP profile from J&M provides low-latency aptX™ digital stereo to the headset, (aptX decoding active with BT03+plus or later model J&M headset) with simultaneous and continuous microphone signals back to the dongle audio source, allowing full stereo music, private driver/passenger intercom and CB radio transmissions.

Now you can finally "Cut-The-Cord" between your helmet headset and the factory audio

system on the GL1800/F6B WITHOUT sacrificing that great J&M sound!

The factory handlebar & dash-knob volume controls will raise and lower the music, intercom & CB volume levels inside each Bluetooth headset, once linked and adjusted.

Either driver or passenger can also link their own cell phone to their individual J&M Bluetooth headsets, simultaneously with this Blu<>Hub dongle, for automatic switching back & forth between stereo music/intercom/CB and individual cell phone conversations.

With this J&M Blu<>Hub dongle system installed, CORDED helmet headsets can still be used at any time thru the standard headset connection plugs, simultaneous with either of the Bluetooth headset links.

The Blu<>Hub dongle will turn on and off automatically with the motorcycle ignition and there are NO BATTERIES EVER, to charge or replace.

This Blu<>Hub dongle kit is 100% plug-n-play into the GL1800/F6B as a permanent and secure installation inside the left fairing pocket location.

Assembled in the USA at our factory in Tucson Arizona, with comprehensive linking and operation manual included.

ROKKER™ **XXR** SERIES

J&M ROKKER XXR 6.71" Fairing Speaker Upgrade Kit 2014-19 Harley® StreetGlide/Ultra and 2015-19 Harley RoadGlide/Ultra

NEW ROKKER XXR series 6.71" speakers have been designed as exact size component upgrades for the fairing position on the 2014-18 Harley StreetGlide, Ultra/Ltd & 2015-19 Harley RoadGlide/Ultra.

Spec'd at 2 ohms impedance and an impressive 300 watts maximum input (175w RMS continuous - 91db sensitivity), these speakers provide the ultimate in raw audio power and include new custom grills with built-in high-output tweeters.

Features of this new ROKKER XXR series speaker kit:

- Lightweight waterproof one-piece woven-fiber driver cone with super-rigid metal basket design.
- High-density lite-weight Neodymium magnet structure, specially coated to maintain flux-strength integrity even at extreme operating temperatures.
- High efficiency VENTED voice-coil for improved cooling when operating at high volume levels for extended periods.
- Custom speaker grills with high-output tweeters for crystal clear sound at highway speeds.

Mounting hole pattern and spade electrical connections are exactly the same as the factory specification, this is a total plug-and-play no-modification solution complete with easy to follow installation instructions.

These are THE most powerful speakers you can buy for your Harley and they will perform extremely well when used with a medium to high-powered accessory amplifier.

ROKKER™ **XXR** SERIES

J&M ROKKER XXR 6.71" Rear-Pod/Lower-Fairing Speaker Upgrade Kit w/H-Output Grill Mounted Tweeters 2014-19 Harley® Ultra/Ltd

J&M's NEW ROKKER XXR series 6.71" speakers have been designed as exact size component/replacements for the stock 6.5" Harley rear trunk-pod or lower-fairing speakers as installed on the 2014-19 Harley Ultra or Ultra Ltd. (NOT applicable for liquid-cooled lower-fairings)

Spec'd at 2 ohms impedance and an impressive 300 watts maximum input (175w RMS - 91db sensitivity), these speakers provide the ultimate in raw audio power and include the new custom grills with built-in high-output tweeters.

Features of this new ROKKER XXR series speaker kit:

- Lightweight waterproof one-piece woven-fiber driver cone with super-rigid metal basket design.
- High-density lite-weight Neodymium magnet structure, specially coated to maintain flux-strength integrity even at extreme operating temperatures.
- High efficiency VENTED voice-coil for improved cooling when operating at high volume levels for extended periods.
- Custom speaker grills with high-output tweeters for crystal clear sound at highway speeds.

Mounting hole pattern and spade electrical connections are exactly the same as the factory specification, this is a total plug-and-play no-modification solution complete with easy to follow installation instructions.

These are THE most powerful speakers you can buy for your Harley and they will perform extremely well when used with a medium to high-powered accessory amplifier.

J&M ROKKER XXR/XXRP Amplifier Kits for 2014-19 Harley®.

These exciting new J&M amplifier kits have been designed for use on 2014-19 Harley StreetGlide/RoadGlide/Ultra/Ltd.

The specific green-band plug-n-play RCA input harnesses included with these amplifier kits provide 2 or 4 separate channels of amplification at 175 watts RMS continuous power per channel into a 2 or 4-ohm speaker load.

These are full range class D digital amplifiers, properly shielded against RF interference into the AM or FM stereo radio bands.

Amplifiers mount to the custom made stainless steel 2-piece bracket system to provide solid and secure mounting inside the fairing.

These new ROKKER XXR/XXRP series amplifiers come out of the box already dialed in for each specific custom speaker configuration, to provide maximum highway performance from your Harley Davidson audio system.

Also included are our custom made heavy-gauge power and ground wires, along with all necessary mounting hardware and complete installation/operation instructions.

J&M Solo Helmet Headset Connection Harness kit for 2014-19 Harley StreetGlide or RoadGlide

This is a custom plug-n-play wiring harness kit (ONLY) to connect a J&M or Harley brand helmet headset, to the factory Harley radio (either version) on the 2014-19 StreetGlide or RoadGlide. (helmet headset not included).

When connected, it allows the rider to answer and communicate on the Bluetooth linked cell phone, thru the factory audio system, as well as listen to music & navigation commands from the cell phone link, all thru his/her helmet headset (see pages 4-7).

This new J&M harness kit features a top-quality in-line 7-pin female din-jack with weather cover, to provide maximum flexibility when choosing the convenient mounting location that is just right for you.

This easy to install, plug-n-play headset cable harness kit is made-in-the-USA at our factory in Tucson, AZ.

ROKKER XXR EXTREME KITS for 2014-19 Harley®

"ROKK-EM SOKK-UM" PERFORMANCE

J&M ROKKER XXR EXTREME Custom Installation KITS for 2014-19 Harley® Baggers.

At the very heart of these custom systems are your choice of a J&M in-fairing mounted 2 or 4 channel ROKKER XXR/XXRP amplifier rated @ 175w RMS per channel X 2 or 4 to provide up to 700w total RMS power!

Depending on which amplifier and specific system you choose, our single in-fairing mounted amplifiers can power 2, 4, 6 or 8 total main speakers on your Harley Bagger, along with up to 8 total tweeters.

Each custom kit listed below is completely assembled together with the amplifier already dialed in for each exact speaker configuration, to provide the on-highway volume, clarity and overall performance that most riders only dream about.

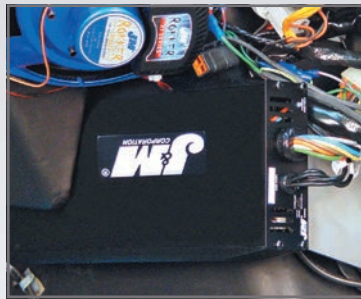

J&Ms fully weatherproof 6.71" & 5x7" ROKKER XXR speakers feature a high-tech woven-fiber woofer cone & a massive high-density high-flux strength Neodymium magnet structure with large center & perimeter positioned voice coil cooling vents, to provide for maximum heat dissipation when operating at high volume levels for extended periods.

The custom designed grill mounted dome tweeters are also weather-proof and shock-proof for maximum long-term durability.

Each of these ROKKER XXR EXTREME custom installation kits are engineered to be 100% plug-and-play for your convenience during the installation and to maintain the complete integrity of your Harley's internal wiring harness.

THE Harley Radio FLASH Nightmare is FINALLY OVER!

All of the J&M ROKKER XXR EXTREME series kits listed below are tuned/enhanced for the latest STOCK HARLEY Radio flash, and include the exclusive Green-Band RCA amplifier input harnesses.

ROKKER™ **XXR** SERIES

J&M ROKKER XXR 7.25" Fairing Speaker kit 1998-2013 Harley StreetGlide/ Ultra/ElectraGlide/RoadGlide

J&M's NEW ROKKER XXR series 7.25" drivers are the largest diameter speakers that can be installed into the Harley BatWing or RoadGlide style fairing, with cone volume and mass comparable to a 6X9" speaker.

Spec'd at 2 ohms impedance and an impressive 217 watts maximum input (165w RMS continuous - 92db sensitivity), these new speakers provide the ultimate in raw audio power.

These complete custom speaker installation kits have been designed for the 1998-2013 Harley® StreetGlide, Ultra, RoadGlide or ElectraGlide Fairing. (NOT for direct connection to the 1998-2005 Harley RSI factory radio system).

Features of this new ROKKER XXR series speaker kit:

- Lightweight waterproof one-piece polycarbonate driver cone with super-rigid metal basket design.
- High-density lite-weight Neodymium magnet structure, specially

coated to maintain flux-strength integrity even at extreme operating temperatures.

- High efficiency VENTED voice-coil for improved cooling when operating at high volume levels for extended periods.

- Custom speaker grills with high-output tweeter & mid-range for crystal clear sound at highway speeds.

- Top-quality adapter rings/bracket hardware for secure and clean mounting into the fairing.

Mounting hole pattern and spade electrical connections are exactly the same as the factory specification, this is a total plug-and-play no-modification solution.

These are THE most powerful speakers you can buy for your Harley and they will perform

HCRK-7252GTM-XXR

HRRK-7252GTM-XXR

extremely well when used with a medium to high-powered accessory amplifier.

Important Note: For most 1998-2005 RoadGlide fairings, when upgrading from the stock 5 ¼" to J&M 7.25" speakers OR when replacing the stock Harley 5X7" speaker plates used on 2012-2013 CVO RoadGlide fairings, with speaker plates that can be used with the Harley 5.25" or 'J&M 7.25" speakers, you will need J&M RoadGlide speaker plate kit, part #RRPA-RGSPA, which are also exact dimensional substitutes for Harley part#s 77021-98B & 77022-98B.

7.25" LOWER Fairing Speaker Kit 2006-2013 Harley Ultra

J&M's new Performance series 7.25" drivers are the largest diameter speakers that can be installed into the Harley LOWER fairing shells, with cone volume and mass comparable to a 6X9" speaker.

This new Performance series speaker set is designed specifically for the 2006-2013 Harley® Ultra or Harley StreetGlide/RoadGlide custom with the factory Harley Ultra vented LOWER fairing shells installed.

Spec'd at 2 ohms impedance and 140 watts max power, these new speakers provide the ultimate in raw audio power from the lower fairing position.

HLPS-7252 Performance Series 7.25" LOWER Fairing Speaker Kit 06-13 Harley Ultra

Features of this Performance series kit are:

- Waterproof injection-molded polycarbonate driver cone.
- High-flux strength but lite-weight Neodymium magnet.
- High efficiency voice-coil.
- Custom designed grillwork.

• Top-quality LOWER fairing housing inserts molded specifically to fit the vented Harley lower fairing shells.

These are THE most efficient speakers you can buy for your Harley and they will perform extremely well when used with a medium sized accessory amplifier.

HLPS-7252

LOWER Speaker In-Series Wiring Kit for 2006-2013 Harley Lower Fairings

This in-series wiring harness kit is to be used when connecting the J&M ROKKER series 7.25" LOWER fairing speakers, together with the J&M 7.25" UPPER fairing speakers, to a J&M in-fairing mounted 2-channel amplifier, (4 speakers total on the motorcycle) OR the front 2-channels of a J&M in-fairing 4-channel amplifier (6-8 speakers total on the motorcycle).

HARLEY ULTRA/BAGGERS

Complete Installation Kits

Performance Series 2 & 4 Speaker Audio Installation Kits Complete with 200w or 400w RMS Amplifier for 06-13 Harley StreetGlide or Ultra Classic

POW!!! – J&M's new 7 1/4" round drivers are the largest diameter speakers that can be installed into the Harley BatWing style fairing, with cone volume and mass comparable to a 6X9" speaker.

J&M's 5 1/4" round drivers are the most efficient speakers you can install into the rear trunk pod position on the Harley Ultra.

Both spec'd at 2 ohms impedance and 140/120+ watts max power, these new speakers provide the ultimate in bass response and extended mid/high frequency range.

They feature a waterproof injection-molded polycarbonate woofer cone, high-flux strength but light-weight Neodymium magnet, high efficiency voice coil, the latest design grillwork with mounted tweeter and midrange, and top-quality adapter rings/bracket hardware for secure and clean mounting into the StreetGlide, UltraClassic or ElectraGlide.

These are THE most efficient speakers you can buy for your Harley and their mounting hole pattern and spade electrical connections are exactly the same as the factory specification.

New J&M 2 or 4-channel 200/400w fairing/rear speaker amplifiers have been designed specifically for use in the 2006-2013 Harley® StreetGlide, UltraClassic or ElectraGlide fairing with the Harley HK radio.

These are full range class D amplifiers and are spec'd at 100watts RMS per channel driven continuous into a 2 ohm load @ 14.4vdc.

Amplifier mounts to the top of the custom made stainless steel bracket system, which has the slots in the bottom section to properly relocate 2 of the Harley CB, MP3 or XM sat radio modules, if installed.

Amplifier gain adjustments are factory preset for each 2 or 4 speaker configuration.

Custom made plug-n-play wiring harnesses are included with these speaker/amplifier kits, top quality heavy gauge power/ground wires are used for the fused battery connection, along with all necessary mounting hardware & complete installation/operation instructions.

POW!!! – J&M's new 7 1/4" round drivers are the largest diameter speakers that can be installed into the Harley BatWing style fairing, and vented lower fairings, with cone volume and mass comparable to a 6X9" speaker.

J&M's 5 1/4" round drivers are the largest & most efficient speakers you can install into the rear trunk pod position on the Harley Ultra.

Both spec'd at 2 ohms impedance and 140/120+ watts max power, these new speakers provide the ultimate in bass response and extended mid/high frequency range.

They feature a waterproof injection-molded polycarbonate woofer cone, high-flux strength but light-weight Neodymium magnet, high efficiency voice coil, the latest design grillwork with mounted tweeter and midrange, (plain grills only for LOWER fairing speakers) and top-quality adapter rings/bracket hardware for secure and clean mounting into the UltraClassic ElectraGlide.

These are THE most efficient speakers you can buy for your Harley and their mounting hole pattern and spade electrical connections are exactly the same as the factory specification.

Lower fairing speaker housings are custom molded to fit the late model VENTED lower fairing shells, as mounted on the Harley Ultra.

New J&M 4-channel 400w fairing/rear speaker amplifier kit has been designed specifically for use in the 2006-2013 Harley® UltraClassic fairing with the Harley HK radio.

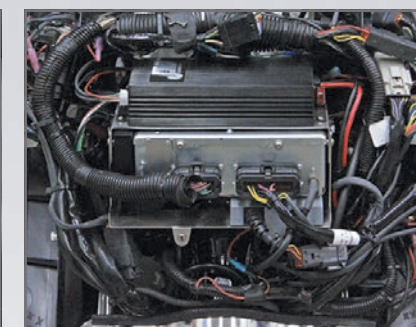

This is a full range class D amplifier and is spec'd at 90watts RMS per channel X4 channels, (360w total) driven continuous into a 2 ohm load @ 14.4vdc.

Amplifier mounts to the top of the custom made stainless steel bracket system, which has the slots in the bottom section to properly relocate 2 of the Harley CB, MP3 or XM sat radio modules, if installed.

Amplifier gain adjustments are factory preset for this 6 speaker configuration on the Harley Ultra, along with the custom in-series wiring harness for the front upper/lower fairing speaker positions.

Custom made plug-n-play wiring harnesses are included with this amplifier kit, top quality heavy gauge power/ground wires are used for the fused battery connection, along with all necessary mounting hardware & complete installation/operation instructions.

JHAK-HCU06-4006SP Perf Series Audio KIT w/400w RMS 4-Ch Amp, 7.25" Fairing, 7.25" Lower & 5.25" Rear Speakers for 2006-2013 Harley Ultra

Complete Installation Kits

Performance Series 2 & 4 Speaker Audio Installation Kits Complete with 200w or 400w RMS Amplifier for 98-13 Harley RoadGlide/Ultra

POW!!! – J&M's new 7 ¼" round drivers are the largest diameter speakers that can be installed into the Harley RoadGlide style fairing, with cone volume and mass comparable to a 6X9" speaker.

J&M's 5 ¼" round drivers are the most efficient speakers you can install into the rear trunk pod position on the Harley RoadGlide Ultra.

Both spec'd at 2 ohms impedance and 140/120+ watts max power, these new speakers provide the ultimate in bass response and extended mid/high frequency range.

They feature a waterproof injection-molded polycarbonate woofer cone, high-flux strength but light-weight Neodymium magnet, high efficiency voice coil, the latest design grillwork with mounted tweeter and midrange, and top-quality adapter rings/bracket hardware for secure and clean mounting into the RoadGlide fairing.

These are THE most efficient speakers you can buy for your Harley and their mounting hole pattern and spade electrical connections are exactly the same as the factory specification.

New J&M 2 or 4-channel 200/400w fairing/rear speaker amplifiers have been designed specifically for use in the 1998-2013 Harley® RoadGlide/Ultra fairing.

These are full range class D amplifiers and are spec'd at 100watts RMS per channel driven continuous into a 2 ohm load @ 14.4vdc.

Amplifiers mount to the custom made metal mounting bracket systems, designed specifically for the RoadGlide fairing.

Amplifier gain adjustments are factory preset for each 2 or 4 speaker configuration.

Custom made plug-n-play wiring harnesses are included with these speaker/amplifier kits, top quality heavy gauge power/ground wires are used for the fused battery connection, along with all necessary mounting hardware & complete installation/operation instructions.

Important Note: For most 1998-2005 RoadGlide fairings, when upgrading from the stock 5 ¼" to J&M 7.25" speakers OR when replacing the stock Harley 5X7" speaker plates used on 2012-2013 CVO RoadGlide fairings, with speaker plates that can be used with the Harley 5.25" or 'J&M 7.25" speakers, you will need J&M RoadGlide speaker plate kit, part #RRPA-RGSPA, which are also exact dimensional substitutes for Harley part#s 77021-98B & 77022-98B.

J&M Blu<>Hub® Dual-Module Driver/Passenger Bluetooth® Dongle Kit with aptX™ Digital Stereo 1998-2019 Harley Infotainment System

These are J&M's brand new Blu<>Hub® dual-module Bluetooth Dongle kits featuring the CSR/Qualcomm BlueCore8 IC chip-sets, loaded with J&M's exclusive JMAHP software profile.

This latest version of the JMAHP profile from J&M provides low-latency aptX™ digital stereo to the headset, (aptX decoding active with BT-03+/BT-04 or later model J&M headset) with simultaneous and continuous microphone signals back to the dongle audio source, allowing full stereo music, private driver/passenger intercom, cell-phone and CB radio communications.

Now you can finally "Cut-The-Cord" between your helmet headset and the factory audio system WITHOUT sacrificing that great J&M sound!

This new J&M Blu<>Hub dongle will also link to most brands of Bluetooth helmet headsets available and provide mono audio to the headset with simultaneous and continuous mike signals back to the audio system, for full intercom, cell phone and CB radio communications.

The factory handlebar & dash-knob volume controls will raise and lower the volume levels inside each Bluetooth headset, once linked and adjusted.

With this J&M Blu<>Hub dongle system installed, CORDED helmet headsets can still be used at any time thru the standard headset connection plugs, simultaneous with either of the Bluetooth headset links.

The Blu<>Hub dongle will turn on and off automatically with the motorcycle ignition and there are NO BATTERIES EVER, to charge or replace.

J&M FLEXPOWER® In-Fairing AM/FM/WB Antennas for 1989-2019 Harley® StreetGlide/ Ultra/Ltd./ RoadGlide

J&M's new Passive FLEXPOWER® hide-a-way AM/FM/WB antenna is THE BEST hide-a-way antenna on the market today, for ALL THREE reception bands of AM, FM and WB, to help you eliminate altogether the rear mounted antenna on your 1989-2019 Harley StreetGlide /Ultra/Ltd./RoadGlide.

These new passive versions (no 12v connection required) provide all of the great reception performance of our original design, but with the correct standard push-plug (89-13) or "FAKRA" style plug (14-17) on the end of the cable, for direct connection to the 1998-2019 Harley radios (all versions).

Over the years we have learned that proper tuning and adequate stinger capture area is far more important to reception quality for an in-fairing (hidden) antenna than trying to artificially amplify a less than ideal signal.

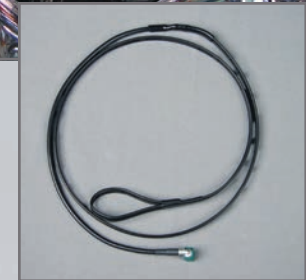

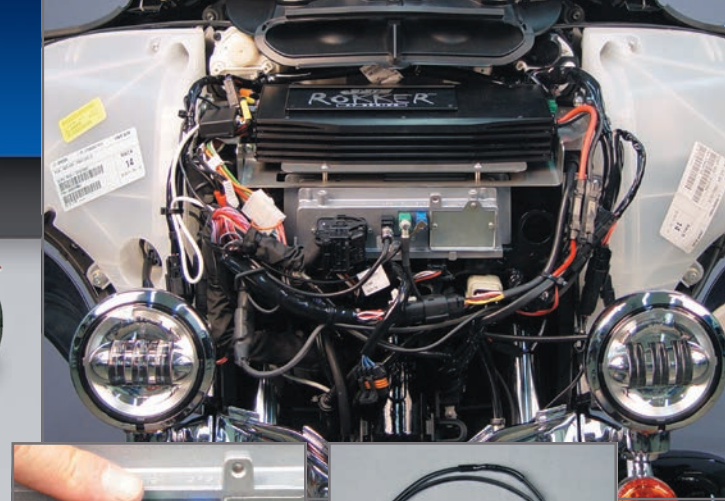

Installation is a snap, as there are no wires to cut or splice.

These antenna kits include complete and detailed installation instructions.

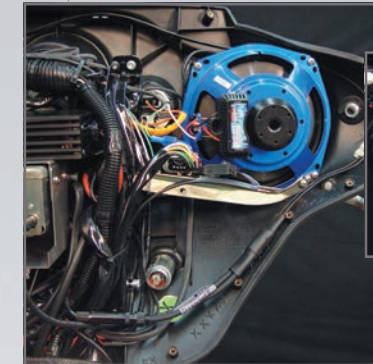

These unique in-fairing antennas are manufactured complete at our shop in Tucson, Arizona USA using only high-grade copper coaxial cable & stinger wire, for maximum durability and performance.

FLEXPOWER® CB Antenna for 1998-2019 Harley StreetGlide/ Ultra/Ltd./ RoadGlide w/ Harley CB Radio

J&M's new FLEXPOWER® hide-a-way CB antenna is THE BEST hide-a-way CB antenna on the market today, to help you eliminate altogether the rear mounted CB antenna on your 1998-2019 Harley®.

These J&M in-fairing antennas are pre-tuned from our factory for the 27mhz CB radio band (no further tuning is required during installation) and is spec'd for the 1998-2019 Harley Ultra or StreetGlide Fairing, with the factory Harley CB radio (check application box below for your specific model year).

Installation is a snap, as there are no wires to cut or splice and antenna wire lead is secured in the fairing with included double sided tape clips.

Antenna kits include complete and detailed installation instructions.

JMCB-2003

Handlebar-Mounted CB Audio System

The World's First, All-In-One, Handlebar-Mounted Motorcycle Audio System...

This exciting product from J&M features a 40-channel CB radio, NOAA weather band, rider/passenger intercom and stereo music amplification from any Portable/MP3 type/iPod music device.

Mount it to your left handlebar with the proper bracket kit, connect the headset/ power harness to your bike's electrical system, (choose between solo or rider/ passenger kits) install our license plate mounted CB antenna, (or any other properly tuned CB antenna) plug in your favorite J&M dual mode helmet headset/headsets and you are ready to go.

All knobs and controls have been designed for ease of use while riding, even with gloves on and in addition, the unit is water resistant so you won't have to worry about getting caught out in the rain.

The new JMCB-2003K model has been designed with an expanded 6-circuit aux input plug to accept J&M's new iPod controller with Bluetooth connection interrupt, to provide the circuits necessary to play music from an iPod, keep the iPod charged while riding and/or listen to stereo music from a Bluetooth linked device AND actually talk over the cell phone, all thru the driver or passenger corded helmet headsets (no batteries to charge).

New Can-bus compatible power supply/noise filter included with all models.

Important Note: The JMCB-2003 is a J&M 6-pin audio system that requires the pre-amplified microphone signal provided by our Dual Mode helmet headsets along with the #HC-ZJM or HC-PJM lower section hook-up cord (please see the headset/helmet pages 8-11).

JMDM-IPBT-JCB03

Bluetooth Cell Phone/GPS/iPod/Radar Beep Digital Music Controller

J&M's new digital music controller will connect to a standard iPod by wire and direct the stereo music into the JMCB-2003's audio system aux input, using the iPod's own onscreen controls, while at the same time keeping the iPod fully charged.

A Smartphone or Garmin Zumo can also be linked by Bluetooth to the J&M music controller, while an iPod is simultaneously connected by wire, and when a navigation command or cell phone call is received, it will automatically interrupt the iPod music signal into the system.

This controller wiring harness also provides for direct plug-n-play of the custom J&M CFRG type radar detector adapter harnesses, (extra cost item) for automatic radar beep alert into one headset speaker, along with a power/ground source connection for a Garmin Zumo.

JMDM-IPBT-JCB03 Bluetooth Cell Phone/iPod/GPS/Radar Beep audio integration terminal for the JMCB-2003K/E (Will connect to older "B" model w/adaptor)
