## PRECISION FIT AND ADVANCED TECHNOLOGY

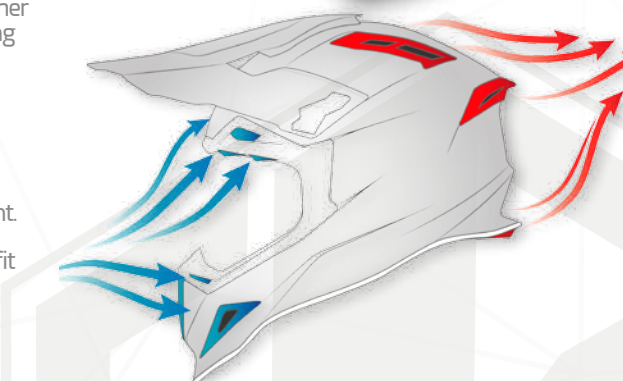

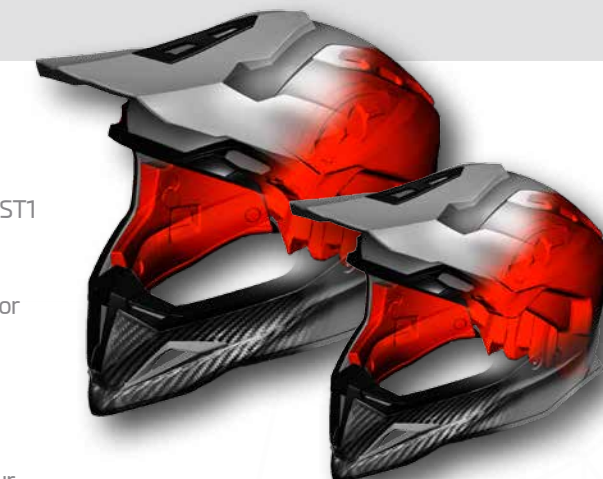

JUST1 J12 helmet was developed and designed with the primary goals of creating the safest and most comfortable motocross helmet for a Rider. Perfect fit is the essential element in helmet performance. The finest and technically advanced materials are used in the production of JUST1 J12 helmets. The external shell is made of full Carbon fiber. This makes the helmet extremely rigid and incredibly light weight. JUST1 J12 has two exterior shell sizes ensuring proper fit to weight ratio for safety and stability. The inner shell dimension (EPS foam and lightweight high impact absorption) is scaled to fit every size of the shell, JUST1 has two interior EPS sizes.

## AIR VENTILATION SYSTEM

Ventilation is essential. With mouth and eyebrow massie and multiple air vents system, JUST1 J12 is designed to maximize airflow to your head. Tried and tested ventilation that allows for proper extraction of heat from the helmet, allowing for a cooler ride in even warm weather conditions. Attention was also paid to the metal membrane integrated on the chin air vent, which makes it less likely that rubble and flying debris could penetrate those areas.

## TECHNIC INNER LINING

The exclusive inner linings of the JUST1 helmets are made with breathable materials that incorporate an anti microbial hygienic treatment. The liner is fully removable and washable. The liner was designed in conjunction with the clavicle flair to make the helmet easy to put on. It allows the user to focus closely on the fit of the crown portion of the helmet first.

### PRECISION FIT AND ADVANCED TECHNOLOGY

The project began from race experience in the most challenging off-road environments. It is the perfect helmet for all conditions, from long-distance travels to off-road adventures, it combines the comfort and protection of a full-face helmet with functionality, light weight, and air ventilation typical of off-road helmets. It can even be used in snow with the optional dual heated dual pane shields. J14 DS is deeply rooted in off-road, characterized by a wide field of view that allows to use it with mx-goggles. Main Features: High visibility Visor, also available in dual pane and dual pane with heating element (accessory both sold separately).

### AIR VENTILATION SYSTEM

Ventilation is essential. With mouth and eyebrow massive and multiple air vents system, JUST1J12 is designed to maximize airflow to your head. Tried and tested ventilation that allows for proper Extraction of heat from the helmet, allowing for a cooler ride in even warm weather conditions. Attention was also paid to the metal membrane integrated on the chin air vent, which makes it less likely that rubble and flying debris could penetrate those areas.

### INNER LINING

The exclusive inner linings of the JUST1 helmets are made with breathable materials that incorporate an anti microbial hygienic treatment. The liner is fully removable and washable. The liner was designed in conjunction with the clavicle flair to make the helmet easy to put on. It allows the user to focus closely on the fit of the crown portion of the helmet first.

### ALL IN ONE

- 1 - OFF ROAD ATTITUDE  
you can remove the visor, cover the visor mechanism with a special cover and wear it with mx goggles.
- 2 - STREET ATTITUDE 2  
you can remove the peak to be more aerodynamic during long regular trip.
- 3 - ADVNETURE ATTITUDE 3  
perfect setting for every kind of adventure trip-
