POWERMADD HANDGUARDS

Handguards are a great powersports accessory. They can be used on anything with handlebars and protect your exposed hands from flying debris — dirt, rocks, ice, bugs, etc., and keep your hands warmer in cold weather riding. PowerMadd was the first company to introduce a dual-material handguard with a snap-in/snap-out vent cover, and the first to offer a 1 year warranty! We offer five varieties of handguards:

FUZION

Our newest guard offers the most coverage with a flexible, durable material and the least amount of weight. The new design sweeps back to cup your hands and offers the ultimate protection from the cold. Constructed of closed-cell AEPE molded foam which is waterproof and extremely durable.

Sentinel

The Sentinel Handguard features an updated design that better matches the style of today's ATVs, motorcycles and snowmobiles. The Sentinel is also our largest handguard and includes a snap-in/snap-out vent cover so that you can get better airflow during warm weather riding.

Accessories for the Sentinel include: LED Light Kit, mirrors, Hand Wrap, foam extension (Sentinel Armor) and Gauntlet X2.

Star Series

The Star Series is PowerMadd's signature guard and changed the way riders think about handguards. It was the first handguard to feature a snap-in/snap-out vent cover and the first to offer handguard accessories. The Star Series Handguard provides over 30 sq. in. of hand protection.

Accessories for the Star Series include: LED Light Kit, mirrors, Hand Wrap, gauntlets and Race Flare.

Trail Star

A simpler version of the Star Series, the Trail Star is a solid color guard with no snap-out vent cover. The Trail Star is a less expensive option due to its simpler design. It uses the same mount kits and many of the same accessories as the Star Series.

Accessories for the TrailStar include: mirrors, Hand Wrap, gauntlets and Race Flare.

PowerX

Designed for motocross, the PowerX features a handguard and mounting system that work together to provide protection and flexibility! Both the guard and mounting bracket flex upon impact, so if you happen to dump your bike, simply pick it up and the guard springs back into place.

The smaller size of the PowerX also makes it a great option for mini-quads!

Sentinel Handguards

The Sentinel Handguard features an updated design and improved functionality. The Sentinel provides over 40 sq. in. of protection — a 38% increase over the Star Series guard.

The Sentinel is constructed of two different types of plastic — a stiff spine for durability, and a softer body for flexibility. In warmer weather you can snap out the vent cover to increase air flow and cool your hands while maintaining protection.

Accessories include: LED light kit, mirrors, Hand Wrap, foam extension (Sentinel Armor), and Gauntlet X2.

Note: Mount kit sold separately - see below.

New Color - Charcoal / Hi Viz #34425

Part #	Description
34400	White / Silver
34401	Dark Yellow / Black

Sentinel Mount Kits

Our Sentinel mounting kits install in minutes and get you riding fast. Sentinel mounting kits include aluminum brackets, hardened steel straps and stainless steel hardware making them strong and long lasting. They mount near the grip so they will work on both standard (7/8") and oversize (1 1/8") bars.

The Tri-Mount kit (34269) will only work on 7/8" bars with at least a 2" rise. They mount past the bend and work great on most utility ATV's and snowmobiles that do not have extra room near the grip.

Part #	Description
34450	Sentinel Snow Mount
34452	Sentinel MX Mount (ATV/Moto)
34454	Sentinel Hayes Brake Mount (Snow) (Fits: Arctic Cat '12-'18; Polaris Axys '15-'20, Yamaha SR Viper '13-'18; Yamaha Sidewinder '17-'18)
34456	Sentinel Hayes Stealth Brake Mount (Snow) (Arctic Cat '19-'20 Yamaha SR Viper & Sidewinder '19-'20)

34269 Installed on Snowmobile

Sentinel LED Light Kit

Increase your visibility and be seen with the new Sentinel LED lights. Simply snap out your vent covers and snap in the LED light kit. They can be controlled by your key or use the included on/off switch.

These bright LED lights (200 lumens each) provide additional visibility and safety - allowing you to see more and be seen easier. The LED lights offer improved visibility while only consuming 4 watts each. These are a great addition to any ATV, motorcycle or snowmobile. NOTE: Sentinel Handguards and mount kit sold separately.

Part #	Description
34490	Sentinel LED Light Kit
34495	Sentinel LED White Vent Cover

Sentinel Armor

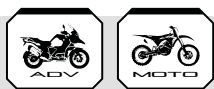

The Sentinel Armor permanently attaches to the handguards adding 40% more protection against roost, wind, snow, and debris.

The Sentinel Armor is constructed of molded light-weight closed-cell AEPE foam, which is both waterproof and extremely durable. All mounting hardware is included and the Armor works with the Sentinel Mirror Kit (mirror cannot be folded in) and Hand Wrap Kit.

Width=13.5"
Height=8.75"
Depth=4.25"

Part #	Description
34477	Sentinel Armor

Sentinel Handguard LED Turn Signal Kit

Maximize your visibility to approaching vehicles by adding PowerMadd's super bright Sentinel LED Turn Signal Light Kit. The light includes a white LED running light which turns off when the amber turn signals are activated. The turn signals operate in conjunction with your original equipment turn signals. Simply snap out your Sentinel handguard vent covers and snap in the LED turn signal light kit. Easy four wire installation (power, ground, left turn signal, right turn signal).

Note: Motorcycles without original equipment LED turn signals will require a fixed rate turn signal flasher.

Part #	Description
34491	Sentinel Handguard LED Turn Signal Kit

Sentinel Handguard Mirrors

The Sentinel Mirror Kit includes two mirrors and all mounting hardware for quick, easy installation. The mirrors are 2.75" in diameter and are mounted at an angle. They can be rotated to dial in the perfect rear view.

The mirrors can be mounted in a fixed or folding configuration. Folding allows the mirrors to be folded in and out of the way of snowmobile covers. In fixed mode the mirrors are compatible with the Sentinel Armor and Hand Wrap.

Mirror in folded position

Part #	Description
34455	Mirror Kit (Pair - includes fixed and folding mount)

Star Series Handguards

The strongest protection you can buy. The Star Series Handguard is designed to take a beating. The mounting brackets are tough aluminum, while the guard itself is made of two different types of plastic—a stiff spine for durability, and a softer colored body for flexibility.

The Star Series protects your hands from flying debris, rocks, bushes, branches, mud, and cold. Plus it keeps your hands warmer by blocking the wind in cold weather. In the summer, simply snap out the removable vent cover to let air flow through. In the winter, try one of our extra protection accessories – Race Flare or Gauntlet.

Note: Mount kits sold separately.

Star Series / Trailstar Mount Kits

Our universal mounting kits install in minutes and get you on the trail or track fast. Mounting kits 34250 and 34252 are made of aluminum brackets, hardened steel straps and stainless steel hardware for longer life. They mount near the grip so they will work on standard 7/8" and oversize (1 1/8") bars. 34269 works only on 7/8" bars. Works great on most utility ATV's or any other 7/8" bars with at least a 2" rise.

34269	Tri-Mount

34250 Installed on Snowmobile

34252 Installed on ATV

34252 Installed on Motorcycle

34269 Installed on Polaris Rush

Handguard Gauntlets

Keep your hands warm and dry no matter what the conditions. Designed to work with our Sentinel, Star Series and TrailStar Handguards, these gauntlets keep out the cold, wind, rain and mud and are great for snowmobiles, ATVs and motorcycles. The unique “stay-open” design makes it easy to grab your bars and see your controls. The gauntlet extends your riding season and allows you to ride with thinner gloves, giving you a better feel. Sold in pairs.

Gauntlets X2 - Sentinel, Star, Trail Star

Part #	Description

Part #	Description
34258	Star/Trail Star Handguard Gauntlets - pair

Trailstar Handguards

The Trail Star Handguard is a lower cost option that gives you the same great protection as the original Star Series Handguard without the removable vent cover. They use the same mount kits as the Star Series as well as the optional Mirrors, Race Flare, Hand Wraps, and Gauntlets.

Note: Use Star Series Mount Kits - sold separately.

Part #	Description
34100	Black
34102	Red
34103	Green
34104	White
34105	Yellow

Harley Davidson Star Series Mount Kits

Easily add handguard style and functionality to your Harley with the Star Series Harley Davidson Mount Kits. Each kit works with the PowerMadd Star Series handguard which is available in 12 colors, including the new matte black which was specifically developed for the Harley Davidson enthusiast. Mounting brackets are CNC'd from 6061 billet aluminum and anodized in a black finish to match your stock Harley Davidson controls.

Protect your hands from road debris and that cold winter chill. And on those hot summer days just simply pop off the featured vent cover to allow the wind to cool off your hands while cruising down the highway. Protect yourself while giving your ride a little more attitude.

34264	2015-2019 Softails w/mechanical clutch.

Star Series LED Handguard Turn Signals Kit

Maximize your visibility to approaching vehicles by adding PowerMadd's super bright Star Series LED Turn Signal Light Kit. The light includes a white LED running light which turns off when the amber turn signals are activated. The turn signals operate in conjunction with your original equipment turn signals. Simply snap out your Star handguard vent covers and snap in the LED turn signal light kit. Easy four wire installation (power, ground, left turn signal, right turn signal).

NOTE: These lights are COB (Circuit on board) LED Light strips and will require the use of a load equalizer if model is Non can bus. Models with Can bus wiring do not require the use of a load equalizer.

Running Light On

For an even easier installation, use one of our Plug-in Play wire harnesses! The 34292 and 34293 wire harnesses will eliminate the stock turn signals.

Part # - 34292-Fits -2014-2018 Street glide models (FLHX); 2015-2018 Road glide models (FLTR); 2016-2017 Dyna Low Rider S (FLDLS) Models

Part # - 34293- Fits -2007-2017 (Except Dyna Low Rider S FXDLS) & 2004-2013 Road Glide(FLTR) Models

34290	Star Series LED Light Kit
34295	Star Series LED White Vent Cover

Star/TrailStar Handguard Mirror Kit

This mirror set looks great with the Star Series and Trail Star Handguards. The 1.875" spot mirror is angled and rotates 360 degrees to allow for optimal viewing adjustment. These mirrors are great for trail riding on ATVs, motorcycles, and snowmobiles. The included Spring Kit turns your Standard Mirror Kit into a Fold-Down Mirror. The mirrors will work with the optional Extensions, Race Flare and Hand Wrap, but not with the Gauntlets. Folding mirror will not work with Hand Wrap Kit or Race Flare.

Mirror also fits
Polaris Handguards

Mirror in
folded position

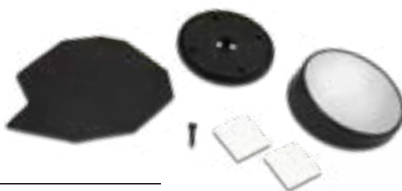

Part #	Description
34289	Mirror Kit (Pair - includes Fixed and Folding)

Large Mirror Upgrade Kit

The Large Mirror kit is an upgrade to our standard mirror kit # 34289. The large mirror is 2.75" in diameter (46% larger than the standard mirror). Kit includes one (1) large mirror and all necessary hardware to easily mount to a standard mirror.

Part #	Description
34257	Large Mirror Upgrade Kit (one side only)

Hand Wrap Attachment

For extra protection in the woods, or on the street, track or trails, the Hand Wrap Attachment offers the ultimate in protection and flexibility. It **attaches to existing Sentinel, Star Series and Trail Star Handguards** with just two bolts and features a unique safety bend that provides wrist relief on tight curves. The included mounting hardware fits both steel or aluminum bars. NOTE: handguards and handguard mount kit not included.

Part #	Description
34253	Hand Wrap Attachment Kit
34274	Aluminum Bar Replacement end Kit
34275	Steel Bar Replacement end Kit

Star/TrailStar Race Flare

The Race Flare permanently attaches to the Star Series and Trail Star Handguards and doubles the amount of protection!

The Race Flare is constructed of molded light-weight closed-cell AEPE foam, which is both waterproof and extremely durable. All mounting hardware is included. Works with PowerMadd Mirror Kit and Hand Wrap Kit. Will not work with folding mirror.

Width=13"
Height=8"
Depth=3"

Part #	Description
34277	Handguard Race Flare

Star Series Extension

When its cold, wet or just plain muddy; when you need more protection, the Star Series Handguard Extension is your answer. Simply snap out the vent cover and snap on the extension for extra protection and warmth.

Part #	Description
34240	Black

Parking Brake Adaptor

Want to run guards on a Yamaha Raptor, Banshee, or Wolverine? Now you can and use your parking brake. Handguards get in the way of the parking brake lever and prevent its use. With this simple adaptor you can reposition the lever so that it can be used with PowerMadd Sentinel, Star Series, TrailStar, PowerX and most other guards, as well.

Allows lever to swing over the handguard.

Part #	Description
44262	Parking Brake Adaptor

FUZION Handguard

The latest in handguard technology from PowerMadd. The new FUZION guard features the ultimate in hand protection with a unique design and flexible material. The expanded coverage area sweeps back toward your hand, significantly increasing coverage making it perfect for cold, muddy or wet conditions. The FUZION features a unique two position mount and is constructed of molded **light-weight** closed-cell AEPE foam, which is both crushproof, waterproof and extremely durable in roll over situations.

Handlebar Risers

It's simple—machines are made for the “average” rider. Adjusting your bars to your exact height reduces fatigue, increases comfort and improves control.

Sitting or Standing—both can be comfortable

Today's machines are made for both sit down and stand up riding. You want a bar height that makes both modes comfortable. Raising your bars can make it easier to steer when sitting and improves control when standing without breaking your back! You should be able to reach your bars when standing straight up with a slight bend in your knees.

How High Can I Go?

The best way to tell is to unbolt the top clamps on your handlebars and see how much slack you have in your cables. Most snowmobile bars can be raised up to 3” without changing the cables. On ATVs the maximum is about 1.5 inches. For snowmobiles you can easily increase the length of your throttle cable and brake line with our Throttle Cable Extension and Extended Length Brake Line.

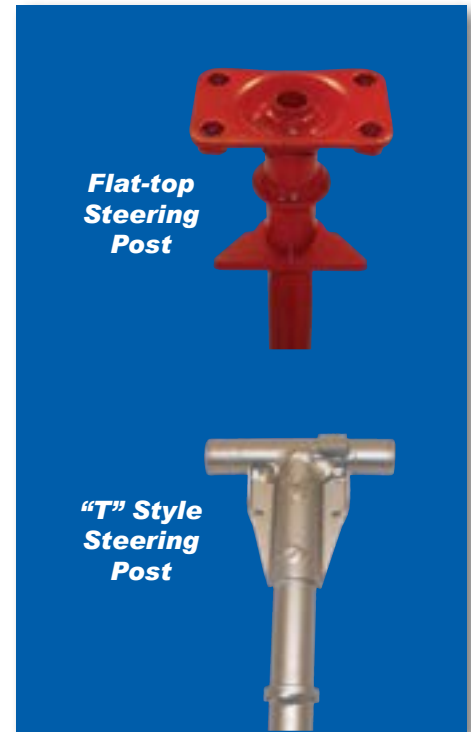

In order to get the right riser system, you will need to know if the top of your steering post is either a flat-top or a “T” style steering post - see photo to the right. Don't know - no problem, just use our Riser Database - see below for details.

Pivot or Straight Riser?

Risers come in two basic styles - pivoting and straight. Pivoting risers go on top of a “T” post and allow you to pivot the riser front to back, and your handlebars up and down. This gives you the most flexibility for the position that fits you the best.

Straight risers sit in between your flat post and handle bars. They raise your bars, but keep the same angle as your steering post - which may move your riding position back.

PowerMadd has the options you need to raise your bars!

Adjustable Height Pivot Riser

The Adjustable Height Pivot Riser lets you change your bar height up to 3" instantly! Want to go from sitting to standing - no problem, just pop the cam lever, readjust your bars, lock it in and go. The Adjustable Pivot Riser works on any T style post - wide or narrow. Will also work on flat posts when using a Pivot Adapter.

Lowered

Raised

Shown in narrow post mount position, to mount on wide post simply mount with wide end down, as shown on sled.

Part #	Description
45590	Adjustable Pivot Riser 5" - 8"
45591	Adjustable Pivot Riser 4" - 6"

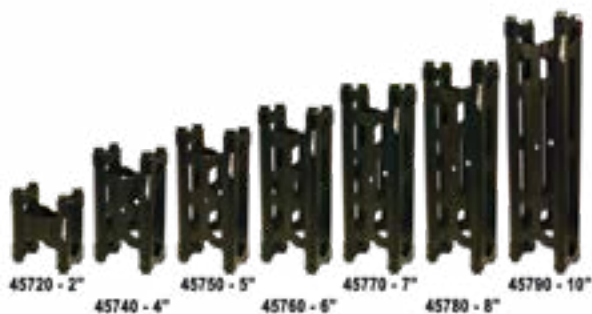

Pivot Risers

PowerMadd's latest pivot risers use a modern design that is both durable and light weight. All mounting hardware is included (4 caps and 8 bolts) making it compatible with any brand - all you need to verify is the width of your T-post. The risers are designed with cut outs on the top and bottom to allow wires to be routed through the inside of the riser. Extended throttle and brake lines may be required with taller risers. See our riser fitment chart for details.

Narrow Pivot Risers - are designed to fit any snowmobile with a (3-3.5") wide T-style steering post. These risers will fit the Ski Doo Gen 4. Narrow risers **DO NOT** work with PowerMadd Pivot Adaptor Kits - use the wide version.

Wide Pivot Risers - are designed to fit any snowmobile with a (4-4.5") wide T-style steering post or a flat top steering post with a PowerMadd Pivot Adaptor Kit.

Part #	Description
45720	2" tall X 3" wide - 7/8" bar
45740	4" tall X 3" wide - 7/8" Bar
45750	5" tall X 3" wide - 7/8" bar
45760	6" tall X 3" wide - 7/8" bar
45770	7" tall X 3" wide - 7/8" bar
45780	8" tall X 3" wide - 7/8" bar
45790	10" tall X 3" wide - 7/8" bar

Part #	Description
45820	2" tall X 4" wide - 7/8" bar
45840	4" tall X 4" wide - 7/8" Bar
45850	5" tall X 4" wide - 7/8" bar
45860	6" tall X 4" wide - 7/8" bar
45870	7" tall X 4" wide - 7/8" bar
45880	8" tall X 4" wide - 7/8" bar
45890	10" tall X 4" wide - 7/8" bar

Pivot Adaptor Kit

The Pivot Adapter turns a flat-top steering post into a "T" style post, allowing you to use a Pivot Style Riser Block (**4.25" wide only**) to raise your handlebars and pivot them forward or backward in order to gain maximum riding comfort. The Pivot Adapter alone raises your bars 1.25". An additional 2-10" of height can be obtained by adding a Pivot Style Riser Block. Most snowmobiles can accept a pivot adapter and 2" pivot riser block without modification to cables or wiring.

Part #	Description
45580	Arctic Cat 2001 & newer
45581	Polaris / Arctic Cat
45582	Ski-Doo
45583	Yamaha

Note: Will not work with Narrow Pivot Risers

PowerRiser 325 & 475

The PowerRiser features a one piece design that offers superior strength at an unequaled price. Dual pivot points allow you to position the riser front to back **and** position your bars up and down for the perfect bar placement. The PowerRiser comes in two widths – 3.25" for snowmobiles as well as Can Am and Polaris ATVs, and 4.75" for ATVs and motorcycles. Both options work with standard 7/8" bars or oversize 1 1/8" bars.

325 Shown on
Yamaha Ntiro

475 Shown on
Yamaha Raptor

PowerRiser 325

The PowerRiser 325 is 2" tall and will work on most snowmobiles with no cable modification. The 1 1/8" option allows you to easily switch to "fat" bars with no adaptor needed. If you want more than a 2" rise check out our Universal Pivoting Riser system on page 15. Check your cable slack for use on ATVs. Neck is 1" wide.

Note - If your machine uses a one-piece style OE bar clamp you will also need 45470 - replacement 7/8" bar clamps for the PowerRiser 325 to work.

Part #	Description
45419	2" Tall X 3.25" wide, 7/8" to 7/8" Bar
45421	2" Tall X 3.25" wide, 7/8" to 1 1/8" Bar
45470	Replacement 7/8" bar clamps (4ea.)

PowerRiser 475

The PowerRiser 475 comes in two heights – 2" and 3". Both are available for standard 7/8" to 7/8" bars and for 7/8" to 1 1/8" bars. The neck is 2.2" wide.

Part #	Description
45430	2" Tall X 4.75" wide, 7/8" to 7/8" Bar
45431	2" Tall X 4.75" wide, 7/8" to 1 1/8" Bar
45432	3" Tall X 4.75" wide, 7/8" to 7/8" Bar
45433	3" Tall X 4.75" wide, 7/8" to 1 1/8" Bar
45440	2.25" Tall X 4.75" wide, 1 1/8" to 1 1/8" Bar

Universal Pivot Riser

This innovative riser system works on **all brands** of snowmobiles with a flat steering post! The Universal Pivoting Riser raises your bars 3" and can be used alone or Extension Blocks can be added for up to 6" in total height. Dual pivot points allow your bars to be positioned front to back, and rotated up or down for optimum positioning. Optional Extension Blocks come in 1" or 3" lengths to give you the exact height you need. At only 3.5" wide the Universal Pivoting System is perfect for use on the narrower style mountain bars.

Part #	Description
45400	Universal 3" Pivoting Riser
45401	Universal Extension Block - 1"
45403	Universal Extension Block - 3"

Non-Pivot Riser

Made from extruded aluminum, our non-pivot riser blocks are lightweight but strong enough for the toughest rider. Most snowmobiles can accept up to a 3" riser block with no modification to cables or wiring (some even higher). Simply unbolt your handlebars, lift them and the clamps up and insert the riser block. Use the provided longer bolts and re-clamp your bars at the new height.

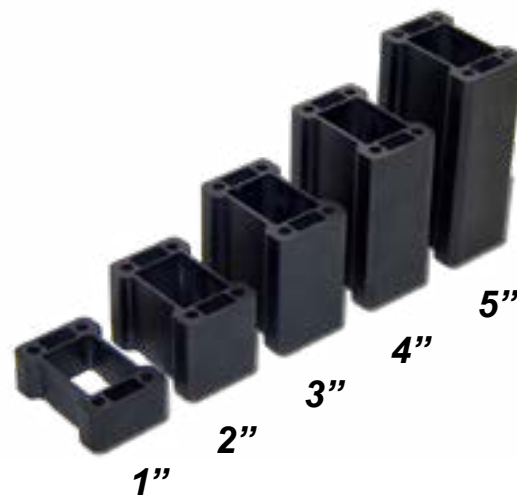

If you need to extend your throttle cable or brake line, check out our Throttle Cable Extension and Extended Length Brake Lines on page 21.

Universal Bar Riser

Need a little bump in bar height? We've got just what you need. Our Universal Bar Riser raises 7/8" bars either 1" (25mm) or 1.6" (40mm). The unique design of these risers allows them to work on virtually any ATV, motorcycle—offroad and street—or snowmobile with 7/8" bars. Risers come with both metric (M8x60mm) and standard (5/16"x18) longer

Note—check your cable slack before purchase to determine how high you can raise your bars.

Part #	Description
45301	Universal 7/8" Bar Riser – 1" (25mm)
45302	Universal 7/8" Bar Riser – 1.6" (40mm)

45301 installed on a Yamaha Raptor

Oversize Bar Adaptor

The Universal adapter allows oversize (1 1/8") bars to be clamped to ATV's, motorcycles and snowmobiles. The adapter will also work on top of snowmobile pivot riser blocks and adds 3/4" in height.

Part #	Description
44257	Oversize Bar Adapter

Installed on Yamaha Raptor

Raising the bar just got easier! Our extended length high performance brake lines replace your existing brake line and give you an additional 6" in length. Better than stock, they are made of extra-tight braided stainless steel with a Teflon smooth bore liner which reduces line expansion to almost zero. All lines have a protective UV-resistant PVC clear coat.

Photo of 45605

Now that you've raised your bars, you may need to extend your throttle cable. Our Throttle Cable Extension offers 9" of additional length, plus an in-line adjuster to fine tune cable tension and slack. Universal ends allow for quick and easy installation on all major brands. (Yamaha's with dual cable throttles and Arctic Cat '07-newer use our replacement throttle cables)

12 Volt Cell Phone Charger

How many times have you been out on the trail and your phone dies because of searching for a signal or from the cold temperatures? PowerMadd has an inexpensive solution! Our 12 Volt Cell Phone Charger installs easily to any machine with a 12-volt battery. The charger has a replaceable 2-amp in-line fuse and a micro USB connector. The USB micro connector works with most Android and Windows phones. Apple phones require an inexpensive adapter (not included).

- ✦ Fits any ATV, motorcycle, snowmobile or UTV with 12 volt battery
- ✦ Easily connects to battery terminals
- ✦ Outputs 1 amp, 5 volts - no draw when not charging
- ✦ Includes a 2 amp in-line fuse for protection
- ✦ 8 feet 10 inches long
- ✦ Compatible with any phone which uses a micro USB charger (Android, Windows, etc.)
- ✦ Apple phones require an adapter
 - iPhone 3 - 4 – micro USB to 30 pin adapter
 - iPhone 5 - 6 – micro USB to Lightning port adapter

Part #	Description
66000	12 Volt Cell Phone Charger
66001	Micro USB Pigtail Cable (replacement)

The ESR (Ergonomic Seat Riser) kit takes you to the next level of comfort and control. The additional height eliminates knee and back fatigue and improves control by allowing you to stand more comfortably for powder or bad trails. Installation is easy. Remove your seat (5 minutes) and install the new foam and seat cover right over your existing cover.

Ski Doo XP Chassis

The XP was a great improvement over the original REV chassis. The seat setup was better, but still just not high enough for perfect comfort and control. The ESR kit for the XP adds 1.5" of additional pre-cut foam with a gripper-style seat cover bringing the XP seat height up to what is now considered standard.

Ski Doo REV Chassis

The rider forward design of the Rev was a great leap forward, but as we all know, the seat level is too low, putting unnecessary strain on your knees and back. The ESR kit for the REV adds 3" of additional pre-cut foam with a gripper-style seat cover totally updating the comfort level and control of your REV.

Oil Sleeve

Most plastic oil reservoirs will warp at some point, which creates an opportunity for oil to leak out the cap. A bad enough leak and oil gets everywhere and you go nowhere!

The PowerMadd Oil Sleeve is CNC machined and designed to stop warping and leaking. A nice simple fix to what could be a major problem on the trail.

View from bottom shows rubber o-ring.

Oil Sleeve NOT installed

Oil Sleeve installed

Fits all reservoirs with a 1.75" opening, including:

- Arctic Cat Crossfire, M-Series and Sno Pro('98-'01) Chassis;
- Polaris Axys, Edge, IQ, RMK, SKS, Switchback, Rush, Indy, Fusion, Evolved and Aggressive Chassis
- Ski Doo XM, XP, XS, Rev, ZX, CK, F and S chassis;

Part #	Description
53740	Oil Sleeve

Power Block

Our race-proven PowerBlocks are made from T6 aluminum and are stronger than stock plastic blocks. The PowerBlock 43599 offers two pivot positions for larger carbs (up to 50mm) and a two-piece design for easy installation and requires an Arctic Cat Firecat throttle lever. It will also work on a Polaris or Ski-Doo when used with our Throttle Cable Extension Kit and a Firecat throttle lever. PowerBlock 43594 is thinner and comes with our custom lever which is shorter than most stock levers.

Part #	Description
43599	Power Block
43594	Power Block w/lever

Our mini-skis reduce friction with increased strength, making them the best choice for pro stock and open mod drag racing. They also provide the ultimate performance upgrade for all mini-sleds. Skis measure 26" long x 4" wide. Wear bars and model specific saddle kits are sold separately.

Power-Lift

Power-Lift Shield

Whether you're warming up your sled, working on your track or just want to prevent track freeze up, the Power-Lift easily lifts the front or rear of any snowmobile 7" with just one hand. Lift-height ranges from 11.5" to 26.5". Made of durable powder coated steel, it comes with a foam handle, rubber coated hook and safety lock pin.

Optional aluminum shield attaches to Power-Lift to protect from flying debris when warming up your sled.

Rider Hold Tight

Ride Safe! This common-sense design allows passengers to hold onto drivers safely and securely whether you're on an ATV, motorcycle, personal watercraft (it floats) or snowmobile. Lightweight and comfortable, the Rider Hold-Tight adjusts to 51" to be worn directly over clothing, snowmobile gear or a life vest.

Dual position rider handles are made of Neoprene tubing and will stay soft even in cold weather. Worn in front it provides the rider with a natural "hold-on" position. Constructed of heavy-duty nylon webbing, 500 Denier cloth and quick release buckles for years of safe riding enjoyment.

Part #	Description
61070	Rider Hold-Tight

Speed Clip

There is nothing worse than being trapped in your helmet after a long ride. With the Speed Clip you can buckle and unbuckle your helmet in a second, even with gloves on!

Part #	Description
61060	Speed Clip

DOT approved and Exceeds Federal Motor Vehicle Safety Standards.

Bar Bag Deluxe

The Bar Bag Deluxe can keep your hat clean and wrinkle free and carry other items like keys, wallets and cell phones. With its large compartment and two smaller zipper pockets it's perfect for carrying all the extras you need on your ATV, motorcycle, snowmobile, or mountain bike.

Part #	Description
73602	Bar Bag Deluxe

Tool Caddy

Don't be caught at the track or on the trail without the right tools. Those little tool kits that come with your machine just don't cut it. The Tool Caddy allows you to carry the standard size tools you need in an organized, tough-nylon adjustable pouch that measures a large 15" wide by 8" high with a separate 8" long zippered compartment for smaller items. Works great for all powersports—ATVs, boats, motorcycles, snowmobiles, etc.

Part #	Description
73610	Tool Caddy

Grab Strap

Stay on with the Grab Strap! Whether you're side-hilling in the mountains or in the ditches of the flat country, the new Grab Strap provides a flexible grab area where you need it. The molded rubber handle is easy to grip even when wet. The Grab Strap is strong too, utilizing a nylon web strap. Comes with universal mount kit for 7/8" handlebars. Overall length is 15".

Part #	Description
43588	Black

Shock Covers

Protect your shocks with PowerMadd Shock Covers which are made from durable 600D Nylon with extra wide hook-n-loop closures and vent holes. Small covers fit springs up to 3.5" x 12.5". Great for snowmobiles and ATVs. Reversible - PowerMadd logo on one side and solid black on the other. *Design subject to change without notice.*

Yamaha Automatic Reverse LED Light Kit

PowerMadd is excited to introduce our new line of Automatic Reverse LED Light Kits for Yamaha vehicles! These kits include plug-in-play hardware for easy installation and a 30,000 hour LED light for years of trouble free use. Our LED light is IP67 rated which means it is sealed from dust and can be submersed in up to 3 feet of water for 30 minutes.

The LED light and brackets (included in the ATV kit) are made of aluminum and offer multiple mounting options. Once the kit is installed, it will allow for the backup light to **automatically turn on** once the vehicle is shifted into the reverse gear. At anytime, you can manually over ride the system with included waterproof switch.

Yamaha ATV Reverse LED Light Kit

66005 - parts includes mounting brackets for rear rack.

66005 - mount under or over your rear rack.
Four mounting position options.

Part #	Description
66005	Reverse Light Kit for ATVs
Fits all Yamaha Grizzly and Kodiak ATVs 2002 - current	

Yamaha UTV Reverse LED Light Kit

66006 - LED mounts directly to UTV body.

66006	Reverse Light Kit for UTV
Fits all Yamaha Rhino, Viking and Wolverine UTVs.	

UTV Fender Flare Extensions

PowerMadd Fender Flare Extensions offer the driver and passenger engineered protection from mud, dirt and debris. PowerMadd Flare Extensions are designed to extend the existing OE (original equipment) fender flares in critical locations and offer protection without sacrificing style. Made from closed cell AEPE foam which is flexible and extremely durable.

- Protection from mud, dirt, debris and snow
- Includes all hardware and instructions for an easy install
- Mounts on the inside of OE fender flares
- Flexible yet durable

Note: Requires drilling into the existing stock fender flares.

Kit includes:

- Front Fender Flairs (pair)
- All mounting Hardware
- Instructions

ProTEK ATV Windshields

The ProTEK ATV Windshield features a crisp design that matches your ATV's styling. The ribs and contours give the ProTEK windshield added strength and great looks. Unlike other brands, you do not have to remove your ProTEK shield to trailer your ATV as long as it faces forward. ProTEK ATV Shields are made of clear high quality optical-grade polycarbonate featuring distortion free optics and black graphics. Shields are approximately: 21"h x 36"w.

**With Headlight
Cut-Out**

**Mount Kit
Included**

ProTEK Mount Kits

No more fitment issues, our new mounts are more universal than ever allowing our two shield options - with headlight cut-out or without headlight cut-out - to fit over 80% of current ATV models. Our unique two-point mounting system allows the shield to be adjusted in four directions.

The Rapid Release version offers instant removal of the windshield. This allows you to utilize the shield only when needed. Simply loosen the jam nut and pull the pin — it's that easy.

Installation is quick and easy!

24590	Grommet Kit

Note: Long Brackets push windshield forward allowing for handlebar mounted instrument clusters.

Snowmobile Windshields

ONE SIZE DOES NOT FIT ALL

Our Cobra snowmobile shields are offered in different heights and looks to give you a shield that matches your riding style and desired level of wind protection. We measure the height of our shields from the point where the shield meets the hood straight up to the tallest point. Cobra shields are made from premium, optical-grade polycarbonate for a brilliant surface and distortion free viewing. Unlike the competition we use 0.08" material for a more durable, longer lasting shield.

HOW TO FIND YOUR WINDSHIELD

Cobra snowmobile windshields are arranged according to brand, then chassis type, with the most recent chassis listed first. Each chassis group includes photos of the windshields available along with exact model fitment information.

PROCROSS / PROCLIMB CHASSIS
