The wait is over. You've been asking for it, we made it. The Quest Dual Sport helmet is now part of the CKX helmet line up. Keep your off road look with the advantages of a full face helmet. Wear it no matter the conditions. No more dirt, wind and rain in your helmet. Want some fresh air? Take the visor off and wear the Quest as a regular off road helmet, with goggles.

Off-Road Modular
TITAN AIR FLOW

The removable muzzle technology offers numerous new opportunities in this class of helmet. Operated with only one finger, using a sturdy, cleverly designed mechanism, this quick release system is ergonomic and very easy to use. The muzzle can be opened or removed from the helmet, at any time to offer a better control on aeration. Using this new technology, the rider can control his way of breathing and communicating much more easily with the helmet on.

TECHNICAL FEATURES

TITAN	Removable muzzle to free the rider
SHELL	Fiberglass composite constructed shells 2 shell sizes (XS to L / XL to 3XL) 4 EPS sizes
LINING	Removable and washable Glasses friendly
AERATION / VENTILATION	Maximum ventilation Adjustable front vent
GOGGLES	210° goggle Superior field of view specifically designed for this helmet.
PEAK	Aerodynamic peak designed to protect you against the elements
CERTIFICATION	Meet or exceed ECE 22.05 standard
WEIGHT	1450 ± 50 g
COMMUNICATION SYSTEM	Removable GoPro compatible camera mount Ready to receive earphones
ATTACHMENT SYSTEM	ProClip™ quick release mechanism

CKX HELMET SIZING CHART

For maximum safety, it is important that your helmet fits you properly. It should be snug and comfortable. It must not be so large that it moves freely around your head, nor so small that it constricts and causes pain. A helmet that is too large may slide down over your eyes, or turn in a lateral direction due to movement during riding. Always secure the chin strap tightly to keep your helmet firmly in place whenever you ride.

USE THIS CHART ONLY AS A GUIDELINE FOR FITTING HELMETS. VISIT YOUR CKX/KIMPEX DEALER TO ENSURE A PROPERLY FITTING HELMET.

INSTRUCTIONS: MEASURE THE CIRCUMFERENCE OF YOUR HEAD, ONE INCH ABOVE THE EYEBROWS AND THE EARS, THEN REFER TO THE FOLLOWING CHART.

EXAMPLE: IF MEASURING TAPE READS 23 INCHES (METRIC CONVERSION: 60 CM), THE PROPER HELMET SIZE WOULD BE "LARGE".

ADULT

CIRCUMFERENCE (INCH)	CIRCUMFERENCE (METRIC)	HELMET SIZE	HAT SIZE (INCH)
20 - 20 ½	51 - 52	2XS	6 ⅝ - 6 ½

GOGGLES

THE 210° GOGGLES ARE UNQUESTIONABLY ONE OF THE TITAN'S FLAGSHIP FEATURES.

Goggles comfort is provided by a customized foam specially fitted to the helmet, ensuring an excellent seal. The goggles can be perfectly adjusted by using two semi-flexible fastening devices. They also offer the widest field of vision for this class of goggles. To achieve this unmatched feature, our designers created the largest pre-curved polycarbonate lens ever developed, mounted on a polyurethane frame.

LS2
HELMETS

// TECHNOLOGY

CARBON FIBER

LS2 uses multiple layers of our exclusive wide-weave carbon fiber for a very light, but strong shell that handles impacts while dispersing energy for a safer ride.

HIGH PERFORMANCE FIBERGLASS COMPOSITE (HPFC)

LS2 carefully layers a blend of a unique fiberglass weave and organic resin into a strong, ultra-lightweight, but rigid shell that accepts an impact while dispersing energy for a safer ride.

KINETIC POLYMER ALLOY (KPA)

A proprietary blend of polycarbonate, space age thermoplastics and additional materials specifically formulated by LS2, KPA offers ultra-lightweight and high penetration resistance, but with some flexibility for the ultimate in energy dispersion. This special formula meets or exceeds both ECE 22.05 and DOT requirements.

HIGH PRESSURE THERMOPLASTIC TECHNOLOGY (HPTT)

A proprietary blend of polycarbonate, ABS and other high performance polymers developed by the engineering team at LS2. LS2 uses only new (not recycled) raw materials in our products. HPTT offers superior strength, energy absorbing flexibility and energy dispersion, making it an excellent choice for the outer shell on a motorcycle safety helmet.

THE WORLD'S BRAVEST HELMET.

Ask a motorcyclist about the "best helmet" in the world, and invariably you will hear a very short list of names. This is an elite club that is the dream of every brand in the world. It is a challenge worthy of the fight and LS2 has entered the arena. We are proud to introduce the Challenger. Fit. Finish. Function. Performance. The challenger will face the competition head-to-head and feature-for-feature. Bold. Unafraid. The game has changed. Always Ahead.

// MODULAR HELMET

// VORTEX

1300g ± 50g

A PARADIGM SHIFT IN MODULAR HELMET DESIGN.

Vortex, the new incredible modular helmet for 2018 aims at truly leading from the front. (Always Ahead) Rugged, yet stylish, the new Vortex offers an extremely lightweight, small profile shell that promotes all-day comfort. The shell is 100% Carbon Fiber, the same used extensively in the aeronautical industry, Formula 1 and MotoGP. Don't get caught in the wake.

// OPEN FACE HELMET

// SPITFIRE

1000g ± 50g

FOR FREE SPIRITS.

The LS2 Spitfire – a modern take on a classic, bobber, ¾ open face helmet design. The Spitfire starts with a lightweight shell. Add a built-in, drop down sun shield. Build the rich comfort padding out of hypoallergenic, breathable materials, and add a built-in ventilation system to allow fresh air to pass through the material, keeping you cool and dry. Our 3D laser cut offers the perfect fit, with no hot spots, for all day comfort. Finish it off with a DOT approved quick release chinstrap and you have a modern, comfortable helmet with the retro style you love. Meets or exceeds DOT standards. Long oval fit.

// HALF HELMET

// REBELLION

950g ± 50g

Rebels make their own destiny and the LS2 Rebellion is a motorcycle half helmet that stands alone, charting its own course, just like you. We set out to revolutionize the half helmet market. We started with a stylish shell made of our high performance, lightweight Kinetic Polymer Alloy (KPA). It has just the right blend of retro-cool with a technical edge. Imagine a half-shell motorcycle helmet that offers flow-through, ported ventilation to keep you cool on the hottest of days. The short peak and Twin Shield System drop down sunscreen will protect your eyes when the sun is in the horizon. The sun shield itself has a unique, two-stage adjustability: lock it ½ way for just a little shade, or full open for total sun protection. It's called "Freedom of choice." Our dual-density EPS meets or exceeds DOT standards. Finish it off with a DOT approved micrometric, quick release chin-strap, and you have all the convenience and comfort of a traditional motorcycle half helmet, but with the technology of the future.

// OFF-ROAD HELMET

// SUBVERTER

TOP LEVEL OFF-ROAD PERFORMANCE.

In the wild world of the motocross helmets, a new star is born today: its name is Subverter. 'Nomen omen' Latin stated, and the new off-road model of the LS2 range represents the perfect expression of the name thanks to its extreme and absolute innovating specifics looking to comfort, safety and look. Made with the ultra-light KPA, the new Subverter is offering, above all, a security sliding structure with a double injection of EPS, to guarantee an exceptional protection on impacts. Subverter is ready to fight for new big and dusty challenges on the head of the motocross riders all over the world!

A

// AR5

Driven by a passion for creating a higher standard, the AR-5 helmet by Answer Racing brings an unparalleled step forward in safety and value. Never before has a fiberglass helmet been equipped with MIPS technology at such an affordable price. Developed by brain surgeons and scientists to reduce forces on the brain, MIPS has

revolutionized the way we think about helmet safety. By adding a low-friction layer between the helmet and head, MIPS helps to reduce rotational forces on the brain that can occur during angled impacts to the head. A refined interior features Cool-Core® technology that aids in evaporative cooling, a dual-density EPS liner that offers superior impact absorption and removable/washable cheek pads and helmet liner.

POLYCARBONATE

- Lightweight, premium, fiberglass shell
- Removable, washable, and replaceable Coolmax™ moisture wicking liner
- Dual-density EPS liner
- Two shell sizes and 4 EPS liners for precise fit
- Meets or exceeds ECE 22.05 and DOT certified
- Multiple intake and exhaust ports to keep you cool

// OFF-ROAD HELMET

// AR3

Style and performance combine with safety in the all-new Answer Racing AR3 helmet. DOT and ECE certified, comfort is addressed with our intermediate-oval shell shape and uses top-of-the-line Cool-Core® evaporative cooling in the interior.

Cool-Core® wicks away perspiration and dries faster than non-treated materials, plus it is anti-microbial to help eliminate odors between washes. The shell design features exceptional venting, a strengthened chin bar and large eye port that accommodates most goggles, including over the glasses types.

POLYCARBONATE

- Made of injection molded polycarbonate
- Sculptured, dual density, EPS impact absorbing liner
- SilverCool moisture wicking liner is removable for washing
- SilverCool padding also reduces odor and is anti-microbial
- 9 intake and exhaust vents help keep you cool
- 4 eyebrow vents help evaporate sweat before it drips into eyes
- Wire mesh chinbar vent has foam filter
- Flexible rubber nose/cheek piece to help deflect roost
- Meets or exceeds the ECE 22-05 & D.O.T. FMVSS 218 safety standard

// OFF-ROAD HELMET

// AR1

The Answer Racing AR1 helmet is our best value helmet ever, all while passing two of the toughest safety standards by exceeding DOT and ECE . A dual-density EPS liner helps to absorb both large and small impacts while a highly developed ventilation system consisting of two large intake ports and four large exhaust ports help keep you cool in the hottest conditions.

ABS

- Shell made of injection molded Acrylonitrile Butadiene Styrene (ABS)
- Sculptured, dual density, EPS impact absorbing liner
- Removable/washable liner is made with moisture wicking fabrics
- Flexible rubber nose piece helps deflect roost
- Two large front air intakes and four rear exhaust vents help keep you cool
- Weighs 3.15 lbs / 1428 grams (size large)
- Meets or exceeds the ECE 22-05 & D.O.T. FMVSS 218 safety standard

// COMMUNICATION SYSTEM

MOTION SERIES BLUETOOTH HELMET AUDIO SYSTEM

The UCLEAR Motion Series is based on direct feedback from riders, dealers, and industry experts to be the most advanced, easiest to use, most durable, most portable, best sounding, longest lasting and weatherproof comm systems, ever. It's bleeding-edge tech made simple to use, then ruggedized. With an industry-first motion sensor, you no longer need to press any buttons to perform simple functions such as pause/play, volume, etc. Enhance your rides with UCLEAR's patented DynaMESH intercom, powerful music, or crystal clear phone calls on any trail, in any weather, on any helmet.

MOTION SERIES TECHNOLOGY

The revolutionary **USAFE** uses an advanced accelerometer to detect and measure hard impacts. If you are unresponsive, **USAFE** can alert your contacts of your situation and GPS location. Requires a connected GPS enabled mobile device.

Exclusive **GESTURE CONTROL** sends out a sensor beam from your MOTION unit allowing simple hand gestures to command the most common features such as volume and pause/restart music without touching the actual control unit. Winter gloves? No problem!

UPrompt: Voice confirmations of user inputs.

UMOVE: Exclusive motion sensor powers your Motion Series unit on and off. Motion is on by the time you put on your helmet, and automatically shuts your Motion off if you forget.

DYNAMESH: The first ever mesh intercom network combined with Multi-Hop automatic switching. **DYNAMESH** pairs with mesh and non-mesh units, and auto-reorganizes as group riders change positions. This ensures stable and constant connections over the longest distances allowed by the FCC.

UCommand: Control your Motion Series unit by natural voice connected through Apple Siri or Google Voice. Speech engine accuracy constantly updates through the cloud.

U-Pair allows universal device pairing to multiple Bluetooth devices at once. Smart phones, smart watches, tablets, GPS, action cams, OEM systems, and competitors' comm systems.

1-touch access to most commonly used advanced features such as group intercom pairing, voice commands, or quick access to Apple Siri or Google Voice. It's E-Z!

Advanced features, preference settings, support, and our exclusive wireless firmware updates. Music sharing, music + intercom overlay, noise cancellation settings, etc.

BOOST 2.0 DROP-IN SPEAKER

New replacement speakers compatible with HBC & AMP Series controllers. Outstanding sound and clean voice transmission from dual integrates mics, and excellent durability. Boost 2.0 Speaker/Mic Kit installs in seconds in full face or modular helmets. *Includes speaker mounting rounds.

PART NO.	DESCRIPTION	CODE
024547	Speaker Boost 2.0 w/Mic	C

PULSE PRO 2.0 DROP-IN SPEAKER

Want more power? Our Pulse Pro speakers deliver the ultimate audio experience for audiophiles who also happen to ride. Our 40mm premium drivers offer the cleanest bass and truest mids in the industry- period. Tiny BOOMLESS dual mics hide under the liner (above the eyes or behind cheek pads) to deliver excellent voice transmission quality. Drop them into any full face, modular, ¾ or moto helmet and turn up the thump! *Includes speaker mounting kit.

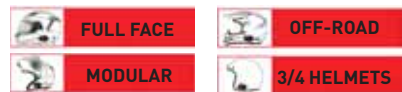

PART NO.	DESCRIPTION	CODE
024577	Speaker Pulse Pro 2.0 w/Mic	C

HD SPEAKERS

Extreme bass and clean sound for those who want a premium wired helmet speaker which plugs into their audio device with a 3.5mm jack. Also serves as a speaker upgrade for most competing comm systems with 3.5mm jacks. The 3ft extension reaches from your helmet to your device, but breaks away when you remove your helmet or need a short cord for use with competing comm systems. *Includes speaker mounting kit.

PART NO.	DESCRIPTION	CODE
024229	HD Speakers	C

HALF HELMET EARBUDS FOR MOTION SERIES CONTROLLERS

UCLEAR's Earbud accessory lets riders enjoy all the benefits of their UCLEAR system with half helmets that do not have traditional speaker pockets covering the ears. Works with any half helmet including motor sports, outdoor sports, and even hard hats! Dual in-line mics install in the helmet liner; only the earbud tips dangle to your ears. 4 sets of standard earbud tips are included. Compatible with MOTION Series controllers (USB-C).

PART NO.	DESCRIPTION	CODE
024599	Half Helmet Earbuds for MOTION Series controllers	C

SENA COMMUNICATION SYSTEM

The system allows you to pair 2 phones at the same time and charges with the supplied Micro-USB cable. (Any USB port will charge it). It features SENA's proprietary Digital Signal Processing, (DSP) for noise cancellation.

To let you know the device is turned on or off, the device has voice prompts for "hello" and "goodbye". The IRP device manager allows you to upgrade the firmware and configure the device settings directly from your PC by downloading the LS2 interface, which is both Windows and Mac compatible. Using this software, you can assign speed dial presets and more.

This unit can be paired with up to 3 other SENA intercoms on a 1 to 1 basis (total 4 units including yours), with a range of approximately 400 meters. You can even share your music with your intercom partner. Additionally, this system also supports the Universal Intercom Function. This means you can intercom with a non-SENA Bluetooth system using the IRP if the other system supports Hands-Free Profile (HFP).

Can pair to two cell phones at one time

- Internal 3 way intercom support
- Digital signal processing noise cancellation
- Can be connected to non-Sena intercom if other system supports HFP
- Integrated fit for LS2 Vector, Metro, Breaker, Citation and Infinity

100% MECHANICAL PERSONAL AIRBAG

THE HELITE SYSTEM HAS BEEN TESTED BY INDEPENDENT LABS, UNIVERSITIES, AND CERTIFICATION AUTHORITIES. THE SYSTEM HAS CONSISTENTLY EMERGED AS THE BEST PERFORMING PERSONAL AIRBAG AVAILABLE. WITH DEPLOYMENT TIMES UNDER 100MS, HELITE PROTECTS QUICKER THAN ANY OTHER MECHANICALLY TRIGGERED AIRBAG.

TURTLE TECHNOLOGY

IN THE EVENT OF AN ACCIDENT, THE AIRBAG DEPLOYS UTILIZING A 100% MECHANICAL TRIGGER. THIS RESULTS IN MAXIMUM RELIABILITY WITH NO MAINTENANCE. HELITE USES ELECTRONIC SYSTEMS IN OTHER INDUSTRIES, BUT FOR MOTORCYCLE RIDING USE WE KNOW THAT THE MECHANICAL TRIGGER IS THE MOST RELIABLE AND EASY TO USE. UPON ACTIVATION, A SPRING LOADED PISTON PIERCES THE CO2 CARTRIDGE AND RAPIDLY INFLATES THE AIRBAG AROUND THE NECK AND BODY. THE AIR CHAMBERS ARE DESIGNED TO STABILIZE THE NECK, SPINE AND TORSO AND REDUCE THE FORCE OF IMPACTS TO VITAL ORGANS.

THE TURTLE TECHNOLOGY IS A BREAKTHROUGH INNOVATION THAT SIGNIFICANTLY IMPROVES ENERGY ABSORPTION ESPECIALLY OF SHARP OR INTRUDING OBJECTS THAT WOULD OTHERWISE DAMAGE THE BAGS OF AIR.

XENA AIRBAG VEST

Helite's women's leather airbag jacket is here! The Xena appeals to all women who want to combine style and safety while riding motorcycles. This timeless airbag jacket can be worn by everyone and anyone thanks to the stretchy leather side panels which also guarantees maximum comfort. The perfect feminine fit emphasizes your silhouette while integrating Helite's patented Turtle technology for an optimal protection.

- Elbow and shoulder protectors are integrated in our leather jacket as well as SAS-TEC back protector Level 2 for the "TURTLE effect".
- Insulation Liner Removable thermal lining, 100% Polyester (color: bordeaux) to ride your bike all year round.
- Adjusted and comfortable cut Stretchy leather on sides and at the bottom of the back ensure a fitted cut and a high comfort.
- Stretchy and breathable fabric under the arms for a great mobility.
- Hip size adjustable with hook and loop fastener.
- Pockets 2 outside pockets, 2 inside pockets (classic + smartphone).
- Quick and easy replacement of the CO² Cartridge. It is nicely hidden in a pocket for more aesthetic.
- In the event of an accident the airbag deploys in under 100ms
- Helite airbags are mechanical to avoid unexpected airbag activation and changing batteries. No special tools or technical knowledge are required to install the lanyard on the motorcycle.
- Certification CE certification - Xena is certified by the external laboratory CRITT Sport, the French specialist for objectively testing Personal Protective Equipment (PPE).

TURTLE2 AIRBAG VEST

The Turtle 2 is known for its discrete look. It matches to any outfit and makes the extra protection as unobtrusive as possible. Retro-reflective stripes on the back guarantee the rider a high visibility on the road at night or in bad weather conditions. The CO² cartridge is nicely hidden in a pocket. Due to generous adjustment straps the Turtle 2 fits easily over any motorcycle jacket while ensuring a high comfort.

Adjustable

Three adjustment straps to fit the vest nicely over any motorcycle gear. Resistant fastening clips to sustain many inflations. Easy to open and close even with gloves.

Retro-reflective

We added small retro-reflective parts for night visibility at the back to provide a discrete and strong protection.

Ventilated textile and high comfort

Interior textile 3D mesh for maximum air circulation. We have a very low cut underarm to keep a full freedom of movement. On this new version, we chose a soft neoprene collar for a better comfort around the neck.

Convenient

1 exterior pocket for small objects (bank card, cash, highway badge, etc.).

CUSTOM VEST (HARLEY STYLE)

You want to boost your safety and keep your style? Our custom vest is made for you! By stitching your patches you can even give the vest your own individual look! Custom guarantees a full freedom of movement and a maximum of comfort. For an optimal protection it integrates the Turtle Technology. You don't have to make anymore compromises.

Airbag

Offers a full protection: back, neck, spine, chest, ribs, pelvis, abdomen, etc. 18L of gas protection for an optimal pressure. Fast inflation time 100 ms. A stretchy fabric is positioned on top of the back to optimize the protection of the neck (nicely hidden by a hook and loop fastener).

Excellent protection with TURTLE technology

The airbag is located under the back protector (SAS-TEC level 2). This innovation is a very big protection improvement for the back. The results of absorption and distribution of shocks is considerably higher and it protects from intruding objects.

Leather of high quality

Black leather of high quality (cow hide 1,2 mm).

Pockets

3 outside pockets, 2 inside pockets (classic + smartphone).

Reconditioning

Quick and easy replacement of the CO² cartridge.

Mechanical trigger system

Helite airbags are mechanical to avoid unexpected airbag activation and changing batteries. No special tools or technical knowledge are required to install the lanyard on the motorcycle.

Certification CE

Custom is certified by the external laboratory CRITT Sport, the French specialist for objectively testing Personal Protective Equipment (PPE).

RACING AIRBAG VEST

The Racing Airbag Vest was specifically designed for backcountry rides. Emphasis was put on aerodynamics, with a comfort fit and enough room for the bulge of the motorcyclist suit. For increased safety, the vest is made of abrasion-resistant materials and provides front and back protection for a double "Turtle effect"!

RECONDITIONING

Quick and easy replacement of the CO² cartridge.
It is nicely hidden in a pocket for more aesthetics.

CO² CARTRIDGE

Helite offers 3 different CO² cartridge sizes to adapt proportionally to the body size. CO² Gas is not dangerous (it's used for extinguishing fires) and easy to handle. Therefore, after airbag activation, the final client can easily reactivate the system on his own.

CO ² CARTRIDGE	50 CC	60 CC	100 CC
Recommended Size	Child S & M	Child L	
	Adult S to XXXL		Adult L to XXXL
Weight	150-155g	180-185g	295-305g

**The CO² cartridge doesn't have any expiration date. But it should be replaced if there is any deterioration or rust. We do recommend you to check the CO² cartridge every year for more security by weighing the cartridge and making sure the weight indicated on the scale corresponds to the weight written on the cartridge. The weight difference should not be higher than +/-3g; if the weight difference is higher the cartridge should be replaced.*

MECHANICAL TRIGGER SYSTEM

Helite airbags are mechanical to avoid unexpected airbag activation and changing batteries. No special tools or technical knowledge are required to install the lanyard on the motorcycle.

LANYARD

The Helite motorcycle lanyard is standard for all motorcycle products. This is an advantage for motorcyclists that have several motorcycles. They can own several lanyards, to avoid installation every time.

WAX REPROOFER

Stain free, silicone free proofer for wax cotton garments. Quickly and conveniently restore your wax jacket's waterproofing.

Benefits:

- Suitable for all colours of waxed cotton
- Easy to use
- Quick top-up application

PART NO.	DESCRIPTION	CODE
371330	Wax reproofer - 250ml	C

RAIN SEAL

- Waterproofs and protects virtually any fabric, especially polyester, cotton and nylon
- Rain droplets simply bead-up and run off the fabric surface and away from seams
- Forms an invisible barrier and protects against water, dirt, oil and bird droppings
- UV inhibitors give protection against the sun's harmful rays
- Re-apply every 6 months
- Can be used on clothing, outdoor covers, luggage, tents, carpets, etc.
- More environmentally friendly than silicon-based products and gives better long term protection

PART NO.	DESCRIPTION	CODE
369370	Rain Seal Waterproofing 500 ML	C

// OXFORD LAYERS

I-TIE FACEMASKS

Schampa's "FaceFit" System is a revolutionary concept that helps hold masks in place, and helps to reduce fogging of eyewear. Simply put the Mask or balaclava on, push down on the "FaceFit" System and now you have a mask that perfectly forms to the unique contour of your face. With the I-Tie system you have more control that ever to adjust it to that perfect fit for your face every time you put it on.

- One Size Fits All
- Contours to your Face
- Excellent in any Conditions
- "Tru-Fit" FaceFit Facemasks work with any helmet or no helmet.
- Unique Mesh Panel helps reduce Cold, Dust, Sun, Dirt, or Sand from entering the mouth or nose.

// COVERT RANGE FOR MEN

The Covert range is the latest development for motorcycle protection by Bull-it, incorporating Covtec yarns into the denim structure itself, and Covtec "LITE" reinforcement in the seat, hip and knees. The Covert Range is the ultimate high performance (AAA Rated EN17092) riding jean.

Ideal for all seasons riding, the Covert is constructed of a 75KPH rated outer denim shell and reinforced throughout zone 1 with Covtec "LITE" (120KPH).

The Covert range is also supplied with CE Level 2 hip and knee armours, offering the highest level on impact protection and to finish a shower repellent coating.

High performance, Lightweight design, Zero compromise.

COVERT JEANS - STRAIGHT

- AAA rated protection.
- High performance cut and tear strength, AAA abrasion resistance
- Lower thermal conductivity reduces chances of friction burns
- CE 1621 Level 2 hip and knee as standard
- Traditional 5 pocket jean design
- Shower resistant finish
- Flat Bull-it logo rivets and buttons at the front and YKK Zips

ESD | motion 3

Multiple-pieces integrated articulation system to provide additional ankle support. Rear-button quick un-locking system for increased foot movement. Extended heel protector with shock absorbing wedge.

ESD | motion 3

Multiple-pieces integrated security skeleton to support movements of foot. Integrated P.U. heat-shield. Reinforced arch support.

D30

D30™ IMPACT PROTECTION developed in Winter-sports and Military industry is first applied to motorcycle boots by FALCO. D30™ intelligent molecules™ flow freely when moving slowly but in case of shock lock together to absorb impact energy. Impact force transmitted to ankle-foot area is significantly reduced thanks to D30™ exclusive support.

TECH TOE

Innovative Falco one-piece moulded protection integrating toe-fingers shield, gear change pad and "Alu-Zinc" slider.

ALL-AROUND CHASSIS

One-piece moulded chassis for increased protection and durability. Impact dampening EVA midsole. Double-compound high-gripping sole.

AJR-TECH

Lining featuring superior performing characteristics and is structurally developed to be extremely breathable, anti-bacterial, quick drying and environment friendly.

HIGH-TEX

Falco membrane resistant to water penetration. The only scientific test to determine, define and indicate whether a motorcycle boot is waterproof is the test required by the regulations EN 13634: 2010. The testing method consists of walk of 100 steps on a suitable platform with water level 5mm above the sole. At the successful completion of this test the boot is considered waterproof.

ACF | men ACF | women

Craft constructive system of the boot around the last reproducing men's or women's foot anatomy. This technique allows to reach a higher level of comfort, to extend utilization time and to match different riding conditions.

VIBRAM

World's leading brand in rubber outsoles destined to fashion and sports industry. Vibram products provide quality, performance and safety matching innovative design and unique compounds specifically developed for the various disciplines of motorcycle use.

// KNEE BRACES

ULTRA CELL 2.0

The Ultra Cell™ Knee Protection System is design with several patented revolutionary design concepts come together in unison to create this System. The A.R.C. Cuff's ability to be totally adjustable for fit, yet remain rigid, along with a superior fastening design in partnership with Boa® Technologies, a natural free-motion, rolling-gliding hinge, tibial plateau-capturing frame design, brace-to-boot tether attachment, and a full time-full coverage patella cup, sets this knee brace decades ahead of all the rest.

- Anatomically correct design frame
- Carbon fiber epoxy matrix for rigidity & lightweight
- Asymmetrical design allows each hinge to set properly
- Allows for automatic tibia alignment of lower frame
- Adjustable retention control cuff
- Inverted adjustment increases lateral rigidity
- Thermo-Formed EV50 shock absorbent foam padding and easy cleaning
- Transfers forces of a lower leg rotation
- Boa® closure system provides smooth even closure and no pressure points
- Quick release tabs
- Telescoping three piece design and easily removable
- Water resistant
- Slimmer feel, quick-release buckles, extra padding, vented rear liner
- Replacement parts also available

THE CELL - KNEE PROTECTION

The Cell™ Knee Protection System is built on more than 10+ years of time-tested and proven designs. Several patented revolutionary design concepts come together in unison to create this System: the A.R.C. Cuff has the ability to be totally adjustable for fit, yet remain rigid; simple, low profile strapping system; a natural free-motion, rolling-gliding hinge follows the natural movement of the knee; carbon fiber matrix, tibial plateau-capturing frame design provides strong, yet lightweight protection: brace-to-boot tether attachment helps prevent lower leg rotation; plus the full-time, full-coverage patella cup offers superior coverage.

- Anatomically correct design frame
- Carbon fiber epoxy matrix for rigidity & lightweight
- Asymmetrical design allows each hinge to set properly
- Allows for automatic tibia alignment of lower frame
- Adjustable retention control cuff
- Inverted adjustment increases lateral rigidity
- Thermo-Formed EV50 shock absorbent foam padding and easy cleaning
- Transfers forces of a lower leg rotation
- hook and loop fastener quick release straps
- Telescoping three piece design and easily removable
- Water resistant

THE CELL - KNEE PROTECTION

Riding and racing motorcycles is serious business - even for the kids. There is no doubt their growing knees need and deserve protection, and the Asterisk Germ Knee Protection System is ready to do the job. Revolutionary design meets simple, stress-free fastening to create a comfortable and user-friendly brace for the pros of tomorrow. Sometimes the bike needs protection too so we've added a special guard to the hinge area. (Your riding pants and tank graphics will thank you!)

*Comes in two thicknesses to accommodate leg growth!

SIZING	ONE SIZE
(in)	10 1/4" - 13 7/8"
(cm)	26,04 - 32,70

Adjustable padding for a custom fit included.

ANTI-ROTATION TETHERS

Designed specifically for the Asterisk Knee Protection Systems to help guard against lower leg rotation. The Anti-Rotation attachment is an adjustable link between the Knee Protection System and your boot. This is a extra set for multiple moto boot applications or ski boots. Boot & Brace Attachments Included

*WORKS WITH ORIGINAL CELL, GERM, AND ULTRA CELL

PART NO.	DESCRIPTION	CODE
161998	Anti-Rotation Tethers	(B)

ZERO PANT

- Each of these offers support but would greatly benefit from some additional modifications to be thoroughly effective
- Knee brace sleeves are satisfactory for acting as a barrier between the brace and the skin, but with very little other aid
- The pant envelops the knee brace, which allows it to keep the brace in place utilizing compression from the hips
- The over-sleeve in the pant seals the brace into the pocket with a hook and loop fastener enclosure located at thigh area.
- It makes it simpler to slide the pants over the knee brace as well as allowing the brace to move without restraint under the pants.

SIZING	S	M	L	XL
(in)	28" - 29"	30" - 32"	33" - 35"	36" - 40"

UNDERSLEEVES

Worn as an undergarment for knee braces, Asterisk undersleeves are designed to prevent chafing and improve comfort. (78% Poly, 14% Cotton, 8% Lycra - Latex Free)

- Conically tapered cut to match the leg's natural contour
- Ventilated mesh promotes air flow
- Reduces heat build up by wicking moisture away from skin
- Flat stitched quad seam for smooth, durable finish
- Durable fold-over elastic band

// EVS PROTECTION

TWIN WALL CARBON FIBER FRAME

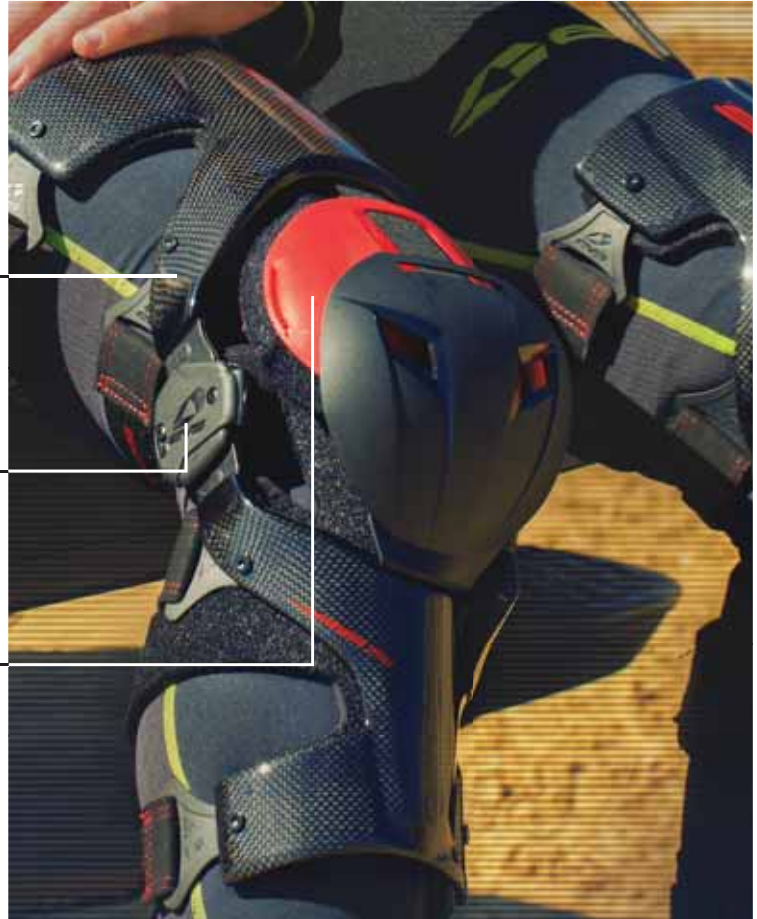

The Web Pro consists of a composite material fully encased in a thick shell of carbon fiber. The result being a knee brace frame that is strong enough to endure significant amounts of force and torsion.

TRU-MOTION HINGE

Modeled after orthopedic knee braces, the Tru-Motion Hinge bends and slides the same way as the knee, allowing for the Web Pro to sit and move comfortably on the rider, while limiting torsion and hyperextension.

DUAL KNEE CUP

The dual knee cup system provides CE level full patella coverage. When straight, the dual knee cups settle one on top of the other. When the leg is bent, the knee cups slide apart covering the upper and lower parts of the knee for complete protection.

WEB PRO

- Twin wall carbon fiber frame for maximum strength and rigidity
- Patented Tru-Motion 3.0 anatomically correct dual alloy hinges
- Dual Defense full coverage knee cup
- Adjustable hyperextension lockouts
- Sharkskin neoprene liner reduces brace migration
- Modular strapping system
- Compression comfort cuff

F2 ROOST DEFLECTOR

The F2 features an innovative modular design for personal customization to suit a variety of riding situations and styling preferences.

- Lightweight ventilated high impact polypropylene construction.
- Fully adjustable design, to comfortably fit a wide range of riders.
- Front pivoting system eliminates darting for a snug, comfortable fit.
- Wrap around body and rib coverage.
- Meets CE 14021 standards for roost deflection.
- Meets CE 1621-1 standards for back impact protection.
- Neck brace compatible design. Works with most leading neck braces.
- Elastic shoulder attachment loops for neck brace integration.
- Plush bio foam molded liner.
- Pivoting system eliminates darting for a snug, comfortable fit.
