CKX HELMET SIZING CHART

For maximum safety, it is important that your helmet fits you properly. It should be snug and comfortable. It must not be so large that it moves freely around your head, nor so small that it constricts and causes pain. A helmet that is too large may slide down over your eyes, or turn in a lateral direction due to movement during riding. Always secure the chin strap tightly to keep your helmet firmly in place whenever you ride.

USE THIS CHART ONLY AS A GUIDELINE FOR FITTING HELMETS. VISIT YOUR CKX/KIMPEX DEALER TO ENSURE A PROPERLY FITTING HELMET.

INSTRUCTIONS: MEASURE THE CIRCUMFERENCE OF YOUR HEAD, ONE INCH ABOVE THE EYEBROWS AND THE EARS, THEN REFER TO THE FOLLOWING CHART.

EXAMPLE: IF MEASURING TAPE READS 23 INCHES (METRIC CONVERSION: 60 CM), THE PROPER HELMET SIZE WOULD BE "LARGE".

GOGGLES

THE 210° GOGGLES ARE UNQUESTIONABLY ONE OF THE TITAN'S FLAGSHIP FEATURES.

Goggles comfort is provided by a customized foam specially fitted to the helmet, ensuring an excellent seal. The goggles can be perfectly adjusted by using two semi-flexible fastening devices. They also offer the widest field of vision for this class of goggles. To achieve this unmatched feature, our designers created the largest pre-curved polycarbonate lens ever developed, mounted on a polyurethane frame.
