ROLAND'S PICKS

We've built many Sportsters over the years, as it is the perfect platform for customization. Here are some of Roland's favorite pieces for your sportster.

"Unique Narrow Width"

NARROW EMPIRE HANDLEBAR & CAFE MEGA RISERS

A tweak to our vintage handlebar with a new gusset we call the Empire. We've also changed up the bend and straightened the control area of the bar for a feel closer to a Tbar, but with adjustability. Pair the Mega Risers with your bars and you have the ultimate highbar set up.

"Easy bolt-on installation"

NOSTALGIA ROCKER BOX COVERS

RSD Nostalgia Rocker Boxes for Sportsters give your Sporty a nice finned detail while also adding increased cooling surface area to aid in lowering engine temperature.

"Unlimited bar & riser options"

TOP TRIPLE CLAMP

RSD billet Top Triple Trees increase the rigidity of your fork, improving suspension and decreasing front fork flex. They also look great while eliminating the built in riser on some Sportster models, allowing the use of standard risers. Also available without riser holes for a clean look on cafe bikes using Clip-Ons. All triples are drilled and tapped for Top Triple Gauge Mount and Adapter Plate.

"Eliminates bulky brackets"

SPORTSTER MID CONTROLS

The ultimate improvement for your foot positioning. Features foot pegs with race style pivots allowing for a higher lean angle and a mega knurl to ensure your feet stay planted and your focus remains on the road ahead. High quality fasteners and pivots ensure smooth operation with little effort.

RECOMMENDED STYLE GUIDE

Get the protection and look you need both on and off your Sportster.

FLAT TRACK YOUR SPORTY

Whether you're a pro or a Joe, the Sportster is the perfect platform to build a hooligan race bike. The spirit of hooligan racing comes from a simpler time, when you raced and rode home on the same bike. Today's flat track hooligan racing category is rapidly gaining in popularity with riders of all ages and experience levels across the nation by offering the fun of motorcycle competition in a less structured environment. Join in on the fun with a couple key products to get your sporty flat track ready.

SLANT CARBON FIBER INTAKE

This is the ultimate High Performance intake from RSD. We've combined the best in performance and light weight with an ergo friendly slanted carbon intake filter from K&N. Our Slant Filter element gives you more knee clearance and a slanted surface that's easy on the body during hard riding. The filter element is coupled with our newest backing plate shape from Vance & Hines for industry leading filtration in a simple package.

19 X 3" DEL MAR WHEEL

The Del Mar looks fast standing still, and it should. Inspired by classic flat track and road racing wheels, the Del Mar is one of our lightest wheels. Even with a lightened rotating mass, we still kept the detailing and style up to par with our new Contrast Ops and Machine Ops finishes. This wheel screams quality, race styling and performance. Also available in Chrome.

RECOMMENDED PRODUCT MAINTENANCE

CHROME

Wash with mild soap and water, use a healthy coat of Carnuba, apply often with a soft cloth.

BLACK ANODIZE

Wash with mild soap and water, no detergents or harsh chemical cleaners that can destroy the black anodized finish. You may use a non-abrasive wax with UV protectant on the black anodized portion of the product to protect it. Never use a harsh or abrasive wax as it will remove the black anodized finish. Avoid exposure to UV rays whenever possible.

CONTRAST CUT

See above for Black Anodized portion. For the milled area on standard Contrast Cut wash with mild soap and water, no detergents or harsh chemical cleaners. To remove stains on the milled area you may use the following methods depending upon the condition of the product.

- *A mild MAG polish will remove mild stains from the milled area, but will make the milled area shiny as it contains some abrasives. CAUTION: Take extreme care not to use this on the Black Ano surface of any product as it will remove the black finish.*

- *Scotch bright can be used to remove more severe stains on the milled area. CAUTION: Measures should be taken up to and including masking to ensure that the Black Ano surface of any product is not damaged.*

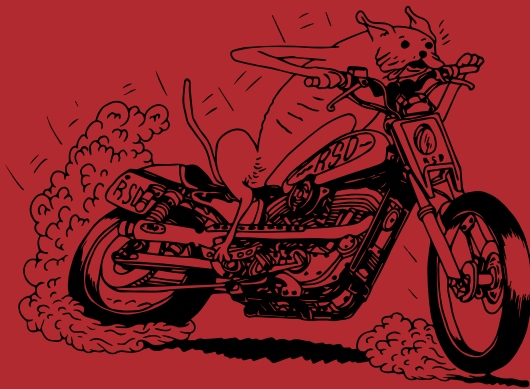

BLACK OPS

Wash with mild soap and water. No detergents or harsh chemical cleaners should be used, as they can destroy the anodized finish. Wax and/or cleaners containing wax are not recommended as they may leave an uneven finish on the matte surface. Detail spray or WD40 also work well for "dry cleaning" or wipe-down. Due to semi-rough surface of the finish, we recommend using a micro-fiber or other lint free type of cloth so as not to leave behind any remnants of the cloth.

The RSD Design Center is located in Los Alamitos, CA. Our facility functions as a design and development center, custom build shop and retail store.
