# SAFETY

## NECK BRACE **NBFF** FRONT FIT

JUST1 Helmets, in addition to the safety standards offered by current production on the market, is launching the exclusivity new: "NBFF" Neck Brace Front Fit. the special design of the helmet's chin incorporates the "NBFF" concept, developed in collaboration with Oasi Bioresearch Foundation, no-profit organization founded by Dr. Alberto Gobbi, with the aim to study and reduce injuries in motorcycles accident and in particular those resulting from Motocross riding. The particular design of the J12 helmet's chin is not a pure aesthetic factor but incorporate the "NBFF" concept with the spoiler in the lower side of the chin that, in case of bad fall of the rider and an excessive bending of the head forward, lens in a perfect manner (Fit) with the front side if the neck Brace, with the aim of avoiding or reduce the whiplash.

## **J1ER** JUST1 EMERGENCY REMOVE

JUST1J helmets fitted with the safety device " J.1.E.R." Just 1 Emergency Remove to remove , in case of need, the cheek pads before removing the helmets from the head of the rider injured. To remove cheek pads put 1-2 fingers into the white tape, using consistent force pull until the cheek pads comes out.

## PRECISION FIT AND ADVANCED TECHNOLOGY

JUST1 J12 helmet was developed and designed with the primary goals of creating the safest and most comfortable motocross helmet for a Rider. Perfect fit is the essential element in helmet performance. The finest and technically advanced materials are used in the production of JUST1 J12 helmets. The external shell is made of full Carbon fiber. This makes the helmet extremely rigid and incredibly light weight. JUST1 J12 has two exterior shell sizes ensuring proper fit to weight ratio for safety and stability. The inner shell dimension (EPS foam and lightweight high impact absorption) is scaled to fit every size of the shell, JUST1 has two interior EPS sizes.

## AIR VENTILATION SYSTEM

Ventilation is essential. With mouth and eyebrow massive and multiple air vents system, JUST1J12 is designed to maximize airflow to your head. Tried and tested ventilation that allows for proper Extraction of heat from the helmet, allowing for a cooler ride in even warm weather conditions. Attention was also paid to the metal membrane integrated on the chin air vent, which makes it less likely that rubble and flying debris could penetrate those areas

## TECHNIC INNER LINING

The exclusive inner linings of the JUST1 helmets are made with breathable materials that incorporate an anti microbial hygienic treatment. The liner is fully removable and washable. The liner was designed in conjunction with the clavicle flair to make the helmet easy to put on. It allows the user to focus closely on the fit of the crown portion of the helmet first.

FOR 2018 WE ARE PROUD TO ANNOUNCE THE ADDITION OF MIPS TO OUR NEW JDH HELMETS.

## MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

**YOUR SAFETY IS OUR MISSION**

## MIPS TECHNOLOGY

MIPS stands for Multi-directional Impact Protection System, which is a leading slip-plane technology inside the helmet designed to reduce rotational forces that can result from certain impacts.

### WHY IT'S IMPORTANT

When a head rotates quickly and comes to a sudden stop, the rotational acceleration can cause the brain tissue to experience high levels of strain. The stretching of the tissue that can be caused by these motions can result in various types of brain injury. We believe that helmets equipped with MIPS technology can provide an additional measure of protection in certain impacts.

### HOW IT WORKS

MIPS uses a slip-plane system that moves inside the helmet, mimicking the brain's own protection system. This layer is designed to rotate inside the helmet with the intent to potentially slow or reduce the amount of energy transferred to or from the head. Science tells us that if we can reduce the strains associated with rotational acceleration, we might reduce the risk and severity of brain injury.

LOW STRAIN LEVEL HIGH

in laboratory tests, adding the MIPS layer reduced rotational acceleration by 20-35%, dampening crashforces and decreasing stress to the brain.

# IRIS

JUST1 IRIS COMES FROM RACE EXPERIENCE IN THE MOST CHALLENGING OFF-ROAD ENVIRONMENTS. OUR INTENTION IS TO CREATE A MASK WITH CUTTING-EDGE DESIGN, ACCURATE EYE PORT INTEGRATION AND TECHNICAL SPECIFICATIONS.

## TECHNICAL FEATURES

- 1- JUST1'S OUTRIGGER SYSTEMS DISTRIBUTES PRESSURE EVENLY FOR THE BEST POSSIBLE FIT.
- 2- JUST1'S VARIABLE DENSITY FACE FOAMS UTILIZES MOISTURE WICKING FLEECE THAT PROVIDES A PERFECT GOGGLE-TO-FACE FIT, SEALING OUT THE ELEMENTS WHILE PROVIDING HOURS OF RIDING COMFORT.
- 3- PROTECTION AND PERFECT FIT FOR THOSE WHO WEAR GLASSES.
- 4- REMOVABLE NOSE GUARD WHICH INTEGRATES WITH THE FRAME TO GUARANTEE STABILITY AND PROTECTION IN ALL CONDITIONS.
- 5- ANTI-FOG, ANTI-UV AND SCRATCH RESISTANT LENSES FOR SUPERIOR OPTICS.
- 6- QUICK AND EASY LENS INTERCHANGEABILITY.
- 7- LENS DESIGNED TO FIT ROLL OFF SYSTEM.
- 8- 45MM WIDE STRAP, SILICON COATED STRAP TO ELIMINATE SLIPPAGE.

## PRECISION FIT AND ADVANCED TECHNOLOGY

The project began from race experience in the most challenging off-road environments. It is the perfect helmet for all conditions, from long-distance travels to off-road adventures, it combines the comfort and protection of a full-face helmet with functionality, light weight, and air ventilation typical of off-road helmets. It can even be used in snow with the optional dual heated dual pane shields. J14 DS is deeply rooted in off-road, characterized by a wide field of view that allows to use it with mx-goggles. Main Features: High visibility Visor, also available in dual pane and dual pane with heating element (accessory both sold separately).

## AIR VENTILATION SYSTEM

Ventilation is essential. With mouth and eyebrow massive and multiple air vents system, JUST1J12 is designed to maximize airflow to your head. Tried and tested ventilation that allows for proper Extraction of heat from the helmet, allowing for a cooler ride in even warm weather conditions. Attention was also paid to the metal membrane integrated on the chin air vent, which makes it less likely that rubble and flying debris could penetrate those areas.

## INNER LINING

The exclusive inner linings of the JUST1 helmets are made with breathable materials that incorporate an anti microbial hygienic treatment. The liner is fully removable and washable. The liner was designed in conjunction with the clavicle flair to make the helmet easy to put on. It allows the user to focus closely on the fit of the crown portion of the helmet first.

## ALL IN ONE

- 1 - OFF ROAD ATTITUDE  
you can remove the visor, cover the visor mechanism with a special cover and wear it with mx goggles.
- 2 - STREET ATTITUDE 2  
you can remove the peak to be more aerodynamic during long regular trip.
- 3 - ADVNETURE ATTITUDE 3  
perfect setting for every kind of adventure trip-
