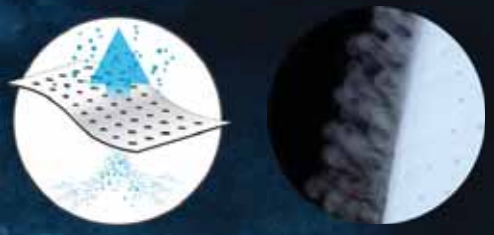
VIVO ISOLATION

Ride hard. Stay dry.

Experience a remarkable comfort level

30% more breathability than the competition



How it works

Unique in design, openings in Vivo insulation allow moisture to move away from the body during intense physical activity while retaining heat in more passive moments. Thus, Vivo offers increased warmth and comfort by offering great breathability.

AMS

INTEGRATED AIR MANAGEMENT SYSTEM

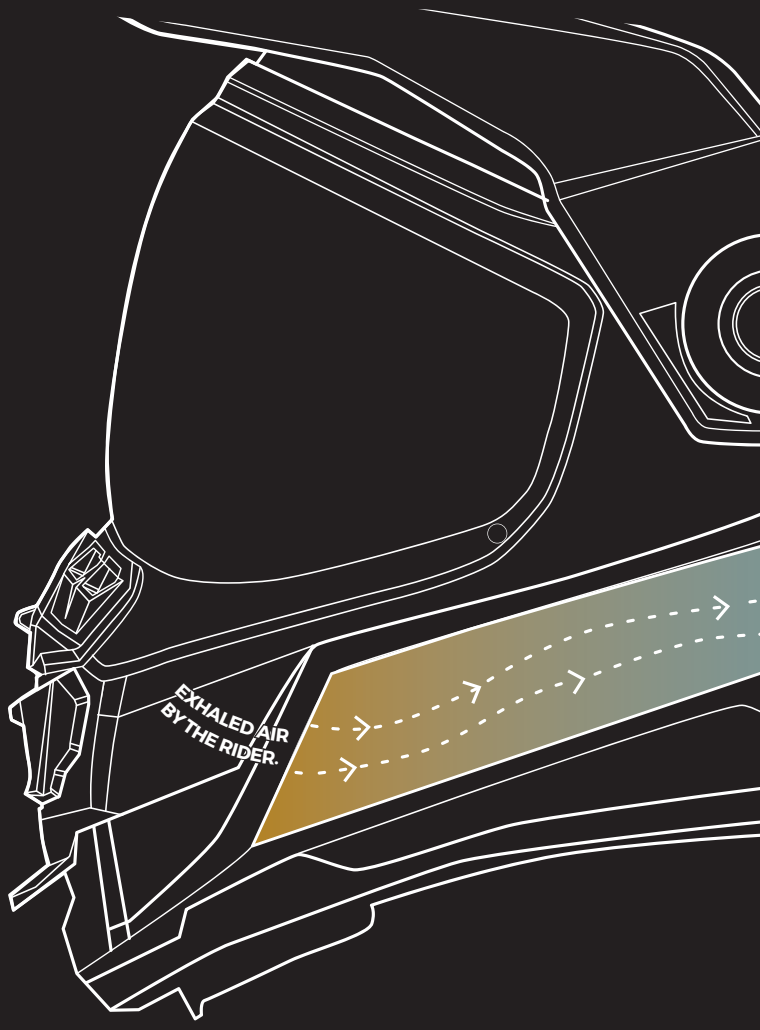
By integrating the Air Management System (AMS) in the Mission and Tranz 1.5 helmets CKX offers an unrivaled level of comfort for trail enthusiasts.

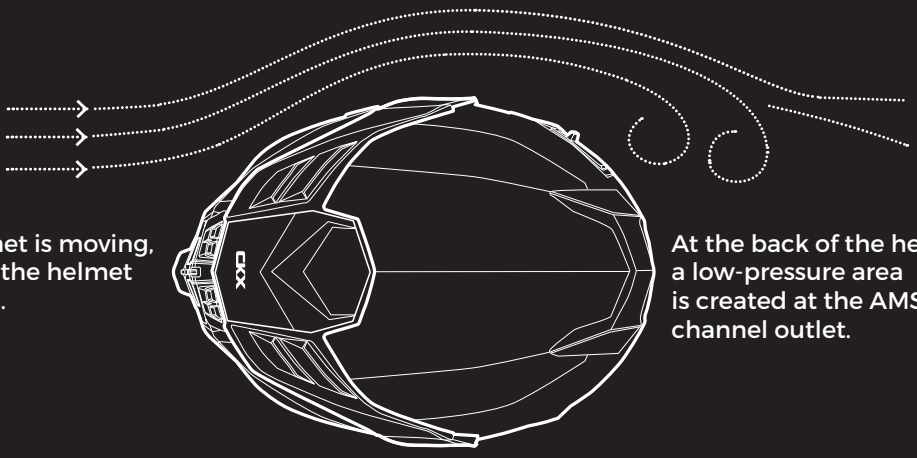
Breathe freely in a space where air moisture is efficiently removed. Enjoy the freshness and clean space inside your helmet, free from condensation and frost.

EXHALED MOIST AIR INSIDE ZONE

Inside the helmet, the pressure is higher where the rider exhales moist air than the pressure at the back of the helmet.

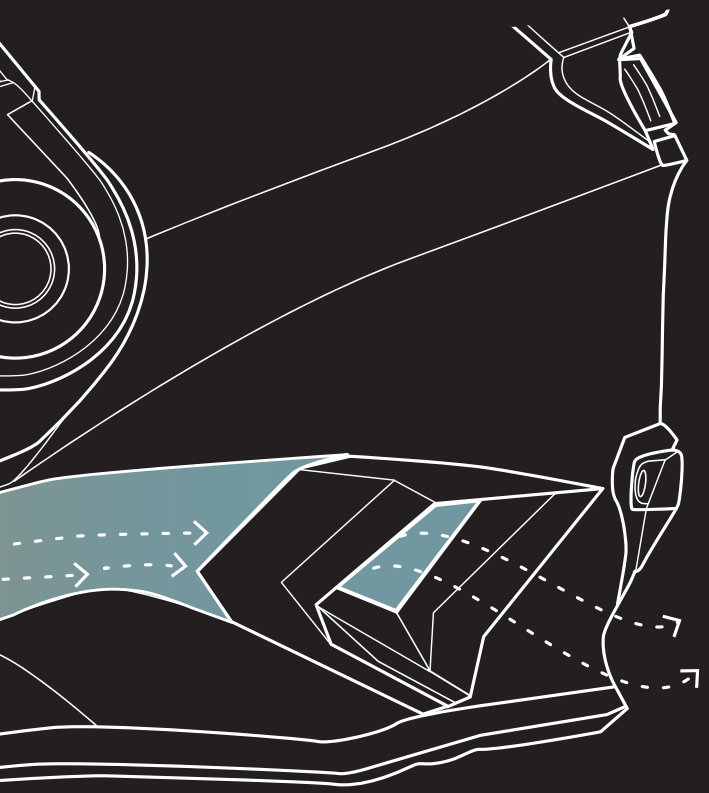


THE TECHNOLOGY AMS EXPLAINED



When the helmet is moving, outside air hits the helmet and bypasses it.

At the back of the helmet, a low-pressure area is created at the AMS channel outlet.



MOIST AIR REMOVAL
REAR ZONE

AIR ALWAYS FLOWS THROUGH THE EASIEST PATH.

The pressure difference between the inside and the back of the helmet causes the moist air to flow outwards through the AMS channel. This is how the AMS system actively contributes to reducing internal fog.

GOGGLES COMFORT IS PROVIDED BY A CUSTOMIZED FOAM SPECIALLY FITTED TO THE HELMET, ENSURING AN EXCELLENT SEAL. THE GOGGLES CAN BE PERFECTLY ADJUSTED BY USING TWO SEMI-FLEXIBLE FASTENING DEVICES. THEY ALSO OFFER THE WIDEST FIELD OF VISION FOR THIS CLASS OF GOGGLES. TO ACHIEVE THIS UNMATCHED FEATURE, OUR DESIGNERS CREATED THE LARGEST PRE-CURVED POLYCARBONATE LENS EVER DEVELOPED, MOUNTED ON A POLYURETHANE FRAME.

FEATURES 210°

- Lens controlled vents included
- Exceptional Field of view of 210°
- Flexible polyurethane frame
- Top and bottom ventilation port within the frame
- Injection molded polycarbonate pre-curved lens
- Anti-scratch lens
- Anti-fog dual pane lens
- 100% UV protected lens
- Helmet specific sized foam
- Interchangeable RapidClip strap
- Adapted for prescription glasses

TINT GUIDE FOR REPLACEMENT LENS

Clear: Recommended for cloudy days and at the time of sunset.

Yellow: Improves contrast, reduces glare. High Intensity tint for maximum sight performance during low light driving. Excellent for night riding and for cloudy conditions.

Orange/Amber: Heightens contrast in partly cloudy and sunny conditions. Blocks high amounts of blue light to heighten contrast and visual acuity.

Blue: Reduces glare from visible white light and heightens contrast.

Pink: Provides the best optics for the widest variety of light conditions. Enhances depth perception, increases contrast, and maximizes visual acuity.

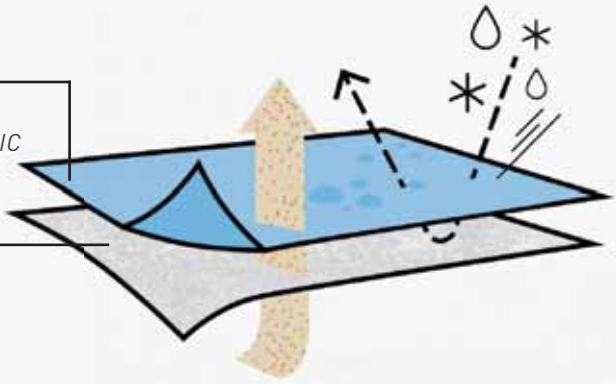
MATERIALS TECHNOLOGY

The performance of materials is the basis of equipment adapted to cold weather conditions. Selected for their durability, robustness and ease of maintenance, the materials used in the manufacturing of our clothing provide you with the comfort and performance you are looking for.

MAIN FABRIC, MEMBRANE AND INSULATION

Our dual layer fabrics are waterproof treated and equipped with a membrane applied on their reverse side, imparting the fabrics with waterproof and breathable properties. Completing the manufacturing process, our insulating material provides a level of warmth designed for your needs.

DUAL LAYER FABRIC AND HOW THE MEMBRANE WORKS



LAYER 1

LAYER 2
MEMBRANE IS APPLIED ON MAIN FABRIC*

** Membrane performance is indicated by a number, the higher it is, the greater the membrane's efficiency*

WIND
PROTECTION FROM THE WIND WHICH CANNOT PENETRATE THE MEMBRANE'S STRUCTURE

WATER/SNOW
PROTECTION FROM WATER MOLECULES WHICH ARE LARGER THAN THE MEMBRANE'S PORES

MOISTURE
WICKING AWAY BODY MOISTURE, THE MOLECULES OF WHICH ARE SMALLER THAN THE MEMBRANE'S PORES.

When the wearer is active and perspiring moisture flows freely and easily through the holes.

When the wearer is inactive the holes trap warm air.

VIVO IS A HOLE NEW INNOVATION

Vivo features a series of small apertures set within the insulation. The holes are uniquely sized to trap air. They also create paths of "least resistance," allowing moisture to escape quickly away from the body.

That's how it enhances breathability without decreasing thermal performance.

Made with 90% recycled fibers, Vivo Eco's flexible yet stable structure provides excellent comfort.

CARBONE // SOFTSHELL

First frost, winter is around the corner! Awaiting the polar winds, the Carbone is an all-around jacket for the off-season. Created with water and wind resistant fabric, the Carbone assures your comfort with its breathability, to be outside even in colder weather. Equipped with a ventilation system, it is ideal to work, or to explore nature's landscape no matter the weather.

MATERIALS TECHNOLOGY

INSULATION

PRIMALOFT

PrimaLoft® is the highest performing ultra-fine microfiber insulation on the market for warm, soft and lightweight, and is warmer wet or dry than all other insulations.

THERMOSHIELD

Thermoshield insulation provides warmth and comfort. Because it is comfortable and lightweight insulation allows freedom of movement. Its fibers trap air for greater insulation for light and heavy-duty performance. You'll stay warm and dry.

MEMBRANE

HIPORA

HIPORA has 4 seemingly contrary characteristics which are Moisture Permeability, Water Resistancy , Breathability and water Repellency. HIPORA has solved the biggest problem inherent in the conventional waterproof film. HIPORA has the secret in the unique polyurethane coating technology. That is, numerous number of micro pores (abt. 9 billion / 1 inch2) of the minimal size (o0.1-3u) are placed all over the polyurethane coated film. They shut out the water from outside, but allow the moisture or warm steam from the body go out. When the body perspires from strenuous work on exercise, the perspiration easily escape leaving the wear feeling comfortable.

DENTIK MEMBRANE

The greatest contribution of Dentik fabric lies in the invention of e-PTFE. Combined with textile matter, it ensures outdoor fabrics have impermeability to water and permeability to air. Not only does it make it possible to eliminate perspiration out of clothing, but it also keeps heat from dissipating during outdoor activities. Therefore,the body is always in its best physical state . That's why it is called "the breathable fabric."

JETHWEAR

JETHWEAR WAS INTRODUCED TO THE MARKET FALL 2013. WITH A NEW CREATIVE DESIGN AND A QUALITY THAT ATTRACTS THE FREERIDE SNOWMOBILER WE HAD A GREAT SUCCESS ALREADY FROM START.

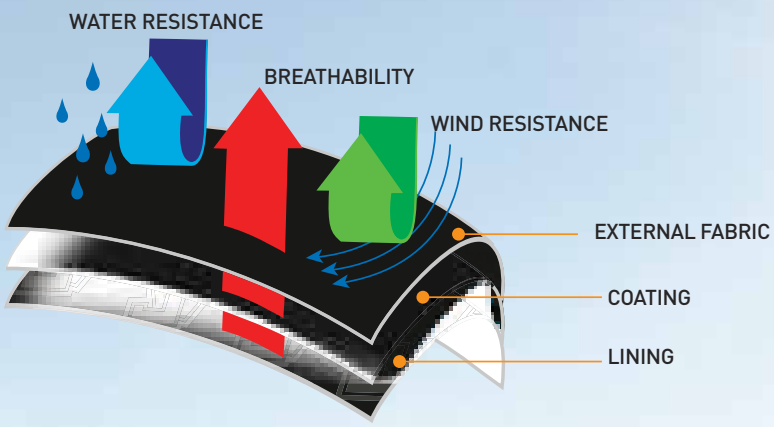
THE SMALL LINE CONTAINING ONE MONO SUIT, THREE JACKETS AND TWO PANTS WERE QUICKLY SOLD OUT. THREE SEASONS HAS PASSED AND JETHWEAR HAS BECOME A PLAYER TO COUNT WITH IN THE SNOWMOBILE MARKET.

JETHWEAR

POWTEC™

— Our Signature Fabric Technology —

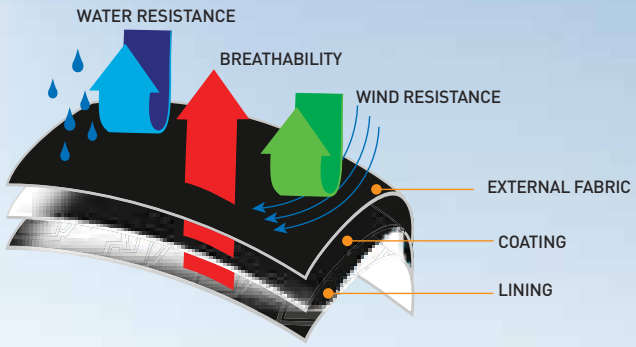
Available on all JETHWEAR jackets, pants and mono suits in JW Series, POWTEC provides an engineered shield against snow, rain and wind while maintaining a comfortable interior environment. The fabric is DWR treated and bounded to a technical waterproof breathable coating. This combination allows increased levels of breathability while also providing a high resistance surface for outdoor elements.



JETHWEAR POWTEC™ ULTRA

— Our Signature Fabric Technology —

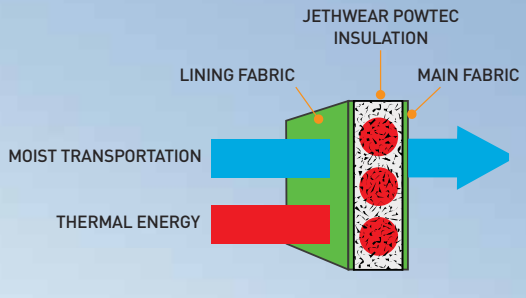
Available on all JETHWEAR jackets, pants and mono suits in Black Series and Team Series, POWTEC Ultra provides a high engineered shield against snow, rain and wind while maintaining a comfortable interior environment. The fabric is DWR treated and bounded to a technical waterproof breathable coating. This combination allows increased levels of breathability while also providing a high resistance surface for outdoor elements.



JETHWEAR POWTEC™ LIGHT

— Our Mid Layer Technology —

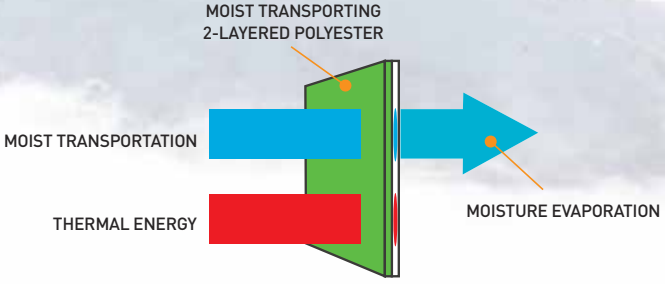
Available on the JETHWEAR Cruiser Series, POWTEC Light is our mid layer technology. Our POWTEC Insulation combined with our liner and main fabric serves for a high end mid layer on cold days and will provide a down-like warmth that's engineered to give the user maximum heat with minimum volume.



JETHWEAR POWTEC™ FUSION

— Our L-1 Technology —

Our POWTEC Fusion is a L-1 fabric in flat knitted technical polyester. The fabric provides moist transportation, warmth, comfort and flexibility. The garment should be worn directly against your skin for optimal effect.



JETHWEAR POWTEC™ INSULATION

— Our Signature Liner Technology —

POWTEC INSULATION will transfer the thermal energy between the outer cold weather and your body temperature. It provides a down-like warmth that's engineered to give the user maximum heat with minimum volume.

CKX HELMET SIZING CHART

For maximum safety, it is important that your helmet fits you properly. It should be snug and comfortable. It must not be so large that it moves freely around your head, nor so small that it constricts and causes pain. A helmet that is too large may slide down over your eyes, or turn in a lateral direction due to movement during riding. Always secure the chin strap tightly to keep your helmet firmly in place whenever you ride.

USE THIS CHART ONLY AS A GUIDELINE FOR FITTING HELMETS. VISIT YOUR CKX/KIMPEX DEALER TO ENSURE A PROPERLY FITTING HELMET.
INSTRUCTIONS: MEASURE THE CIRCUMFERENCE OF YOUR HEAD, ONE INCH ABOVE THE EYEBROWS AND THE EARS, THEN REFER TO THE FOLLOWING CHART.
EXAMPLE: IF MEASURING TAPE READS 23 INCHES (METRIC CONVERSION: 60 CM), THE PROPER HELMET SIZE WOULD BE "LARGE".

GOGGLES

THE 210° GOGGLES

ARE UNQUESTIONABLY ONE OF THE TITAN'S FLAGSHIP FEATURES.

Goggles comfort is provided by a customized foam specially fitted to the helmet, ensuring an excellent seal. The goggles can be perfectly adjusted by using two semi-flexible fastening devices. They also offer the widest field of vision for this class of goggles. To achieve this unmatched feature, our designers created the largest pre-curved polycarbonate lens ever developed, mounted on a polyurethane frame.

GHOST

Are you looking for off-road goGgles which are both modern in design and practical? The frameless design of the GHOST and its cylindrical (curved) lens give it a unique look. In addition to the basic features, we developed a system of interchangeable straps that offer either a conventional or rapid clip as needed.

Includes one extra single lens clear with pins for tear-Off

Flywheel OEM Replacement BRP

KIMPEX is offering a new replacement flywheel for your Ski-doo. This flywheel can be used as a direct Replacement to the OEM.

Ski-doo 1200 snowmobiles are plagued with problems on the original flywheels. The additives in the motor oil were dissolving the epoxy that holds the magnets in the flywheel, causing them to detach and scatter throughout the engine.

Solution:

1. Seal that protects the magnet's epoxy from oil additives

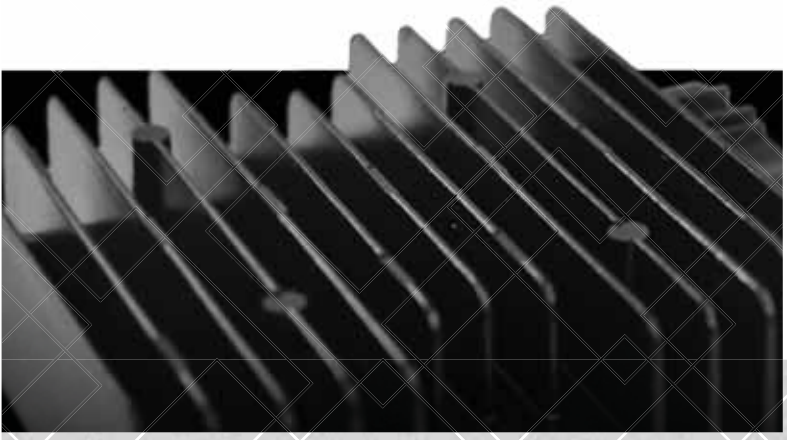
STOP BURNING YOUR REGULATOR!

It's time to update or replace your voltage regulator with advanced Mosfet technology. This modern concept, ultra-reliable can handle up to 50 amps peak and 30 amps continuous 3-phase, single phase 30 Amps and runs cooler than all OEM regulators diodes. In addition, this rectifier has a protection against overheating, rather than burning it off for a while to cool off.

WHY USE *MOSFET* ENHANCED TECHNOLOGY?

Runs cooler
Runs much cooler than the traditional Shunt type voltage regulator.

Saves gas
Less load on the stator, less work, less fuel is used and you save.



Regulated energy
The energy regulated by the Mosfet voltage regulator is much cleaner

Extended battery life
Extends the battery's life and cold cranking capacity.

More engine power
Remove stator load resulting in more engine power.

Optimized power
Optimizes power delivery by switching the stator coils on or off.

KIMPEX

Mosfet Voltage Regulators

Features:
- Direct replacement to your original unit
- Plug-and-play, direct fit, easy installation
- The Quality exceeds the OEM equipment
- Improved heat sink and charging capabilities
- Handles up to 50amp peaks and 30amp continuous 3 phases, 30amp single phase
- Higher grade of electric components
- All products shipped are tested
- One year limited warranty

Dimensions:
Width : 30mm
Length : 95 mm
Height: 110 mm
Fixation holes center to center :78 mm

Other specifications:
Number of plugs : 2
Number of pins : 6
Minimum charging voltage: 12V
Maximum charging current: 50A
Open circuit voltage: <15V
Operation temperature: -20° to 85°

Halogen Bulbs

H.I.D. High Intensity Discharge Lamp System

Xenon-gas-filled headlight bulbs, which produce a super-white HID-type headlight beam.

The lenses have been optically dyed to transform the light into intense white beam which simulated the appearance of H.I.D. lighting system and produce superior, super-trick lighting over standard, dull headlight.

HID lighting provides the brightest illumination available. The more intense, higher color temperature light results in three times the output of standard halogen lighting, which means improved peripheral vision and enhanced down-road visibility. The end result is safer driving for everyone on the road.

All twin packages are in a reusable "Tuff Pak" storage case.

NGK Spark Plugs

Standard Spark Plugs

- OEM Quality
- Triple-Gasket Sealing Process
- Consistent Performance
-Plug of Choice in Millions of Vehicles

V-Power® Spark Plugs

- Lowers ignition system voltage requirements
- Greater ignitability and performance over conventional spark plugs
- "Trivalent Metal Plating" has superior anti-corrosion and anti-seizing properties
- Increased fuel economy and lower emissions
- Highly durable against electrical and chemical wear
- Good performance spark plug

G-Power® Spark Plugs

- Fine platinum tip reduces required voltage
- Extremely durable under high heat
- Trivalent Metal Plating - superior anti-corrosion and anti-seizing properties
- Faster starts and quicker acceleration
- Better fuel economy and lower emissions
- Best platinum spark plug at an economical cost

Iridium IX® Spark Plugs

- Fine Iridium tip ensures high durability and a consistently stable spark
- Iridium alloy has extremely high melting point, perfect for today's high-tech, high-performance ngines
- Trivalent Metal Plating - superior anti-corrosion and anti-seizing properties
- Outstanding acceleration, high fuel efficiency and durability
- Ultimate design, technology and performance.

Laser Platinum® & Laser Iridium® Spark Plugs

- Laser welded Platinum or Iridium center electrode tip
- Platinum disc welded to backside of ground electrode provides long life
- Trivalent Metal Plating provides superior anti-corrosion and anti-seizing properties
- Faster starts and quicker acceleration
- Better fuel economy and lower emissions
- Best spark plug available in their category
- Original Equipment Manufacturer approved design

Racing Spark Plugs

To withstand the severe conditions that occur in racing engines, NGK Racing Spark Plugs feature electrode materials and configurations as follows:

- **Electrode materials** - Many use precious metals such as platinum or gold/palladium for greater durability and lower voltage requirements.
- **Electrode configurations** - Fine-wire center electrodes provide better sparking and enhanced ignitability. Fine-wire ground electrodes further improve the ignitability of the plug.
- **Ensulator configurations** - Special configurations are used for the insulator noses to improve throttle response.

NGK RACING CABLE

NGK Racing Cables

The ideal sales add-on for today's demanding enthusiasts, all NGK Racing Wires feature legendary NGK quality construction, from the rugged silicone outer insulation and molded boot (solving the problem of lost performance caused by aging wires!) to the inner core of solid copper wire strands for maximum spark energy. And the resistor covers come equipped with 5k ohm ceramic resistors to defend against electronic ignition disruptions caused by RFI (radio frequency interference)!

NGK makes it easy to upgrade with a choice of 6 configurations (straight and 90° boots, threaded and solid post terminals and 50 cm and 100 cm lengths). Installation headaches, as well as the replacement of costly one piece molded ignition units, have been virtually eliminated with the new NGK in-line Cable Splicer! Your customer just inserts the lead from the CDI ignition in one end of the Cable Splicer, puts the new wire in the other end, and screws the two pieces together. A simple, low-cost do-it-yourself solution, and only with the NGK in-line Cable Splicer and Racing Cables!

Get plugged in to high performance add-on sales! Order NGK Racing Cables and in-line Cable Splicers today.

KIMPEX®

BATTERIES

ISO 9001 and ISO 14001

KIMPEX is made with the same specifications and quality control as the top brand-names in batteries but at an affordable price, KIMPEX have reliable power to start up your engine at any time. KIMPEX is available for the most popular applications in DRY and SEALED battery type. Also available is the Factory Activated for the most recent models. KIMPEX is the new kid on the block.

Batteries sold by Kimpex are covered by a limited 1-year warranty, with proof of purchase (consumer). Kimpex reserves the right to claim the defective battery for validation.

Battery Characteristics

Super Performance Lithium Ion Battery

The lithium Ion Battery is a great powersport replacement battery if you want to improve the performance of your powersport vehicule. The super Performance Lithium Battery is the mst environment friendly battery chemically available.

- Less Weight and Volume: 1/3 of normal Lead-acid battery
- Non-spill : no acid inside, no leak
- No-pollution does not contain any acid and heavy metals such as lead, cadmium, hydragyrum (mercury)
- Non-explosive and non-combustible
- Quickly rechargeable with big current: rechargeable with 13 amp current and 90% recharged within 6 min
- Excellent Cycle life: More than 2000 cycles under JIS-D standard (Lead-acid only 150-300 cycles)

Factory Activated Maintenance Free Gel Battery

Kimpex's Gel batteries are the ideal replacement of all kinds of Lead-acid Batteries.

- Large thermal capacity and strong heat dissipation capability of Gel electrolyte avoids thermal runaway, which is easier emerged by the acid Maintenance Free Battery.
- Well-distributed specific gravity of the Gel electrolyte and no stratification phenomenon solves initial capacity reduction problem of acid Maintenance Free Battery.

***Can be ship by air**

Factory Activated Maintenance Free Battery

The most convenient batteries for users are Kimpex' Factory Activated Maintenance Free Battery. The battery is absolutely ready to go when people buy it. They are perfect flexibility to fit demanded install positions.

- Special permanently sealed container design allows the battery to be installed in any position other than upright.
- Complete factory acid filling process ensures safety and non-pollution.
- Professional factory charging process enlarges cranking power by 10% more than Dry Charged Maintenance Free batteries.

***Can be ship by air.**

Maintenance free Battery

This is too valuable to waste on maintaining batteries. Kimpex's Maintenance Free Batteries would allow them to completely free up from the boring battery maintenance duties. People just need to fill the battery with acid, install it on the motorcycle and then forget it (regular charging is still necessary).

- Advanced lead-calcium technology promotes the cranking power, never requires refilling, half shelf discharge rate compared to conventional batteries.
- Special additives in the electrolyte retards plate sulfation.
- Lean liquor design prevents the battery from leaking.

***Cannot be ship by air.**

Heavy Duty Battery

It is common for consumers always seeking power along with more cranking power, longer life and excellent vibration resistance. Kimpex's Heavy Duty Batteries reach these entire requests as follows:

- Enlarged plate area delivers up to 30% more cranking performance.
- Special separator design provides longer life.
- Tight assembling technology enhances vibration resistance.

***Can be ship by air.**

Battery Characteristics

Conventional Battery

It standard usage and reasonable cost are the most important factors when looking for a replacement battery, then choose Kimpex's Conventional Batteries. They provide plenty of capacity, great cranking power and long life base on an unbeatable price.

- Thru-partition construction provides less internal resistance and great cranking power.
- Special alloy technology and advanced lead paste design enables plenty of capacity and long life.

***Can** be ship by air.*

Yuasa Battery Characteristics

Absorbed Glass Mat (AGM)

Absorbed Glass Mat (AGM) Technology is an advanced battery design that eliminates water loss. Once it's filled with acid, you'll never need to fill it with water or check the acid level.

Long Life
Because of its lead calcium design, the AGM battery will hold its specific gravity more than three times longer than conventional lead antimony types. This means much longer periods between charges when the battery is used in a standby mode, like winter storage.

And to remain factory-fresh the AGM battery is shipped dry along with its own pack of high-gravity acid that's added at the time of installation.

Non-spillable
Once filled with acid from its special packs, the AGM battery is virtually maintenance free. All of the acid is absorbed in the special plates and separators, so there is no need to worry about acid leaks on the valuable vehicle parts and accessories.

YuMicron CX

For increased power, less maintenance and longer life, YuMicron CX is the battery of choice. The first motorcycle battery built on lead-calcium technology, YuMicron CX is specially designed for today's big, complex machines, where higher cranking power is a must. It delivers all the features of the standard YuMicron – plus...

- **Unique CX design** for higher cold cranking amps
- **Lead-calcium technology** reduces water loss –and servicing – by 66% compared to lead antimony
- **And, CX substantially reduces self-discharge** – for longertime between charges

YuMicron

Personal watercraft, snowmobiles and ATVs make special demands – and YUASA's YuMicron Battery meets them head-on. The high-tech, power-boosting design also makes YuMicron ideal for accessory-laden touring bikes and modified machines.

- **Heavy-duty glass** mat resists vibration damage
- **Special thin YuMicron Separator** packs in extra plates, delivers up to 30% more cranking power than conventional types
- **Through-the-wall intercell connector** minimizes internal resistance, maximizes power
- **Sulfate Stop** curbs plate sulfation – and provides longer life

Standard

- Original Equipment in most machines.

YUASA BATTERY

Yuasa Battery Characteristics

High Performance Maintenance Free

If high power is top priority in a replacement battery, look to Yuasa's High Performance Maintenance Free batteries. Yuasa means more power, less maintenance and longer life. Yuasa's High Performance Maintenance Free batteries are your best choice for motorcycles, utility vehicles, scooters, ATVs, riding mowers, personal watercraft and snowmobiles.

- No spilling, no leaks, no water to check and topping off is a thing of the past
- Increased power and up to 30% more cranking amps than YuMicron thanks to a radial grid design and additional plates
- Long lasting which means Yuasa's High Performance Maintenance Free batteries will last up to three times longer than conventional batteries
- Exceptional resistance to vibration makes Yuasa the most reliable battery on the market today

Yuasa High Performance Maintenance Free VRLA Batteries fit:

YTX14AH-BS – 60+ applications including motorcycles, utility vehicles, ATVs, snowmobiles and riding mowers. (Upgrade for YB14-A2, YB14-B2, YB14A-A1, YB14A-A2)

YTX14AHL-BS – 120+ applications including motorcycles, ATVs, snowmobiles and riding mowers. (Upgrade for YB14L-A2, YB14L-B2, 12N14-3A)

YTX20CH-BS – 9+ applications including motorcycles and ATVs. (Upgrade for YTX16-BS)

YTX20H-BS – 10+ applications including motorcycles, personal watercraft and riding mowers. (Upgrade for YTX20-BS)

YTX20HL-BS – 55+ applications including motorcycles, utility vehicles, ATVs, personal watercraft and riding mowers. (Upgrade for YTX20L-BS)

YTX20HL-BS-PW – 30+ applications including utility vehicles, ATVs and personal watercraft, ATVs. (Upgrade for YB16CL-B)

YTX24HL-BS – 45+ applications including motorcycles, ATVs, snowmobiles and riding mowers. (Upgrade for 50-N18L-A, Y50-N18L-A3, Y50-N18L-A-CX, SY50-N18L-AT)

Maintenance Free VRLA

Sealed VRLA (Valve Regulated Lead Acid) means a battery that's perfect for people who have better things to do than battery maintenance! Our permanently sealed VRLA battery never needs refilling; however, it still needs periodic charging. Ideal for motorcycles, scooters, ATVs, riding mowers and personal watercraft.

- Spill-proof design means virtually no possibility of leaks
- Advanced lead-calcium technology pumps up starting power
- Sulfation retardant dramatically reduces battery-killing plate sulfation
- And, sealed VRLA batteries hold voltage longer and need less charging in standby or storage mode
- Selected types also available in Factory Activated (filled, sealed and charged at the factory)

NP Series Batteries

Yuasa NP Series batteries are the culmination of over seven decades of battery manufacturing experience, offering:

- High energy density
- Sealed leak proof construction
- Excellent performance in either float or cyclic applications
- Maintenance free
- Rechargeable, lead acid battery
- Long service life

Drive Chains

Silent Chain 11 Plates Wide

Silent Chain 13 Plates Wide

Silent Chain 15 Plates Wide

Replaces OEM chain used on Arctic Cat, Bombardier (Ski-Doo), John Deere, Kawasaki, Polaris, Sno-Jet and Yamaha.
Count the number of pins in the chain to determine the length needed.
Note: *Check clearance in chain case when upgrading to a heavier chain, and change sprockets to match chain.*

KIMPEX

Three simple rules for studding your track

This is your responsibility
Before you buy any stud, check very carefully to make sure your track is tensioned properly and that you have the necessary clearance between your track and your tunnel or heat exchanger.

1. The right number of studs in the right places will give you best traction.
Too few studs will slip; too many stud's will keep the points from digging in and the sled will float, instead of hooking up.

2. Place studs where the pressure is concentrated.
On the edge of the tracks for turns, in the center of the track for acceleration and braking. Place the studs near to, but not interfering with, the suspension.

3. Take the time and care to lay out your stud pattern carefully.
The illustrations show a simple wedge or arrow pattern, the only difference is that one has fewer studs than the other. Note, both patterns are repeated many times, but are always the same. You can use any repetitive pattern you choose, such as a diagonal or zigzag pattern, but make sure that you take the time to lay it out for maximum effectiveness. Also, avoid repeating the "scratch lines" as much as possible.

Note: *If you stud your track, you should also add a pair of Kimpex® quality carbide runners to the skis. This will allow you to maintain the safe and sure steering control you need to complement your studded track.*

Warranty
All products are warranted against defects in workmanship and materials only. No further warranty is intended or implied. Defective parts may be returned for repair only. Replacement with new products is at the discretion of the seller. No credit will be allowed on parts that have been obviously abused.

Deptn of Penetration

Not Effective Not Recommended

We recommend the following for your application:

- 1/4" penetration for added safety on icy surfaces, or when using reduced stud quantities
- 3/8" penetration for trail performance and excellent grip in all conditions
- 1/2" penetration for the advanced needs of racing only. Not recommended for typical trail riding

DuPont™ Slide Runners w/Vespel®

- DuPont Vespel® material inserts
- Space-age polymer/composite material, that is stronger than hardened steel, aluminum, or even titanium
- 15T scale Rockwell hardness of about 80 (UHMW slide runner hardness rating is about R64)
- Capable of withstanding extreme friction and heat environments
- Pieces are placed at a 30-degree angle across the entire slider for constant contact and even wear
- Made using compression moulding process
- Lightweight, yet strong
- Partially made with current UHMW plastic slide runner material
- Sold individually

Ice Scratchers

ICE SCRATCHER

Ice Scratchers

For use especially in wooded areas or on packed and icy snow, the ice scratchers produce ice fragments which become embedded in the tracked vehicle and help cool the tracks.

BETWEEN THE LINES Designs

Duraflex Ice Scratchers

- Comes standard with carbide tips
- Ultimate engine cooling and slider lube
- Unmatched performance and weight
- Works with all reverse and non-reverse gear equipped snowmobiles
- Pre-assembled for one-bolt mounting
- Virtually indestructible zinc-plated wire rope for increased down pressure and no coating to crack and peel
- Improved crimps for greater hold
- Hooks and stays on rails when not in use
- Knurled mounting surface eliminates spinning and loosening on the slide rail

KIMPEX IS THE ONLY DISTRIBUTOR THAT OFFERS THIS KIND OF BRAKES !

CERAMIC BRAKE PAD

DUST FREE / BRAKE IMPROVEMENT / DURABILITY

PAD PURPOSE

The purpose of any brake pad is to push or squeeze against the brake drum or disc to slow it down. Softer brake pads "bite" into the rotor and stop better but tend to wear out faster.

STOPPING POWER

The stopping power of ceramic and metallic pads varies by temperature. Ceramic pads tend to stop better when very hot and metallic operate better in the cooler range.

FADE RESISTANCE

A ceramic pad's strongest point is its ability to resist "brake fade", or the tendency to lose performance during repeated use and subsequent heating.

WEAR

Though both pads tend to wear at similar rates, the ceramic's softer material surface helps prevent damage to metal rotors.

NOISE AND DUST

Ceramic pads vibrate at a higher frequency than the human ear can detect, and thus appear quieter in operation than metallic. Also, ceramic pads don't cause the black "brake dust" deposits like metallic pads.

Kimpex Windshields

All Kimpex Windshield are made of Optical Grade Polycarbonate which is the same material used as original equipment.

To help you find the appropriate windshield, we have incorporated the heights for all the windshields available, under the column Height on the following pages. The height of our KIMPEX windshield is measured from the side of the windshield, starting at its base to its highest point on a vertical line.

STEALTH by KIMPEX

ERGONOMIC HANDLE

Design of the handle allying style and ergonomics, facilitating the grip.

WIDE SKI BLADE

The ski has a width of 7", allowing a better lift.

INNOVATIVE DESIGN WITHOUT KEEL

The unique design of the blade without keel prevents the darting and allows him to erase all traces of its passage, leaving the trail in perfect condition.

DOUBLE RUNNER SKI

Without keels, equipped with two smooth 2"thick with 7.5" carbide wide 90°, providing better control in turns and on ice.

DRIVE WITHOUT DARTING OR LEAVING A TRACE

Kimpex breaks new ground once again in the world of snowmobiling. This totally new ski glides in the snow, not on the snow, without leaving a trace. Curved and with no central fin, its special ski base removes all trace of the blade to keep from inconveniencing the snowmobile following behind. Kimpex has brilliantly created this unique characteristic that lets you follow a snowmobile equipped with the same skis, and not constantly fall into its tracks.

Retractable Wheel Systems

KIMPEX ROUSKI

Rouski Gen3

Have a look on the main benefits of the Rouski retractable wheels:

- Protects garage and driveway pavement
- Makes the travel to the restaurant or the gas station easier
- Makes it easier to drive the snowmobile back in the trailer
- Allow you to take teh ferry
- Safe riding on bridges and roads
- Make driving easier, especially while cornering or driving on hard surfaces
- Minimizes wear on guide rails and skis
- Works as well when you drive forward than when you drive in reverse
- No modification on the snowmobile's original parts

A well thought out mechanism...

- Rouski automatically retracts on snow-covered trail
- In just a few secondes, you can engage the Rouski mechanism and keep on riding

PISTONS HIGH PERFORMANCE

New Dual Ring Pistons

- High-performance, long life pistons
- Engineered to provide the best possible path for combustion chamber heat transfer to cylinder walls
- PTFE coated to create the least amount of friction during the break-in period
- All our pistons, wrist pins and circlips are manufactured to the original OEM specifications
- Our kits include: piston, ring(s), wrist pins and circlips

All our Kimpex pistons and piston kits are covered by a limited three-years warranty.

For greater reliability!

Pistons and Rings Installation Guide
The following guide is intented for experienced mechanics and should not be the only reference for installing a new piston.

Kimpex Snowmobile Pistons
High performance, long life. Die-cast models available. Engineered to provide the best possible path for combustion chamber heat transfer to cylinder walls PTFE coating.

Piston kit includes: Piston, Rings, Pin and Circlips.
All pistons, rings, pins and circlips are manufactured to O.E.M. specifications.
All individual components will interchange with original parts. Important Note:
Chrome plated rings cannot be used in chrome plated or electrofusion liners.

Preliminary Work
- If the old piston has failed, determine the cause and remedy the problem before replacing.
- Air leaks and/or a lean fuel mixture are the two biggest causes of burned pistons.
- In cases where any part of the old piston is broken or burned through, the crankcase should be disassembled and thoroughly flushed of any debris.

Cylinder Preparation - Cast Iron Liners
- Measure cylinder for taper and out-of-roundness. Any measured difference of more than .003" (smallest cylinder diameter to largest) would indicate re-boring is necessary.
- Hone good condition cylinder with #220 or 300 grit stones to de-glaze. A 60° cross-hatch pattern is the recommended finish to insure proper ring sealing.

Cylinder Preparation- Chrome, Nikasil or Electrofusion Liners
- Measure cylinder for taper and out-of-roundness. These models cannot be re-bored; if a measured difference of more than .003" exists between smallest and largest cylinder diameter, the cylinder must be replaced or sleeved with a cast iron liner. Hone good condition cylinder with #500 grit stones.

Port Opening Preparation
- To prevent ring breakage, all horizontal port edges must be chamfered until a minimum 3/64" radius is produced. The best method is to pull strips of emery cloth through the ports or use a round file.

Piston and Ring Installation
- Remember never install chrome rings in chrome plated, nikasil or electrofusion cylinders.
- Prior to installation, fit each ring into the cylinder bore and measure the end gap to eliminate the chance of ring butting. Acceptable gap range is .010 to .025. If gap is inadequate, carefully file to the recommended specs. See "Piston Clearance Guide". Clean and lubricate all moving parts with 10W30 oil.
- Install pistons with the arrow pointing to the exhaust side of the engine (except for few models Polaris where the arrow points toward the magneto side).
- Install circlips carefully without forcing, bending or turning them. Be sure they seat properly in the grooves and position the openings down.
- Install rings onto matching pistons. Lubricate and check to be sure the end gaps can be completely closed around the locating pins.
- Install new base gaskets, compress rings and carefully slide the cylinders down into position. Before installing the cylinder heads, rotate the crankshaft by hand to make sure pistons and rings move freely into cylinder.

Break-in Procedure
- Overhauled snowmobile engines require a short break-in period. For oil-injected machines, add a pint of 50:1 two-cycle engine oil to the first 5 gallons, running the pre-mix in conjunction with the oil injection system. For pre-mix systems, use 20:1 oil ratio with the first 5 gallons of mix.
- For good engine break-in, set carburetor to rich mixture, avoid sustained high or low RPM operation, vary the driving speed and briefly accelerate at full throttle.

Piston Clearance
- Refer to shop manual or dealer for clearance references.
