Press and hold 5 sec.

Volume Down ———→

## To Change Channels

## Squelch On/Off Control

Squelch is a static filter.

Squelch "On" indicator. When squelch is on, the squelch indicator light is on.

The default and recommended setting is "Squelch On". To turn Squelch off — Press 2 and 4 at the same time. To turn Squelch on — Press 3 and 4 at the same time.

## How to use your RACEceiver Earphones

1. Compress the foam lengthwise between your thumb and forefinger until you feel the "tube" inside the foam.
2. Then compress the foam around the tube and insert carefully into your ear. Hold for a few seconds, to allow the foam to expand and seal out the outside noise.

## Troubleshooting

1. All I hear is static. — Be sure the squelch is on.
2. The display shows numbers counting to 10 over and over. — Change the battery.
3. Does not sound as clear as it did yesterday or this morning. — Change the battery.
4. It sounds a little scratchy or rough. — Back the volume down a notch or two.

## Recommendations

1. Don't try "no name" batteries — Use the good ones. A quality AAA battery should last 20–24 hours.
2. Take the battery out after a race.
3. If it rains, try to keep your RACEceiver as dry as possible.

## "Hot Jump" Feature

### **Consumer Warning**

Use care in inserting earpieces. Do not force into ears or hearing damage or other injury may occur. Set volume to lowest setting before inserting earpieces. Once earpieces are inserted, begin increasing volume to a comfortable level. Inserting earpieces with volume set at a higher level may cause hearing damage.

### **Driver Warning**

When used as one-way communication devices between race control and competitors, Raceceiver should not be relied upon as the sole indication of potential hazards. Caution lights and signals by flaggers and other officials must be observed. The driver should not rely on any warning devices to the exclusion of his own observation of track conditions.

### **A word from Innovative Spectator Products**

*Congratulations and thank you for purchasing The RACEceiver 1600 Elite! After years of lugging bulky scanners, we are pleased to be the innovator of the world's first microscanner. We look forward to years of serving your communication needs with a corporate mission built on customer service, value and innovation.*
