Welcome!

It all began in 1992 with the conception and production of the original 'Bullet Lights'. Our owner, Pat Scott, utilized his state-of-the-art CNC machine shop, NCDI, to design and fabricate the line. The product was first of its kind. Utilizing CNC technology, the housing was machined from aircraft quality solid billet aluminum, then fitted with a cutting edge projector-type halogen lamp and still is to this day. The light was smaller and brighter than anything the market had ever seen before. Word quickly spread about the quality and brightness of this new light and in June of 1993 Weekend Concepts and the Lazer Star brand was born as a division of NCDI.

Sand sports was the core consumer base, but with ingenuity the Billet Lights line evolved and the introduction of more styles and technologies became available, shifting popularity to V-Twin/Harley Davidson consumers. By 2000 the line was heavily distributed throughout the Power sports community.

In 2002 Weekend Concepts outgrew NCDI and branched off to its own corporation, owned and operated by the Scott family and moved its facility to Anaheim.

In 2008, seeing an opportunity Weekend Concepts/Lazer Star Lights moved into its own facility in Paso Robles, CA and development began on the newly emerging technology of projection type LED circuitry. The LX LED, a line of high-quality, highly efficient lighting products were introduced in 2011. Lazer Star's constant strive to offer the best products on the market is now working on its 3rd generation of LX LED light bars, offering customers the absolute best technology, strongest products and easiest to use mounting solutions.

Lazer Star Lights Mission Statement:

Our mission is to enhance the recreational experience by providing confidence, comfort and reliability through our dependable, quality products and family oriented service.

A Personal Thank You,

Whether you are a returning customer or new to our family, I want to personally thank you for choosing Lazer Star Lights. Our success is dependent upon your enthusiasm and satisfaction of our products. We hope you find our newest lighting solutions as exciting as we do, and we would love for you to share your experiences with us.

- Pat Scott, Founder

From Our Family To Yours

LAZER STAR LIGHTS

LX LED™
BY LAZER STAR®

Lazer Star Lights flagship line, now in it's second generation; LX LED offers the absolute best in fit, form and function. The Gen2 LX offers a patented design featuring female Deutsch connectors in the ends for convenient installation from either end of light bar, or as a daisy chain wiring solution.

ENTERPRISE
The top-of-the-line 10-watt LED light bar series, will guide you on all your adventures. Low profile 2-1/2" tall housing is available in many options of beam configurations and lengths up to 50 inches.

ENDEAVOUR®
The industry standard 3-watt double-row LED light bars provide exceptional light, in the same 2-1/2" profile as Enterprise; available in many configurations and lengths from 6" – 52". Endeavour is also available in "Racer Special" featuring an amber/white color switching function.

ATLANTIS®
A single row of 3-watt LED's with an industry leading low profile at 1-3/4", available in stock lengths up to 50". Racer Series Atlantis is available in amber, red, or blue LED as well as, 2 versions of Best in the Desert compliant Racer Tail lights.

LAZER STAR

CREE® LEDs   IP-68

Easy-to-use PATENTED end caps*:

US Patent No: 8974102
- Plugs Located at Either End of Light Bar Allow for Convenient Wiring and Installation
- Daisy Chain Wiring Capable – Several Lights can be Connected Together from a Single Power Source.
- Patented mount can be positioned anywhere along the track in the base of light, featuring a pivoting design for endless adjustability.
- Mounts can be configured for Horizontal, Vertical, or Side Mounting.

ENTERPRISE

10 WATT LED

The Enterprise series 10 WATT LED is our top performing LED product line. A go-to for racers and hard core off-roaders, Enterprise features industry leading Cree® XM-L 10-Watt LED's, which produces 1,000 Lumen's while drawing minimal amperage. LED's utilize solid state technology instead of filaments or arcs; this ensures extreme durability and reliable lighting that will last for years.

Each light has a proprietary gasket and vacuum seal which passes rigorous quality testing to be IP68 and 8.6g vibration compliant.

Features

- Compact 2.57" profile
- 10 Watt Cree® XM-L LED technology
- 1,000 Lumens per LED
- 50,000 hour life rating
- 95% efficiency
- Voltage: 9-32 Volts AC/DC input
- Operating temp -104 F ~ +122 F
- Aluminum construction
- Polycarbonate lens
- Lengths available: 6"- 50"
- Beam options: Spot, Flood or Combi
- Combi beam is a combination of spot & flood reflectors together in a single light bar

Benefits

- Highest quality construction
- Longitudinal slide-trac mount
- 8mm mounting bolt
- Deutsch Connectors (except 50")
- Dual power input for Daisy Chain Wiring (except 50")
- Warranty - Limited Lifetime
- Backed by a family company for over 23 Years

ENDEAVOUR

3 WATT DOUBLE ROW

The Endeavour series 3 WATT DOUBLE ROW is the industry standard configuration in LED light bars. Lazer Star has taken this to the next level by utilizing Cree® XP-E2 LED technology. Lazer Star's commitment to using the best LED on the market and not over powering it translates to greater efficiency, higher quality of light output, and superior longevity of the individual LED.

Each light has a proprietary vacuum seal which passes rigorous quality testing to be 8.6g vibration and IP68 compliant.

Features

- Compact 2.57" profile
- 3 Watt Cree® XP-E2 LED technology
- 300 Lumen's per LED
- 50,000 hour life rating
- 95% efficiency
- Voltage: 9-32 Volts AC/DC input
- Operating temp -104 F ~ +122 F

ATLANTIS®

3 WATT SINGLE ROW

The Atlantis series 3 WATT SINGLE ROW, features Cree® XP-E2 LED technology in a single row light bar that measures in at only 1-3/4" tall making it one of the slimmest, most powerful light bars on the market today. Offered in a wide variety of lengths from 6" to 50", Atlantis is the perfect solution for automotive or powersports enthusiasts.

Marine

Atlantis series also comes with a marine-grade finish specifically designed to withstand the harsh conditions of constant contact with moisture and corrosive salt-air environments. Great for use on wakeboard or deep sea fishing towers. Stay out on the water later or get out earlier with the power of light.

Each light has a proprietary vacuum seal which passes rigorous quality testing to be IP68 and 8.6g vibration compliant.

Features

- Compact 1-3/4" profile
- 3 Watt Cree® XP-E2 LED technology
- 300 Lumen's per LED
- 50,000 hour life rating
- 95% efficiency
- Voltage: 9-32 Volts AC/DC input

RACER SPECIAL/ RACER TAIL LED LIGHTS

**Designed Specifically with Racing in Mind
Racer Tail are Best in the Desert Compliant**

Lazer Star LED Racer Special combines superior light output with unmatched durability to give you light you can rely on under the harsh conditions of racing.

Racer Special LED Driving Light Bars

The Original amber-to-white swapping LED light bar. The Racer Special uses Cree 3 Watt LED's, that offer superior output at 300 lumens per LED. Special two-circuit wire kit sold separately. Available in 3 Lengths:

*   Top row; white LED
*   Bottom row; amber LED
*   Configured to work independently from each other – 2-circuit Wire Kit recommended – See Electronics; Wire Kits

Atlantis Racer Tail Light Bar

Multi-Color Racer Tail LED Light Bars are available in 2 versions; both are a single light bar solution which are best in the desert complaint - safety with taillights and safety only. The safety function is the same on both lights; safety with taillight includes a section of red LED on each end that functions as run/ brake.

*   Racer safety light bar
*   One amber left section – flashes
*   One blue middle section – steady on (wired independently)
*   One amber right section – steady on
*   Racer safety light bar with tail lights is the same configuration as above.
*   Added left and right red LED sections on the ends to use as tail/ brake function.

Atlantis Single-Color Light Bars

*   Red 3-Watt 6" LED – Can be used with our tailLight converter (Part #LSWC808) for run/brake configuration
*   Amber 3-Watt LED Light Bars - Offered in 6" & 12" lengths
*   Atlantis 6" available in 4 colors:
*   Amber, red or blue
*   White (see standard Atlantis series page)
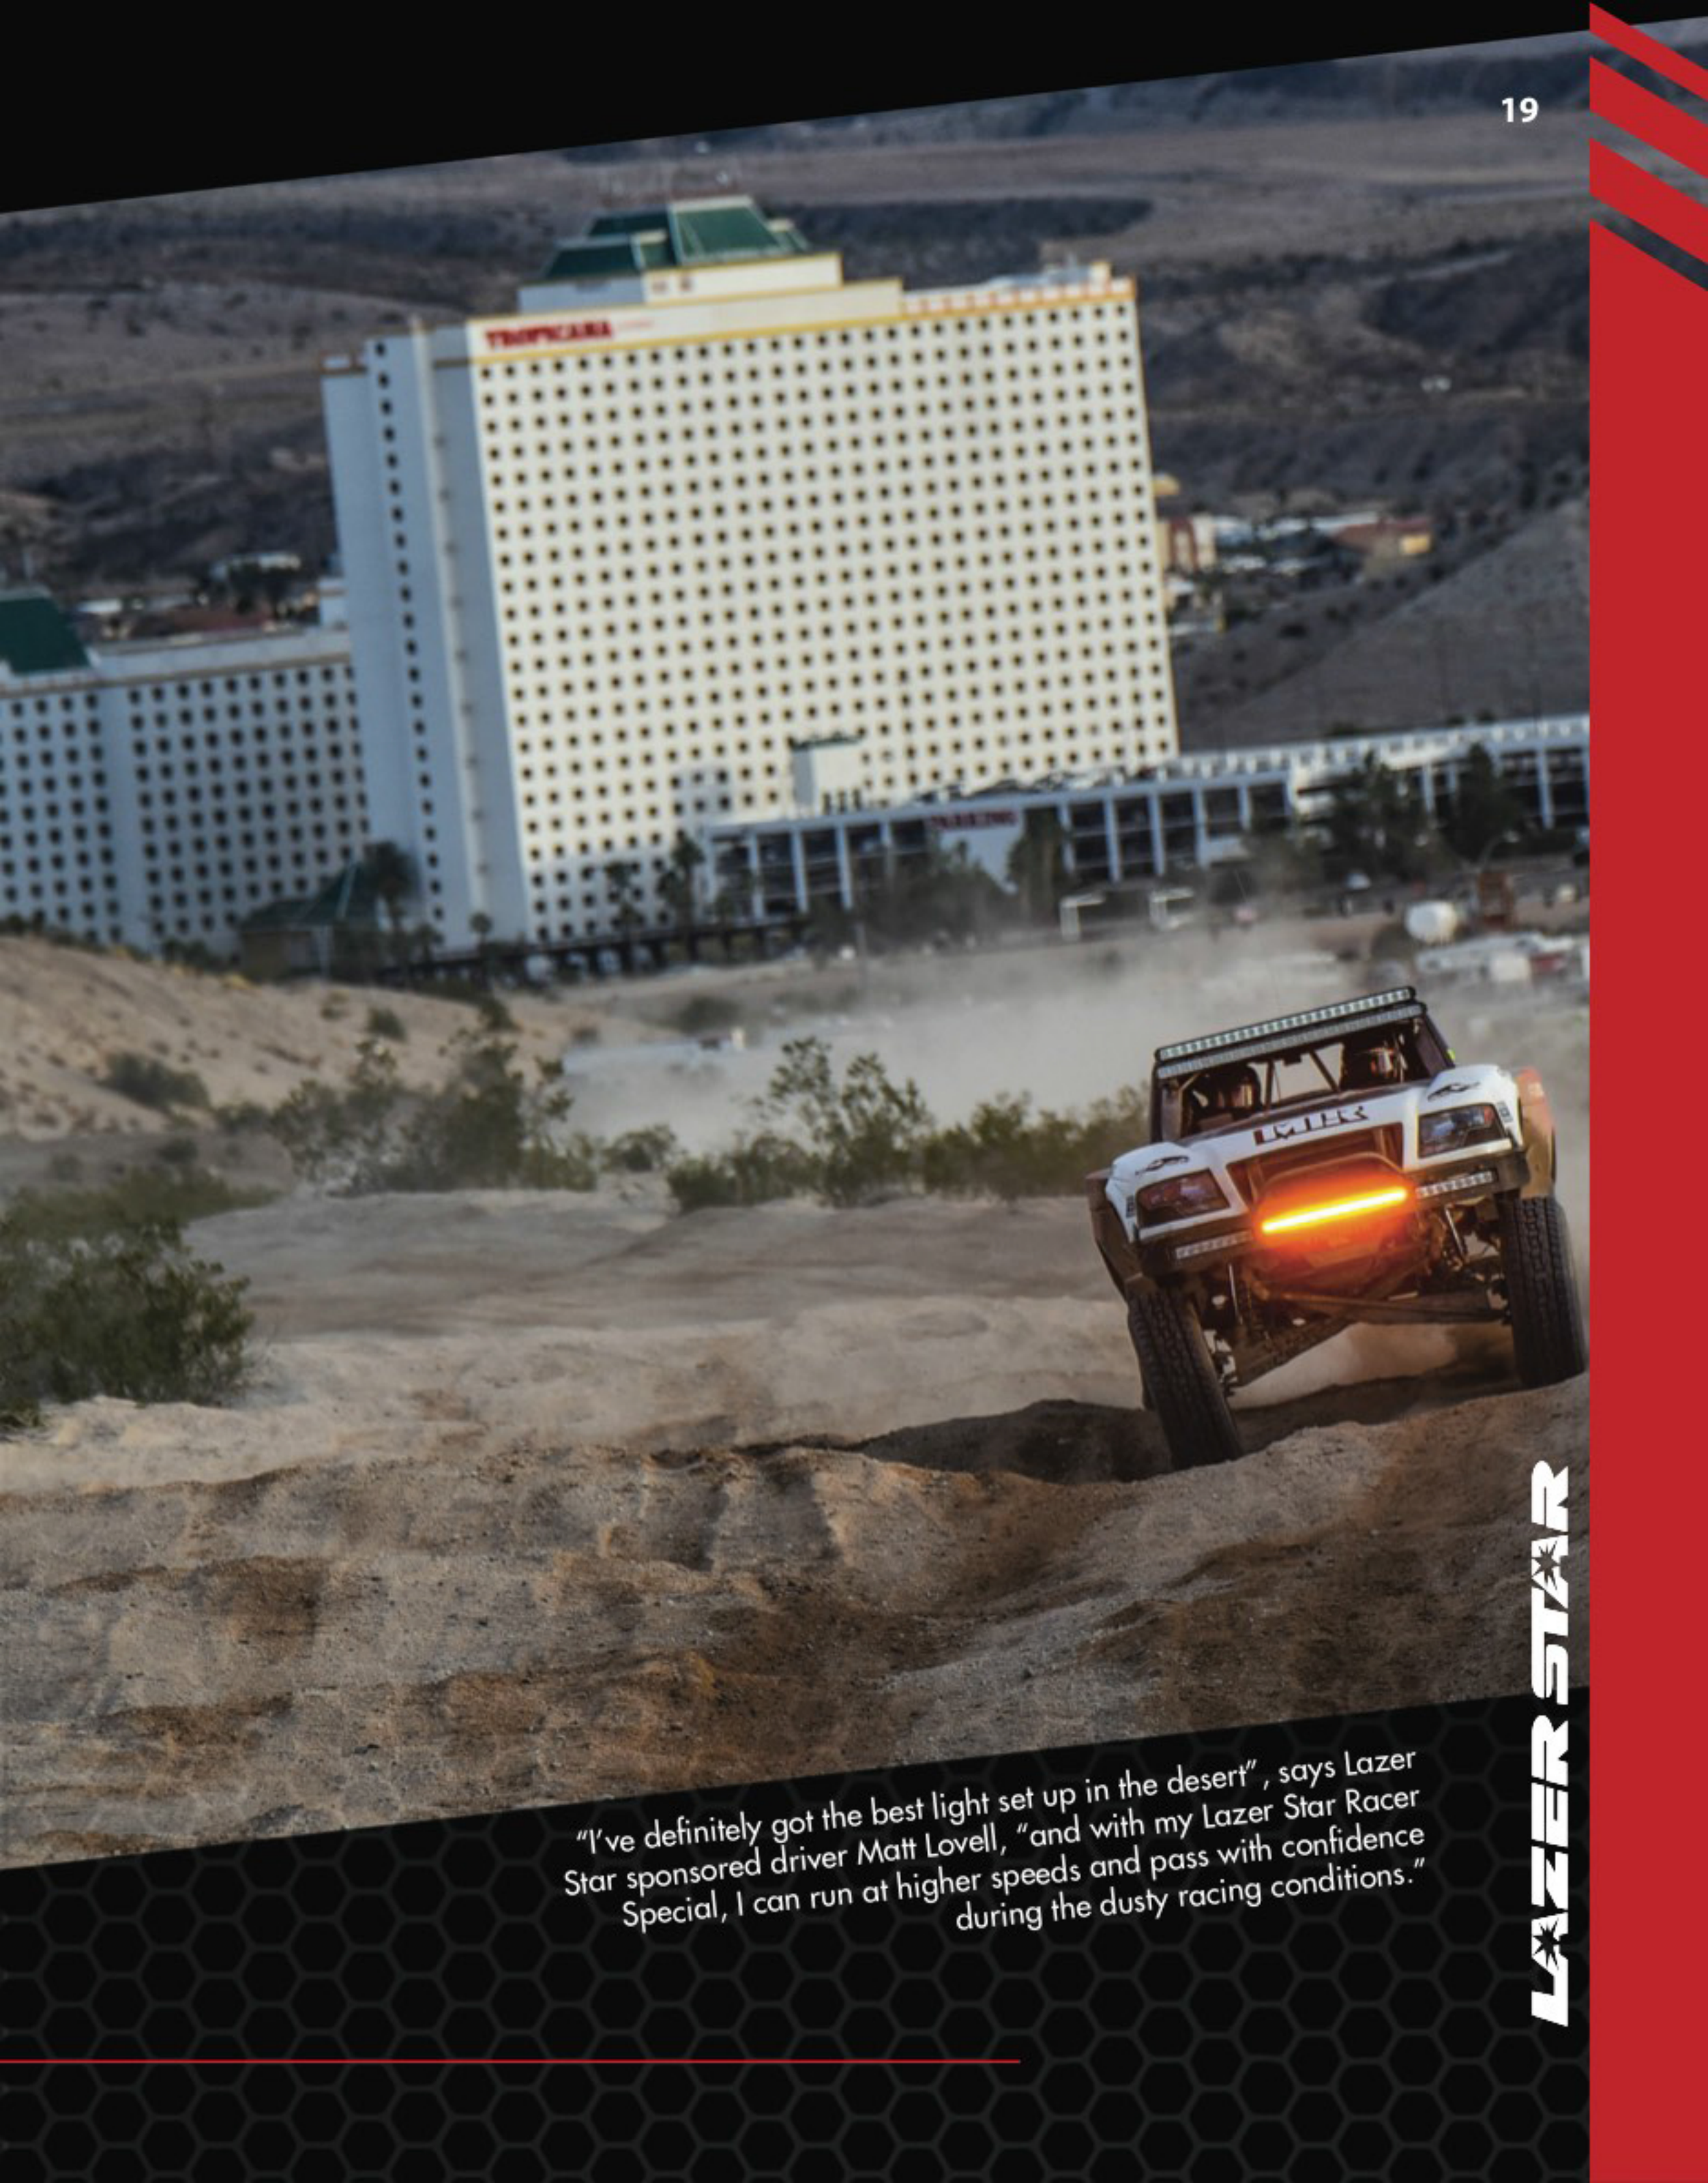

Lazer Star

"I've definitely got the best light set up in the desert", says Lazer Star sponsored driver Matt Lovell, "and with my Lazer Star Racer Special, I can run at higher speeds and pass with confidence during the dusty racing conditions."

BILLET LIGHTS

The Billet Light series represent Lazer Star Lights original product line introduced in 1993. This product line has always been hand-assembled in our own facility with parts procured and machined locally. The cornerstone of Billet Lights is the ability to outshine stock lighting by at least 30%, in a housing that is a fraction of the size. The circular beam pattern optics we utilize in spot or flood beam types makes Lazer Star the perfect on-road and off-road lighting solution.

- CNC Machined From solid 6061 Billet aluminum
- Quartz or Borosilicate Lenses
- Pivot mount is standard on all driving light configurations
- Rigid mount is the popular choice for turn signal applications
- Chrome/polish/black anodize finishes available
- Wire Kits and load equalizers available

Bullet 2-1/4" Diameter X 3-1/2" Long & Shorty 2-1/4" Diameter X 2-1/2" Long

- 35-Watt and 50-Watt driving lights
- 75-Watt and 100-Watt off road lights
- 20-Watt halogen turn signal
- Amber or red LED turn signal/brake light
- Rigid mount solution with 5/16-24 thread
- Pivot mount solution with 3/8-16 thread

Micro B 1-9/16" Diameter X 2-7/16" Long

- 35-Watt driving lights
- 20-Watt halogen turn signals
- Amber or red LED turn signal/brake light
- Rigid mount solution with 5/16-24 thread
- Pivot mount solution with 5/16-18 thread
- Micro B Point version pointed body and bezel also available

XS 1-3/16" Diameter X 1-7/8" Long

- Amber or red LED turn signal/brake light
- Rigid mount only
- XS Point version with pointed body and bezel also available

Orion 4-3/4" Diameter X 6" Long

- H4 DOT approved headlight
- Driving light in spot or flood
- 35-Watt, 55-Watt and 100-Watt H3 bulb options
- Cold rolled high-carbon steel housing
- Billet aluminum bezel and mounting pieces

LAZER STAR®
BILLET LIGHTS

CNC-Machined 6061 Billet

Pyrex Glass Lenses

6th Gen. Ultrabright 3mm LEDs

Stainless Steel Mounting Hardware
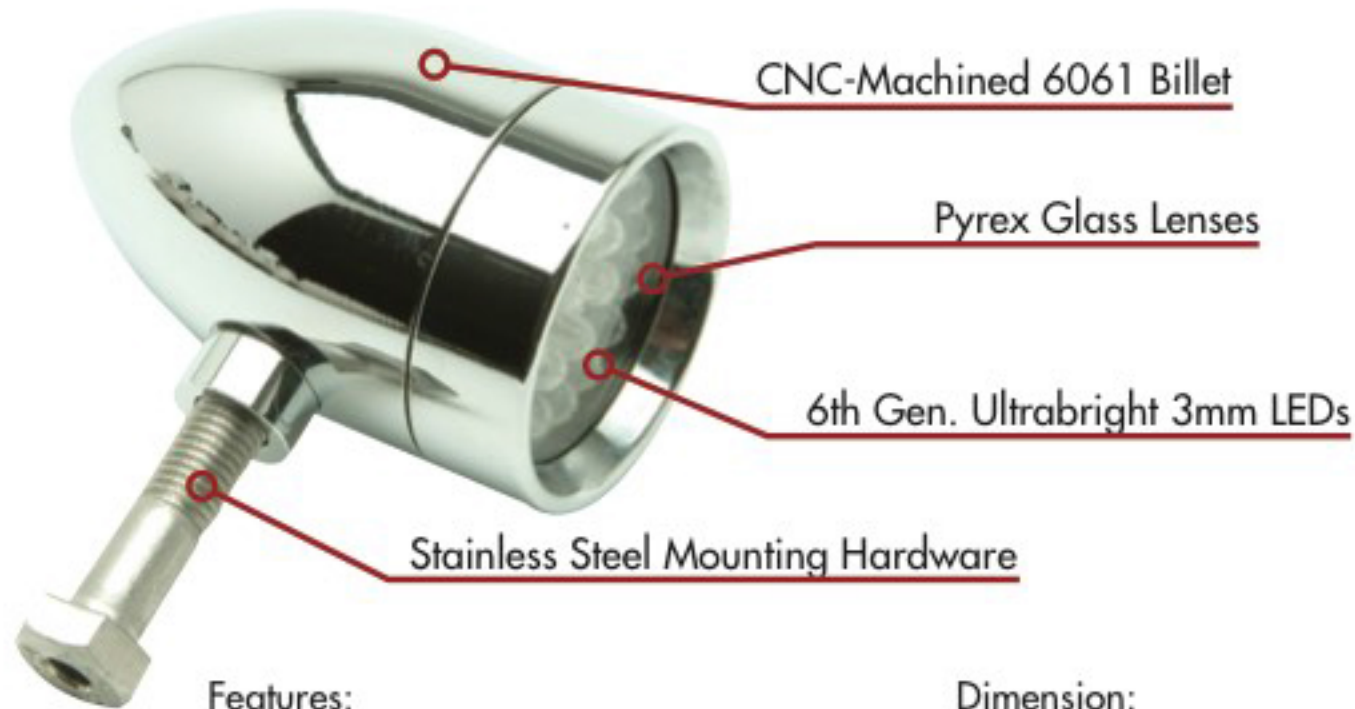

Features:

- All Lazer Star Turn Signals Available with a High-Quality Chrome, Polished or Black Anodized Finish
- High-Temp Teflon® Coated Aircraft Quality Wire
- Pyrex Glass Lens
- All Halogen Lights Come Standard with Single Filament 20 Watt Flood Bulb
- All LED Lights are 3-Wire Dual Circuitry with a 3-Year Replacement Warranty

Dimension:

Bullet: 2-1/4" Diameter x 3-1/2" Long
Shorty: 2-1/4" Diameter x 2-1/2" Long
Micro B: 1-9/16" Diameter x 2-7/16" Long
Micro B Point: 1-9/16" Diameter x 2-7/16" Long
XS: 1-3/16" Diameter x 1-7/8" Long

4 MOUNTING OPTIONS

Rigid Mount

5/16-24 x 1 ½" stainless steel hollow bolt & 5/16" spacer, best used when mounting to a flat location with rear access for wire exit and light tightening.

Pivot Mount

4 way pivot 5/16-18 x 1" or 3/8-16 x 1" stainless steel mounting bolt with sealed wire hole, commonly used for universal mounting.

Handlebar Mount

Ball joint allows light to mount to OEM Harley handlebar turn signal location. Can be used on any Pivot Mount style light.

Diamond Base

Chromed billet base mates with stock light bars on H-D FL series motorcycles. Also sold separately to use with any 5/16-24 threaded light.

JEEP KITS

JEEP WRANGLER JK KITS

Light Kit solutions for Jeep Wrangler JK, universal automotive license plate & touring motorcycle engine guard locations. All mounts and lights are also available separately to create a solution that is unique to your needs.

Jeep Wrangler JK Model 2007 - 2017

Our Jeep kits are designed specifically for the 2007 – 2017 JK Wrangler models. Whether you are looking for a roof bar solution or something more subtle like the A-Pillar mount, we have them.

Jeep High-Light Kit

Features choice of 10-Watt Enterprise 50", 3-Watt double-row Endeavor 52", 3-Watt single-row Atlantis 50" or PreRunner LED 50" in 3-Watt single and 3-Watt double configurations.

Jeep A-Pillar High-Light Bracket

- Fits 2007 – current Jeep JK Wrangler
- Accepts 50" To 52" LED light bar
- Steel construction with black powder coat finish
- Laser cut logo

Jeep A-Pillar Light Kit

Features a pair of A-Pillar location brackets with choice of 10-Watt Enterprise 6", 5-Watt Endeavour E5, or 3-Watt 4" round. Kit is also available with PreRunner 5-Watt cube.

Jeep A-Pillar Windshield Light Bracket

- Fits 2007 – 2017 Jeep JK Wrangler
- Utilizes factory hardware
- Steel construction in black powder coat finish

A-Pillar Hi-Lo Kit

Includes both A-Pillar high-light kit with A-Pillar kit, comes complete with lights. Available only in LX LED configurations.

– Light Bar and Bracket Available Individually

AUTOMOTIVE/ MOTORCYCLE KITS

Universal Automotive License Plate Light Bar Kit

A convenient, universal lighting option for trucks, Jeeps, SUV's, RV's, etc. A license plate mount enables users to enhance their vehicle's lighting capabilities while utilizing existing front license plate mounting locations. Kits available in 10-Watt, 3-Watt single row, or 3-Watt double row. Brackets are a black powdercoat finish.

Motocross Universal Off-Road Headlight Kit

This easy to use universal motocross bracket makes converting your bike for riding or racing after dark a breeze. The adjustable center slot allows for the bracket to adjust to various triple-clamp widths for universal fit. Featuring our most popular lighting solutions in 10-Watt, 3-Watt or 5-Watt, or create your own solution by purchasing the mount separate and pairing it with the best lights for your next adventure. Bracket features lightweight aluminum with black powdercoat finish.

- Universal mounting bracket adjusts to triple-clamp width
- Kits configured with light and mounting bracket
- LX LED are AC/DC compatible and can run directly from Stator
- PreRunner LED are DC only and require a battery to function properly
- Kits are compatible for use with stock Stator

Motorcycle Engine Guard LED Touring Light Kit

Advancement in compact high output projection LED has allowed us to bring riders the light needed for safety and reliability. Easy to use kits allow several types of lights to mount directly on your bikes 1.25" engine guards. Lights and mounts are pre-kitted with our 10-Watt, 3-Watt and 5-Watt options. However, clamps and lights are available separately to create the solution that is perfect for your riding style.

- Kit includes 1.25" tube clamp and set of lights
- Wire kit recommended

LAZER STAR

UTV & ATV LIGHT KITS

UTV and ATV Lighting Kits Available in LED or Halogen Solutions

UTV A-Pillar Light Kits

Lazer Star Lights now offers a turn-key solution for mounting accessory LED lights to your UTV. Our UTV kit includes everything needed to outfit your vehicle with more powerful auxiliary lighting to the A-pillar or bumper locations. **Check our website for the newest additions to this line.**

- Kit Includes pair of LED Lights with specific size tube clamps, in-line fused Wire kit and rocker switch.
- 2x2 lights also include a 1 foot Daisy Chain Wire
- 1.5", 1.75", 2", 38mm, 41mm, and 45mm clamp size options
- Lights and tube clamps available separately for custom set-ups.

ATV Light Kits

Designed specifically for sport quad applications

LX LED ATV

From 10-Watt single row, or the 3-Watt double or 3-Watt single row, the LX LED ATV kits deliver the power of light.
- AC or DC Input 9-32V
- LED provides higher efficiency allowing for a stock Stator to handle multiple units and provide brighter lighting
- Stock charging systems can typically provide more light when utilizing LX LED bars versus other older technologies
- ATV LED kits offer four different "Drop" brackets to allow for best position of light on ATV steering stems.
- Brackets available separately

Lazer Star Billet Lights *Made in the USA*

Billet Light ATV kits are the original line of ATV kits offered by Lazer Star. A tried and true solution if you are looking for the style and function of the original Lazer Star Lights.

- Polished or black anodized finish
- Lazer Star housings and brackets are machined from solid 6061 Billet aluminum
- Stainless steel mounting hardware
- Quartz glass lenses
- High-Temp Teflon® coated aircraft quality wire
- ATV kits come in spot/flood combination
- Universal kits featuring halogen lights

ACCENT LIGHTING

iStar Pod Lights
Rock Out With Your Pod Out!

iStar Pod lights offer superior illumination in a small, flat housing. These lights are perfect for any interior lighting, accent lighting, rock lights, or custom lighting applications where powerful compact LED lighting is needed. Offered in 5 solid colors or color-changing RGB; featuring bluetooth with smart phone controller app.

Available colors
- Red, white, blue, green, and amber
- Plug n' play olor changing RGB

Kits
- Solid colors - in single, two, or six pack options
- RGB – six pack only

Optional
- Radius and 30° backer sold seperately

LED Whip Bulbs

Efficient, affordable, and easy to use LED Whip bulbs.
- 1156 bayonet-style base fits most whip poles
- 3 year replacement warranty on LED function
- Green, purple, white, blue, red, and amber colors
- Low amperage draw means it can be left on for hours!

Lazer Star FlexLED

The original: Lazer Star FlexLED utilizes flexible tubing with an easy-to-use 3M adhesive backing. Available in multiple lengths and colors, they are perfect as dome lights, taillights, accent lights for engines, chrome, and under car lighting. Wire in diode for dual function, sold separately.

- 1", 3", 6", 12", or 20" lengths housed in clear 3M adhesive flexible tubing
- Available in red, amber, blue, green and white
- Custom lengths up To 40"
- LED can be cut every ½" or 3 LED segments
- 100,000 hour life rating
- 3 year warranty

BilletLED

Billet aluminum housing, with ultra-bright FlexLED imbedded inside. Lazer Star's BilletLED is the answer to customized interior lighting as well as tail/brake lights or custom accent lighting. Offered in 5 colors, 3 lengths and 3 different mounting positions. Wire in diode for dual function, sold separately.

- CNC machined billet housing
- White and red color options – amber, blue and green available as special order
- 3 mounting positions - back mount/bottom mount/or radius tube mount
- 3 lengths - 4", 7", and 12"

OEM UPGRADES

LED HEADLIGHT CAPSULES/FULL FACE TURN SIGNAL RETRO-FITS

LED Capsule Upgrade

LX LED upgrade capsules are Plug n' Play to upgrade most applications. Cool white 5500° kelvin feature 20,000 hour life cycle, with a low 1.09 amp draw at 13.8 volts. Capsules measure 1.75" diameter x 3.25" long and carry a 3 year warranty. These capsules meet EU safety standards.

*   Powerful 10 Watt Cree XM-L LED's
*   Lamp base options:

9005	30w	H13	40w
9006	30w	H3*	30w
880*	30w	H4	40w
H11	30w	H9	30w
		And more!	

Note: These lamps are UPGRADES and not replacements for the base types shown and are for off-road use only. Know the laws in your state and municipality prior to upgrading. *These items are larger than originals. Check your clearance behind the reflector prior to ordering.

Full Face Retro

Retrofit LED boards fit Harley Davidson bullet 'Deuce' style or 'Classic' style lights. Our boards come pre-wired with standard 1156 or 1157 bayonet-base in an Amber or Red LED. These easy to use plug-n-play LED's give you 30% BETTER VISIBILITY over existing incandescent bulbs. Full Face Retro's come with a 3 year warranty.

*   47 count LED board
*   6th generation LED provide the best optics available
*   1156 or 1157 bayonet-style base for Plug n' Play, user friendly installation
*   Load equalizer or no load flasher required (except H-D can bus)
*   3 year warranty
*   1156 red LED kits available with red lenses included

ELECTRICAL

Wire Controllers

Lazer Star central light controllers are for your Jeep JK, UTV, Truck, SUV, or other universal applications. Our wire controllers make installation of accessories and lights a snap by providing a central location under the hood to house up to 6 circuits, while only needing to run a single line through the cab to the switch panel. Comes complete with everything you need for plug n' play installation.

- 3 types available: Jeep JK, UTV, or universal application
- Easy plug n' play installation
- System includes*: switch panel/carling style back-lit switches or touch pad/80A circuit breaker/relays
  20 & 30 amp fuses/ACC tap connection
- Mounting face plate or touch pad

Wire Kits

Wire kits are custom designed for reliable service with specific Harley-Davidson, general motorcycle, off road, and UTV configurations. These are available with a relay that features a built-in fuse for higher amperage situations or in a standard fused version for lower amperage applications.

- Feature all necessary wire, connectors, shrink tube, tie wraps and exclusive Lazer Star fused relay
- Harley-Davidson specific model that includes a handlebar mounted switch
- General motorcycle model that includes a sealed toggle switch
- Off-road model designed for Jeeps, Trucks and Sandrails
- LX LED model for use on a single light or low amp draw applications
- Round Rocker switch substitute available for most kits

Load Equalizers

Load equalizers are often needed to make flasher systems work correctly. We offer a wide range of equalizers by Namz, Badlands, and Biketronics. Most vehicles require a load equalizer when changing from the factory turn signals.

- Equalize the resistance Load on your turn system to allow correct flashing brightness and speed when using aftermarket turn signals including LED
- Available for most years Harley-Davidson in specific plug n' play applications
- Available in wire-in applications for use on any vehicle.
- Load equalizers NOT REQUIRED on can bus equipped Harley-Davidson

Multi-Function

- Add run & turn or run, turn & brake function to your aftermarket turn signals
- Use the Lazer Star converter for two mode operation of run/brake or run/turn on any vehicle (LED or standard up to 50-Watt per light)
- Use Badlands Illuminator for three functions of run, turn and brake for LED or Halogen Illuminator features a built-in load equalizer : wire-in for any vehicle or plug in for Harley-Davidson
- Use Biketronics Frontrunner, Tailstopper, and Tailbones for Harley-Davidson applications
