## 'Super King' Gas Tanks

A new twist on the original Sportster 'King' tanks. We cut two shell blanks apart and weld them back together to create this all-new, extra-wide 'Super King' gas tank. These tanks are 2" wider than the original 'King tanks' providing additional fuel and a unique 'fat look' for any custom build. They use screw-in vented gas caps and come in high-tunnel and low-tunnel versions. The universal mounts facilitate a quick installation on most custom applications. Tanks have bare metal finish and have been pressure tested.

- 866SKLT** 3.2-gallon low-tunnel tank
- 866SKHT** 3.2-gallon high-tunnel tank

## Stock-Style Frames For 1996-2017 Dyna Models

These frames are offered in early- and late-style configurations. The early version uses 1996–2005 5-speed Evolution and Twin Cam drivelines in conjunction with 130-series rear tires and 1½" or 1⅝"-wide rear belts. The later version uses 2006-up 6-speed Twin Cam drivelines for 200-series rear tires and 1⅝" or 1"-wide rear belts. They also offer both standard Dyna and Dyna Wide Glide neck angles. These frames feature a round DOM 1¾"-diameter, 3/16"-thick wall backbone with a custom steering neck unlike the square backbone and unsightly box neck of the stock frames. The steering neck does not have provisions for a fork lock, but the backbone has a machined slot under the front to allow stock wiring to be pulled thru it, just like stock frames. The downtubes and frame rails are 1¼"-diameter,

.120"-thick wall DOM tubing. Each frame includes the stock fuel tank mounts as well as mounts for the stock regulator, kickstand, oil tank, battery tray, electrical panel, motor mounts, mid and forward control mounts, and the rear brake reservoir. The fender struts are made from 1/2"-thick steel plate and will accept stock fenders and shock bolts. The stock OEM swingarms and components will work with these frames, which are great for a crash repair, or building a new ground-up custom.
