Our Mission

Pro Comp is globally recognized as one of the leaders in off-road technology. Since 1992 we've been manufacturing high quality, durable products for on and off road racers and enthusiasts.

Pro Comp is located in San Diego, California. We design suspension systems, shock absorbers, lighting and accessories for trucks and SUVs. Our 80,000 square foot research, development and manufacturing facility allows us to integrate all of our operations under one roof and focus on our passion – producing the highest quality products for our customers.

Our additional 60,000 square foot distribution center assures inventory is available when it is needed.

By utilizing state of the art CAD engineering, laser cutting technology and CNC manufacturing our products are built to exacting tolerances to insure accuracy and ease of installation. We have dedicated fabrication teams that oversee each and every aspect of new applications from concept to reality.

Pro Comp has created value for its customers by improving product performance and integrating new technologies. Our commitment to maintaining the utmost in quality and durability is what drives us and continues to be our mission statement. Pro Comp builds suspension systems that work!

**Nissan Titan
2WD/4WD 6" Suspension Kit**

Highly anticipated and well thought out, Pro Comp introduces the new Nissan Titan 6" Suspension Kit. This kit provides ample clearance for 35" tires while maintaining the driving qualities and characteristics that makes this truck so appealing. By using the latest in CAD and laser manufacturing technologies Pro Comp is successful in producing a kit that enhances the off-road prowess of the Titan.

**Pro Runner Monotube
Coil Over Shock**

Massive and race inspired, the new Pro Runner monotube coil over shock is engineered to maximize driving performance. This 2 3/4" CNC machined coil over shock utilizes a 7/8" double hardened chrome rod, viton o-ring seals and a sintered metal piston combined with multi-disc valving to assure optimum control and heat dissipation. Pro Comp delivers on the big three: performance, reliability and value.

**Robby Gordon Signature Series
MX6 Reservoir Shock**

Straight from Pro Comp is the latest in the Robby Gordon Signature Series line, the new MX6 Reservoir Shock. It's the only monotube reservoir shock on the market with six way external adjustability. Simply turn the one piece billet adjuster to your desired setting and go. Who says you can't perfectly dial in your ride?

WHAT'S NEW

**INTRODUCING THE LATEST IN KIT
ORDERING - THE "P KIT"**

Order the New Palletized Kits - The "P Kits"!! Order and stock one part number and receive a complete suspension system in one box!

All parts are strapped to a crate and ready to ship. Stock it on your shelf and when an order gets placed, simply add a label then ship to your customer - it's that easy.

PRO COMP

SUSPENSION SYSTEMS THAT WORK!®

**2005
Ford Super Duty**

Designed right and engineered tough...
Our new '05 kits are available in 2", 5", or 7" systems in both Stage I and Stage II styles.

Pro Comp offers a wide choice of suspension systems and accessories for your 1973 to present Chevy/GMC truck or SUV. Whether it is 2WD or 4WD we make a kit that's right for you. Increase the height of your vehicle from 2" – 7" to provide ample tire and terrain clearance while still maintaining that "factory" ride quality. For additional information contact your local Pro Comp dealer or check out our website.

Chevy Silverado/GMC Sierra 1500/1500HD/2500/2500HD

High quality components are featured throughout our kits and are specifically engineered for your vehicle. They are built to exacting tolerances for easy installation.

* 7200 Lbs. GVW or Less

Increase your ride height with 2", 3" or 5" kits for 2WD and 4WD '94 to '04 Dodge trucks. Experience improved on-road and off-road performance while providing enough tire clearance for 37" tires (on our 5" kit). Pro Comp suspension kits and accessories are the right choice for your Ram's needs.

Dodge 2500

The latest technology and materials make this the kit for your Dodge. Complete your package by including MX6 shocks – the monotube 6 way adjustable shock unmatched by the competition and engineered for your application.

DODGE 2500 4WD

YEAR	APPLICATION	frt/rear	w/mx6 shocks	ss skid plate	Max tire size
03-05	RAM 2500	3.0"/0.0"	K2058MX •	_____	33"x12.50"
03-05	RAM 2500	5.0"/3.0"	K2059MX	56102	37"x13.50"

• p/n 58156 can be used for level stance on vehicles with 3.65" diameter rear axle tube.

Dodge 1500

DODGE 1500 4WD

YEAR	APPLICATION	frt/rear	w/MX6 shocks	ss skid plate	Max tire size
02-05	RAM 1500	4.5"/1.5"	K2057MX	56102	35"x12.50"

Note: Do not sell this kit if vehicle is equipped with model 244D transfer case
Front driveshaft modification is highly recommended as the factory light duty CV joint is sensitive to the change in angle created by the installation of the lift. For information regarding modifications contact Inland Empire Driveline at 800-800-0109

Dodge 94-01 1500 / 2500 2WD and 4WD

Features:

- Stage I systems provide the basic hardware for a simple lift installation
- Cast aluminum coil spacers assures correct lift and oe quality ride, extended bump stops and a matched set of ES3000 shock absorbers allow clearance for 33" tires and maintain factory ride quality
- Stage II systems add tubular upper and lower control arms and front dual shock mounts for improved on and off-road performance
- Ram 1500 systems include rear add-a-leaves and 1" rear lift blocks with u-bolts

Stage II KIT FEATURES:

- New design radius arms for increased suspension travel and improved turning radius
- Pre-stressed coils for a compliant ride and desired ride height
- Drop pitman arm included for precise steering with no bump steer
- Optional methods for rear lift include; replacement lift springs, add-a-leafs or lift blocks
- Pick up applications include lift blocks and u-bolts. bronco application include rear add-a-leaf kits
- Kit reference numbers include necessary components for a complete suspension lift package
- Applications- see foot notes regarding specific application

Ford Ranger 2WD 86-01

Features:

- 5" lift provides clearance for 31" tires
- Rugged I-beam and radius arm drops constructed from 1/4" thick steel
- Pre-stressed coils rated exclusively for Ford Rangers
- Drop pitman arm available for precise steering with no bump steer
- Extended braided stainless brake lines available for positive brake response
- Kit reference numbers include all components for a complete suspension package
- alignment hardware required - sold seperately

Features:

Spindles are an effective way to give a two-wheel drive truck an aggressive look, increase ground clearance, and maintain factory ride quality. Explorer Pro Comp's Ford lift spindles are a direct factory replacement that can be aligned to factory specifications and allow the use of 31" diameter tires on factory rims. Rear lift is achieved with an add-a-leaf set. Add-a-leaf's cannot be used on explorers equipped with mono-leaf rear springs.

Pro Comp has developed an extensive line of suspension kits & accessories for Jeeps. Our components are designed, tested and built to withstand the rigors of off road use and still get your 1953 to present year Jeep back home. Available are 2" to 5" kits with optional suspension packages to fit your needs. For additional information contact your local Pro Comp dealer or check out our website.

Jeep Wrangler YJ 87-95

KIT FEATURES:

- 5" lift provides clearance for 33" tires on 8" wide rims
- 10" of functional wheel travel
- Coil springs designed and rated exclusively for the YJ
- Track bar relocation brackets and dropped forged pitman arm
- Includes ES9000 shock absorbers
- MX6 suspension Packages available
- ES2000 steering stabilizer included
- 4-link chromolly series control arms
- Complete bolt-on installation

NISSAN TITAN 2WD/4WD 6" KIT

Think beyond the obvious. That's what we do at Pro Comp. Our passion for performance drives us forward and fuels our desire for constant improvement. The result is the new Nissan Titan 6" Suspension Kit from Pro Comp.

Highly anticipated and well thought out, this kit provides ample clearance for 35" tires while maintaining the driving qualities and characteristics that makes this truck so appealing. By using the latest in CAD and laser manufacturing technologies Pro Comp is successful in producing a kit that enhances the off-road prowess of the Titan.

Front and rear cross members are made from bulletproof 3/16" steel that is precision laser cut and CNC formed. Integrated urethane bump stops are featured on the rear cross-member which is forward offset centering the front tire in the fender well for improved tire clearance. Front differential mounting is integral with the cross-members for easy installation.

Front spindles are top quality one-piece cast, CNC machined units. Strong and reliable components built for the long haul.

Factory alignment cams are maintained easing alignment procedure and maintenance. A Stage One kit is available with ES Series shocks as well as a Stage Two system featuring Pro Comp Pro Runner 2 3/4" coil overs and MX6 shocks.

Billet aluminum spacers are used to lift the rear and are offset mounted for correct wheel alignment. For those who require additional load carrying capacity an add-a-leaf option is available. Additionally stock wheels and/or spare can be used.

This kit requires no cutting or drilling! Precise laser cut parts and components make it easy to install for any mechanic in 3-4 hours with no cutting or welding and using standard tools.

As a bonus the original factory skid plate can be used with this kit, however Pro Comp offers an optional two-piece stainless steel skid plate that complements and completes this outstanding kit.

If you're a Titan owner this is the only suspension kit worthy of its name. Live big, drive hard and remember it's all about the ride...

Year	Application	Front/Rear	Kit w/ ES Series Shocks	Kit w/MX6/Coil Shocks	Max Tire Size
04	Titan 2WD/4WD	6.0"/3.0"	K6001	K6001MX	35"x12.50"

Look no further than Pro Comp for your Toyota. We offer the necessary components to increase the ride height and ground clearance to fit up to 33" x 12.50" tires. From the Landcruiser to the Tacoma, we have a kit for you.

Pro Runner Coil Over Shocks

Standard Reservoir Shock

MX6 Adjustable Monotube Shocks

MX6 Reservoir Shocks

ES Series

Pro Runner Coil Over Shocks

Pro Comp's new Pro Runner monotube coil over shock is designed and engineered to maximize driving performance both on and off-road.

The massive 2 3/4" CNC machined coil over shock absorbers complete our 6" F150 and Titan suspension systems. This big bore mono tube technology utilizes a 7/8" double hardened chrome rod, viton o-ring seals and a sintered metal piston combined with multi-disc valving to assure optimum control and heat dissipation. Pro Comp delivers on the big three: performance, reliability and value.

MX6R

The best just got better. Straight from Pro Comp is the latest in the Robby Gordon Signature Series line, the new MX6 Reservoir Shock. Based on the original MX6 it's the only monotube reservoir shock on the market with six way external adjustability. Simply turn the one piece billet adjuster to your desired setting and go. Who says you can't perfectly dial in your ride?

This 2" monotube shock has anodized aluminum bodies and is nitrogen charged to 300 PSI. We've improved upon the MX6 design by adding a 10" anodized aluminum reservoir. It also features high quality parts like, gun drilled 14mm hardened chrome shaft, 4000 PSI 6" braided stainless steel hose, precision 46mm single piece banded monotube piston and one piece anodized billet cap. Race inspired and built to take anything you can throw at it. This race quality shock is just what you need. It's Perfection – Dialed.

Year	Application	P/ N	Extended	Collapsed	Mount

Optional Reservoir Mounting Kits			P/ N		
Kit to mount reservoir to shock body (2" to 2")			63012		
Kit to mount reservoir to 1 1/2" tube (IE Hoop) (2" to 1 1/2")			63013		

Note: Each kit complete to mount one shock and consists of 2 urethane mouting blocks and 2 stainless steel clamps

MX6

Step up to quality, precision and maximum adjustability with the MX6. Each MX6 is precision engineered and custom valved for your vehicle.

The MX6's inverted mounting design reduces unsprung weight and protects the shock body from damage. This design also allows ease of fitment with no clearance problems in high-performance late model vehicle applications. Applications for most popular jeeps, pickups and SUV's including lifted vehicles and HD models.

From the suspension experts at Pro Comp!

*High Performance
6 position adjustable monotube*

See page 48 for applications

Standard Reservoir Shocks

- Superior control in demanding conditions... keeps the tires on the ground and the chassis stable.
- Great looking and durable 6 braided stainless steel line
- Rolled closed end, not welded, for superior strength
- 1/2" diameter Nitro Steel piston rod for excellent off-road durability
- Available for multi-shock applications and specific lifted trucks to fit OE shock mounts
- Zinc plated finish with "Clear Coat" for long life
- Adjust automatically for ANY conditons to ensure maximum comfort and great handling

- (2) Pro Comp 6" HD Main Shock

ES SERIES SHOCKS

The choice is simple when it comes time to replace your old worn out shocks, Pro Comp. The tough choice, however, is which Pro Comp shock would be right for your truck or SUV? There's the twin tube hydraulic ES1000, containing the S-924 high temperature shock fluid. Or maybe the cellular gas charged twin tube designed ES3000 with 10 stage velocity sensitive valving. Then there is the ES9000, with twin tube, "VSV" nitrogen gas charge technology. Each shock is specifically engineered to bolt up to factory height applications, as well as, lifted suspension system fitted vehicles. For keeping your trucks steering in line when off road, there are the Pro Comp ES2000 steering stabilizer shock absorbers. Gas charged, combined with vehicle specific valving, the Pro Comp steering stabilizers will keep you going straight through whatever terrain you wander into. All ES-series shock absorbers are backed with the exclusive limited lifetime Pro Comp warranty, and are built to last and last. So, whatever the choice, Pro Comp has the right shock absorber for you!

Stainless Steel Skid Plates

Stainless Skid Plate Kits afford optimum under carriage protection for your vehicle without adding unnecessary weight. Formed from heavy gauge material, these "brush finished" stainless plates add the ultimate finishing touch to any suspension system. For specific application, Pro Comp also offers in conjunction with, and sometimes separate, a heavy gauge steel chassis supported skid pan. Skid Plate Kits are available for most popular Pro Comp suspension equipped vehicles and come complete with all mounting hardware and detailed installation instructions. Note: Vehicle must have factory bumper for proper fitment.

Traction Bars

Race style, double tube design delivers the first ever functional and great looking traction bar system engineered for lifted vehicles. While most traction bars are designed to only reduce axle wrap-up, Pro Comp Traction Bars are designed to allow suspension articulation as well. Our exclusive reverse hourglass shaped urethane bushings afford the stability needed, while allowing the traction bars to flex for articulation. Most popular applications are engineered to accommodate twin Pro Comp ES3000 shock absorbers. With the addition of this Shock Option Kit, greater suspension dampening is added to the rear axle. Traction bars by Pro Comp, true performance and looks!

Traction Bars mount to the frame and axle. The rear axle mounting plate is positioned between the axle spring plate and lift block. This mounting system results in a secure installation while losing no valuable ground clearance as common in most "street" traction bar kits. Mounting kits are required and sold separately.

Limit Straps

Heavy-duty nylon straps help protect off-road suspension systems by preventing over-extension of suspension components. Most commonly, a limit strap is approximately .5" to 1" shorter than the full extension of the suspension and is mounted to the upper and lower shock eyebolts. For other custom applications, a 9/16" mounting hole is provided for a secure and simple installation. Limit straps are sold as pairs and are available in a variety of lengths.

Brakeline Kits & Specifications

Stainless Steel Brake Line kits are designed to replace stock rubber brake hoses on vehicles with increased ride heights of 4" - 6". Steel braided lines will not swell under increased braking pressure demanded by larger tires, thus delivering a quick and positive response. All Pro Comp stainless hoses comply with D.O.T. specifications and are packaged as complete kits for the front and rear of vehicles. NOTE: Although extended length hoses are necessary on many suspension kit installations, labor should be performed by a certified brake mechanic only. Care must be taken to assure no interference of moving parts is encountered, as well as, proper routing and length to eliminate any possibility of bind throughout steering and suspension cycles.

Rear Add-a-Leaf Kits

Pro Comp add-a-leaf kits are the perfect solution when only 1.5" to 2.5" of raised height is required. Pro Comp rear add-a-leaves can be used in conjunction with lift blocks in order to strengthen the integrity of the existing leaf spring pack. This is very helpful when trying to renew the height and strength of a rear spring suffering fatigue due to age and heavy loads. For some vehicles, Pro Comp offers both long and short add-a-leaf kits. The long add-a-leaf will usually install directly under the main leaf (with mounting eyes) allowing it to work towards eliminating spring/ axle wrap-up, as well as, keeping the vehicle's existing ride quality. All kits include two single leaves and new centering bolts (unless noted otherwise). Degree shims may be required to re-align rear driveshaft angles. Pro Comp recommends using new u-bolts, flat washers, high nuts and spring clips whenever modifying or changing leaf spring packs.

Do not use a riser block on the front of any vehicle

Rear Block with U-Bolt Kits

All Explorer Pro Comp kits include 2 cast iron riser blocks (except 1" and 1.5" blocks which are constructed of T6061 Aluminum), 4 u-bolts, 8 heavy duty flat washers, and 8 hi-nuts. All blocks are tapered in order to improve vehicle driveshaft angles. Do not use blocks on the front axles of vehicles.

U-BOLT KITS

U-bolt kits are packaged complete with new hi-nuts and extra thick washers. U-bolt lengths are usually adequate for stock and aftermarket leaf spring packs.

Explorer Pro Comp u-bolts are manufactured from low-alloy, high strength steel. Round style u-bolts are zinc plated; Square u-bolts are unplated in order to preserve the integrity of the steel at it's bent points. U-bolts are equivalent in strength to a Grade 5 bolt.

83-88	Ford Ranger 2wd	543	—
87-94	Ford F150 2wd	594	—
89-94	Ford Ranger 2wd*	594	—
97-03	Jeep TJ 2wd/4wd (rear)	—	20-65225

*Pinch bolt style axle.

Explorer Pro Comp alignment eccentrics are used in twin I-beam Ford applications. Cams are used in the rear of Jeep TJ's to adjust pinion angle (causing driveline vibration). All kits are sold in pairs.

Tailshaft Conversion

This short shaft or slip yoke eliminator kit shortens the T-case allowing you to run a 4" longer CV style drive shaft. Combined with a CV style drive shaft (sold separately) it helps eliminate driveline vibration and the friction of the factory slip yoke design. It also improves driveline angles and eliminates in most cases the need for a transfer case lowering kit. This improves ground clearance since the skid pan is not lowered. The new main shaft is close to 20% larger than factory and will take the added torque of 4 to 1 conversions, additional horsepower and larger tires. This kit fits all 231 equipped YJ's and TJ's. It also fits XJ's with manual transmissions.

CV STYLE DRIVE SHAFT

YEAR	MAKE	LIFT	p/n
87-93	Jeep YJ Wrangler	4-5	4040
94-95	Jeep YJ Wrangler (52)	4-5	4041
96-04	Jeep TJ Wrangler (56)	0-4	4042

footnotes
52. 4041 driveshaft uses a 1.125" diameter cap (1330) on the differential u-joint and is the most common. Some vehicles may use a smaller 1.062" cap and will require part # 4040.
56. When using this kit it is necessary to adjust the pinion angle. If you have a Pro Comp suspension system (part # K3054, K3055, K3056, K3057) use part # 55490 adjustable upper rear control arm to properly adjust pinion angle.

These high quality Spicer CV style drive shafts are designed to work with the tail shaft kit part # 4007. If your vehicle or lift height is not listed you will have to have one made at a driveline shop.

Center Bolt & Spring Clips

DESCRIPTION	DIMENSIONS	BULK P/N	P/N
leaf spring centering pin	5/16" dia. x 4.5" long	97-516	97-516B
leaf spring centering pin	3/8" dia. x 4.5" long	97-380	97-380B
leaf spring centering pin	7/16" dia. x 4.5" long	97-716	97-716B
leaf spring centering pin	10mm dia. x 165mm long	97-165	97-165b
leaf spring bend clip	2.5" wide	98-250	98-250B
leaf spring bend clip	3.0" wide	98-300	98-300B

Note: Pair part numbers are packaged on a card for showroom display. Explorer Pro Comp recommends using new spring clips and centering pins whenever modifying or changing leaf spring packs. Our centering pins are Grade 5 bolts with a standard head and include all necessary hardware.

Degree Shims

DESCRIPTION	BULK P/N	PAIR P/N
2.0 degree shim	99-200	99-200B
2.5 degree shim	99-250	99-250B
4.0 degree shim	99-400	99-400B
6.0 degree shim	99-600	99-600B

Note: Single and pair part numbers are packaged on a card for showroom display. Explorer Pro Comp degree shims are constructed of tens alloy aluminum are designed to align driveshaft angles with aftermarket leaf springs. Pro Comp shims centering pin hole diameter is 5/16" (some reaming of holes may be necessary). Explorer Pro Comp does not recommend using more than 3 degree shims on any front axle.

High Capacity Heat-Treated Aluminum Differential Covers

Provide extra oil volume to keep gears cooler for longer life. Finned design aids in dissipating heat and provides additional protection in adverse off-road conditions. Available in fully polished and black powdercoat with polished fins. When ordering add to the end of part number "P" for polished, or "B" for black powdercoat.

Recovery Straps

Light Duty

Straps	p/n
1 1/2"x15' strap, 10,000 lb. rating w/hks	101550

- Both the 1 1/2"x15' with hooks, and the 2"x20' recovery straps are a "must have" emergency tool for any car, suv, or truck.
- Attractive silver/grey finish and Pro Comp logo complement these quality straps.

Heavy Duty

Straps	p/n
2"x20' strap, 20,000 lb. rating	220000
2"x30' strap, 20,000 lb. rating	230000
3"x30' strap, 30,000 lb. rating	330000
4"x30' strap, 40,000 lb. rating	430000

ATV/Buggy/Snowmobile

Straps	p/n
1"x15' strap, 10,000 lb. rating	101500

- Heavy duty recovery strap sized down and perfect for OHV usage.
- Fits great in tool pouches, fanny packs or ATV storage compartments.
- Stylish leather wrapped end loops protect paint and chrome finish and assure years of practical usage.

Tree trunk protector

Straps	p/n
3"x6' tree trunk protector	306000

A "must have" accessory for winch recovery applications. 30,000 lb. rating will complement your winch cable without damaging trees or other anchor points.

Trail Kit

Don't get stuck without it! This all purpose survival kit includes everything you need to get out of a jam.

FOOTNOTES
45. Old body style.

For 2005 we have taken every light we offer and given them all a facelift. From the packaging and new hard plastic covers to a complete internal upgrade. We have increased the gauge of steel used to house our lights, as well as, almost doubling the chrome and paint process, assuring mile after mile of performance. Pro Comp lighting originally developed and tested at races throughout Baja and is now available in a model to fit most any need.

Footnotes

33. Tie rod must have factory hole for stabilizer to fit.
35. For stock height vehicles. Will not work with Pro Comp IFS Suspension Systems.
37. Explorer Pro Comp steering stabilizer kits will not fit on late model 4WD Dodge full-size vehicles equipped with a vacuum servo mounted on the front axle of the drivers side.
38. Will not fit Ford vehicles with factory high rider package or Ford vehicles with off-set pitman arm.
39. Most 4WD Bronco & F150 full-size trucks are equipped with factory quad shock option – this is required to mount our stabilizer system.
40. This kit will fit Ford vehicles equipped with factory high rider package or Ford vehicles that have an aftermarket pitman arm with more than 1 1/4" off-set.

Notes

Footnotes

- 25. Shock is rearward.
- 26. Shock is forward.
- 27. Washers may be required to increase space between shock on the lower mount.
- 29. Slight grinding of A-Frame Hole might be required.
- 32. Due to inconsistent factory mounting location – ES Series shock absorbers may need to be installed rod-end down to avoid rubbing of rear axle.
- 33. Tie rod must have factory hole for stabilizer to fit.
- 35. For stock height vehicles. Will not work with Pro Comp 6" IFS Suspension Systems.
- 36. Fits vehicles with Dana 44 axle only.
- 37. Explorer Pro Comp steering stabilizer kits will not fit on some late model 4WD Dodge full-size vehicles that are equipped with a vacuum servo mounted on the front axle of the drivers side.
- 38. Will not fit Ford vehicles with factory high rider package or Ford vehicles with off-set pitman arm.
- 39. Most 92-95 4WD Bronco & F150 full-size trucks are equipped with the lower mount of the factory quad shock option – this is required to mount our 2566 stabilizer system.
- 40. This kit will fit Ford vehicles equipped with factory high rider package or Ford vehicles that have an aftermarket pitman arm with more than 11/4" off-set.
- 51. Requires OE coil.

How to Order

ORDERING PRO COMP HAS BECOME AS EASY AS 1, 2 OR 3!

Now there are three easy ways to order Pro Comp Suspension Systems. For example, need an 8.5" Super Duty kit? You can...

1. Order and stock by individual part numbers: (ex. #52419-qty 1, #22610-qty 2, #22415-qty 2)
2. Order by the kit quick reference system "K Kits" and stock by individual part numbers: (ex. Order #K4018 – Receive #54129-qty 1, #22610-qty 2, #22415-qty 2)

OR

3. Order the New Palletized Kits - The "P Kits"!! Order and stock one part number and receive a complete suspension system in one box! (Ex. Order #P1048 – Receive all of the above in one box!)

All parts are strapped to a crate and ready to ship. Stock it in on your shelf and when an order gets placed, simply add a label then ship to your customer – it's that easy.

- **Make life easier for yourself and your customer.**
- **Cut down on shipping and receiving time.**
- **Have one location for a complete suspension system.**
- **Easier inventory control.**
- **Save cost on packing and shipping materials.**
- **Palletized kits are clearly labeled with a part number and UPC code.**

The Bottom Line – Get product out the door faster to your customer with no more packing, strapping multiple boxes and worrying about how to ship a leaf spring. We've done the work for you!

To order: Simply replace the letter "K" with the letter "P" after looking up the quick reference part number.

footnotes

1. Moderate to severe driveline vibration may occur at speeds above 30 MPH when operated in 4-HIGH.
2. Exhaust modification may be necessary – use P/N 51088-20. Will not work on 96 & up models equipped with oxygen sensor or vehicles equipped with big block motors.
3. Kit includes replacement driveshaft and transfer case correction kit.
4. Kit includes ES2000 steering stabilizer.
5. Requires mounting kit for installation.
6. Kit includes 4 ES3000 shock absorbers and mounting hardware.
7. Driveline modifications may be necessary.
8. Standard cab, short beds, two-door Blazers, Yukons, and Tahoes may require rear driveline modification.
9. If the spring eye bolt on the spring hanger is located below the frame rail, use P/N 81088. If the spring eye bolt is located in the "C" channel section, use P/N 81288.
10. Increased ride height is achieved by coils only. Consult your installer for any other necessary modifications.
11. 4 wheel ABS, use P/N 7350 brake line kit.
12. Vehicle may require caster/camber bushing kit – see steering accessories section for specific applications.
13. Add-a-leafs are recommended to avoid stacking of blocks.
14. All ride height increases are approximate and will vary due to vehicle specification (ex. cab style, engine size, wheel offset, etc).
15. Pitman arm is used on vehicles with power steering only.
16. Vehicles equipped with factory dual shocks – see shock application guide for additional part numbers needed.
17. Some vehicles may have a Chrysler Corporation rear axle and use P/N 50055. U-bolt P/N 50050 will not fit this axle. Please determine type of axle before installation.
18. Vehicles equipped with light duty, double offset joint (rubber boot) front driveshafts must be replaced with Spicer constant velocity (CV) type.
19. Not compatible with Auto Trac equipped vehicles.
20. P/N 20-65225 (cam bolt kit) can be used to adjust rear pinion angle for reduction or elimination of rear driveline vibration.
21. Leaf spring bushings are included in P/N 55089 kit.
22. Aftermarket torsion bars are recommended.
23. P/N 50090 contains front and rear u-bolts and hardware.
25. Shock is rearward.
26. Shock is forward.
27. Washers may be required to increase space between shock on the lower mount.
28. Lower control arm modification and welding required.
29. Slight grinding of A-frame hole might be required.
30. 88-91 shortbed, standard cab trucks require bearing kit #5116BC.
31. Not designed for vehicles with factory off-road package.
32. Requires a lift block for installation.
33. Tie rod must have factory hole for stabilizer to fit.
34. Except with rear air leveling system
35. For stock height vehicles. Will not work with Pro Comp 6" IFS Suspension Systems.
36. Fits vehicles with Dana 44 axle only.
37. Explorer Pro Comp steering stabilizer kits will not fit on some late model 4WD Dodge full-size vehicles that are equipped with a vacuum servo mounted on the front axle of the drivers side.
38. Will not fit Ford vehicles with factory high rider package or Ford vehicles with off-set pitman arm.
39. Most 92-95 4WD Bronco & F150 full-size trucks are equipped with the lower mount of the factory quad shock option – this is required to mount our 2566 stabilizer system.
40. This kit will fit Ford vehicles equipped with factory high rider package or Ford vehicles that have an aftermarket pitman arm with more than 1 1/4" off-set.
41. Will not work with 4" lift kit.
42. Will not fit models with factory rear air conditioning 92-99 Suburbans.
43. Will not work with factory dual rear wheels.
44. Pro Comp suspension equipped vehicles only.
45. Old body style.
46. Vehicles with production dates before 03/30/99 can be identified by the decal located on the driver's door jamb and the 14mm trac bar bolt.
47. Vehicles with production dates after 04/01/99 can be identified by the decal located on the driver's door jamb and the 21mm trac bar bolt.
48. P/N 52480 may be required to reduce high speed driveshaft vibration on vehicles with two piece driveshaft. This kit lowers carrier bearing to correct drive line angle.
49. TRD Tacomas must use Pro Comp replacement front shock. Not using this shock will cause upper ball joint failure.
50. Kit designed for vehicles manufactured after 4/01/99.
51. Requires OE coil.
52. Some vehicles may require major rear driveshaft modifications to reduce driveline vibration.
53. Not recommended for vehicles equipped with factory rear dual wheels.
54. 88-92 vehicles require 2 to 3 bolt Idler arm conversion upgrade p/n51090 and factory GM 3 bolt idler arm p/n12540218 or 2 bolt idler arm spacer p/n90-6102
All parts sold separately.
55. When vehicle is equipped with a VB or winch, also order coil spacer P/N # 55496 kit.
59. Add-a-leafs will not work with steel or fiberglass mono-leafs.

Notice to Dealer, Installer & Operator

Vehicles that have been enhanced for off-road performance often have unique handling characteristics. Because of the higher center of gravity and larger tires, this vehicle may handle and react differently than many passenger cars, both on and off-road. You must drive your vehicle safely! Extreme care should always be taken to prevent vehicle roll-over or loss of control which can result in serious injury or even death. Always avoid sudden sharp turns, or abrupt maneuvers!

Please make sure your Dealer/Installer explains and delivers all warning notices, warranty forms and instruction sheets included with parts. Explorer reminds you to fasten your seat belts at all times and reduce speed! Have a safe day and enjoy.

Please Note

Application listings in this catalog have been carefully fit checked for each model and year denoted. Explorer Pro Comp however reserves the right to update as necessary without notice and will not be held responsible for misprints, changes or variations made by vehicle manufacturers. Please call when in question on new year models, not listed specific body or chassis styles or vehicles not originally distributed in the USA.

PRO COMP TIRE SIZE GUIDE

This sizing chart is designed to provide the optimum tire size and rim width information for a given lift application. Body and or fender modifications may be required to properly install the maximum tire diameter and maximum wheel width listed. Before installation and operation of any tire and wheel combination, be certain there is no interference with brake, suspension and steering components and body / fender panels. Excessive tire diameter, wheel width and or improper rim backspacing may cause premature wear and or failure of brake components, suspension and steering components, as well as, possible body damage.

#1 Tire Terms:

#2 Backspace: is the distance from the hub-mounting surface to the back edge of the rim.

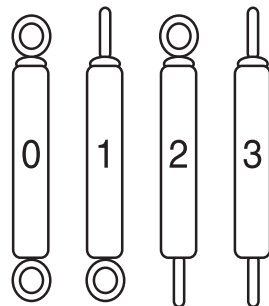

Toxic

Shocking!! isn't it? The Ultimate High Performance "VSV" gas shocks for your lowered or stock sport truck. Whether you're in the weeds or tearing up the asphalt, our "VSV" 10 stage velocity sensitive valving gives you quick response to all driving conditions for precise control. Toxic Shocks are specifically engineered for limited travel applications. Toxic Shocks include urethane bushings for long life and improved handling characteristics. Using the information and the chart below, matching a Toxic Shock with a custom application is simple. "Simplicity equals performance".

- "VSV" 10 stage velocity sensitive valving, specifically set up for limited suspension travel applications
- Twin tube gas stabilized design
- 1 3/16" and 1 3/8" bore carbon stamped nylon banded piston
- 1/2" and 5/8" chrome hardened piston rod
- External multi-lip shaft wiper seal
- Urethane upper and lower mounting bushings
- Optional "Black Toxic" shock boots are sold in pairs
12147 Black mini boots for shocks up to 15.5"
12127 Standard boots for shocks over 15.5"

1st digit denotes product type: (1=ES1000, 3=ES3000, 9=ES9000)
2nd, 3rd, and 4th digits denotes extended length of the shock. (215 = 21.5")
5th digit denotes mounting (top/bottom)
0 = loop/loop 1 = stem/loop
2 = loop/stem 3 = stem/stem
4 = 2" loop / 2" loop 5 = LG. stem / 2" loop
6 = LG. stem / lg.stem 7 = 2" loop / LG. stem
6th digit denotes mounting hardware included in the box.
