VIVO INSULATION

Ride hard. Stay dry.
Experience a remarkable
comfort level

30% more breathability
than the competition

How it works

Unique in design, openings in Vivo insulation allow moisture to move away from the body during intense physical activity while retaining heat in more passive moments. Thus, Vivo offers increased warmth and comfort by offering great breathability.

EXPERIMENT WINTER!

SNOW HELMETS

A LIGHTWEIGHT INSULATED FOG-FREE HELMET

REDEFINE TRAIL RIDING

EXPERIENCE A ONE-OF-A-KIND HELMET

AERODYNAMIC, LIGHTWEIGHT AND SPORTY, IT PROVIDES AN EFFECTIVE PROTECTION AGAINST THE COLD. THE MISSION HELMET SIGNIFICANTLY REDUCES THE RISK OF FOGGING BY INTEGRATING AMS TECHNOLOGY.

CKX ORIGINAL DESIGN
WIND TUNNEL, ENVIRONMENTAL CHAMBER AND TRAIL TESTED
3 PATENTS PENDING

* Clearly effective for a large proportion of people, uses, and conditions, the performance of AMS varies based on the type of use, the weather conditions, and the adjustment of the helmet and breath deflector.

New **MISSION**

GO BEYOND THE HORIZON.

CKX HELMETS

MISSION &
TRANZ 1.5 AMS

**BREATHE
LIKE NEVER BEFORE**

AMS

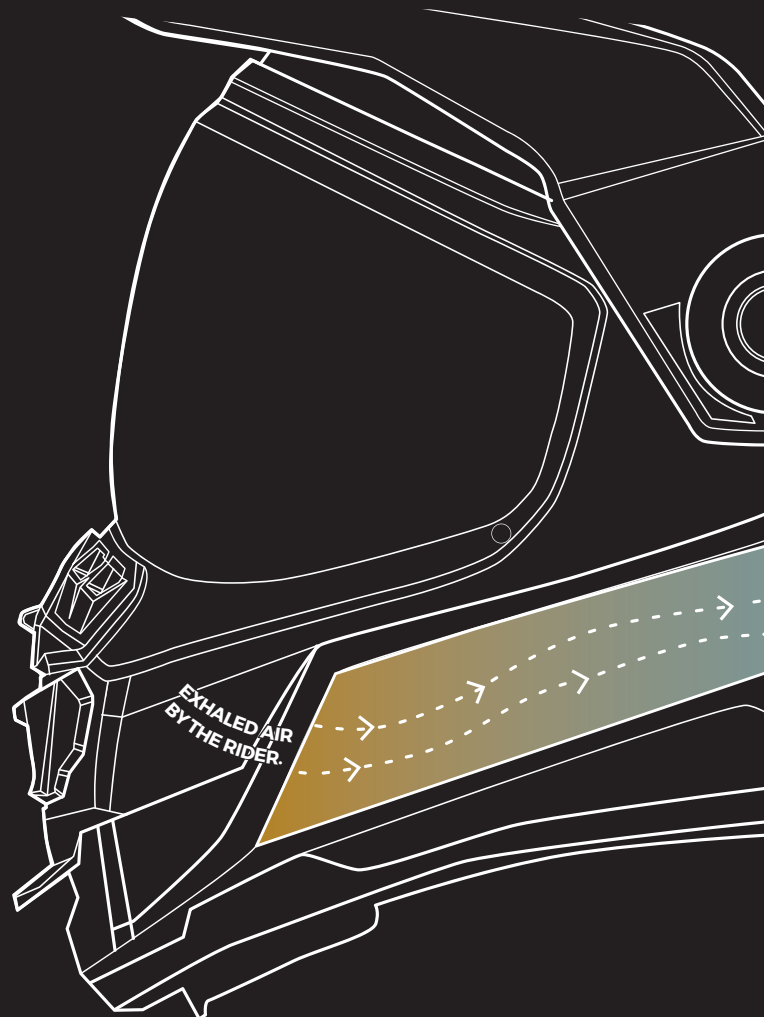

INTEGRATED AIR MANAGEMENT SYSTEM

By integrating the Air Management System (AMS) in the Mission and Tranz 1.5 helmets CKX offers an unrivaled level of comfort for trail enthusiasts.

Breathe freely in a space where air moisture is efficiently removed. Enjoy the freshness and clean space inside your helmet, free from condensation and frost.

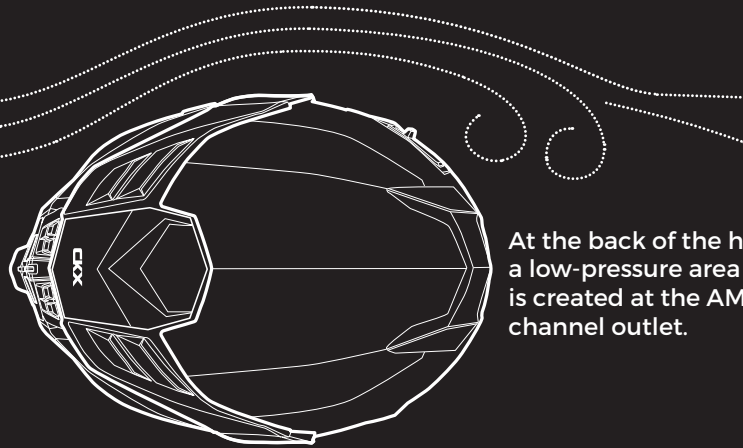

**EXHALED MOIST AIR
INSIDE ZONE**

Inside the helmet, the pressure is higher where the rider exhales moist air than the pressure at the back of the helmet.

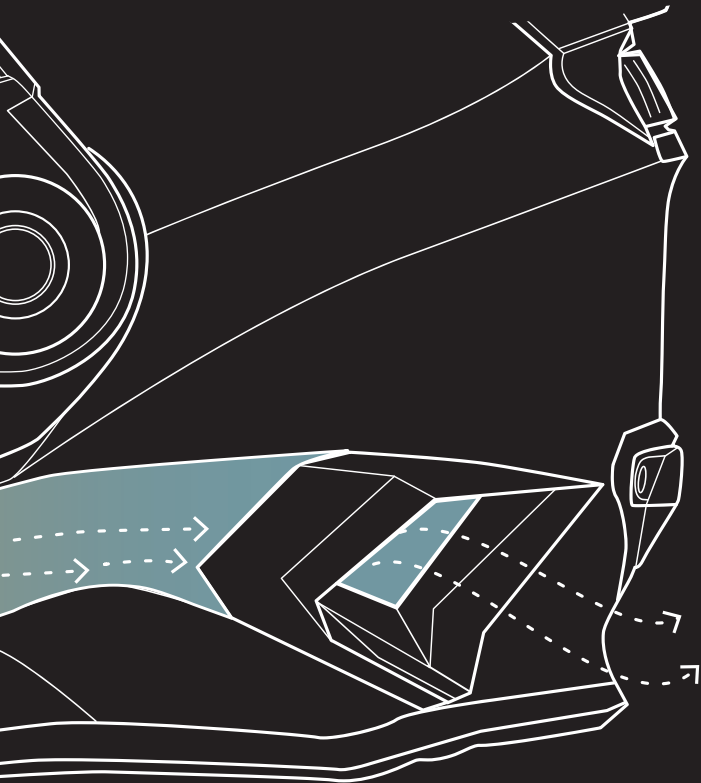

THE TECHNOLOGY **AMS** EXPLAINED

When the helmet is moving, outside air hits the helmet and bypasses it.

At the back of the helmet, a low-pressure area is created at the AMS channel outlet.

MOIST AIR REMOVAL REAR ZONE

AIR ALWAYS FLOWS THROUGH THE EASIEST PATH.

The pressure difference between the inside and the back of the helmet causes the moist air to flow outwards through the AMS channel. This is how the AMS system actively contributes to reducing internal fog.

Full Face
MISSION AMS

The first helmet with revolutionary AMS technology, CKX's new Mission Helmet redefines the trail riding experience. Lightweight and featuring an aerodynamic and sporty look, it provides an effective protection against cold and wind. See bigger, see farther. Push your limits and dominate the trails.

CKX
TITAN

TITAN

THE LOOK OF A
BACKCOUNTRY HELMET
WITH THE ADVANTAGES
OF A MODULAR HELMET.

The 210° goggles and the **TITAN** helmet design combine perfectly to ensure a perfect seal when the removable muzzle is in place. In addition, the unique design of the goggles and helmet provide an unrivalled 210° field of view. This is a first for a helmet in this category.

- PERFECT SEAL BETWEEN HELMET AND GOGGLES
- REMOVABLE MUZZLE
- EXCEPTIONAL FIELD OF VIEW
- CARBON FIBER COMPOSITE CONSTRUCTION - 1350G
- FIBERGLASS COMPOSITE CONSTRUCTION - 1450G

PERFECT SEAL

TO ENSURE THE COMFORT OF A MODULAR HELMET IN A BACKCOUNTRY HELMET, DESIGNERS HAVE DEVELOPPED A SPECIAL HERMETIC SYSTEM, PROTECTING THE DRIVER AGAINST WEATHER CONDITIONS. FIRST OF ITS KIND IN THE WORLD, THIS SYSTEM IS BASED ON THREE MAJOR COMPONENTS.

ADJUSTMENT

To ensure perfect fit between the goggles and the helmet, the goggles are designed to be fully compatible with the helmet. The result is a high-end goggle created to tailor-fit the **TITAN** helmet.

NOSE AND BREATH GUARD

The new 210° goggles oversized nose guard provides superior protection to the snowmobiler's cheeks and nose. Moreover, the breath guard is made from flexible polyurethane material to perfectly fit on the nose guard for a maximum seal. **PATENT PENDING.**

INSULATION

Because every detail matters, a closed-cell foam piece of insulation material has been added to the goggles upper comfort contour to provide an additional barrier against cold wind infiltration. **PATENT PENDING.**

REMOVABLE MUZZLE

THE TITAN IS THE VERY FIRST MODULAR BACKCOUNTRY HELMET IN THE WORLD.

The removable muzzle technology offers numerous new opportunities in this class of helmet. Operated with only one finger, using a sturdy, cleverly designed mechanism, this quick release system is ergonomic and very easy to use even in cold weather. The muzzle can be opened or removed from the helmet, at any time. Using this new technology, **THE RIDER CAN CONTROL HIS WAY OF BREATHING AND SPEAK MUCH MORE EASILY WITH THE HELMET ON.**

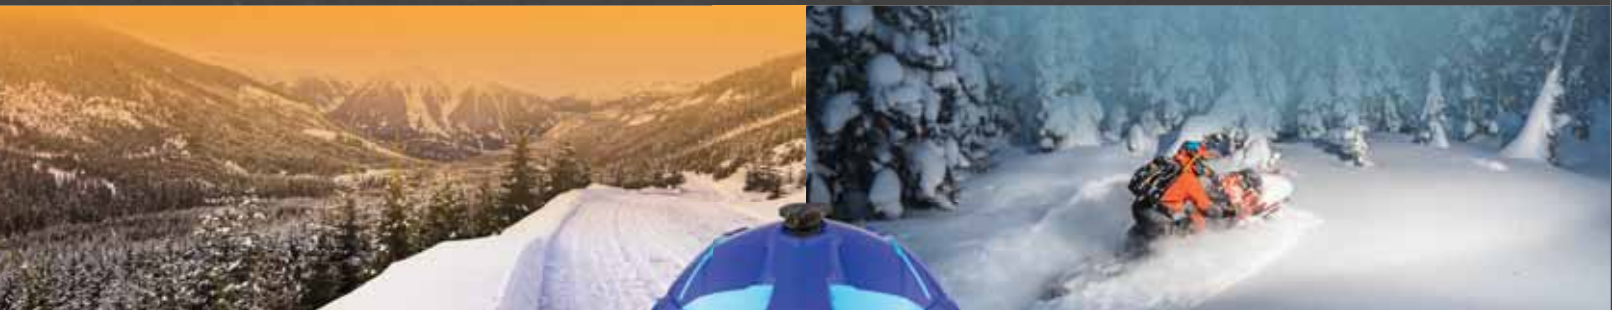

TITAN ORIGINAL

EXPERIMENT WITH THE DIFFERENT CONFIGURATIONS.

ADAPT IT TO YOUR NEEDS.

Bridging the gap between two styles, the Titan is the only fully configurable helmet! From trail riding to backcountry, customize the insulation and ventilation depending on the intensity level of your activity.

INSULATED > > > >

> > > VENTILATED

TRAIL

The Titan is now set for **TRAIL** riding. As soon as you take it out of the box, it is ready to take on the tracks. Providing you with maximum insulation, it incorporates a goggles frame optimized for trail riding.

Ride in cold weather for long periods of time at high speed without compromising on the comfort.

LET'S RIDE

BACKCOUNTRY

Are you a **BACKCOUNTRY** enthusiast? Remove the insulating pieces and customize your helmet's ventilation based on the level of intensity of your activity. Use the fully ventilated backcountry goggles frame included and packed separately.

Go beyond your limits without ever looking back.

AND... ACTION!

TRAIL

GOGGLES COMFORT IS PROVIDED BY A CUSTOMIZED FOAM SPECIALLY FITTED TO THE HELMET, ENSURING AN EXCELLENT SEAL. THE GOGGLES CAN BE PERFECTLY ADJUSTED BY USING TWO SEMI-FLEXIBLE FASTENING DEVICES. THEY ALSO OFFER THE WIDEST FIELD OF VISION FOR THIS CLASS OF GOGGLES. TO ACHIEVE THIS UNMATCHED FEATURE, OUR DESIGNERS CREATED THE LARGEST PRE-CURVED POLYCARBONATE LENS EVER DEVELOPED, MOUNTED ON A POLYURETHANE FRAME.

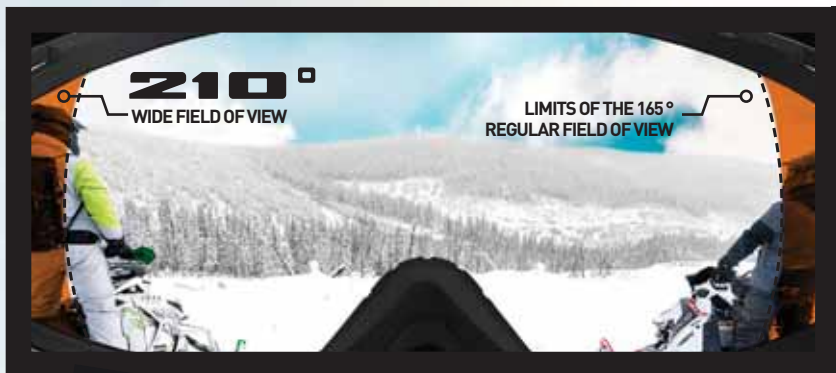

FEATURES 210°

- Lens controlled vents included
- Exceptional Field of view of 210°
- Flexible polyurethane frame
- Top and bottom ventilation port within the frame
- Injection molded polycarbonate pre-curved lens
- Anti-scratch lens
- Anti-fog dual pane lens
- 100% UV protected lens
- Helmet specific sized foam
- Interchangeable RapidClip strap
- Adapted for prescription glasses
- Removable nose guard

THE 210° ELECTRIC GOGGLES TOTALLY ELIMINATES THE RISK OF FOGGING

THE 210° GOGGLES BRING A NEW HEATED LENS TO THE CKX LINE-UP. GOGGLES WERE THE 210° ELECTRIC WAS DESIGNED TO WORK PERFECTLY WITH THE RAPIDCLIP AND WITH ALL OF ITS FEATURES: YOU CAN STILL EASILY PLACE THEM ON TOP OF THE HELMET OR HAVE THEM HANGING ON THE SIDE. THE STRAIN RELIEF SYSTEM ENSURES A SAFE CONNECTION AT ALL TIMES AND THE HEATING TECHNOLOGY AVOIDS FOG DURING LONG RIDES. YOU WILL NEVER HAVE TO CHANGE GOGGLES AGAIN!

FEATURES 210° ELECTRIC

- Interchangeable 210° electric double lens
- Lens controlled vents included
- Power cord's strain relief system included
- Exceptional Field of view of 210 °
- Flexible polyurethane frame
- Top and bottom ventilation port within the frame
- Injection molded polycarbonate pre-curved lens
- Anti-scratch and anti-fog lens treatment
- 100% UV protected lens
- Helmet specific sized foam
- Additional foam barrier against the wind
- Interchangeable RapidClip strap
- Adapted for prescription glasses
- Removable nose guard
- Power cord included

TINT GUIDE FOR REPLACEMENT LENS

- **Clear:** Recommended for cloudy days and at the time of sunset.
- **Yellow:** Improves contrast, reduces glare. High Intensity tint for maximum sight performance during low light driving. Excellent for night riding and for cloudy conditions.
- **Orange/Amber:** Heightens contrast in partly cloudy and sunny conditions. Blocks high amounts of blue light to heighten contrast and visual acuity.
- **Blue:** Reduces glare from visible white light and heightens contrast.
- **Pink:** Provides the best optics for the widest variety of light conditions. Enhances depth perception, increases contrast, and maximizes visual acuity.

EXPERIMENT WINTER!

2020 CKX LINE UP

EVERY SEASON, AS THE SNOW ARRIVES, IT RECREATES A VIRGIN LANDSCAPE WHERE IT'S POSSIBLE TO LEAVE ONE'S TRACK, FOOTPRINT AND MARK.

FOR THE 2020 COLLECTION, WE HAVE RAISED OUR STANDARDS TO IMPROVE THE PERFORMANCE OF OUR CLOTHES.

EXPERIENCE AN IMPROVED LEVEL OF IMPERMEABILITY, INSULATION AND BREATHABILITY!

EXPERIMENT WINTER!

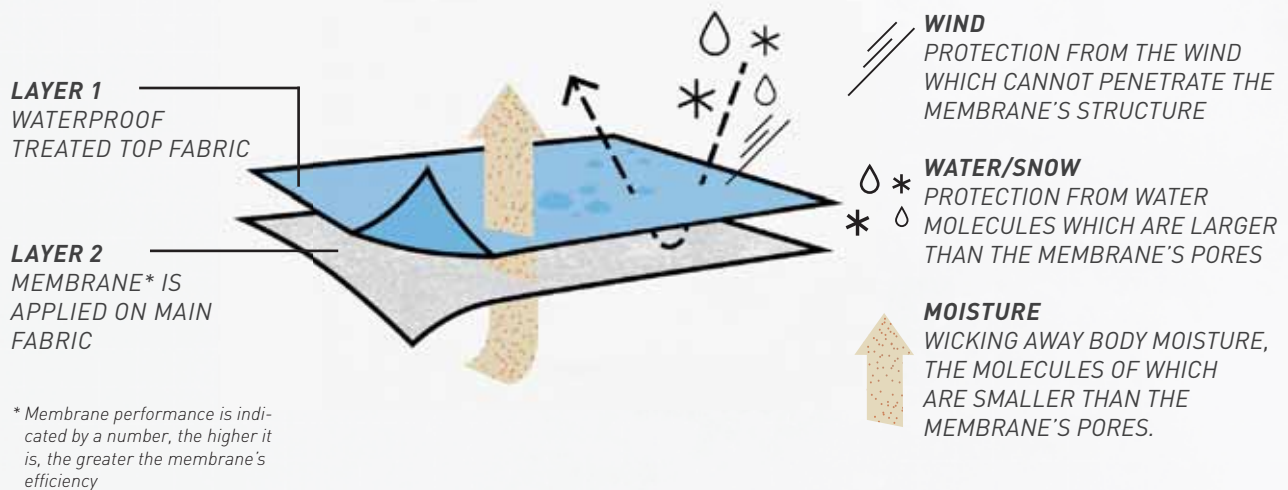

MATERIALS TECHNOLOGY

The performance of materials is the basis of equipment adapted to cold weather conditions. Selected for their durability, robustness and ease of maintenance, the materials used in the manufacturing of our clothing provide you with the comfort and performance you are looking for.

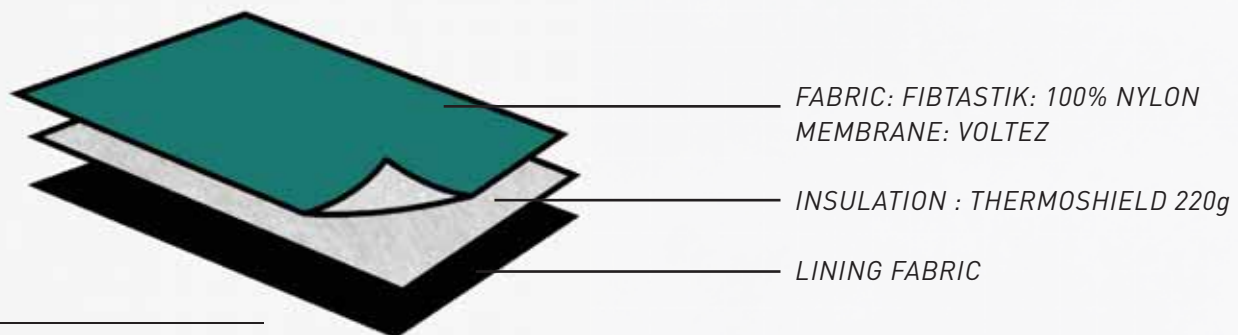

MAIN FABRIC, MEMBRANE AND INSULATION

Our dual layer fabrics are waterproof treated and equipped with a membrane applied on their reverse side, imparting the fabrics with waterproof and breathable properties. Completing the manufacturing process, our insulating material provides a level of warmth designed for your needs.

DUAL LAYER FABRIC AND HOW THE MEMBRANE WORKS

CKX COMFORT LINE CONSTRUCTION

5000 mm Water and wind resistant/5000g /m²/ 24h breathability

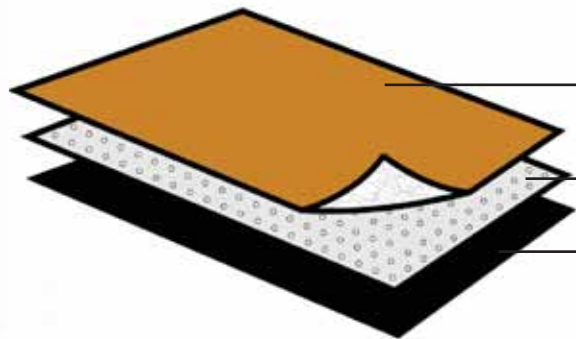

Thermoshield insulation provides warmth and comfort. Because it is comfortable and lightweight insulation allows freedom of movement. Its fibers trap air for greater insulation for light and heavy-duty performance. You'll stay warm and dry.

EXPERIMENT WINTER!

MATERIALS TECHNOLOGY

CKX PERFORMANCE LINE CONSTRUCTION

FABRIC : P8-TEX: 100% POLYESTER

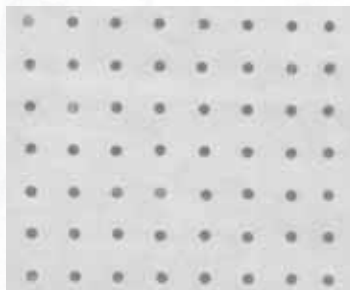

MEMBRANE : HILLTEX 20-15

INSULATION : VIVO 60g

LINING FABRIC

20000 mm Water and wind resistant/15000 g/m²/ 24 h breathability

VIVO IS A HOLE NEW INNOVATION

Vivo features a series of small apertures set within the insulation. The holes are uniquely sized to trap air. They also create paths of "least resistance," allowing moisture to escape quickly away from the body.

That's how it enhances breathability without decreasing thermal performance.

Made with 90% recycled fibers, Vivo Eco's flexible yet stable structure provides excellent comfort.

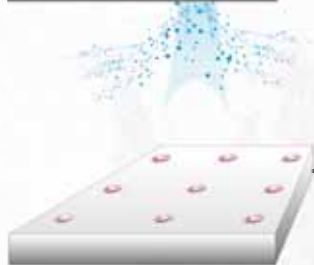

30%
INCREASES
BREATHABILITY BY 30%

0%
DECREASES THERMAL
PERFORMANCE BY 0%**

4
INCREASED 4 WAY
STRETCH

When the wearer is active and perspiring moisture flows freely and easily through the holes.

When the wearer is inactive the holes trap warm air.

CKX ACCESSORIES

EXPERIMENT WINTER!

MATERIALS TECHNOLOGY

INSULATION

PRIMALOFT

PrimaLoft® is the highest performing ultra-fine microfiber insulation on the market for warm, soft and lightweight, and is warmer wet or dry than all other insulations.

THERMOSHIELD

Thermoshield insulation provides warmth and comfort. Because it is comfortable and lightweight insulation allows freedom of movement. Its fibers trap air for greater insulation for light and heavy-duty performance. You'll stay warm and dry.

MEMBRANE

HIPORA

HIPORA has 4 seemingly contrary characteristics which are Moisture Permeability, Water Resistancy , Breathability and water Repellency. HIPORA has solved the biggest problem inherent in the conventional waterproof film. HIPORA has the secret in the unique polyurethane coating technology. That is, numerous number of micro pores (abt. 9 billion / 1 inch²) of the minimal size (o0.1-3u) are placed all over the polyurethane coated film. They shut out the water from outside, but allow the moisture or warm steam from the body go out. When the body perspires from strenuous work on exercise, the perspiration easily escape leaving the wear feeling comfortable.

DENTIK MEMBRANE

The greatest contribution of Dentik fabric lies in the invention of e-PTFE. Combined with textile matter, it ensures outdoor fabrics have impermeability to water and permeability to air. Not only does it make it possible to eliminate perspiration out of clothing, but it also keeps heat from dissipating during outdoor activities. Therefore, the body is always in its best physical state . That's why it is called "the breathable fabric."

ALASKA // LEATHER GLOVES

Enjoy the suppleness and strength of our goat leather gloves. Waterproof and insulated, they will give you the warmth and comfort you are looking for.

PRIMALOFT

PrimaLoft® is the highest performing ultra-fine microfiber insulation on the market for warm, soft and lightweight, and is warmer wet or dry than all other insulations.

**THERMOSHIELD**

Thermoshield insulation provides warmth and comfort. Because it is comfortable and lightweight insulation allows freedom of movement. Its fibers trap air for greater insulation for light and heavy-duty performance. You'll stay warm and dry.

■ TECHNOLOGY

CARBON FIBER

LS2 uses multiple layers of our exclusive wide-weave carbon fiber for a very light, but strong shell that handles impacts while dispersing energy for a safer ride.

KINETIC POLYMER ALLOY (KPA)

A proprietary blend of polycarbonate, space age thermoplastics and additional materials specifically formulated by LS2, KPA offers ultra-lightweight and high penetration resistance, but with some flexibility for the ultimate in energy dispersion. This special formula meets or exceeds both ECE 22.05 and DOT requirements.

HIGH PERFORMANCE FIBERGLASS COMPOSITE (HPFC)

LS2 carefully layers a blend of a unique fiberglass weave and organic resin into a strong, ultra-lightweight, but rigid shell that accepts an impact while dispersing energy for a safer ride.

HIGH PRESSURE THERMOPLASTIC TECHNOLOGY (HPTT)

A proprietary blend of polycarbonate, ABS and other high performance polymers developed by the engineering team at LS2. LS2 uses only new (not recycled) raw materials in our products. HPTT offers superior strength, energy absorbing flexibility and energy dispersion, making it an excellent choice for the outer shell on a motorcycle safety helmet.

SUBVERTER

KPA

1450g ± 50g

TOP LEVEL OFF-ROAD PERFORMANCE.

In the wild world of the motocross helmets, a new star is born today: its name is Subverter. 'Nomen omen' Latin stated, and the new off-road model of the LS2 range represents the perfect expression of the name thanks to its extreme and absolute innovating specifics looking to comfort, safety and look. Made with the ultra-light KPA, the new Subverter is offering, above all, a security sliding structure with a double injection of EPS, to guarantee an exceptional protection on impacts. Subverter is ready to fight for new big and dusty challenges on the head of the motocross riders all over the world!

FAST V2

GO HARD OR GO HOME.

Perhaps the best value on the market in a lightweight, MX helmet, LS2's Fast is a mighty weapon for serious off road riders. The shell is made from our technically advanced Kinetic Polymer Alloy (KPA). This innovative material is ultra-lightweight and offers a bit of energy absorbing flexibility, but with a penetration resistance that rivals high-end composites.

SNOW KIT

Winter Powersports enthusiasts? Adapt your favorite LS2 helmet with our snow kits. All you need are few easy-to-install parts to ensure optimal performance in cold weather.

BACKCOUNTRY 8.4 FLASHLIGHT FOR HELMET

Backcountry 8.4 Flashlight produces 840 lumens, is shock proof, has the highest waterproof rating of IPX8, and will last 2 ½ hours on high. It's made out of 6061 aluminum that is anodized black, and the internals are rugged enough to resist harsh vibration and survive drop impacts of up to 1.5 meters (5'). With the battery installed, this amazing flashlight weighs only 165 grams (5.8 oz). The Flashlight mount system is GoPro compatible, so any mounts that accept GoPro also fit this light.

Kit includes:

- + Backcountry 8.4 Flashlight
- + Rechargeable 18650 – 3100 mAh battery
- + Flashlight mounting adapter
- + Gopro compatible base and short arm
- + 110 v/12 volt charger
- + Lanyard
- + Holster
- + Spare O-rings
- + Spare switch & switch cap

PART NO.	DESCRIPTION	CODE
200634	Flashlight Kit for Helmet	(B)

MOTION SERIES BLUETOOTH HELMET AUDIO SYSTEM

The UCLEAR Motion Series is based on direct feedback from riders, dealers, and industry experts to be the most advanced, easiest to use, most durable, most portable, best sounding, longest lasting and weatherproof comm systems, ever. It's bleeding-edge tech made simple to use, then ruggedized. With an industry-first motion sensor, you no longer need to press any buttons to perform simple functions such as pause/play, volume, etc. Enhance your rides with UCLEAR's patented DynaMESH intercom, powerful music, or crystal clear phone calls on any trail, in any weather, on any helmet.

MOTION SERIES TECHNOLOGY

The revolutionary **USAFE** uses an advanced accelerometer to detect and measure hard impacts. If you are unresponsive, **USAFE** can alert your contacts of your situation and GPS location. Requires a connected GPS enabled mobile device.

Exclusive **GESTURE CONTROL** sends out a sensor beam from your MOTION unit allowing simple hand gestures to command the most common features such as volume and pause/restart music without touching the actual control unit. Winter gloves? No problem!

UPrompt: Voice confirmations of user inputs.

UMOVE: Exclusive motion sensor powers your Motion Series unit on and off. Motion is on by the time you put on your helmet, and automatically shuts your Motion off if you forget.

DYNAMESH: The first ever mesh intercom network combined with Multi-Hop automatic switching. **DYNAMESH** pairs with mesh and non-mesh units, and auto-reorganizes as group riders change positions. This ensures stable and constant connections over the longest distances allowed by the FCC.

UCommand: Control your Motion Series unit by natural voice connected through Apple Siri or Google Voice. Speech engine accuracy constantly updates through the cloud.

U-Pair allows universal device pairing to multiple Bluetooth devices at once. Smart phones, smart watches, tablets, GPS, action cams, OEM systems, and competitors' comm systems.

1-touch access to most commonly used advanced features such as group intercom pairing, voice commands, or quick access to Apple Siri or Google Voice. It's E-Z!

Advanced features, preference settings, support, and our exclusive wireless firmware updates. Music sharing, music + intercom overlay, noise cancellation settings, etc.

024141	Accessory Kit for HBC200 & HBC100PLUS	C

HALF HELMET EARBUDS HEADPHONE

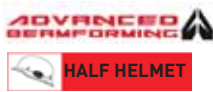

UCLEAR's Earbud accessory lets riders enjoy all the benefits of their UCLEAR system with half helmets that do not have traditional speaker pockets covering the ears. Works with any half helmet including motor sports, outdoor sports, and even hard hats! Dual in-line mics install in the helmet liner; only the earbud tips dangle to your ears. 4 sets of standard earbud tips are included. Compatible with MOTION Series controllers (USB-C).

JETHWEAR

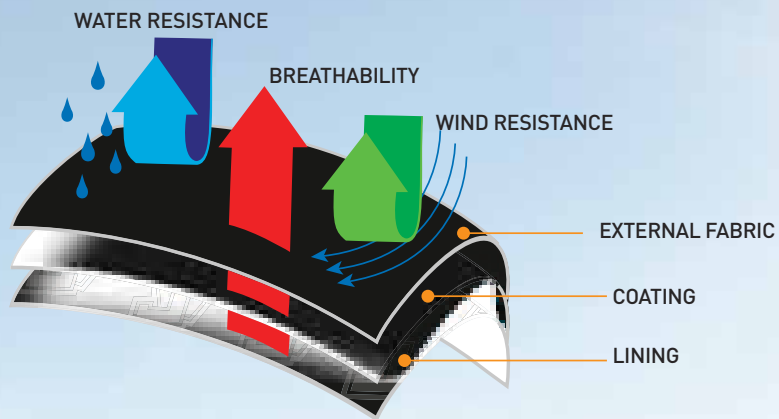

JETHWEAR WAS INTRODUCED TO THE MARKET FALL 2013. WITH A NEW CREATIVE DESIGN AND A QUALITY THAT ATTRACTS THE FREERIDE SNOWMOBILER WE HAD A GREAT SUCCESS ALREADY FROM START.

THE SMALL LINE CONTAINING ONE MONO SUIT, THREE JACKETS AND TWO PANTS WERE QUICKLY SOLD OUT. THREE SEASONS HAS PASSED AND JETHWEAR HAS BECOME A PLAYER TO COUNT WITH IN THE SNOWMOBILE MARKET.

JETHWEAR POWTEC™

— Our Signature Fabric Technology —

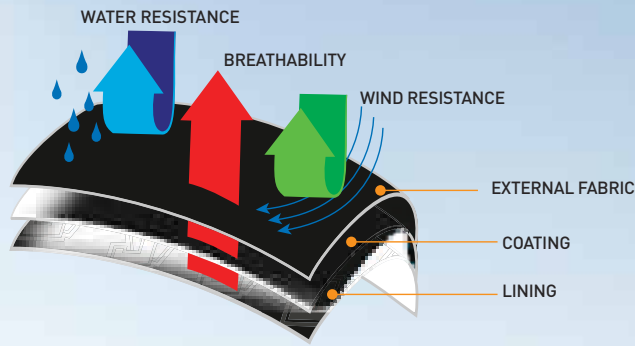

Available on all JETHWEAR jackets, pants and mono suits in JW Series, POWTEC provides an engineered shield against snow, rain and wind while maintaining a comfortable interior environment. The fabric is DWR treated and bonded to a technical waterproof breathable coating. This combination allows increased levels of breathability while also providing a high resistance surface for outdoor elements.

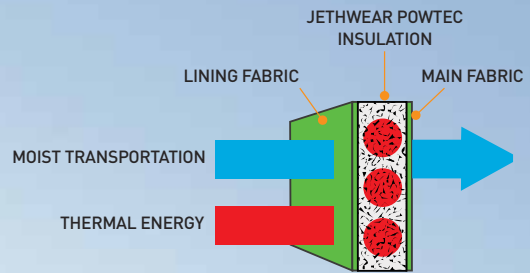

— Our Signature Fabric Technology —

Available on all JETHWEAR jackets, pants and mono suits in Black Series and Team Series, POWTEC Ultra provides a high engineered shield against snow, rain and wind while maintaining a comfortable interior environment. The fabric is DWR treated and bonded to a technical waterproof breathable coating. This combination allows increased levels of breathability while also providing a high resistance surface for outdoor elements.

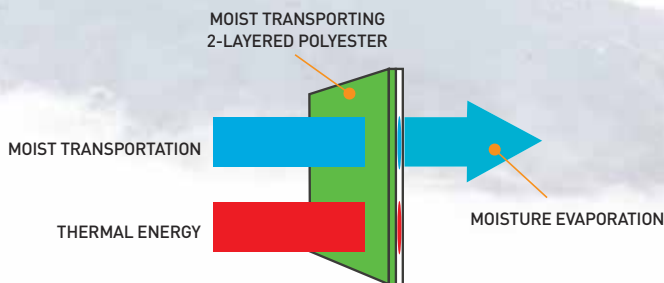

— Our Mid Layer Technology —

Available on the JETHWEAR Cruiser Series, POWTEC Light is our mid layer technology. Our POWTEC Insulation combined with our liner and main fabric serves for a high end mid layer on cold days and will provide a down-like warmth that's engineered to give the user maximum heat with minimum volume.

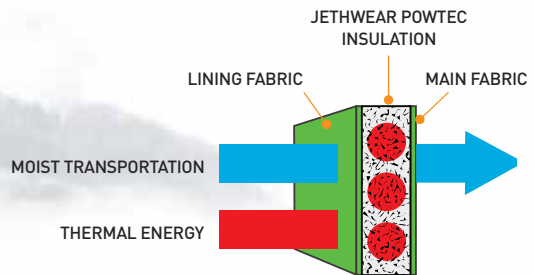

— Our L-1 Technology —

Our POWTEC Fusion is a L-1 fabric in flat knitted technical polyester. The fabric provides moist transportation, warmth, comfort and flexibility. The garment should be worn directly against your skin for optimal effect.

— Our Signature Liner Technology —

POWTEC INSULATION will transfer the thermal energy between the outer cold weather and your body temperature. It provides a down-like warmth that's engineered to give the user maximum heat with minimum volume.

M'S JW THE ONE SUITS

JETHWEAR

**A LIGHTWEIGHT
INSULATED FOG-FREE HELMET***
REDEFINE TRAIL RIDING

EXPERIENCE A ONE-OF-A-KIND HELMET

AERODYNAMIC, LIGHTWEIGHT AND SPORTY, IT PROVIDES AN EFFECTIVE PROTECTION AGAINST THE COLD. THE MISSION HELMET SIGNIFICANTLY REDUCES THE RISK OF FOGGING BY INTEGRATING AMS TECHNOLOGY.

AMS
TECHNOLOGY

BREATHE LIKE NEVER BEFORE
INTEGRATED AIR MANAGEMENT SYSTEM

X2

SHUT OUT SUN GLARE
ADJUSTABLE PEAK WITH TWO POSITIONS

SEE BIG, SEE FAR
OVERSIZED SHIELD

COMMUNICATE FREELY
OVERSIZED OPENING

RIDE AT FULL SPEED
REMOVABLE & AERODYNAMIC PEAK

RIDE WITHOUT FATIGUE
THE LIGHTEST IN ITS CATEGORY**

* Clearly effective for a large proportion of people, uses, and conditions, the performance of AMS varies based on the type of use, the weather conditions, and the adjustment of the helmet and breath deflector.

** Electrical version, without peak.
For all equipped version: additional ± 150g.
1580g = carbon, 1680g = fiberglass

MISSION
GO BEYOND THE HORIZON
