# RIGID INGENUITY

## OUR STORY

In 2006, Rigid Industries LED Lighting introduced the E-Series LED Light Bar, the first of its kind in the LED lighting industry. Since then, RIGID has led the forward projecting LED lighting industry in innovation, light output and efficiency. Up until that time, the industry had focused on traditional incandescent light for racing and recreational applications, but the advanced LED lighting technology, combined with the patented Hybrid, Specter, and Hyperspot optics that offered more lighting at a fraction of the power consumption quickly revolutionized lighting in the off-road industry. Our patented optic systems effectively control the beam of light emitted by the LED, which translates to more light where you want it with very little wasted spill light. Since the introduction of our first product, our design and engineering teams are constantly developing new and innovative quality products using the latest in LED technology.

While RIGID started as an off-road lighting company, we quickly realized that our advanced lighting technologies could be applied to many other industries. RIGID currently produces lighting for the automotive, power sports, agriculture, marine, mining/construction, military, police and fire rescue industries, just to name a few. We take pride in the fact that our LED lighting products are designed, engineered, and assembled in the USA. This not only builds our local economy, but it also allows RIGID to maintain the high level of quality that you've come to expect from RIGID products. This level of refinement and quality control is what separates RIGID from the rest.

In 2015 RIGID announced its acquisition by Truck-Lite®. Together, RIGID and Truck-Lite now offer the complete package of DOT, off-road and accessory LED lighting for not only on and off-road markets, but for markets from around the world in a wide variety of heavy-duty and commercial vehicle categories. RIGID and Truck-Lite take pride in the fact that our products are designed, engineered and assembled in the USA, employing over 2,400 people and counting. Both RIGID and Truck-Lite look forward to expanding our presence and products around the globe.

## MANUFACTURING

RIGID products are proudly designed, engineered, assembled and tested in our **ISO 9001:2008** facility in the United States. Currently, we have two locations in the greater Phoenix Metro area. Our highly skilled and motivated workforce takes pride in the fact that RIGID LED lighting products are built in the USA. This not only helps build our local economy, but allows us to remain hands-on, ensuring you will continue to receive the highest level of quality that you've come to expect from RIGID.

We go the distance by requiring extra testing and certifications for heavy-duty vibration, dust, moisture and corrosion resistance on our lights and brackets. This ensures that we have a product that we can stand behind, no matter the industry or application it is used for and we back all of our products with a Limited Lifetime Warranty. Quality workmanship, combined with innovative technologies allows us to produce the best forward projecting LED lights on the market.

# BUILD QUALITY

DON'T BE FOOLED BY OTHERS

## RIGID VS OTHERS

### 1. BOARDS

#### RIGID

##### 1.A

Aluminum PCB Smart Boards™

##### 1.B

Copper thermal conductive pad

##### 1.C

Gold plated electrical contacts

#### OTHERS

##### 1.A

Cost-cutting stock boards

### 2. LEDs

#### RIGID

##### 2.A

Hand selected brightest high-tech LEDs from the best LED manufacturers.

#### OTHERS

##### 2.A

Falsely claiming use of name brand LEDs (Cree), cheap, less advanced LEDs

### 3. OPTICS

#### RIGID

##### 3.A

RIGID invests heavily in optical science and has developed multiple patented optics that maximize the total light output and efficiency.

#### OTHERS

##### 3.A

Simple non-engineered reflector dishes that scatter the light.

### 4. CONNECTIONS

#### RIGID

##### 4.A

Waterproof connector mates with the supplied wiring harness.

#### OTHERS

##### 4.A

Blunt cut wires and no wiring harness, switch, or relay.

### 5. LENS & SEALS

#### RIGID

##### 5.A

Impact Resistant Polycarbonate Lens that will never yellow.

##### 5.B

Custom molded synthetic polymer gaskets create a 100% water/dustproof seal.

##### 5.C

GORE® Pressure Equalizing Vent. (not shown)

#### OTHERS

##### 5.A

Light diffusing glass or inferior plastics will quickly crack, scratch, and yellow.

##### 5.B

Hand-applied household silicone seal, no pressure vent.

### 6. COATING

#### RIGID

##### 6.A

6063-T5 aircraft aluminum extruded housings treated with Alodine® corrosion preventive and Tiger Drylac® UV protectant polyester powder coating.

##### 6.B

Corrosion-proof chrome-plated 304 stainless steel hardware.

#### OTHERS

##### 6.A

Thin-wall low-grade aluminum material with Single coat black paint that quickly fades when exposed to the sun.

##### 6.B

Zinc or non-coated hardware quickly corrodes under harsh environments or salt exposure.

# HOW TO NAVIGATE THIS CATALOG

Follow the Navigation Key below to find information needed to help you through the process of choosing the light or lights that are right for you.

## NAVIGATION KEY

**PRODUCT DESCRIPTION**

**FORM FACTOR**

**FEATURES**

**DIMENSIONS & MOUNTS**

The D-Series is a line of rugged, high-output LED work lights designed for use in demanding environments. These lights are built to last and provide reliable performance in a variety of applications. The D-Series is available in multiple form factors, including round, square, and rectangular, to meet your specific needs. Each light is equipped with a durable, impact-resistant lens and a robust mounting bracket. The D-Series is also available in multiple color temperatures, allowing you to choose the light that best suits your application. For more information on the D-Series, visit our website or contact your local distributor.

**FEATURES**

- High-output LED technology
- Impact-resistant lens
- Robust mounting bracket
- Multiple color temperatures
- Wide beam spread
- IP67 rating
- 5-year warranty

**LIGHTS COME WITH**

The lights come with a mounting bracket and a set of screws. The mounting bracket is made of aluminum and is designed to fit most vehicles. The screws are made of stainless steel and are designed to hold the light in place. The lights are also included with a set of instructions and a warranty card.

# ADAPT™

The RIGID® Adapt™ LED Light Bars are the world's first off-road lighting products that can change instantly according to conditions. Adapt offers 8 selectable beam patterns that range from broad short-distance lighting to highly focused long-distance lighting in a single fixture. It also includes RIGID's new Active View™ Technology, which allows the beam pattern to actively adjust with vehicle speed. There are no moving parts within the Adapt. Instead, RIGID uses advanced LED technology and combines it with patented new optics to create a revolutionary lighting solution that can Adapt with changing conditions. Further, Adapt has built-in accent lighting that can be set to any color in the light spectrum, including white, for a custom look around town. The Adapt has a signature new look that is unlike any other light bar on the market, and it even has expanded mounting capabilities that include new base-mounting options in addition to traditional side mounts. Adapt LED light bars include a RIGID Dash Controller, which is a molded backlit dash-mounted unit that offers easy, intuitive control of Adapt's beam patterns, Adaptive Mode, accent lighting, and programmable presets. RIGID Adapt Light Bars are available in 10-inch to 50-inch lengths and include a RIGID Dash Controller, Under Dash Module, wiring harness, and mounting hardware. With the RIGID Adapt, it has never been easier to Own the Night.

**8 MODE -  
ACTIVE VIEW  
TECHNOLOGY**

## RIGID ACCENT LIGHTING

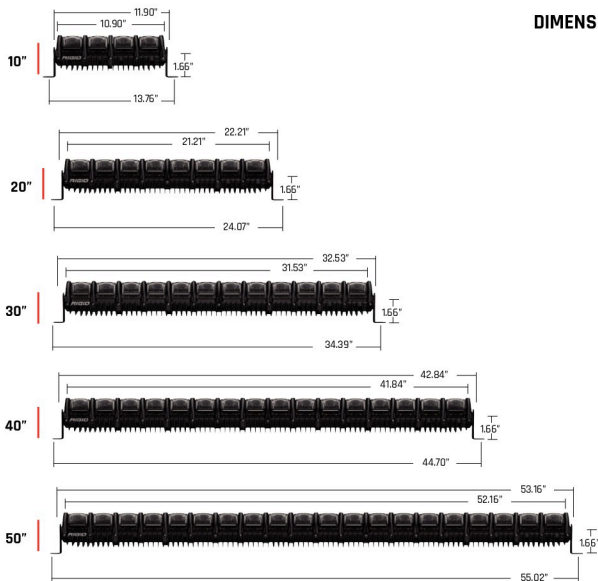

## FEATURES

- 50,000+ Hour Lifespan
- 9-36 V DC
- Durable UV Polyester Powder Coat
- GORE® Pressure Equalizing Vent
- Harness & Dash Controller Included
- High-Grade Aluminum Alloy Heatsink
- Integrated Thermal Management System
- Impact Resistant Polycarbonate Lens
- IP68 Compliant - Dust / Water Ingress
- Mounting Brackets Included
- Over / Under Voltage Protection
- Op. Temp -40° F ~ +145° F / -40° C ~ +60° C
- Protected Against RFI / EMI
- Patented Technology
- Reverse Polarity Protection
- RoHS Compliant
- SAE J575 Compliant - Shock / Vibration

## RIGID DASH CONTROLLER

- **Active View™ Technology** - Automatically Change Beam Patterns Based On Vehicle Speed
- Dash Controller & Under Dash Module with Wiring Harness
- Molded RIGID Dash Controller with 2 User Presets - Preset Both Beam Pattern Mode & Accent Lighting Colors
- 8 Selectable Beam Patterns from 15-Degrees to 90-Degrees
- Integrated Optic Design with Spot, Flood, and Driving Zones
- Selectable RGB-W Accent Lighting - With User-Configuration, Choose from any Color in the Light Spectrum
- Back Lit Molded Dash Controller - Enables User to Select Mode, Accent Color, Adaptive Mode, and Select Between 2 User Presets
- Multiple Mounting Locations; Traditional Side Mounting or Underside Low-Profile \*Stealth Mount \*(Sold Separately)
- Patent-Pending Technology

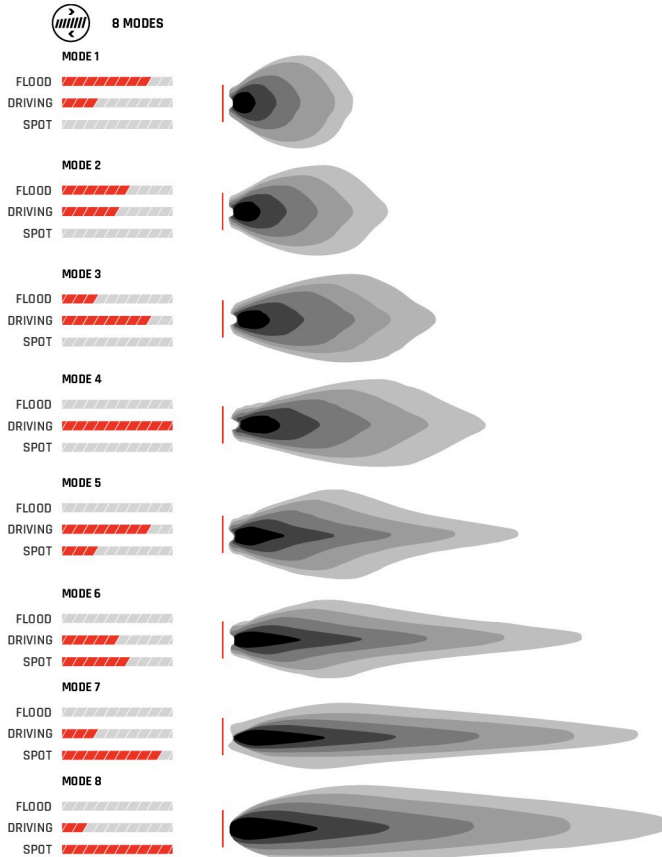

BEAM PATTERNS  
THAT CAN  
ACTIVELY ADJUST  
WITH CHANGING  
CONDITIONS

## 8 BEAM PATTERNS MODES

The RIGID Adapt offers 8 selectable beam patterns that range from broad short-distance lighting to highly focus long-distance lighting in a single fixture. It also includes RIGID's new Active View™ Technology, which allows the beam pattern to actively adjust with vehicle speed. There are no moving parts within the Adapt. Instead, RIGID uses advanced LED technology and combines it with patented new optics to create a revolutionary lighting solution that can Adapt with changing conditions.

# D-SS<sup>®</sup> PRO

One of RIGID's most versatile, compact lighting solutions just got better with the RIGID D-SS PRO, Dually Side Shooter LED pod. Perfect for any application that requires a wide spread beam, including A-Pillars, Fog Lights, and motorcycle applications. The D-SS PRO incorporates powerful optics and recently improved LED technology for greater output with the added benefit of additional LEDs aimed to the side for a much broader beam. The D-SS PRO packs a powerful punch up to 7,920 lumens depending on the optics chosen. The D-SS fixtures boost up to 120-degrees of horizontal lighting coverage when used in pairs or when used in the single light applications. The main forward-facing LEDs are available with RIGID's advanced Flood, Spot, or Driving optics, so there's a D-SS PRO lighting solution for nearly any application. The D-SS PRO LED lights are available in pairs with three side-shooting LEDs on one side of each fixture, or in single applications with a pair of side-shooting LEDs on both sides of the fixture. Only RIGID provides a broad, powerful lighting solution in such a compact package.

RIGID's D-SS PRO lights are also available with a durable white finish. Though suitable for marine applications, RIGID's white lighting products are perfect for use anywhere an alternative to black is desired. The distinctive white is a durable UV-resistant powder coated finish with an additional chromate conversion coating for superior corrosion resistance. They feature the same legendary lighting technology and superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

COVERAGE

## FEATURES

- Up to 50,000+ Hour Lifespan
- 9-36 V DC
- Durable UV Polyester Powder Coat
- GORE® Pressure Equalizing Vent
- Harness & Switch Included
- High-Grade Aluminum Alloy Heatsink
- Integrated Thermal Management System
- Impact Resistant Polycarbonate Lens
- IP68 Compliant - Dust / Water Ingress
- Mounting Brackets Included
- Over / Under Voltage Protection
- Operating Temp -40° F ~ +145° F / -40° C ~ +60° C
- Protected Against RFI / EMI
- Patented Technology
- Reverse Polarity Protection
- RoHS Compliant
- SAE J575 Compliant - Shock / Vibration
- Waterproof Deutsch Connector

## DIMENSIONS & MOUNTS

### SURFACE MOUNT

WHAT BEAM  
PATTERN WILL  
SUIT MY NEEDS  
THE BEST?

## BEAM PATTERNS

Our custom designed graphs are intended to illustrate the beam patterns that our optics produce. First, consider what type of application the light is needed for and then choose what beam pattern best suits your needs. Each beam pattern varies depending on the optic or optic combination you choose. Once you know which beam pattern best suits your needs, refer to the specifications table (A, B, C) to determine how much LUX output you need and which product will best suit your application.

# RADIANCE POD™

Rigid's innovative Radiance line continues to expand with the Radiance Pod, a unique lighting solution that offers Rigid's legendary quality at a level everyone can attain. A compact cube similar to Rigid's popular D-Series, the Radiance Pod features independently controlled back-lighting that is available in white, amber, green, red, or blue. The Radiance Pod is built with a rugged aluminum alloy housing to protect the three powerful LEDs inside, while a black exposed circuit board is visible through the durable polycarbonate lens for a unique industrial look. The Radiance Pod is sold in pairs and includes mounting brackets suitable for attachment to any flat surface.

**INDEPENDENTLY  
CONTROLLED  
BACK-LIGHTING**

\*Consult your Rigid Industries' installation manual, the Rigid Industries' website and any local, state and federal laws, rules and regulations to determine whether your particular application/installation is authorized for use on a public highway.

## FEATURES

- 50,000+ Hour Lifespan
- 10-15 V DC
- Durable UV Polyester Powder Coat
- GORE® Pressure Equalizing Vent
- Harness (Sold Separately)
- High-Grade Aluminum Alloy Heatsink
- Integrated Thermal Management System
- Impact Resistant Polycarbonate Lens
- IP68 Compliant - Dust / Water Ingress
- Mounting Brackets Included
- Over / Under Voltage Protection
- Operating Temp -40° F ~ +145° F / -40° C ~ +60° C
- Protected Against RFI / EMI
- Patented Technology
- Reverse Polarity Protection
- RoHS Compliant
- SAE J575 Compliant - Shock / Vibration
- D-Series Construction & Durability
- Complete Multi-Switch Wiring Harness Available (Sold Separately - Part Number 40300)
- Independently Controlled Back-Lighting Available in White, Amber, Red, Blue or Green
- Dedicated Wire to Run Back-Lighting without Primary LEDs
- Stainless Steel Mounting Brackets
- Black Exposed Circuit Board
- Patent-Pending Technology

WHAT BEAM  
PATTERN WILL  
SUIT MY NEEDS  
THE BEST?

## BEAM PATTERNS

Our custom designed graphs are intended to illustrate the beam patterns that our optics produce. First, consider what type of application the light is needed for and then choose what beam pattern best suits your needs. Each beam pattern varies depending on the optic or optic combination you choose. Once you know which beam pattern best suits your needs, refer to the specifications table (A, B, C) to determine how much LUX output you need and which product will best suit your application.

BROAD OPTIC

HOW MUCH

# RADIANCE™ PLUS

The RIGID Radiance Plus light bar is the perfect solution for those who want RIGID's legendary quality at a level everyone can attain. Featuring improved LED technology, the Radiance Plus offers more light output than ever before while consuming a fraction of the power compared to incandescent lighting. The RIGID Radiance Plus is built with the same high-grade aluminum alloy housing as our legendary E-Series, but that's where the visual similarities end. Inside, the Radiance light bar is feature-packed, with a black exposed printed circuit board, optimized forward projecting Broad Spot optics which combine the attributes of a spot and flood beam pattern, and recent updates in LED technology that boast up to 21,384 row lumens. Further, the Radiance has back-lighting available in white, amber, red, blue and green. The RIGID Radiance light bar is for the customer who wants a truly custom look that only RIGID can provide. Even better, the Radiance Plus now includes a Multi-Trigger Harness designed specifically for the Radiance light bar. The Radiance Multi-Trigger Harness also comes standard with two separate backlit LED rocker switches (red and blue), so each circuit can be used independently. Radiance Plus Light Bars are available in 10" - 50" lengths.

**BACK-LIGHTING  
AVAILABLE  
IN 5 COLORS**

\*Consult your Rigid Industries' installation manual, the Rigid Industries' website and any local, state and federal laws, rules and regulations to determine whether your particular application/installation is authorized for use on a public highway.\*

# CHASE™

The RIGID Chase rear facing LED light adds safety and functionality to any UTV, rail, buggy, Jeep, or other off-road application by packing reverse, courtesy, strobe, running (low power), and brake lights (high power) into a single compact package. A halo of powerful colored LEDs in red, amber, or blue around the perimeter of the aluminum housing can be used as a strobe (for racing and chase applications), running light, or third brake light. The center portion of the RIGID Chase functions as a 715 lumen white light suitable for use as a reverse or area light, and there's also a smaller downward-facing courtesy light for illuminating the cargo area. Whether it's used individually or wired in series, the Rigid Chase LED light is packed with features at a great value.

# REFLECT™

The RIGID Reflect is the first LED light that not only illuminates the road ahead, but also allows you to see what's behind. The RIGID Reflect is an advanced LED lighting solution with a fully adjustable side mirror all in one. Though originally developed for UTV and Powersports applications, the Reflect is a great solution for just about any off-road application. The Reflect uses RIGID's patented LED technology and new Side-Shooter optics to provide a wide beam of light for cornering and drifting. For even more versatility, there are also built-in amber LEDs on the outside edge of the fixture that can be used as turn signals, flashers, or even auxiliary running lights. The lights and mirror can be aimed independently, and tube mounting clamps are included to make installation easy. The RIGID Reflect is one more compact, versatile lighting solution that enables off-road enthusiasts to Own the Night™.

LIGHT & MIRROR

# IGNITE™

The Rigid Ignite™ is the smallest, most versatile forward projecting light in Rigid Industries' product line! Measuring approximately 1.4" x 1.4" x 2", this flexible light packs 1000 raw lumens using Spot, Flood or Diffused beam patterns; perfect for any application where short range light output is needed. The Ignite utilizes a Go-Pro® style mounting bracket which mates with an array of off the shelf Go-Pro mounts. Due to the wide range of mounting options, the Ignite's applications are almost limitless. The compact and lightweight housing makes the Ignite a great choice for auxiliary lighting on cars and trucks, motorcycles, UTVs, and even marine applications. Low current draw (less than 1 amp) and voltage requirements (7-28 volts) makes the Ignite adaptable to any application. Single light kits include one Ignite, mounting brackets, and related hardware. GoPro Mount Not Included.

RIGID Ignite lights are also available with a durable white finish. Though suitable for marine applications, RIGID's white lighting products are perfect for use anywhere an alternative to black is desired. The distinctive white is a durable UV-resistant powder coated finish with an additional chromate conversion coating for superior corrosion resistance. They feature the same legendary lighting technology and superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

# MIDNIGHT EDITION™ PRO

It's all about stealth with RIGID's new Midnight Optics. Utilizing our exclusive Hybrid Spot Optic with a translucent black enamel coating, our Midnight Optics take the subtle "blacked out" look seriously; featuring black oxide hardware, to dark grey screen-printed and black embossed logos on the bezel. Midnight Optics enable RIGID to "disappear" during the day while still providing powerful LED technology to light up the night. Thanks to improved LED technology, the Midnight Edition PRO now offers more light output than ever before. Midnight Optics are available in E-Series, RDS-Series, SR-Series, and D-Series product lines.

# RIGID INDUSTRIES CAPTURE®

The Rigid Industries Capture® is the world's only LED light with an integrated GoPro® charging system. The Capture combines a powerful light source with a docking station for GoPro® Hero 3+ or 4. High and low light output options provide just the right amount of light for any filming situation. The Capture also features an optimized light output and beam pattern for the GoPro® camera's field of view area with Rigid's patented radius housing and a lenticular lens design. The custom high quality Carling® switches provide a solid feel and clean look in your vehicle, while the amber lens covers will help your vision and video in adverse conditions. The Capture enables you to record your favorite on- or off-road excursions day or night.

## LIGHT COMES WITH

GoPro® Not Included.

## ★ FEATURES

- 50,000+ Hour Lifespan
- 9-36 V DC
- Durable UV Polyester Powder Coat
- GORE® Pressure Equalizing Vent
- Harness & Switch
- High-Grade Aluminum Alloy Heatsink
- Integrated Thermal Management System
- Impact Resistant Polycarbonate Lens
- IP68 Compliant - Dust / Water Ingress
- Mounting Brackets Included
- Over / Under Voltage Protection
- Operating Temp -40° F ~ +145° F / -40° C ~ +60° C
- Protected Against RFI / EMI
- Patented Technology
- Reverse Polarity Protection
- RoHS Compliant
- SAE J575 Compliant - Shock / Vibration
- Waterproof Deutsch Connector (Black Housing Only)

## DIMENSIONS

ALL HOUSINGS AVAILABLE IN WHITE

## ☒ LIGHTS COME WITH

- Mounting Hardware
- Wiring Harness
- 2 Carling Switches
- 2 Carling Switch Bezels
- 2 - 4" Amber Light Covers
- GoPro® NOT INCLUDED

**BLACK HOUSING ONLY**  
• 2 Black Powder Coated, L-Shape Brackets

**WHITE HOUSING ONLY**  
• 2 Stainless Steel, L-Shape Brackets

# RDS-SERIES<sup>®</sup> PRO

Rigid revolutionized the lighting industry with the introduction of the RDS-Series, and recent advancements in LED technology have made them more powerful than ever before with the RDS-Series PRO. With an improved output of 85,538 raw lumens, the RDS-Series Pro projects more usable light exactly where it's needed on the road ahead. By taking an E-Series light bar and treating it to a gentle arc, the patented RDS-Series provides a sleek, integrated look with the curved windshields and bumpers on today's trucks and SUVs. The curve is for more than just looks, it is also functional: the arc of the RDS-Series light bars provides a wider spread of LED light, providing unmatched lighting coverage with a single light bar. RDS Series PRO also includes updated branding and blacked-out circuit boards for a more refined look.

## BEAM PATTERNS & RDS PATENTED TECHNOLOGY

Our custom designed graphs are intended to illustrate the beam patterns that our optics produce. First, consider what type of application the light is needed for and then choose what beam pattern best suits your needs. Each beam pattern varies depending on the optic or optic combination you choose. Once you know which beam pattern best suits your needs, refer to the specifications table (A, B, C) to determine how much LUX output you need and which product will best suit your application.

# E-SERIES<sup>®</sup> PRO

The E-Series is one of RIGID's most versatile, all-around lighting solutions, and recent enhancements in LED technology mean greater light output than ever before with the E-Series PRO. Among RIGID's most popular product lines, the E-Series PRO has recently benefited from several upgrades to improve both looks and performance. Plus, new branding and new blacked-out circuit boards give the E-Series PRO a more refined look. Available with your choice of Hybrid Optics or Specter Optics, the E-Series features a host of beam options, including Spot, Flood, Driving, Hyperspot, Diffused, and new Driving/Spot and Spot/Hyperspot combinations. These and other innovations make it one of the brightest and most efficient LED light bars on the market. The E-Series was born in off-road, but its versatility makes it well suited for use with power sports, marine, general automotive and even first responder applications.

## LIGHTS COME WITH

### BLACK HOUSING ONLY

- 2 Black Powder Coated, L-shape brackets
- Deutsch Connector (4"-10")
- Open Leads, No Connector (20"-50")
- Harness w/Switch

### WHITE HOUSING ONLY

- 2 Stainless Steel, L-shape brackets
- Deutsch Connector (4"-10")
- Open Leads, No Connector (20"-50")
- Harness w/Switch

# SR-SERIES<sup>®</sup> PRO

The SR-Series PRO LED Light Bars provide a sleek, low profile lighting solution that measures less than 2" tall. Thanks to improved LED technology, the SR-Series PRO now offers more light output than ever before. As the name implies, the SR-Series PRO utilizes a single row of LEDs with your choice of Hybrid or patented Specter optics in a variety of beam patterns. Ideal for applications where space is limited, the SR-Series PRO is a powerful light source designed to project light at extreme distances while consuming very little power. Available in a wide range of lengths and configurations, these LED light bars can be used on virtually any application, whether it's an off-road vehicle, industrial, agricultural, or marine.

RIGID's SR-Series PRO lights utilize extruded aluminum housings and are available with either a black or white durable powder coated finish. Along with improved LEDs for more output, the SR-Series PRO benefits from new branding and blacked-out circuit boards for a more refined look. They feature the same superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

\* Raw Lumens is based on LED manufacturer specifications.\*\* Distance with 25 lux and Peak Beam Intensity are tested using ANSI/IESNA FL standards.

## LIGHTS COME WITH

### BLACK HOUSING ONLY

- 2-1", 2-3" Black Powder Coated, L-shape brackets
- Deutsch Connector (4"-10")
- Open Leads, No Connector (20"-50")
- Harness w/Switch

### WHITE HOUSING ONLY

- 2-1", 2-3" Stainless Steel, L-shape brackets
- Deutsch Connector (4"-10")
- Open Leads, No Connector (20"-50")
- Harness w/Switch

# D-SERIES<sup>®</sup> PRO

The D-Series has always been the most versatile compact lighting package on the market today. RIGID has just made it professional grade with the D-Series Pro, which offers more light output than ever before thanks to recent advancements in LED technology. Available with a variety of mounting options, including surface, flush, or heavy-duty, the D-Series PRO can be utilized for virtually any lighting application. Measuring just 3" x 3", the D-Series packs a powerful punch up to 4,752 lumens depending on the optics chosen. Customers have used these versatile lights for reverse lights on a truck, a handlebar light for a motorcycle, flood lighting for a trailer, auxiliary lighting on agriculture and mining equipment, and many other applications that require a powerful, efficient light in a small space.

RIGID's D-Series lights are available with either a black or white durable powder coated finish, and recent updates to the D-Series include new branding and blacked-out circuit boards for a more refined look. They feature the same superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

## FEATURES

- 50,000+ Hour Lifespan
- 9-36 V DC
- Durable UV Polyester Powder Coat
- GORE® Pressure Equalizing Vent
- Harness & Switch Included (Exclusions Apply)
- High-Grade Aluminum Alloy Heatsink
- Integrated Thermal Management System
- Impact Resistant Polycarbonate Lens
- IP68 Compliant - Dust / Water Ingress
- Mounting Brackets Included
- Over / Under Voltage Protection
- Operating Temp -40° F ~ +145° F / -40° C ~ +60° C
- Protected Against RFI / EMI
- Patented Technology
- Reverse Polarity Protection
- RoHS Compliant
- SAE J575 Compliant - Shock / Vibration
- Waterproof Deutsch Connector (Exclusions Apply)

## BEAM PATTERNS

Our custom designed graphs are intended to illustrate the beam patterns that our optics produce. First, consider what type of application the light is needed for and then choose what beam pattern best suits your needs. Each beam pattern varies depending on the optic or optic combination you choose. Once you know which beam pattern best suits your needs, refer to the specifications table (A, B, C) to determine how much LUX output you need and which product will best suit your application.

# D-XL™ PRO

With the enormous popularity of the original D-Series came the need for a slightly larger, more powerful lighting solution. The RIGID Dually XL PRO boasts more light than ever before in a housing that measures 4"x4". Recent improvements to the LEDs in the Dually XL Series PRO improve light output to up to 9,504 raw lumens while maintaining the efficiency that is the hallmark of the entire RIGID product line. Featuring an unbreakable polycarbonate lens, durable UV-resistant polyester powder coat, stainless steel hardware, and a vibration isolator, the Dually XL Series PRO is available with your choice of beam pattern and either Hybrid or Specter optics. Recent updates include new RIGID branding and blacked-out circuit boards for a more refined look. Whether it's off-road, power sports, general automotive, mining, agriculture, or fire and rescue, the Dually XL PRO is perfect for any application that requires a high intensity LED light.

# Q-SERIES<sup>®</sup> PRO

The Q-Series is designed and built to withstand the harshest working environments imaginable. Constructed of the toughest and most durable materials available, including a double-pass TIG-welded stainless steel bracket with vibration isolator, the Q-Series provides reliable, powerful LED light and is tough enough to withstand mining, agriculture, construction, and the oil and gas industries. The rugged construction also makes it well suited to extreme environments. If the application is severe, the Q-Series is the ultimate lighting solution.

RIGID's Q-Series lights are also available with a durable white finish. Though suitable for marine applications, RIGID's white lighting products are perfect for use anywhere an alternative to black is desired. The distinctive white is a durable UV-resistant powder coated finish with an additional chromate conversion coating for superior corrosion resistance. They feature the same legendary lighting technology and superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

# SR-Q<sup>®</sup> PRO

The SR-Q Series PRO is a sleek low profile lighting option that packs more lighting output than ever before thanks to recent improvements to the advanced LEDs inside. The SR-Q Series PRO now emits up to 4,752 raw lumens, depending on optic. An excellent choice for any application where space is limited, the SR-Q Series PRO makes auxiliary lighting professional grade. A single row of LEDs and is available in multiple beam patterns, including Spot, Flood, Driving, Wide, Hyperspot, and Diffused; as well as being offered in UV. Other recent updates to the SR-Q Series PRO include updated RIGID branding and blocked out circuit boards for a more refined look. Both surface and flush mount options are available and there are multiple mounting capabilities, such as the Suction Cup Mount and Angled Flush Mounts, just to name a few. The SR-Q Series is also a perfect back-up light and is available as a Back-Up Light Kit with a 25' harness and a three-position switch for ease of wiring and usage.

RIGID's SR-Q Series lights are also available with a durable white finish. Though suitable for marine applications, RIGID's white lighting products are perfect for use anywhere an alternative to black is desired. The distinctive white is a durable UV-resistant powder coated finish with an additional chromate conversion coating for superior corrosion resistance. They feature the same legendary lighting technology and superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

# SR-M<sup>®</sup> PRO

Among the smallest, most compact products that RIGID offers, the SR-M Series PRO (Single Row Mini) still packs a lot of lighting power with an impressive output up to 2,376 raw lumens thanks to improved LED technology. The size of SR-M Series PRO makes it highly adaptable to a variety of uses, including everything from a flood light on a toy hauler, handlebar-mounted lights for motorcycles and many other power sports applications. Common automotive uses include back bumper lighting. With a range of beam patterns in your choice of Hybrid or Specter Optics, the SR-M Series is one of the brightest mini LED lights on the market. In addition to more powerful LEDs, recent updates include new branding and blacked-out circuit boards make the SR-M Series PRO more powerful and refined than ever before. They feature the same superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

RIGID's SR-M Series lights are also available with a durable white finish. Though suitable for marine applications, RIGID's white lighting products are perfect for use anywhere an alternative to black is desired. The distinctive white is a durable UV-resistant powder coated finish with an additional chromate conversion coating for superior corrosion resistance. They feature the same legendary lighting technology and superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

# A-SERIES®

The A-Series LED Accessory Light is the universal light that can be used just about anywhere. Vehicle cabs, boat cabins, work vehicle beds, under the hood of a vehicle and trunks are just a few of the places where the A-Series can provide handy bright lighting in otherwise dark environments. The A-Series has a durable compact aluminum housing and includes rubber flat-mount, 3M™ VHB™, 2 way pad for flat mounting, and radius tube-mount adapters, which provide side or bottom wire exits to accommodate different applications. It is lightweight, waterproof, and available in a variety of different LED colors in high and low power versions. The versatility of the A-Series makes it an easy installation on almost anything.

## COLOR SELECTION

COOL WHITE

• Cool White matches the look of all other white LED lights.

WARM WHITE

• Warm White is comparable to a 60-watt incandescent light bulb.

NATURAL WHITE

• Natural White is similar to being outside on a sunny day.

RED

BLUE

AMBER

GREEN

**MINIMUM

# R-SERIES 46™

RIGID Industries entered the world of round lighting with the release of the R-Series 46, which combines innovative LED technology with the classic round shape of traditional auxiliary lighting. The R-Series 46 mirrors the size of the common Par 46 in size, making it easy to both utilize modern LED technology in common older applications, and also retrofit Rigid Industries' leading technology into existing fixtures, such as police spotlights, tractor headlights, and other heavy machinery. The R-Series 46 provides a powerful beam of light and a 50,000 hour lifespan that is far superior to traditional incandescent bulbs, all while using a fraction of the power. The R-Series 46 is available with stand-alone surface mounting and as a direct-fit replacement for Par 46 bulbs.

RIGID's R-Series 46 lights are also available with a durable white finish. Though suitable for marine applications, RIGID's white lighting products are perfect for use anywhere an alternative to black is desired. The distinctive white is a durable UV-resistant powder coated finish with an additional chromate conversion coating for superior corrosion resistance. They feature the same legendary lighting technology and superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

# R-SERIES<sup>®</sup> 36

Rigid Industries has expanded its round light offering with the new R-Series 36. Designed to be a direct fit into any Par 36 bulb enclosure, this new light is a drop-in replacement for thousands of fixtures used on tractors, heavy equipment, and other industrial and agricultural applications. The Par 36 is also used on many spotlight fixtures. Inside, the R-36 Retrofit is available with Rigid's patented Hybrid or Specter optics in a variety of beam patterns. The lightweight housing includes an advance heat sink for superior cooling, while the outside includes a durable UV-resistant polyester powder coat finish and an unbreakable polycarbonate lens. With its tested resistance to vibration, salt, and water, the Par 36 Retrofit provides years of trouble free use.

# SCENE LIGHTS

Developed specifically for First Responders and Rescue personnel, LED Scene Lighting by Rigid Industries is an efficient way to light up any area. Available in a variety of sizes and configurations to accommodate different needs and uses, Scene Lighting utilizes the latest in LED technology in a rugged housing that incorporates a thermally optimized heat sink for prolonged, trouble-free use. Scene Lights provide up to 115° horizontal spread for maximum coverage and heavy-duty mounting brackets that enable precise adjustable aiming. Whether it's the scene of a fire or a remote pit in Baja, Scene Lighting provides clear, bright light with minimal amp draw.

RIGID's Scene lights are also available with a durable white finish. Though suitable for marine applications, RIGID's white lighting products are perfect for use anywhere an alternative to black is desired. The distinctive white is a durable UV-resistant powder coated finish with an additional chromate conversion coating for superior corrosion resistance. They feature the same legendary lighting technology and superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

# SITE SERIES™

Many situations require a highly portable, high-powered light source that can illuminate a required worksite. Whether it's an emergency scene, a mine or industrial application, a remote pit in Baja, or a harbor slip, whatever the situation, RIGID's Site Series provides the flexibility to light any area and provides the mobility to easily move the lighting source with changing conditions. Featuring RIGID's all new 80/40 Optic, Hybrid Flood and an 80/40, Hybrid Spot Combo, the Site Series offers a wider area of coverage than comparable lights from the competition. The Site Series' handle and tilting brackets make adjustments and moving the light easy for the user. Additional mounting options are sold separately. Available in both AC and DC options with a 50,000 hour lifespan and unmatched RIGID quality, the RIGID Site Series provides reliable lighting for many different worksite environments.

RIGID's Site Series lights are also available with a durable white finish. Though suitable for marine applications, RIGID's white lighting products are perfect for use anywhere an alternative to black is desired. The distinctive white is a durable UV-resistant powder coated finish with an additional chromate conversion coating for superior corrosion resistance. They feature the same legendary lighting technology and superior build quality as the rest of RIGID's lighting products, providing reliable and efficient lighting on demand.

## LIGHTS COME WITH

- Mounting Hardware
- Stainless Steel, Heavy Duty Adjustable U-Shape Bracket
- Vibration Isolators

### AC VERSION ONLY

- Power Supply with Standard 110V Outlet Plug
- Deutsch Connector (Both Light & Power Supply)

### DC VERSION ONLY

- 2-Wire Open Leads, No Connector

# RI-SERIES™

The Rigid Industries RI-Series is a full line of flashlights that offer high-output LED technology in a compact package. Inspired by tactical flashlights developed for military and law enforcement, the RI-Series couples cutting edge LEDs with machined aluminum reflectors to create a rugged, powerful light source. With a military-grade hard anodized aluminum housing, waterproof construction, rechargeable battery, and many more features, the RI-Series can withstand the elements and provide years of trouble-free operation.

## LIGHTS COME WITH

- Anti-Roll
- Pocket Clip (Excludes RI-600)
- Lanyard
- AC/DC Car Charger
- 110 Volt Wall Charger
- Rechargeable Lithium Ion Battery(s)
  - (1) RI-600 & RI-800
  - (2) RI-1100 & RI-1500

**THE POWER  
OF RIGID IN  
YOUR  
HANDS**

## FEATURES

- 50,000+ Hour Lifespan
- Impact Resistant Polycarbonate Lens
- IP67 Compliant - Dust / Water Ingress
- Operating Temp -40° F ~ +145° F / -40° C ~ +60° C
- RoHS Compliant
- SAE J575 Compliant - Shock / Vibration
- High, Medium, Low, And Strobe Modes
- High Intensity Spot Reflector Design
- Thermally Regulated LED Circuit
- Momentary Tail-Cap Switch
- Type 3 Military Grade Hard Anodized Aluminum
- Polished Aluminum Reflector
- RI-600 is Available in Red, Blue, Green, Infrared and UV LEDs
- Tactical Bezel Housing (Excludes RI-600)
- Textured Pattern On Handle For Grip
- Works with 18650 Li-Ion or CR123 Batteries
- Limited Lifetime Warranty
- Holsters Also Available (Sold Separately)

## DIMENSIONS

# Truck-Lite<sup>®</sup> **LED HEADLIGHT KIT** BY RIGID INDUSTRIES<sup>®</sup>

Truck-Lite<sup>®</sup> Headlight Kits by Rigid Industries are an excellent upgrade for light, medium and heavy-duty trucks, off-road vehicles, classic cars, motorcycles and more. Perfectly adapted to cold environments, the 7" Round Heated Lens provides a steady, complete-surface melting of snow and ice that is only active when temperatures drop under 50°F/10°C. Metalized reflector optics provide lighting that is smooth and clean across the entire driving surface. LED headlights provide a brighter, crisper and whiter light output as compared to traditional incandescent, halogen, or HID headlights, with a color temperature closer to daylight. The advantages of LED lighting technology result in dramatically improving light projection distance and overall visibility. The durability and dependability of LED lighting provides a solid-state, bulb-free headlamp design that is impervious to damage from shock and vibration.

THE PERFECT  
COMBINATION FOR  
TRAVELING FAR  
AND WIDE.

## FEATURES

- DOT Compliant
- 16-Gauge Wire
- Encapsulated Circuitry
- 2 LED Arrays

- Low & High Beams
- Hard-Coated Polycarbonate Lens
- E-Coat Aluminum Housing
- Metalized Reflectors

Heated Lens  
Turns On At 10°C/50°F

# SAE COMPLIANT

Off-road auxiliary lighting is one thing, but everyone knows that it's important to have lighting that is also safe and legal for on-road use. Rigid Industries' SAE Compliant Fog Lights and Auxiliary High Beam Driving Lights allow them to be used on-the-road and not just off-road. Rigid created the proprietary output spread and height with the new patented Clarilux™ optic system. The color temperature of these LEDs was carefully chosen to be a perfect range of pure daylight to penetrate the night for superior clarity on the road. These SAE Compliant lights project long-range high intensity light while drawing very little power and provide up to 50,000 useful hours. The low profile design includes a High-Grade Aluminum Alloy Housing with a custom designed oversized heat sink to keep the LEDs running cooler, brighter and longer. Combine this with the strength of a polycarbonate lens; the Rigid SAE Compliant Lights represent the ultimate solution for your street-legal lighting in North America.

**PERFECT FOR  
ON ROAD AND  
OFF-ROAD USE**

## FEATURES

- 50,000+ Hour Lifespan
- 9-36 V DC
- Durable UV Polyester Powder Coat
- GDRE® Pressure Equalizing Vent
- Harness & Switch Included (Exclusions May Apply)
- High-Grade Aluminum Alloy Heatsink
- Integrated Thermal Management System
- Impact Resistant Polycarbonate Lens
- IP68 Compliant - Dust / Water Ingress
- Mounting Brackets Included
- Over / Under Voltage Protection
- Operating Temp -40° F – +145° F / -40° C – +60° C
- Protected Against RFI / EMI
- Patented Technology
- Reverse Polarity Protection
- RoHS Compliant
- SAE J575 Compliant - Shock / Vibration
- Waterproof Deutsch Connector (Exclusions May Apply)
- Fog Light is Compliant with SAEJ583
- Auxiliary High Beam Driving Light Compliant with SAE J581

# E-MARK COMPLIANT E<sub>11</sub>

RIGID's worldwide expansion means addressing the needs of customers in a global marketplace, including those that need lighting that complies with European standards. For these users, RIGID now offers E-Mark Compliant Lights (ECE). The E-Mark Compliance is a widely recognized mark in the automotive industry covering the safety requirements of automotive vehicles and their components across Europe.

# AMBER LIGHTS

Amber light has long been known to be more effective in murky conditions, including fog, extreme dust, and smoke. Desert racers have adopted Amber lighting as a better option to traditional white light when chasing down vehicles ahead of them. First responders appreciate having a dedicated amber lighting option when conditions render white light less effective. As a result, we offer dedicated Amber light bars to fill these needs and those of any application where conventional light is obstructed by adverse conditions.

# MIL-STD-461F EMI COMPLIANT

RIGID's MIL-STD-461F Compliant lights meet stringent military standards and are designed to withstand the harshest work environments. Using RIGID's forward projecting LED lighting technology, the patented optics capture the maximum amount of light emitted from the individual LEDs, creating a brilliant white light that delivers a reliable 50,000 hour lifespan. When lighting options demand military-grade reliability, the MIL-STD-461F EMI Compliant light is the total lighting solution.

## BEAM PATTERN

# INFRARED LIGHTS

Certain applications require a stealthy light source, and the Infrared LED Lights by RIGID offers an excellent solution. RIGID combines special LED lighting configurations and optics to provide a high-powered infrared light source that brings stealth to a new level. These infrared lights produce a beam of energy at 940 nanometers, which is considered invisible light. These lights are useful for enhancing night vision ability for military personnel, public safety, security services, and many other applications that utilize infrared technology.

## NIGHT VISION

## NIGHT VISION WITH INFRARED LIGHT

# LIGHTING KITS

pg 104 - pg 108

# IGNITE™ BACK-UP KITS

Most vehicles have very inadequate backup lighting, which can be a major safety problem. Rigid makes it easy to add compact and powerful backup lighting to any vehicle with the Rigid Ignite™ Backup Kit. The Ignite Series Accessory Lights are small but pack a lot of power with 1000 raw lumens in a light that measures just 1.4" x 1.4" x 2". While a wiring harness is not included, the powerful LEDs in each light consume less than one amp each, so powering them is often as easy as tapping into the vehicle's existing backup lighting circuit.

## FEATURES

- Small Package, Big Output
- IP68 Compliant
- RIGID Quality & Performance
- Unlimited Mounting Options
- (Surface Mount);  
• Mates To Any Go-Pro® Case Mount
- Easy (Flush Mount) Install
- Using 1.75" Hole saw
- Low Minimum Voltage; 6-28 VDC
- See pg. 34 for Additional Features

# IGNITE™ MOTORCYCLE KITS

Rigid's Ignite is compact yet powerful, packing 1000 raw lumens in a housing that measures just 1.4" x 1.4" x 2" and weighs less than 4 ounces. Each Ignite Light also consumes just 1 amp at full power. The Motorcycle Kits have both High and Low settings that enable the lights to easily work with a sealed control switch suitable for permanently mounting the lights just about anywhere on the bike. With the Ignite Motorcycle Kit, it's easier than ever to add lights to touring bikes, cruisers, dirt bikes, and just about any other application.

## FEATURES

- Small Package, Big Output
- IP68 Compliant
- Rigid Quality & Performance
- Unlimited Mounting Options
- (Surface Mount):  
Mates To Any Go-Pro™ Case Mount
- Using 1.75" Hole saw
- Low Minimum Voltage: 6-28 VDC
- 2 Outputs: High & Low
- See pg. 34 for Additional Features

# BRANDON PALANIUK SIGNATURE SERIES BOAT DECK LIGHT KITS

## FEATURES

- 50,000+ Hour Lifespan
- 9-24 V DC
- Durable UV Polyester Powder Coat
- Integrated Thermal Management System
- Impact Resistant Polycarbonate Lens
- IP68 Compliant - Dust / Water Ingress
- Over / Under Voltage Protection
- Op. Temp -40° F ~ +145° F / -40° C ~ +60° C
- Protected Against RFI / EMI
- Patented Technology
- Reverse Polarity Protection
- RoHS Compliant
- SAE J575 Compliant - Shock / Vibration
- Custom Wiring Harness (Up to 24' Fishing Boat)
- Available in 4 and 6 Light Options
- Multiple Color Choices

Created specifically for night fishing, RIGID's Boat Deck Light Kits provide a simple and effective way to illuminate boat decks for night use without blinding boat occupants. These kits consist of four or six A-Series lights with a dedicated 27' harness that can handle installations on boats up to 24' in length. The A-Series LED lights feature water resistant die cast aluminum housings, polycarbonate lens and a built-in thermal management system that ensures long life. The kit includes switches, mounting hardware, wiring and a power distribution block(s) for a simple and clean install. A variety of colors and color combinations are available to accommodate your own personal style or needs.

- Mounting Pads
- 3 Amp Blade Fuses (4 or 6)
- 1 or 2 Switches (1 or 2 Colors)

# UV BLACK LIGHT KITS

The UV Black Light Kits were designed exclusively with the night fisherman in mind. The UV Black Light Kits will illuminate fluorescent fishing line, making it easy to detect subtle bites. The added SR-M Driving Light Kit helps with making precise casts down the bank or to aide in netting a catch. Both lights include a 15' cord with a cigarette lighter adapter as well as a triple suction cup mount, making it easy to aim the light exactly where you want it anywhere on the boat. Whether you're a professional angler or you just enjoy night fishing, the RIGID UV Black Light Kits will help increase the success of any night fisherman.

## SINGLE LIGHT KIT

**PART# 401083**

### **KIT INCLUDES**

- SR-M Driving Diffused UV Light
- Triple Suction Cup Mount
- 15ft. DC Cigarette Lighter Adapter with switch

## COMBO LIGHT KIT

**PART# 401073**

### **KIT INCLUDES**

- SR-M Driving Diffused UV Light
- SR-M Driving Light
- Green Light Cover
- Triple Suction Cup Mount
- 15ft. DC Cigarette Lighter Adapter with switch

# TROLLING MOTOR MOUNT LIGHT KIT

Available for several popular models of the Minn Kota® Fortrex® trolling motor, this mounting kit replaces the original diversion plate mounted on the nose of the trolling motor mount. The housing is constructed of PA66 glass filled nylon and shock-absorbing silicone rubber, while a 25' plug-and-play harness makes installation easy. This lighting kit makes it simple to see what's dead ahead without overpowering normal night vision. The kit even includes an amber lens cover for use in fog or rain.

## TMM LIGHT KIT

**PART# 400033**

### **KIT INCLUDES**

- Minn Kota® Fortrex® Trolling Motor Mount
- 25 ft. Plug and Play Harness with Waterproof Switch
- SR-M PRO Driving LED Light
- Amber Lens Cover

- Compatible with Minn Kota® Fortrex® 80, 101, 101H, and 112
- DISCLAIMER: Not compatible with boat models where factory navigation lights are installed in the forward most portion of the rub rail at the bow of the boat.

# ROCK LIGHT KITS

The RIGID Rock Light Kit uses the power and durability of A-Series LED lighting and adds custom 15' leads on each light, a distribution block, plus switch and angled mounts to light any truck, Jeep, or all-terrain vehicle. This kit will allow you to light up the trail with strategically placed lights on the vehicle. Perfect for night rock-crawling, the LED lights are available in a variety of colors, including white, red, blue, green, or amber to aid night vision or accent vehicle colors. Rock Light Kits are available in 4-light or 6-light configurations to enhance and customize your night crawling experience.

## 4 LIGHT KIT

## 6 LIGHT KIT

### KIT INCLUDES

- A-Series with 15' Leads
- Distribution Block for Easy Wiring
- 8' Wiring Harness
- Angled Mounting Pads w/30° Angle
- Mounting Hardware

# BACK-UP LIGHT KITS

Most factory back-up lights are inadequate for being able to clearly see what's behind the vehicle while in reverse. The SR-Q Series PRO Back Up Light Kit is a sleek low profile lighting solution that packs more lighting output than ever before. Thanks to recent improvements to the advanced LED circuitry inside, the SR-Q Series PRO now emits 3,168 raw lumens.

## FEATURE

- 3 POSITION SWITCH OPTIONS: on, off and auto with reverse

# SPECIALTY MOUNTS

## RI ACCESSORIES BY RAM

RAM stands for "Round A-Mount" and features a unique, patented ball and socket design that provides a full 180° rotation of your mounted light. The ball is made from an elastomeric rubber, gripping the socket while also providing shock and vibration dampening. These mounts are compatible with Rigid Industries SR-M, SR-Q and D-Series LED lights. With RAM Mounts, the only limitation for lighting options is your imagination.
