*WITH YOU TO GET THE MOST OUT OF WINTER
STYLE AND PERFORMANCE-ORIENTED GEAR*

CKX

CKX CLOTHING

CKX GEAR CATEGORY

BACK COUNTRY

Always listening to users, CKX designed this category of products for action. Perfectly suitable for the most active snowmobilers, they help you face the elements while keeping you dry for high-intensity outdoor activities and backcountry rides. Go discover unexplored powder snow territories!

CROSS OVER

Why choose? If you are one of those who appreciates long distances on trails, but does not hesitate to also be active in the backcountry, CKX offers jackets and pants made of materials that provide water resistance, breathability and warmth adapted to your needs. Go from trails to powder snow in comfort!

TRAIL PERFORMANCE

For those who like to rack up miles and miles and are looking for effective protection against the cold, CKX presents the Performance Trail Collection. Combining the efficiency of water resistance materials and the warmth of insulation, the jackets and pants of the Trail Performance Collection will allow you to go even further!

COMFORT

To enjoy winter in all your activities, CKX presents the jackets and pants of the comfort line. Whether it's for your family afternoons at the cottage or an impromptu ice fishing trip, CKX's Comfort line of jackets and pants will provide you with the comfort and warmth you're looking for.

CKX FABRICS

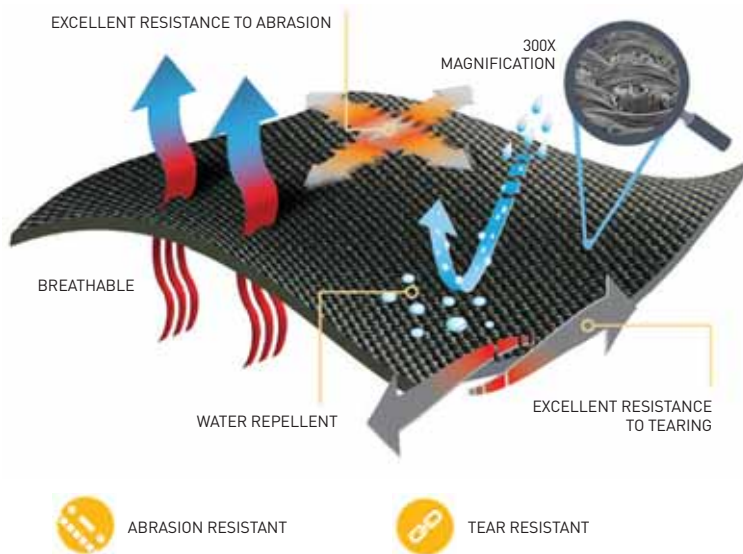

Reetex is a durable fabric whose weave and filament finish increase resistance to tears and abrasion. It is used to reinforce knees, elbows, seat and bottom of trousers

The original CORDURA® fabric with textured yarns

Designed for living and built to last, the original durable CORDURA® fabric has proven performance in many of the world's toughest environments. Made with high tenacity air jet textured nylon 6,6 filament yarns.

Characteristics:

- Rugged – excellent resistance to abrasion
- Strong - excellent tear strength
- Air jet textured for high abrasion resistance
- Water Repellent coating
- Military-grade, 100% high tenacity nylon 6,6 filament fiber
- Stylish versatility

P8-Tex is a lightweight, high-density fabric that is the performance fabric par excellence. Made of 100% polyester and featuring a unique weave, it perfectly complements the work of the membrane to repel water and wind while maintaining its breathable properties.

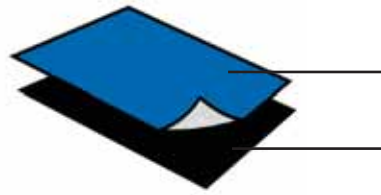

A medium density fabric made of 100% nylon, Taslan offers good water and wind resistance. Combined with an effective membrane, it is a durable and resistant material.

Fibtastik is a durable and resistant 100% medium density nylon fabric.

CKX INSULATIONS

ZERO
WITHOUT INSULATION

FABRIC : P8-TEX: 100% POLYESTER
MEMBRANE : HILLTEX 20-15
LINING FABRIC

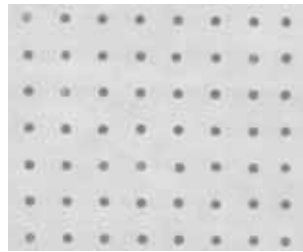

Featuring revolutionary technology, Vivo insulation improves breathability without reducing technical performance. Made from 90% recycled fibers, the Vivo's soft yet stable structure gives the garments excellent comfort.

VIVO IS A HOLE
NEW INNOVATION

30%
INCREASES
BREATHABILITY BY 30%**

0%
DECREASES THERMAL
PERFORMANCE BY 0%**

4
INCREASED 4 WAY
STRETCH

Vivo features a series of small apertures set within the insulation. The holes are uniquely sized to trap air. They also create paths of "least resistance", allowing moisture to escape quickly away from the body.

When the wearer is active and perspiring moisture flows freely and easily through the holes.

When the wearer is inactive the holes trap warm air.

Primaloft insulation represents the standard for trail performance with fibers that have remarkable properties. Thanks to the nature of its continuous filaments, it offers incomparable softness and uniformity for optimal warmth and comfort.

Thermoshield insulation brings warmth and comfort to clothing. Comfortable and lightweight, it is composed of fibres that trap air for effective insulation that keeps you warm.

WATERPROOF, WINDPROOF AND BREATHABILITY TECHNOLOGY

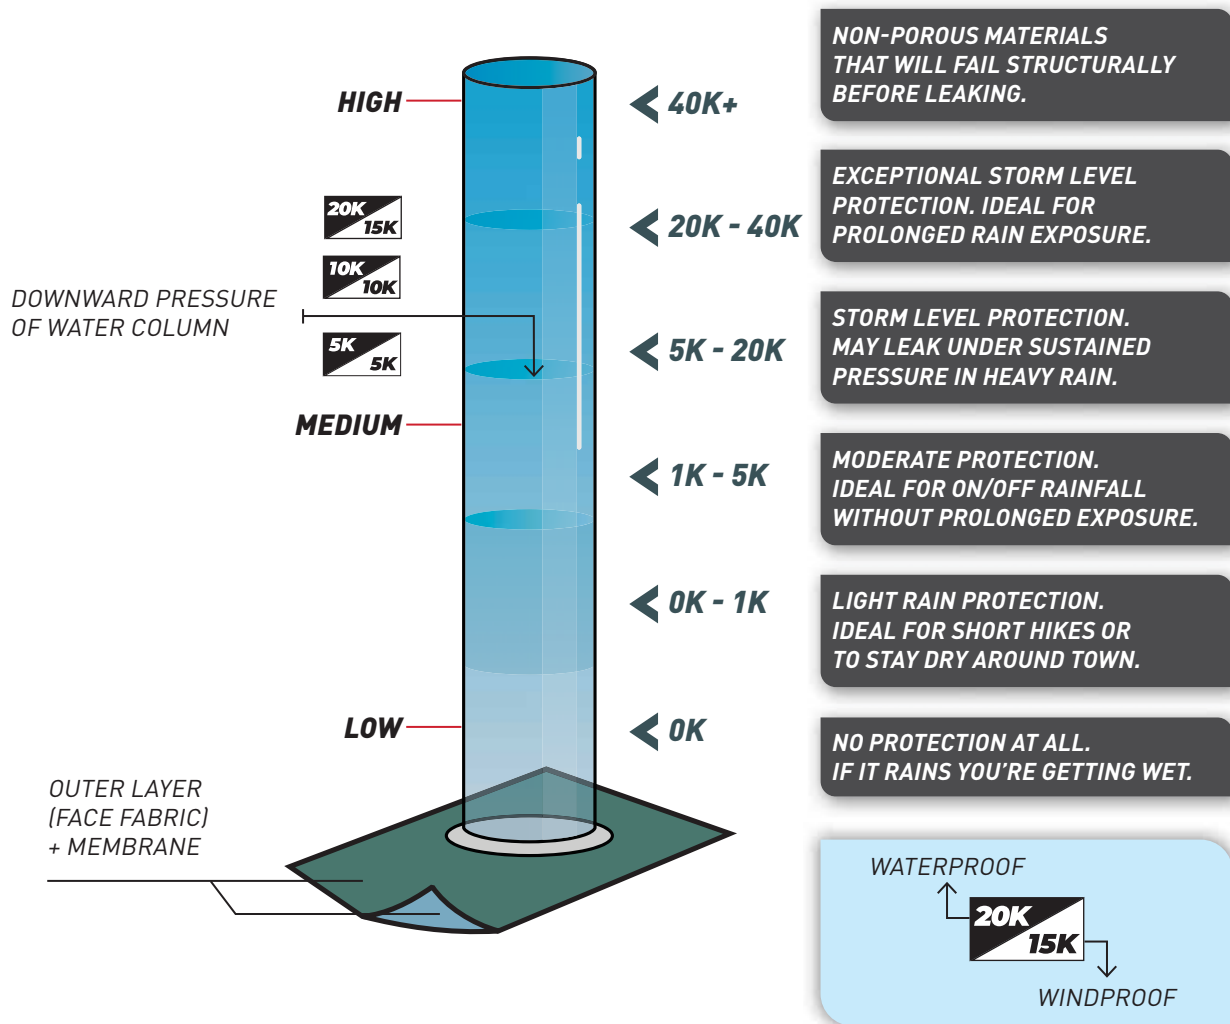

Wind and water protection technology Voltez is a soft, lightweight shield that gives clothing water and wind resistance as well as good breathability. With ratings ranging from 5K to 10K, the Voltez provides comfort and protection for everyday winter outings.

Considered as a high-performance membrane, HillTex offers exceptional protection against heavy rain and snow at 20K. The membrane also stands out by featuring an excellent 15K breathability rating. It is the membrane that stands out in extreme conditions to keep you warm and dry.

WATERPROOF TESTING

WE'VE GOT YOU COVERED TO HAVE FUN IN THE SNOW!

WHETHER ON A TRAIL, BACKCOUNTRY, A SNOWMOBILE, AN ATV, AN EXPEDITION OR COTTAGE, WHATEVER YOUR TYPE OF ACTIVITY, OUR OUTERWEAR OFFERS THE COMFORT, STYLE AND FEATURES YOU'RE LOOKING FOR.

CKX ACCESSORIES

FABRICS TECHNOLOGY

INSULATION

PrimaLoft® is the highest performing ultra-fine microfiber insulation on the market for warm, soft and lightweight, and is warmer wet or dry than all other insulations.

Thermoshield insulation provides warmth and comfort. Because it is comfortable and lightweight insulation allows freedom of movement. Its fibers trap air for greater insulation for light and heavy-duty performance. You'll stay warm and dry.

MEMBRANE

HIPORA® has 4 seemingly contrary characteristics which are Moisture Permeability, Water Resistancy , Breathability and water Repellency. HIPORA® has solved the biggest problem inherent in the conventional waterproof film. HIPORA® has the secret in the unique polyurethane coating technology. That is, numerous number of micro pores (abt. 9 billion / 1 inch²) of the minimal size (0.1-3u) are placed all over the polyurethane coated film. They shut out the water from outside, but allow the moisture or warm steam from the body go out. When the body perspires from strenuous work on exercise, the perspiration easily escape leaving the wear feeling comfortable.

The greatest contribution of Dentik fabric lies in the invention of e-PTFE. Combined with textile matter, it ensures outdoor fabrics have impermeability to water and permeability to air. Not only does it make it possible to eliminate perspiration out of clothing, but it also keeps heat from dissipating during outdoor activities. Therefore, the body is always in its best physical state . That's why it is called "the breathable fabric."

// PRIMALOFT

PrimaLoft® is the highest performing ultra-fine microfiber insulation on the market for warm, soft and lightweight, and is warmer wet or dry than all other insulations.

// THERMOSHIELD

Thermoshield insulation provides warmth and comfort. Because it is comfortable and lightweight insulation allows freedom of movement. Its fibers trap air for greater insulation for light and heavy-duty performance. You'll stay warm and dry.

// EVA TECHNOLOGY

EVA (Ethylene Vinyl Acetate) is one of the best insulating materials on the market because it utilizes air as thermal insulator. Air microbubbles are trapped in the shell, creating a high-performance barrier against the cold. And thanks to these tiny bubbles, the boots are incredibly lightweight. High-density EVA makes the boots sturdy, flexible, warm, lightweight and 100% waterproof.

AMS
MISSION

EXCLUSIVE TO
CKX HELMETS

MISSION &
TRANZ 1.5 AMS

**BREATHE
LIKE NEVER BEFORE**

AMS

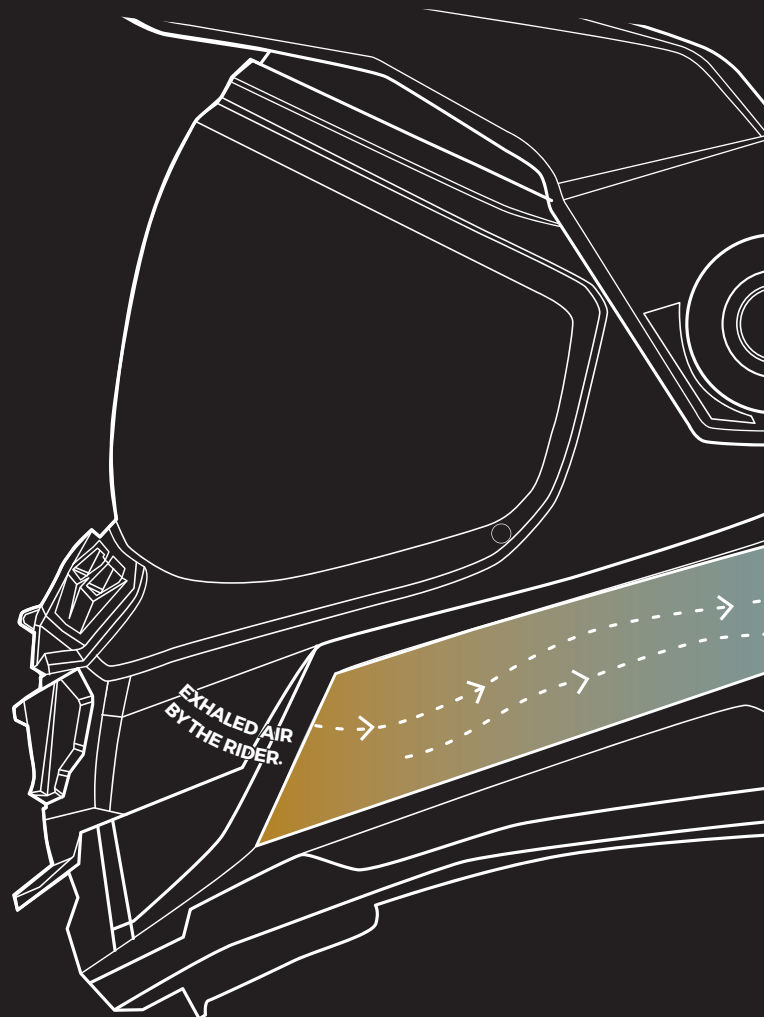

INTEGRATED AIR MANAGEMENT SYSTEM

By integrating the Air Management System (AMS) in the Mission and Tranz 1.5 helmets CKX offers an unrivaled level of comfort for trail enthusiasts.

Breathe freely in a space where air moisture is efficiently removed. Enjoy the freshness and clean space inside your helmet, free from condensation and frost.

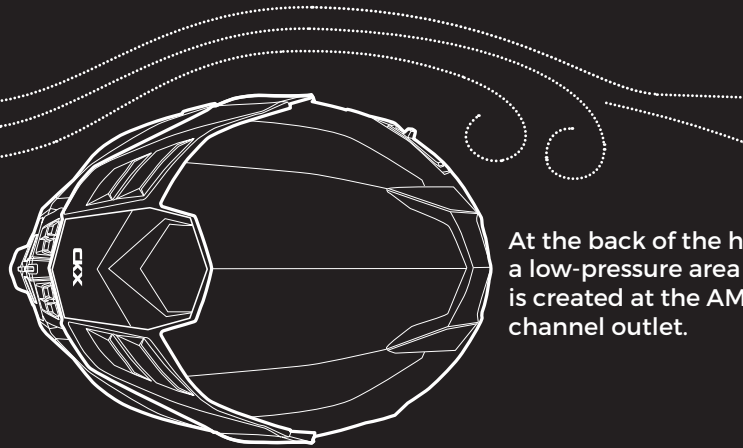

**EXHALED MOIST AIR
INSIDE ZONE**

Inside the helmet, the pressure is higher where the rider exhales moist air than the pressure at the back of the helmet.

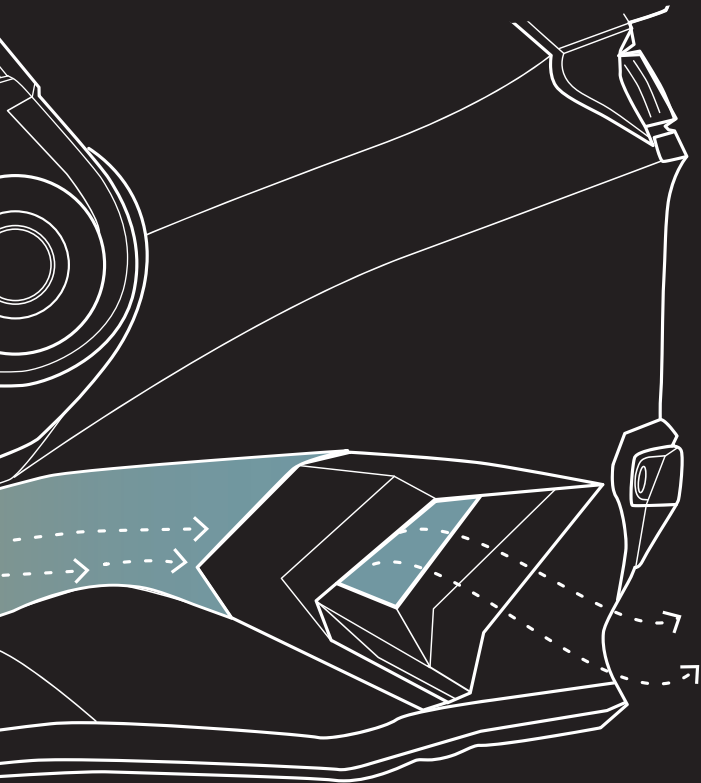

THE TECHNOLOGY **AMS** EXPLAINED

When the helmet is moving, outside air hits the helmet and bypasses it.

At the back of the helmet, a low-pressure area is created at the AMS channel outlet.

MOIST AIR REMOVAL REAR ZONE

AIR ALWAYS FLOWS THROUGH THE EASIEST PATH.

The pressure difference between the inside and the back of the helmet causes the moist air to flow outwards through the AMS channel. This is how the AMS system actively contributes to reducing internal fog.

FULL FACE HELMETS

MISSION *AMS*

SOLID

THE FIRST HELMET WITH REVOLUTIONARY AMS TECHNOLOGY, CKX'S NEW MISSION HELMET REDEFINES THE TRAIL RIDING EXPERIENCE. LIGHTWEIGHT AND FEATURING AN AERODYNAMIC AND SPORTY LOOK, IT PROVIDES AN EFFECTIVE PROTECTION AGAINST COLD AND WIND. SEE BIGGER, SEE FARTHER. PUSH YOUR LIMITS AND DOMINATE THE TRAILS.

GOGGLES COMFORT IS PROVIDED BY A CUSTOMIZED FOAM SPECIALLY FITTED TO THE HELMET, ENSURING AN EXCELLENT SEAL. THE GOGGLES CAN BE PERFECTLY ADJUSTED BY USING TWO SEMI-FLEXIBLE FASTENING DEVICES. THEY ALSO OFFER THE WIDEST FIELD OF VISION FOR THIS CLASS OF GOGGLES. TO ACHIEVE THIS UNMATCHED FEATURE, OUR DESIGNERS CREATED THE LARGEST PRE-CURVED POLYCARBONATE LENS EVER DEVELOPED, MOUNTED ON A POLYURETHANE FRAME.

// FEATURES 210°

- Lens controlled vents included
- Exceptional Field of view of 210°
- Flexible polyurethane frame
- Top and bottom ventilation port within the frame
- Injection molded polycarbonate pre-curved lens
- Anti-scratch lens
- Anti-fog dual pane lens
- 100% UV protected lens
- Helmet specific sized foam
- Interchangeable RapidClip strap
- Adapted for prescription glasses
- Removable nose guard

TINT GUIDE FOR REPLACEMENT LENS

- **Clear:** Recommended for cloudy days and at the time of sunset.
- **Yellow:** Improves contrast, reduces glare. High Intensity tint for maximum sight performance during low light driving. Excellent for night riding and for cloudy conditions.
- **Orange/Amber:** Heightens contrast in partly cloudy and sunny conditions. Blocks high amounts of blue light to heighten contrast and visual acuity.
- **Blue:** Reduces glare from visible white light and heightens contrast.
- **Pink:** Provides the best optics for the widest variety of light conditions. Enhances depth perception, increases contrast, and maximizes visual acuity.

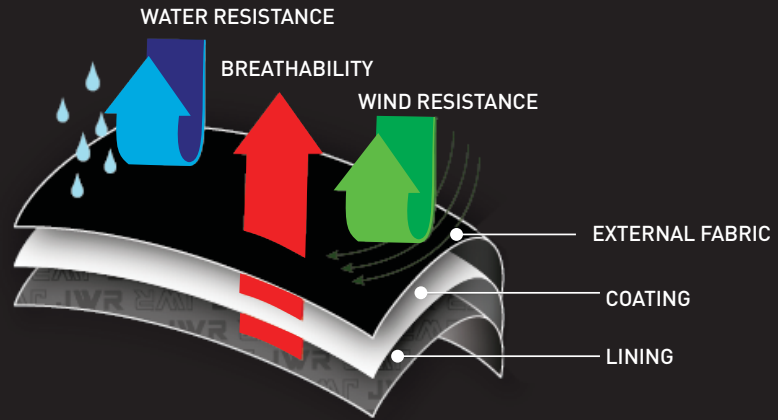

JETHWEAR

JETHWEAR APPAREL

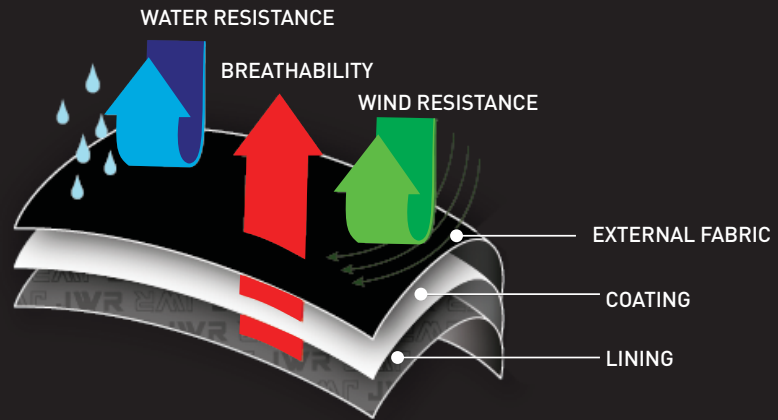

JETHWEAR POWTEC™

Powtec™ 10K/10K is our signature fabric technology that provides solid levels with 10K waterproofness combined with 10K in breathability that will keep you dry, warm and comfortable. The DWR treatment provides a high resistance surface against the outdoor elements.

JETHWEAR POWTEC™ ULTRA

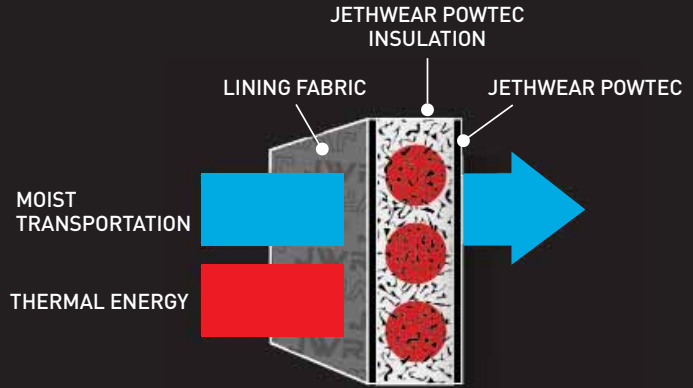

Powtec™ Ultra 20K/20K is our high performance shell with 20K waterproofness and 20K breathability. Powtec™ Ultra provides a durable shield against snow, rain and wind while maintaining a comfortable interior environment. The garment is also treated with a water resistant DWR coating for ultimate protection.

JETHWEAR
POWTECTM
 INSULATION

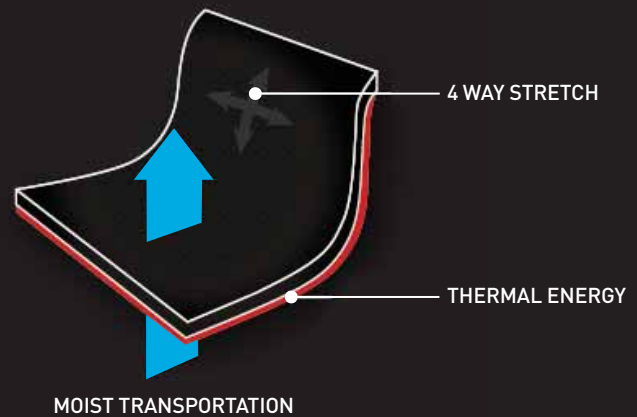

PowtecTM Insulation will transfer the thermal energy between the outer cold weather and your body temperature. It provides a down-like warmth that's engineered to give the user maximum heat with minimum volume.

JETHWEAR
POWTECTM
 BASE DRY

PowtecTM Base Dry is a flat knitted 4-way stretch fabric with brushed inside. The fabric provides moist transportation, warmth, comfort and flexibility.

CREST

MEN'S BIBS

The Crest Bib Pant is designed with a high front and back to avoid any snow to get in. With its 5 outer pockets you will have plenty of room for your stuff. It is equipped with JW Leg Adjustment System that allows a drawstring in your leg pocket to shorten the leg length. Reinforced lower leg areas and double main fabric on knees and back makes this a bib durable for sledding.

All new updated Phase Helmet for this season! We are happy to announce our partnership with MIPS and FidLock. Now our helmet is equipped with MIPS, an Brain Protection System with the shell and liner are separated by a low friction layer. MIPS has been proved to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain. The FidLock magnetic closing system makes it easy, quick and secure to buckle your helmet with a one-handed operation.

Technical Features:

- Weight: 1320g +/-50g
- ECE Approved
- Mips
- Fidlock magnetic hook
- Ventilation
- Removable & washable interior
- Breath guard included

Material specification:

- Shell: ABS
- Peak: ABS
- Mips
- Buffer layer: Expanded polystyrene (EPS)
- Liner: Different fabric based on position
- 80%nylon, 20% spandex
- 100% polyester, TPU, micro polyester
- 92% polyester, 8% spandex

// AUTO-SHARPENING RUNNER & U-BLADE

Do you want to have control of your snowmobile on icy and snow-covered trails just like a Formula 1 on asphalt tracks? Yes, it's possible!

With the Snowtracker aggressive and semi-aggressive kits, you will rediscover the pleasure of driving your snowmobile on straight line trails or trails with curves, with an aggressive grip and without darting.

Includes the self-sharpening 6" carbide runner. Aggressive runners and stabilizers allow more than 1" penetration into snow versus 3/4" for the semi-aggressive runners. Please note that the height of stabilizers is shorter than the runners. Therefore, stabilizers will not come into contact with paved track or road with blocks. Only the runner carbide will support you or will wear at out during your passage.

WINDSHIELD AND FASTENING SYSTEM

**DESIGNED TO
RESIST WEAR**

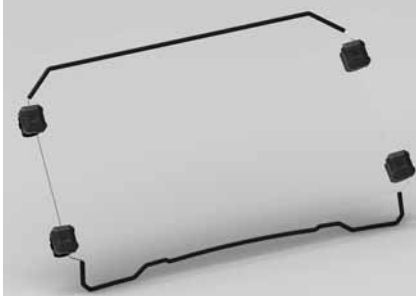

STURDY DOUBLE CLOSURE FASTENING SYSTEM

- + Shatter-resistant, durable construction
 - Glass fibre reinforced plastic (GRP)
- + Windshield positioning is preserved under all riding conditions
 - Internal non-slip coating ①
- + Fits all roll cage tube diameters and all ATV cage profile types
 - Wide hook and loop strip (Velcro) ②
- + A double-safety fastening system is provided by blocking the hook and loop strip
 - Gripping serrated inner cover and captive screw ③

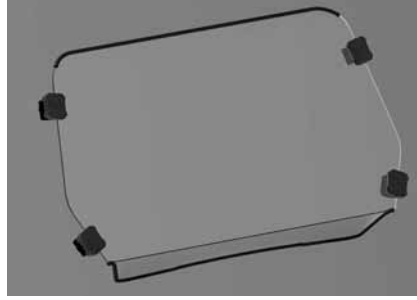

A QUICK AND EASY-TO-INSTALL WINDSHIELD

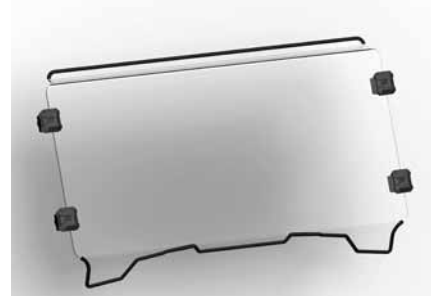

- + Can be easily installed by a single person
- + Maintains the initial adjustment during disassembly
 - Mounting base remains in place ④
- + Less handling time required to prepare for vehicle transportation
- + Available in 2 quality grades
 - Polycarbonate (1/4") standard GP and scratch resistant ⑤
- + Available in 2 models
 - Full and half windshield ⑤

// X2 SERIES HALF WINDSHIELD AND CLAMP SYSTEM

Maintain this great outdoor feeling while keeping debris away with Kimpex X2 Series windshields and clamp systems. Perfect for all-terrain riding enthusiasts, the X2 Series windshields are made of 1/4" thick polycarbonate and are available in short (half) or full versions, with or without anti-scratch.

You'll also enjoy the X2 Series clamp system: strong and sturdy, these clamps are designed to endure harsh conditions. Installation is quick and easy, even for a single person and allow you to keep the windshield initial adjustment during removal. The clamps are suitable for all diameters and profile types of UTV roll cages. The unique clamp design includes a double closure fastening system consisting of hook and loop straps (Velcro) with a gripping serrated inner cover. When screwed on, the covers secure the strap in place.

Windshield technical specifications:

- Half or full windshield
- Made of 1/4" thick polycarbonate
- UV resistance protection
- Seal gasket in the lower part of the windshield

X2 clamps technical specifications:

- X2 Series clamp system included
- Robust construction: fibreglass-reinforced plastic
- Compatible with all diameters and profile types of UTV roll cages
- Wide, sturdy hook and loop straps (Velcro)
- Non-slip applique inside Velcro straps
- Self-locking cover with captive screw

// GEN 3 WINDSHIELD

Discover the new look of the GEN 3 windshields with eye-catching serigraphy! Perfect for your rides in all seasons, it is equipped with the aerodynamic management system that eliminates air draft at your back. Ultra rigid, it reduces vibrations and has mounting points specially adapted for mirrors. It allows you to enjoy a larger field of vision thanks to the transparency of the hand guards. The attachment system, which installs in seconds, has also been improved to reduce premature wear. Combine style, comfort and innovation with KIMPEX GEN 3 windshields.
