THE ROAD TO YOUR BAGGER

The Bagger trend has taken many turns on the road from simple road bike to full custom's that pushed the boundaries of non-function. We're happy to see things have taken a turn back to the performance side of the tracks and we have the right product line to satisfy the high performance consumer.

NOTES

We can't help but go to a racing frame of mind, even when building a Bagger.

TOP 10 RECOMMENDED BAGGER PARTS

These bolt-on parts have been tested and approved by all types of riders and continue to be our most popular.

16" VINTAGE KING APE BAGGER HANDLEBAR

For our King Ape Bagger Handlebar, we continued with the classic vintage bar styling but added a special bend. This bend allows the bars to mount in a more upward position for a more aggressive riding position. Keeping with the King Ape aesthetic, everything is a little larger including the tubing diameter to give you a punk tall bar with attitude, style and quality.

FEATURES

- FITMENTS AVAILABLE FOR ALL FLHT/FLHX MODELS
- 1" DIAMETER TO ACCEPT STOCK OR AFTERMARKET HAND CONTROLS
- SLOTTED AND DRILLED TO ALLOW INTERNAL WIRING
- KNURLING FOR RISERS AT 3-1/2" ON-CENTER
- STYLISH MULTI-HOLE DRILLED CORNER GUSSET OFFERS STRENGTH & RIGIDITY
- BILLET ALUMINUM END CAPS INCLUDED
- BLACK BAR FEATURES A GLOSS BLACK BAR & CHROME MOON END CAPS
- COMPATIBLE WITH CABLE & THROTTLE-BY-WIRE APPLICATIONS

16" - 40.5" WIDE X 16" TOTAL RISE, 12" END
RISE X 12" CENTER WIDTH, 10.25" PULLBACK

Anthony's bike was an exercise in restraint, keeping the stock road glides lines and aesthetic while pushing the performance envelope. Upgraded suspension, motor and drastically reduced weight keep a smile on Anthony's face commuting across LA and through the Malibu Canyon's.

KIEDIS ROADGLIDE

When Anthony Kiedis from the Red Hot Chili Peppers calls and says he wants a bike built, you got to wonder where it's going. When he tells you he writes all his songs on his bike while he's listening to the tracks on the sound system you start to get the picture.

We stripped this one down to the frame as it spent most of its life on the Malibu Coast. Our friends at Bennett's Performance rebuilt the gloss black motor from the ground up using S&S parts and we slathered it in RSD Black Ops Clarity engine covers. Anthony wanted it blacked out. So the Black Ops theme was carried throughout. Radial mount forks, PM brakes, Progressive Suspension reservoir shocks and our Machine Ops Raid Wheels wrapped in sticky Dunlops keeps things rolling. Sound system upgraded by Kicker Audio. RSD Slant Slip-On Mufflers and Blunt intake keep the gasses rapidly moving. Pro Step bars with new Radial master cylinders are aggressive and comfortable.

Hopefully the bike keeps Anthony inspired to continue entertaining us with more blood, sugar, sex, magik and whatever else he's got cooking.

RECOMMENDED PRODUCT MAINTENANCE

CHROME

Wash with mild soap and water, use a healthy coat of Carnuba, apply often with a soft cloth.

BLACK ANODIZE

Wash with mild soap and water, no detergents or harsh chemical cleaners that can destroy the black anodized finish. You may use a non-abrasive wax with UV protectant on the black anodized portion of the product to protect it. Never use a harsh or abrasive wax as it will remove the black anodized finish. Avoid exposure to UV rays whenever possible.

CONTRAST CUT

See above for Black Anodized portion. For the milled area on standard Contrast Cut wash with mild soap and water, no detergents or harsh chemical cleaners. To remove stains on the milled area you may use the following methods depending upon the condition of the wheel.

- *A mild MAG polish will remove mild stains from the milled area, but will make the milled area shiny as it contains some abrasives. CAUTION: Take extreme care not to use this on the Black Ano surface of any product as it will remove the black finish.*

- *Scotch bright can be used to remove more severe stains on the milled area. CAUTION: Measures should be taken up to and including masking to ensure that the Black Ano surface of any product is not damaged.*

BLACK OPS

Wash with mild soap and water. No detergents or harsh chemical cleaners should be used, as they can destroy the anodized finish. Wax and/or cleaners containing wax are not recommended as they may leave an uneven finish on the matte surface. Detail spray or WD40 also work well for "dry cleaning" or wipe-down. Due to semi-rough surface of the finish, we recommend using a micro-fiber or other lint free type of cloth so as not to leave behind any remnants of the cloth.
