TOP QUALITY BRANDED MATERIALS

Top quality materials, combined with a highly sophisticated design and prudent innovations, make every Rukka product a safe, comfortable and long-lasting partner for any motorcyclist.

RUKKA D30 AIR SYSTEM

PATENTED, CE APPROVED AND BREATHABLE PROTECTOR

D30 Air is a patented protective material that combines enhanced chemistry with product engineering to produce high performance shock absorption and impact protection solutions.

A brand New D30 Air material has been developed especially for the Rukka protectors. This New material has some unique characteristics that provide enhanced versatile and flexible protection.

THE BENEFITS OF D30 AIR:

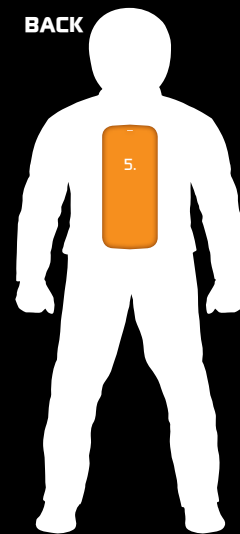

- High performance shock absorption
- Trusted protection
- Maximum flexibility
- Extremely comfortable
- Tested according to CE-standards

HOW D30 AIR WORKS
WIE FUNKTIONIERT D30 AIR
MITEN D30 AIR TOIMII

The material contains intelligent molecules that flow freely when moving but on shock lock together to absorb impact energy, instantly returning to their flexible state.

D30 Air does not go hard when hit, the molecules lock together to absorb and spread the force, significantly reducing the effect of impact.

D30 Air disperses the force of impact, drastically reducing transmitted force and minimizing the risk of injury or equipment damage.

The protective qualities are retained after repetitive impact.

Comfort, flexibility and protection are always present.

1. JACKET SET 7/70265 799R

 ALSO AVAILABLE

Patented breathable Rukka RVP Air protectors function equally in all weather conditions.

- Active safety
- Regardless of the weather
- Breathe and let the fabric breathe
- Patented
- Meet the prEN 1621-1 2010
- Distribute the impact
- The damping is hundreds of times larger in comparison to a hard protector
- Prevent the outer material breakage better than hardshell protectors

ARMAPROTECTION TECHNOLOGY

ArmaProtection Technology

UNIQUE PROTECTION, COMFORT AND FUNCTIONALITY

Gore-Tex Pro with ARMACOR protection technology and Laminated Leather

UNIQUE PROTECTION, COMFORT AND FUNCTIONALITY

Gore-Tex Pro for 100% water- and windproofness, durability and breathability. Water- and windproofness and breathability are guaranteed by 3-layer Gore-Tex ProShell with Armacor product technology. This advanced material mix achieves excellent tear and abrasion resistance and thereby exceedingly good protection.

Gore Lockout Closure; a simple, toothless, easy to use and durably waterproof front closure system.

The latest novelty is a 3-layer Gore-Tex leather laminate with 1.2 mm bovine leather outer material. The only durably waterproof, breathable leather material for Motorsports apparel.

The ArmaProtection technology also benefits the temperature-regulating Outlast material, thus contributing to a comfortable thermal balance. Outlast absorbs and releases warmth according to the wearer's individual needs acting as a temperature-balancing buffer.

AirCushion System on the inside of the seat area reduces condensation and acts as a climate buffer. Keptec Antiglides stops annoying sliding over the seat.

The patented breathable Rukka Air protectors for maximum active and passive safety.

Reflectors as standard.

Note! See details in individual product descriptions. Check individual care instructions from the product.

R-STAR jacket 77102 737R trousers 77103 737R

MATERIALS:

- Elastic Cordura which is used as the face material in a Gore-Tex Pro 3-layer laminate.
- Waterproof Gore-Tex Lockout closure in front
- Tear and abrasion resistant Super Fabric reinforcements

PROTECTORS:

- Rukka D30 Air Protectors meet the requirements of CE Norm prEN1621-1 2010 and prEN1621-2 2010

SPECIAL:

- Soft neoprene in collar
- Detachable collar of elastic GTX 3-layer fabric
- Detachable Outlast inner jacket and trousers
- Integrated detachable kidneybelt
- Collar with magnet closure
- Sleeves with zippers and waterproof GTX cuffs
- Ventilation on both sides of the jacket
- Width adjustment on upper and lower arm
- Jacket and trousers have connecting zippers
- Two waterproof inside pockets, one with mobile phone pocket, two outside pockets.
- Rukka AirCushion and Rukka Antiglied system of Keprotect in seating area
- Waist closure with double tightening.
- Two outside pockets in trousers
- Ventilation system on top of the both knees

AirPower Technology

ENHANCED COMFORT EVEN FOR HOT RIDING CONDITIONS

Gore-Tex & Cordura AFT

ENHANCED COMFORT EVEN FOR HOT RIDING CONDITIONS

AirPower Technology benefits Cordura AFT material, that has been developed by Rukka in collaboration with DuPont to meet the safety standards for motorcycling. High-performance polyamide fibres form the basis of a lightweight, extremely tear- and abrasion-resistant design. The Cordura AFT uses a knitted mesh structure that is experienced especially comfortable when riding in hot climate.

Detachable Gore-Tex inner jacket and inner trousers for durability, breathability and 100% water- and windproofness.

Gore Lockout Closure; a simple, toothless, easy to use and durably waterproof front closure system.

Temperature regulating Outlast material.

The patented breathable RVP Air protectors for maximum active and passive safety.

3M Scotchlite reflectors as standard

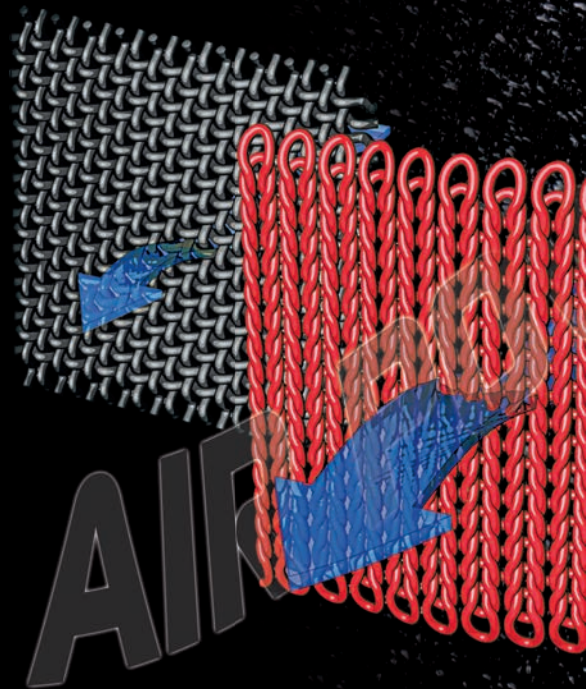

Note! See details in individual product descriptions. Check individual care instructions from the product.

CORDURA
AFT BRAND
F A B R I C

Tear- and abrasion-resistant Cordura AFT fabric.

- + Knitted mesh structure. More comfort when riding in hot climate.
- + Cordura AFT is 2-7 times more durable than Nylon, polyester and Cotton
- + High performance polyamide fibres form the basis of lightweight design that has an extremely high resistance against wear and tear

Gore-Tex® gloves with
2 in 1
TECHNOLOGY

User can change between direct grip and warmth

Two different chambers offers an easy and convenient change between direct grip and warmth. In the warm chamber the insulation provides optimum warmth over all sides of the fingers. In the grip chamber the insulation is only on the back of the fingers. This means high tactility and increased breathability.

 The Sanitized® finishing of the Rukka product acts like a deodorant. The garment remains fresh, odourless and comfortable also in constant wear. Sanitized increases wearing comfort and affords protection against hygiene problems. For the products worn next to the skin Sanitized finish prevents the development of hygiene problems.

Colour: 990 black

Outlast Temperature Regulation stores and releases body heat.

It works to keep the wearer's temperature not too hot... not too cold... but just right, over a broad range of environments and activity levels.

When your activity level or the outside temperature increase, the Outlast thermocules that contain the phase change paraffin begin to change from a solid to a liquid which provides you with a comfortable sensation of thermal equilibrium. The energy required to activate this process comes from your warm body or the rising ambient temperature.

When you begin to cool down, Outlast thermocules begin to change back from a liquid to solid. In this phase change, the energy that was absorbed by the thermocules while you were active is returned to you.

With the new moisturetransferring material Outlast functions in active use too.

Not too hot... Not too cold... But just right.

THERMO
 MIDLAYER

TOAST microfleece-set

mens 70575 217R
 ladies' 70576 217R

Sizes: mens: S-3XL, ladies': 34-46
Colour: 990 black

- **HIGHLY BREATHABLE**
 Transfers the body's extra moisture away from the skin.
- **CAPTURES WARMTH**
 Polyester fleece is extremely warm because of its structure. The pile surface provides space for air pockets between the threads
- **RESISTS MOISTURE**
 Keeps warm even under extreme weather conditions
- **DRIES QUICKLY**
- **SOFT AND COMFORTABLE**

Sizes: S-XXL

Colour: 990 black

 New N2S is a combination of Windstopper and microfleece. Windstopper membrane keeps the wind out while retaining breathability. Microfleece feels soft and comfortable, keeps you warm and transfers body's extra moisture further. WINDSTOPPER N2S products can be worn either directly on the skin to serve as functional undergarments or above the functional underwear to form an additional, warming layer.

Sizes: S-XXL

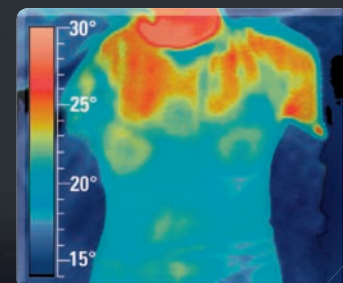

Colour: 990 black

MOTORRAD

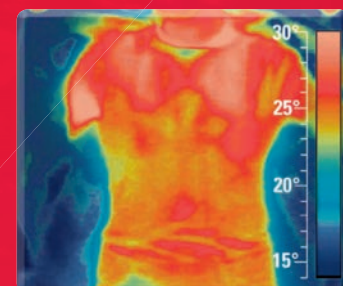

Urteil: **sehr gut**

 Rukka Next to Skin series employ the concept of multifunctional high-tech laminates in the functional undergarments sector. An outer layer of Windstopper membrane keeps the wind out while retaining breathability. The inner, knitted layer conducts moisture away from the skin, preventing chill-out through evaporation. WINDSTOPPER N2S (Next-to-skin) products can be worn either directly on the skin to serve as functional undergarments or above the functional underwear to form an additional, warming layer.

THE BLUE AREAS SHOW THAT THIS FABRIC CANNOT WITHSTAND WIND. ALTHOUGH THE OUTSIDE TEMPERATURE REMAINS THE SAME, YOU WILL QUICKLY START TO FEEL COLD. THIS IS THE WINDCHILL EFFECT.

THE RED AREAS SHOW THAT THE WINDSTOPPER FABRIC CAN BLOCK THE WIND. YOU REMAIN COMFORTABLE AND WARM AND CAN MAINTAIN YOUR LEVEL OF PHYSICAL ACTIVITY.

GORE-TEX, THE BASICS OF ALL RUKKA MOTORCYCLING OUTFITS
100% WATERPROOF • 100% WINDPROOF • DURABLE • BREATHABLE

GORE-TEX

- 100% Waterproof - Even under high pressures the waterdrops cannot penetrate the membrane. Your body remains dry.
- 100% Windproof - The wind is caught into the structure of the membrane. You stay warm.
- Durable
- Breathable - Body moisture escapes through the membrane.
- Z-liner is freely suspended between the outer material and the lining

GORE-TEX PRO WITH ARMACOR PRODUCT TECHNOLOGY

Thanks to its patented lattice structure with an integrated Kevlar® core this technology offers extreme tear and abrasion resistance yet lighter weight. Incorporated into a Gore-Tex Pro motorcycle jacket, it will protect enthusiastic motorcyclists in the event of a fall. This means safety and enhanced comfort - in all weather conditions.

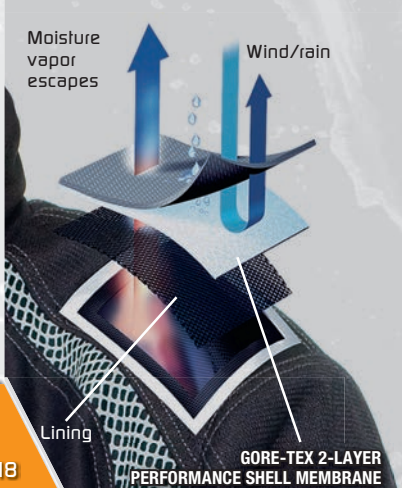

- Extremely tough, extremely breathable, durably waterproof and windproof
- Provides perfect and lasting protection against the variable weather elements.
- An ideal combination of passive and active security.
- Durable waterproofness, total windproof protection and increased breathability with Gore-Tex 3-layer laminate.
- Even greater comfort in warm weather.
- Even more protection against cooling in wet weather.

GORE-TEX PRO LEATHER LAMINATE

- The best advantages of leather combined to waterproofness - leather for every weather
- The only durably waterproof, breathable leather material for Motorsports apparel.
- A 3-layer Gore-Tex Pro laminate with 1,2 mm bovine leather outer material
- A highly breathable, hydrophobic leather prevents the suit from getting wet

GORE-TEX 2-LAYER PERFORMANCE SHELL

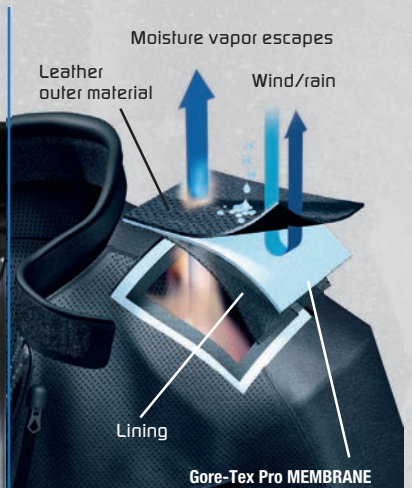

GORE-TEX Z-LINER PERFORMANCE SHELL

GORE-TEX PRO WITH ARMACOR PRODUCT TECHNOLOGY

GORE-TEX PRO LEATHER LAMINATE

SUPER FABRIC REINFORCEMENTS

LAMINATED GORE-TEX SUPER FABRIC REINFORCEMENTS

GORE
LOCKOUT™
CLOSURE

From the Inventor of GORE-TEX® Products

A simple, toothless, easy to use and durably waterproof front closure system.

- Easy operation due to an innovative 2-track design
- Tough, resistant and fatigue-free due to the use of top-quality materials
- Attractive appearance due to the flat construction and seamless join of the closure tracks
- No catching of material due to a flap-free design
- Garments worn underneath remain reliably dry due to a durably waterproof closure

SuperFabric™

SuperFabric material provides critical, top layer protection in areas such as shoulders, elbows and knees

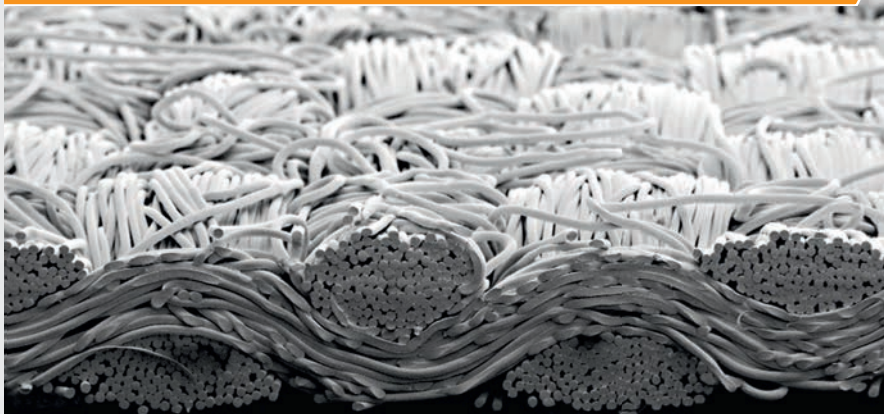

- **ABRASION & CUT RESISTANT**
 extremely hard epoxy layer attached to a base fabric
 -> up to 10 times better abrasion resistance
- **BREATHABLE**
 allows air to pass through the small gaps between guard plates
- **LAMINATED**
 Added flexible armor panels to boost performance in new Rukka Gore-Tex 3L ProShell laminates
- **HEAT RESISTANT**
 The guard plates help reduce heat to fabric below generated by the friction against asphalt

- SuperFabric technology takes a base fabric (nylon, neoprene, crepe etc.) and overlays it with tiny, hard plates (guard plates) in a specific arrangement.
- The gaps between guard plates allow complete flexibility and are small enough to keep even sharp objects from penetrating.

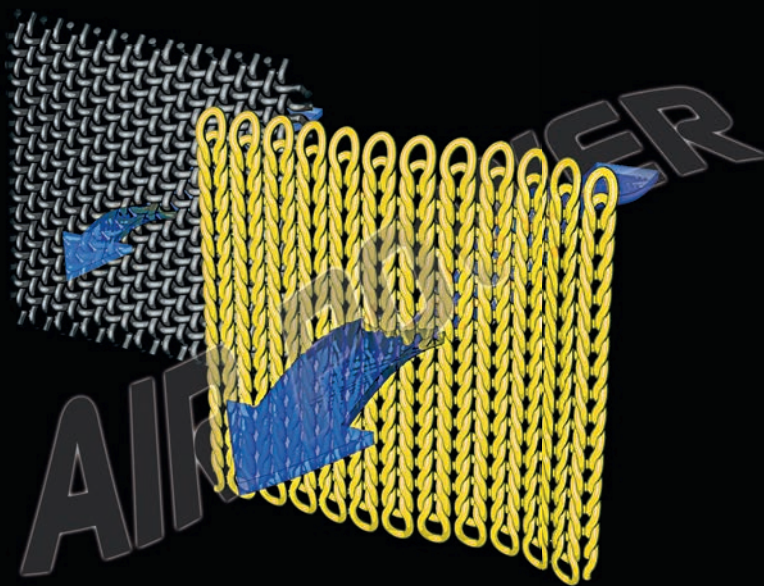

HIGHER ABRASION RESISTANCE VS. BETTER BREATHABILITY

CORDURA:

Enhanced tear and abrasion resistance, and long-lasting durability.

CORDURA AFT:

Knitted mesh structure. More comfort when riding in hot climate.

CORDURA
BRAND
F A B R I C

CORDURA
AFT
BRAND
F A B R I C

- Cordura is a nylon yarn made out of 100 % polyamide fibres. The raw fibres are cut, respun and finally woven to a fabric.
- Cordura is available in many different fibre strengths and has a much higher abrasion resistance than regular nylon.
- Rukka employs only Cordura with a minimum fibre strength of at least 500 denier, raising safety standards to a very high level.

Tear- and abrasion-resistant Cordura AFT fabric.

- + Knitted mesh structure. More comfort when riding in hot climate.
- + Cordura AFT is 2-7 times more durable than Nylon, polyester and Cotton
- + High performance polyamide fibres form the basis of lightweight design that has an extremely high resistance against wear and tear

ENHANCED SAFETY AND COMFORT

rukka Antiglidesystem

rukka Air Cushion system

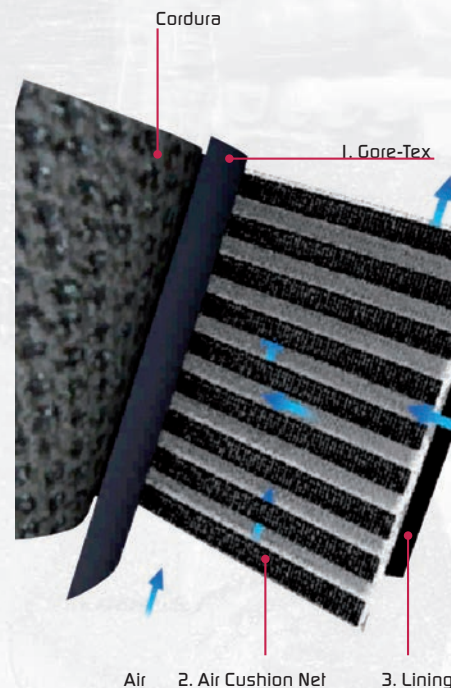

ANTIGLIDE KEPROTEC reinforcement material (includes Kevlar) in the seat area ensures a good grip and prevents sliding over the seat

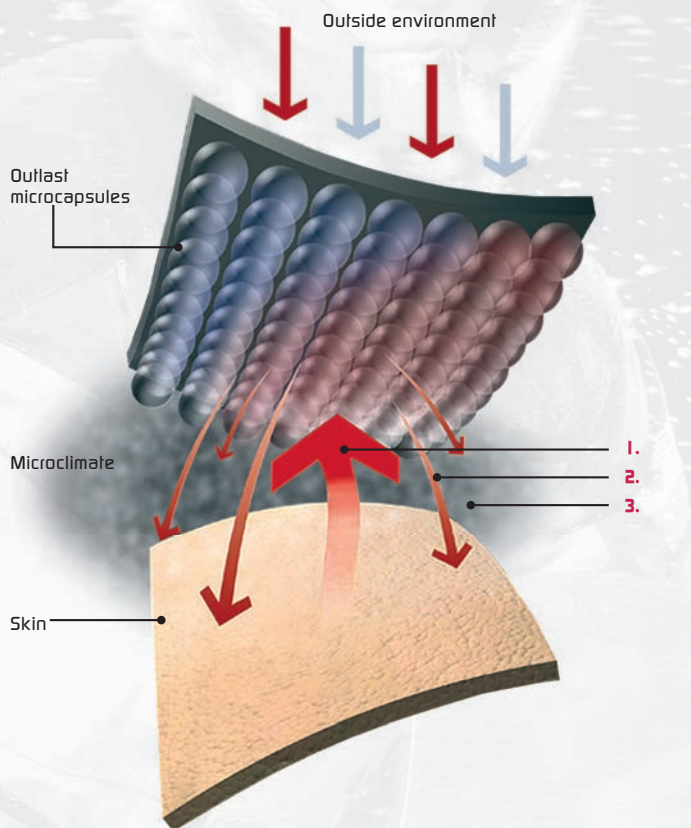

AIR CUSHION SYSTEM

works as a climate buffer and reduces condensation

1. 100 % water- and windproof Gore-Tex membrane
2. Knitted Air Cushion net
3. Breathable lining

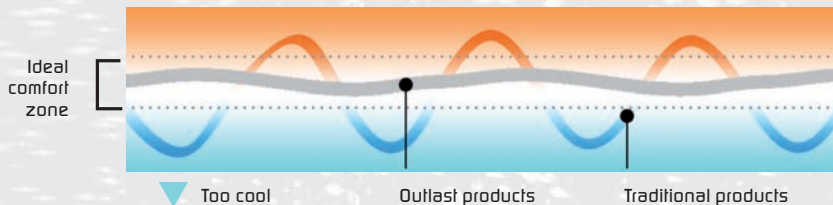

ADAPTIVE COMFORT

1. Outlast microcapsules absorb the excess heat.
2. Stored heat is released to the body as needed.
3. The result is a constant microclimate.

▲ OUTLAST VS. TRADITIONAL PRODUCTS

Not too hot... Not too cold... But just right.

- Revolutionary Outlast material contributes to a comfortable thermal balance. It absorbs and releases warmth according to the wearer's individual needs acting as a temperature balancing buffer.
- Outlast works as a thermal shock absorber by slowing the rate of temperature change within a wearer's personal microclimate.
- Outlast reduces the rate at which a person will overheat or get cold.
- Outlast will provide enhanced comfort.

100 % WINDPROOF

WINDSTOPPER ACTIVE SHELL

- 100 % Windproof
- Water repellent
- Breathable
- Comfortable in various weather conditions
