# New for 2016!

## 610 ANTI-VIBE

**SHELL:** Durable nylon mesh for air flow. Leather trim and reflective piping. Digital embossed palm for enhanced grip

**FEATURES:** 3 levels of vibration control with interchangeable gel pads.

1. For the ultimate in anti vibration we developed a 4mm gel insert to be slipped into the gloves chambers called Anti Vibe 1. These chambers are located at the base of the fingers and the heel of the glove. The anti Vibe 1 inserts are packaged in a handsome clam shell package (see photo) that is attached to the glove and which also helps explain the three levels of vibration control.

2. When a mid level of anti vibration control is required, we have developed Anti Vibe 2 gel inserts with 2MM of gel to slip into gloves chambers. These inserts are already placed inside the glove when the glove is purchased and can be removed at any time.

3. If minimal anti vibration is required no inserts are placed in the glove chambers although the glove is still padded with foam. We call this Anti Vibe 1.

- Touch technology
- Reflective Trim for added safety
- Neoprene cuff for secure fit

## CUSTOMER TESTIMONIALS

*"These gloves are a must for cold weather. Dry and warm. Used them down to 25F and no issues. Gore-tex is the only insert that I will use for wet weather."* - **4150 Gore-Tex All Season**

*"The Aventador gloves are no bull. These are some serious gloves.*

*With huge gauntlet, built in wiper blade and Gore-tex inserts, these gloves have kept my hands toasty warm in sub-20 degree weather in rain and sleet during my 20 min commute*

*Pros: breathable liner. No clammy hands at the end of a ride. Fits perfect."* - **Devin M. - 4294 Aventador Gloves, 5 star rating.**

*"This is the second pair of Cold Throttle gloves I have purchased. The first pair lasted at least five years of riding virtually every day in all climates year round. The leather is well crafted and supple, and the gloves are very comfortable. I wear them in temps down to 30 degrees F. Great gloves Olympia! Keep up the good work."* - **Kevin S. - 4370 Cold Throttle, 5 star rating.**

*"Quality is great, the gel prevents vibration and the ventilation by riding wind through the perforation makes for even more comfort in 90-100F summer in New Mexico. I'll buy again after I wear thee out!"* - **Coenraad A. - 407**

*"I live in Arizona and ride year round. So I am very hard on my riding gear. Olympia gloves are the only gloves that will stand up to the daily wear/sweat/sunshine. Every other brand I tried lasted one season max, and some only lasted a few months. My last pair of Olympias lasted five years, including a freeway speed slide on pavement. They have a good selection of sizes and types, I would recommend these gloves to anyone who rides."* - **Cecil S. - 144 Deerskin Classic**

### CUSTOMER TESTIMONIALS

*"These gloves are amazing. They are incredibly warm. Avid skiers know there is no substitute for leather and the same goes for motor cycle riders. They are totally wind proof and extremely supple and comfortable. The large roomy cuffs easily cover and seal even the most bulky jacket sleeves. Was going to get electric gloves, but get the job done way more simply." - Stephen P.*

*"Love them! I ride all year in any weather in the NorthWest. These keep my hands dry and warm, even in all day downpours. This is my second pair of gloves by Olympia, and I'm very pleased." - David G.*
