THE ROAD TO YOUR DYNA

Here at RSD, the Dyna is not dead. Remember that a couple extra bucks spent will let you ride the sh!t out of your bike all day long. Sometimes just a couple changes make you feel like you have a brand new bike. Like the old adage says, sometimes it's cheaper to keep her.

NOTES

*Give your Dyna a multi-faceted attitude
adjustment from front to back.*

TOP RECOMMENDED DYNA PARTS

We have selected a curated grouping of parts to keep your Dyna looking fresh for years to come.

ROLAND'S PICKS

Roland's obsession with Dynas continue even after last years BIG NEWS from Harley. The Dyna is the perfect bike when you have to get out of town fast. This love affair can spread to every nook & corner of the bike but Roland has a few favorites...

"Don't cut corners"

RADIAL BLUNT AIR CLEANER

The Blunt Air Cleaner is our smallest filtered air cleaner and features more leg clearance with a high flow filter. Simple, yet aggressively detailed styling keeps the Blunt focused on getting as much clean air into your motor, with as little ergonomic impact as possible.

"Handcrafted"

NOSTALGIA CAM COVER

The original billet ribbed cover line; the RSD Nostalgia Cam Cover is a direct replacement for your stock timing/cam cover that gives your machine a high quality vintage vibe with modern materials.

"Technical yet classic"

DYNA FREESTYLE SEAT

The Freestyle Dyna Seat is a slimmed down seat with a fast back that keeps you planted in the saddle. The material is black distressed vinyl with a Traction gripper center panel and features double stitching.

"Complete the package"

HUTCH WHEEL

The Hutch relives those glory days without the swap meet searches and the questionable safety of vintage cast wheels. Designed with weight savings in mind for a light, reliable and high quality wheel with enough funk to turn out any race chopper.

RECOMMENDED PRODUCT MAINTENANCE

CHROME

Wash with mild soap and water, use a healthy coat of Carnuba, apply often with a soft cloth.

BLACK ANODIZE

Wash with mild soap and water, no detergents or harsh chemical cleaners that can destroy the black anodized finish. You may use a non-abrasive wax with UV protectant on the black anodized portion of the product to protect it. Never use a harsh or abrasive wax as it will remove the black anodized finish. Avoid exposure to UV rays whenever possible.

CONTRAST CUT

See above for Black Anodized portion. For the milled area on standard Contrast Cut wash with mild soap and water, no detergents or harsh chemical cleaners. To remove stains on the milled area you may use the following methods depending upon the condition of the parts.

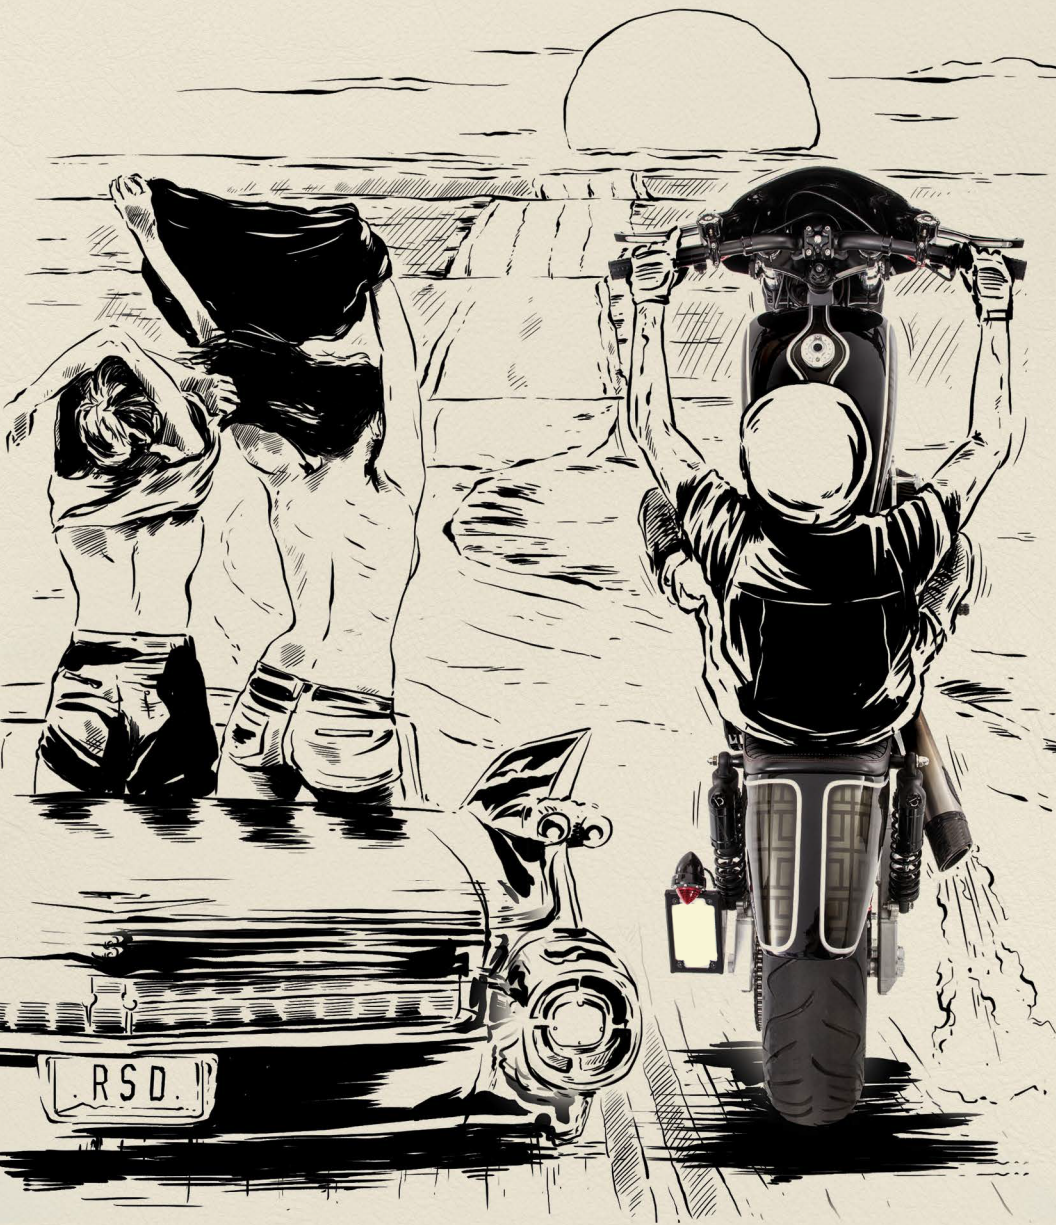

- *A mild MAG polish will remove mild stains from the milled area, but will make the milled area shiny as it contains some abrasives. CAUTION: Take extreme care not to use this on the Black Ano surface of any product as it will remove the black finish.*

- *Scotch bright can be used to remove more severe stains on the milled area. CAUTION: Measures should be taken up to and including masking to ensure that the Black Ano surface of any product is not damaged.*

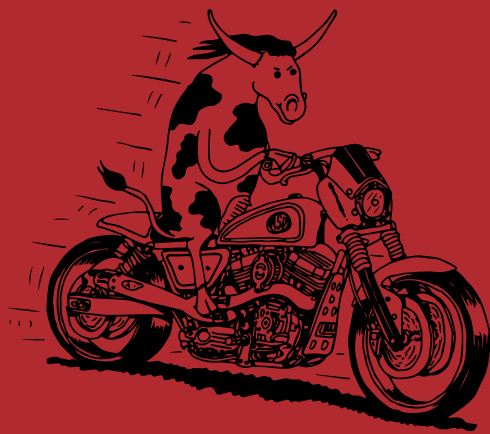

BLACK OPS

Wash with mild soap and water. No detergents or harsh chemical cleaners should be used, as they can destroy the anodized finish. Wax and/or cleaners containing wax are not recommended as they may leave an uneven finish on the matte surface. Detail spray or WD40 also work well for "dry cleaning" or wipe-down. Due to semi-rough surface of the finish, we recommend using a micro-fiber or other lint free type of cloth so as not to leave behind any remnants of the cloth.
