TECHNOLOGY

CARBON FIBER

LS2 uses multiple layers of our exclusive wide-weave carbon fiber for a very light, but strong shell that handles impacts while dispersing energy for a safer ride.

HIGH PERFORMANCE FIBERGLASS COMPOSITE (HPFC)

LS2 carefully layers a blend of a unique fiberglass weave and organic resin into a strong, ultra-lightweight, but rigid shell that accepts an impact while dispersing energy for a safer ride.

KINETIC POLYMER ALLOY (KPA)

A proprietary blend of polycarbonate, space age thermoplastics and additional materials specifically formulated by LS2, KPA offers ultra-lightweight and high penetration resistance, but with some flexibility for the ultimate in energy dispersion. This special formula meets or exceeds both ECE 22.05 and DOT requirements.

HIGH PRESSURE THERMOPLASTIC TECHNOLOGY (HPTT)

A proprietary blend of polycarbonate, ABS and other high performance polymers developed by the engineering team at LS2. LS2 uses only new (not recycled) raw materials in our products. HPTT offers superior strength, energy absorbing flexibility and energy dispersion, making it an excellent choice for the outer shell on a motorcycle safety helmet.

THE WORLD'S BRAVEST HELMET.

Ask a motorcyclist about the "best helmet" in the world, and invariably you will hear a very short list of names. This is an elite club that is the dream of every brand in the world. It is a challenge worthy of the fight and LS2 has entered the arena. We are proud to introduce the Challenger. Fit. Finish. Function. Performance. The challenger will face the competition head-to-head and feature-for-feature. Bold. Unafraid. The game has changed. Always Ahead.

-----------	-----	--	--	-------------

A PARADIGM SHIFT IN MODULAR HELMET DESIGN.
 Vortex, the new incredible modular helmet for 2018 aims at truly leading from the front. (Always Ahead) Rugged, yet stylish, the new Vortex offers an extremely lightweight, small profile shell that promotes all-day comfort. The shell is 100% Carbon Fiber, the same used extensively in the aeronautical industry, Formula 1 and MotoGP. Don't get caught in the wake.

SPITFIRE

1000g ± 50g

FOR FREE SPIRITS.

The LS2 Spitfire – a modern take on a classic, bobber, ¾ open face helmet design. The Spitfire starts with a lightweight shell. Add a built-in, drop down sun shield. Build the rich comfort padding out of hypoallergenic, breathable materials, and add a built-in ventilation system to allow fresh air to pass through the material, keeping you cool and dry. Our 3D laser cut offers the perfect fit, with no hot spots, for all day comfort. Finish it off with a DOT approved quick release chinstrap and you have a modern, comfortable helmet with the retro style you love. Meets or exceeds DOT standards. Long oval fit.

ENJOY GOOD WEATHER SAFELY.

The 569 Track is one of the most popular helmets LS2 has ever built, and for good reason. From the built-in drop-down sun shield, to the quick release chin strap, the 569 delivers the simple comfort and conveniences riders need and want, all wrapped up in an ECE/DOT approved package.

| HALF HELMETS

REBELLION

950g ± 50g

Rebels make their own destiny and the LS2 Rebellion is a motorcycle half helmet that stands alone, charting its own course, just like you. We set out to revolutionize the half helmet market. We started with a stylish shell made of our high performance, lightweight Kinetic Polymer Alloy (KPA). It has just the right blend of retro-cool with a technical edge. Imagine a half-shell motorcycle helmet that offers flow-through, ported ventilation to keep you cool on the hottest of days. The short peak and Twin Shield System drop down sunscreen will protect your eyes when the sun is in the horizon. The sun shield itself has a unique, two-stage adjustability: lock it 1/2 way for just a little shade, or full open for total sun protection. It's called "Freedom of choice." Our dual-density EPS meets or exceeds DOT standards. Finish it off with a DOT approved micrometric, quick release chin-strap, and you have all the convenience and comfort of a traditional motorcycle half helmet, but with the technology of the future.

SUBVERTER

1450g ± 50g

TOP LEVEL OFF-ROAD PERFORMANCE.

In the wild world of the motocross helmets, a new star is born today: its name is Subverter. 'Nomen omen' Latin stated, and the new off-road model of the LS2 range represents the perfect expression of the name thanks to its extreme and absolute innovating specifics looking to comfort, safety and look. Made with the ultra-light KPA, the new Subverter is offering, above all, a security sliding structure with a double injection of EPS, to guarantee an exceptional protection on impacts. Subverter is ready to fight for new big and dusty challenges on the head of the motocross riders all over the world!
