# Rukka Air Protectors

Every Rukka motorcycling outfit carries the patented breathable Rukka Air protectors that meet the CE norm EN 1621-1 2012 and function equally in all weather conditions. Also available back protector that meet the CE norm prEN 1621-2 2010.

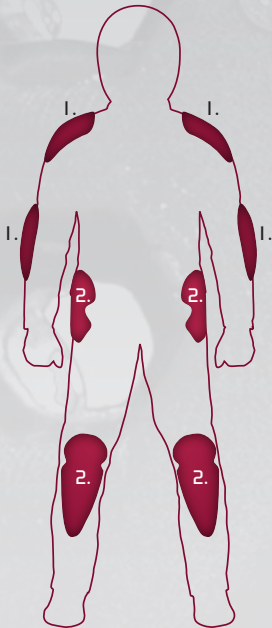

## Rukka RVP Air System

**1. JACKET SET**  
 9 70265 799R CE EN 1621-1 2012

**2. TROUSER SET**  
 9 70266 799R CE EN 1621-1 2012

Patented breathable Rukka RVP Air protectors function equally in all weather conditions.

- Active safety
- Regardless of the weather
- Breathe and let the fabric breathe
- Patented
- Meet the EN 1621-1 2012
- Distribute the impact
- The damping is hundreds times larger in comparison to a hard protector
- Prevent the outer material breakage better than hardshell protectors

## Rukka D30 Air System

D30 and Rukka worked together to develop a unique D30 material only for Rukka which was then used in the production of an exclusively designed range of Rukka limb and back protector components.

### PATENTED, CE APPROVED AND BREATHABLE PROTECTOR

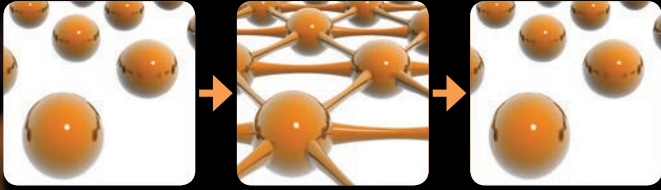

D30 Air is a patented protective material that combines enhanced chemistry with product engineering to produce high performance shock absorption and impact protection solutions.

A brand New D30 Air material has been developed especially for the Rukka protectors. This New material has some unique characteristics that provide enhanced versatile and flexible protection.

### THE BENEFITS OF D30 AIR:

- High performance shock absorption
- Trusted protection
- Maximum flexibility
- Extremely comfortable
- Tested according to CE-standards

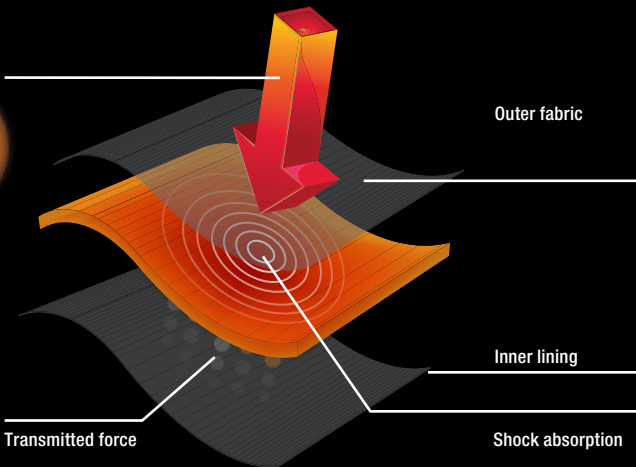

## HOW D30 AIR WORKS WIE FUNKTIONIERT D30 AIR MITEN D30 AIR TOIMII

The material contains intelligent molecules that flow freely when moving but on shock lock together to absorb impact energy, instantly returning to their flexible state.

D30 Air does not go hard when hit, the molecules lock together to absorb and spread the force, significantly reducing the effect of impact.

Impact force

D30 Air disperses the force of impact, drastically reducing transmitted force and minimizing the risk of injury or equipment damage.

The protective qualities are retained after repetitive impact.

Comfort, flexibility and protection are always present.

# ArmaProtection Technology

UNIQUE PROTECTION, COMFORT AND FUNCTIONALITY

Gore-Tex Pro with Armacor protection technology and Laminated Leather

**UNIQUE PROTECTION, COMFORT AND FUNCTIONALITY**

Gore-Tex Pro for 100% water- and windproofness, durability and breathability.

Water- and windproofness and breathability are guaranteed by 3-layer Gore-Tex ProShell with Armacor product technology. This advanced material mix achieves excellent tear and abrasion resistance and thereby exceedingly good protection.

Waterproof YKK -Aqua Seal front zipper.

Gore Lockout Closure; a simple, toothless, easy to use and durably waterproof front closure system.

3-layer Gore-Tex leather laminate with 1,2 mm bovine leather outer material. The only durably waterproof, breathable leather material for Motorsports apparel.

The ArmaProtection technology also benefits the temperature-regulating Outlast material, thus contributing to a comfortable thermal balance. Outlast absorbs and releases warmth according to the wearer's individual needs acting as a temperature-balancing buffer.

AirCushion System on the inside of the seat area reduces condensation and acts as a climate buffer. Keprotec Antiglide stops annoying sliding over the seat.

The patented breathable Rukka Air protectors for maximum active and passive safety.

Reflectors as standard.

 THE ADVENTURE OUTFIT FOR  
 HOT RIDING CONDITIONS™

# AirPower Technology

ENHANCED COMFORT EVEN FOR HOT RIDING CONDITIONS

Gore-Tex & Cordura AFT

**ENHANCED COMFORT EVEN FOR HOT RIDING CONDITIONS**

AirPower Technology benefits Cordura AFT material, that has been developed by Rukka in collaboration with DuPont to meet the safety standards for motorcycling. High-performance polyamide fibres form the basis of a lightweight, extremely tear- and abrasion-resistant design. The Cordura AFT uses a knitted mesh structure that is experienced especially comfortable when riding in hot climate.

Detachable Gore-Tex inner jacket and inner trousers for durability, breathability and 100% water- and windproofness.

Temperature regulating Outlast material.

The patented breathable Rukka Air protectors for maximum active and passive safety.

3M Scotchlite reflectors as standard

GORE-TEX® GLOVES WITH

## 2 in 1 TECHNOLOGY

User can change between direct grip and warmth  
Two different chambers offers an easy and convenient change between direct grip and warmth. In the warm chamber the insulation provides optimum warmth over all sides of the fingers. In the grip chamber the insulation is only on the back of the fingers. This means high tactility and increased breathability.

**Thermo**

**Not too hot...  
 Not too cold...  
 But just right.**

Outlast Temperature Regulation stores and releases body heat.

It works to keep the wearer's temperature not too hot... not too cold... but just right, over a broad range of environments and activity levels.

When your activity level or the outside temperature increase, the Outlast thermocules that contain the phase change paraffin begin to change from a solid to a liquid which provides you with a comfortable sensation of thermal equilibrium. The energy required to activate this process comes from your warm body or the rising ambient temperature.

When you begin to cool down, Outlast thermocules begin to change back from a liquid to solid. In this phase change, the energy that was absorbed by the thermocules while you were active is returned to you.

With the new moisturetransferring material Outlast functions in active use too.

**N2S**

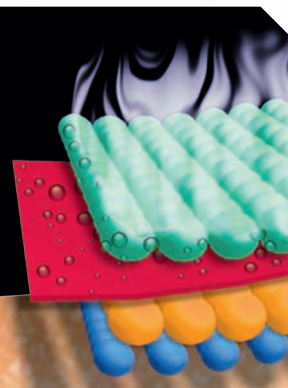

New N2S is a combination of Windstopper and microfleece. Windstopper membrane keeps the wind out while retaining breathability. Microfleece feels soft and comfortable, keeps you warm and transfers body's extra moisture further. WINDSTOPPER N2S products can be worn either directly on the skin to serve as functional undergarments or above the functional underwear to form an additional, warming layer.

SIZES	S - XXL
COLOURS	990 black

**N2S**

- OUTER LAYER
- WINDSTOPPER MEMBRANE
- WATERABSORBING LAYER
- WATERTRANSMITTING LAYER

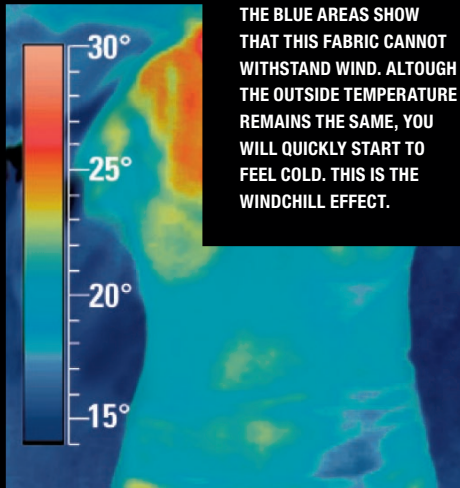

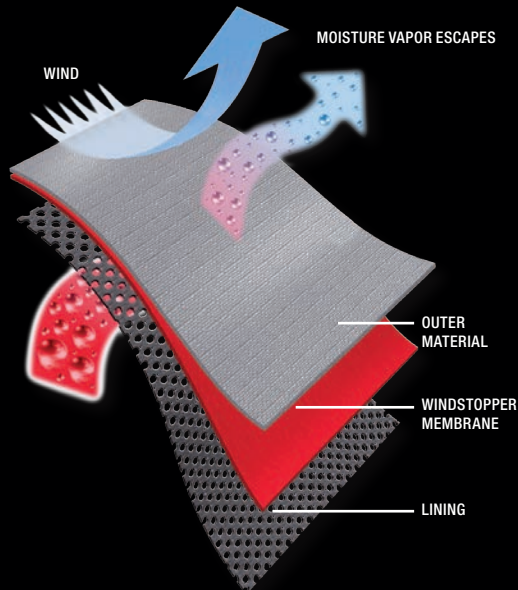

Underwear to protect against wind. Front covered with Gore Windstopper. Other parts made of lightweight 100% polyester allowing the body moisture to pass away from the skin creating ideal body temperature balance and comfort during the riding.

SIZES	S - 3XL
COLOURS	990 black

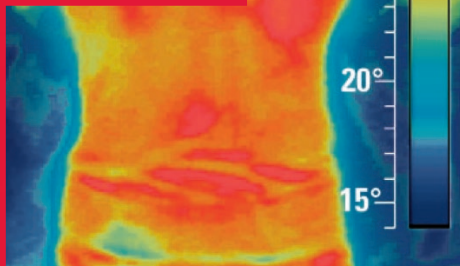

- 100 % windproof
- Water repellent
- Breathable
- Comfortable in various weather conditions

THE BLUE AREAS SHOW THAT THIS FABRIC CANNOT WITHSTAND WIND. ALTHOUGH THE OUTSIDE TEMPERATURE REMAINS THE SAME, YOU WILL QUICKLY START TO FEEL COLD. THIS IS THE WINDCHILL EFFECT.

THE RED AREAS SHOW THAT THE WINDSTOPPER FABRIC CAN BLOCK THE WIND.

YOU REMAIN COMFORTABLE AND WARM AND CAN MAINTAIN YOUR LEVEL OF PHYSICAL ACTIVITY.

100% WATERPROOF • 100% WINDPROOF • DURABLE • BREATHABLE

**GORE-TEX**

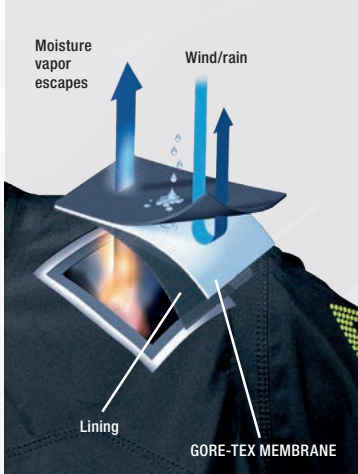

- 100% Waterproof - Even under high pressures the waterdrops cannot penetrate the membrane. Your body remains dry.
- 100% Windproof - The wind is caught into the structure of the membrane. You stay warm.
- Durable
- Breathable - Body moisture escapes through the membrane.
- Z-liner is freely suspended between the outer material and the lining

**GORE-TEX PRO WITH ARMACOR PRODUCT TECHNOLOGY**

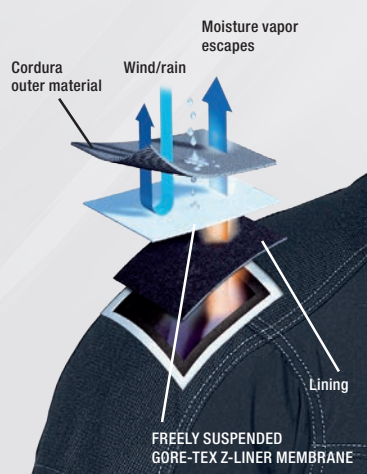

- Thanks to its patented lattice structure with an integrated Kevlar® core this technology offers extreme tear and abrasion resistance yet lighter weight. Incorporated into a Gore-Tex Pro motorcycling jacket, it will protect enthusiastic motorcyclists in the event of a fall. This means safety and enhanced comfort - in all weather conditions.
- Extremely tough, extremely breathable, durably waterproof and windproof
  - Provides perfect and lasting protection against the variable weather elements.
  - An ideal combination of passive and active security.
  - Durable waterproofness, total windproof protection and increased breathability with Gore-Tex 3-layer laminate.
  - Even greater comfort in warm weather.
  - Even more protection against cooling in wet weather.

**GORE-TEX PRO LEATHER LAMINATE**

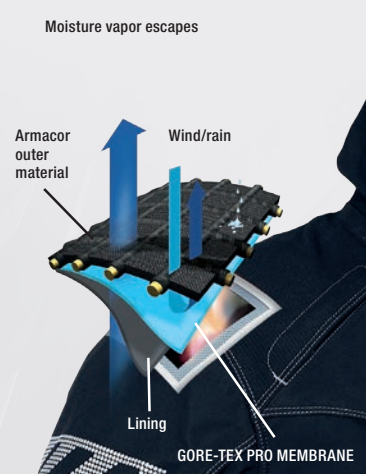

- The best advantages of leather combined to waterproofness - leather for every weather
- The only durably waterproof, breathable leather material for Motorsports apparel.
- A 3-layer Gore-Tex Pro laminate with 1,2 mm bovine leather outer material
- A highly breathable, hydrophobic leather prevents the suit from getting wet

## AQUASEAL®

Aquaseal® is a registered trademark of YKK CORPORATION in Japan and other countries/ regions.

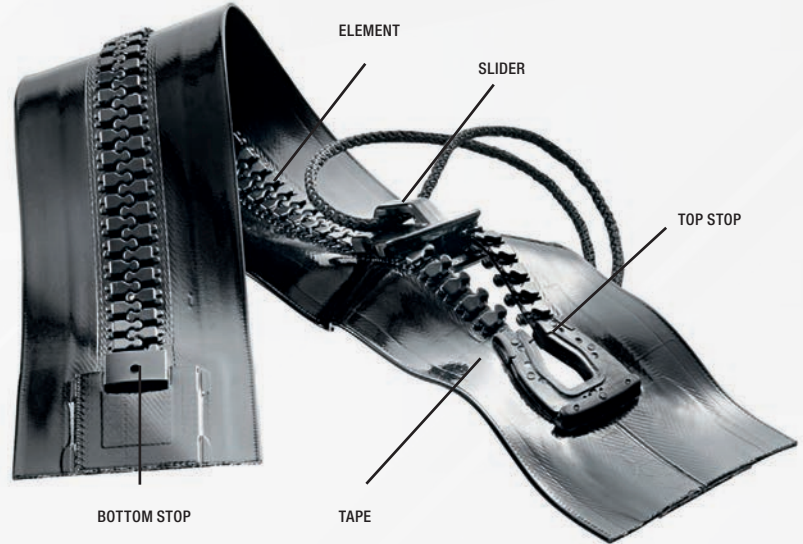

### LOCKOUT™ CLOSURE

From the Inventor of GORE-TEX® Products

**A simple, toothless, easy to use and durably waterproof front closure system.**

- Easy operation due to an innovative 2-track design
- Tough, resistant and fatigue-free due to the use of top-quality materials
- Attractive appearance due to the flat construction and seamless join of the closure tracks
- No catching of material due to a flap-free design
- Garments worn underneath remain reliably dry due to a durably waterproof closure

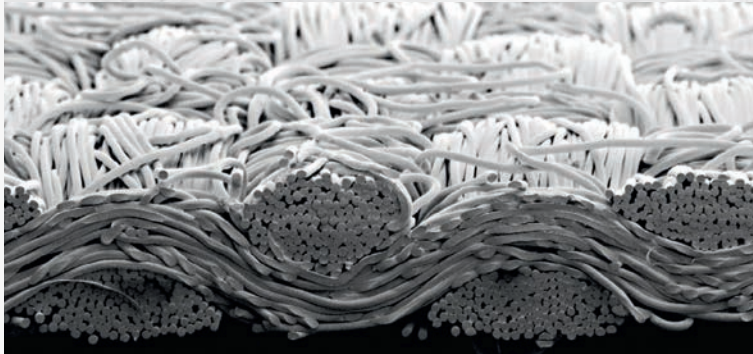

**YKK AQUASEAL® IS A NEW TYPE OF WATERPROOF ZIPPER WHICH USES POLYESTER ELASTOMER FOR THE ZIPPER TAPE.**

The lightweight fully waterproof zipper to consider for equipment complying with the latest international maritime safety standards. Combining Vislon® technology with a seal between the zipper elements, Aquaseal® allows for easy and smooth operation with protection in critical situations.

- Flexibility of the zipper increases the suit's fit.
- Smooth slider operation and high operability

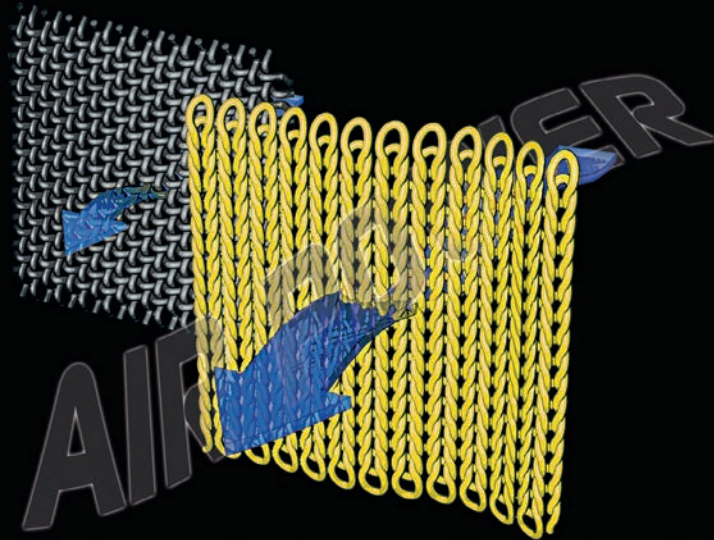

**HIGHER ABRASION RESISTANCE VS. BETTER BREATHABILITY**

**CORDURA:**

Enhanced tear and abrasion resistance, and long-lasting durability.

**CORDURA AFT:**

Knitted mesh structure. More comfort when riding in hot climate.

**CORDURA®**  
 BRAND  
 F A B R I C

- Cordura is a nylon yarn made out of 100 % polyamide fibres. The raw fibres are cut, respun and finally woven to a fabric.
- Cordura is available in many different fibre strengths and has a much higher abrasion resistance than regular nylon.
- Rukka employs only Cordura with a minimum fibre strength of at least 500 denier, raising safety standards to a very high level.

**CORDURA®**  
 AFT BRAND  
 F A B R I C

**Tear- and abrasion-resistant Cordura AFT fabric.**

- + Knitted mesh structure. More comfort when riding in hot climate.
- + Cordura AFT is 2-7 times more durable than Nylon, polyester and Cotton
- + High performance polyamide fibres form the basis of lightweight design that has an extremely high resistance against wear and tear

**ENHANCED SAFETY AND COMFORT**

**rukka**  
**Antiglide**  
 system

**ANTIGLIDE KEPROTEC**

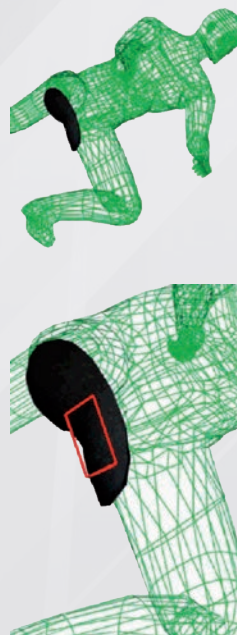

reinforcement material (includes Kevlar) in the seat area ensures a good grip and prevents sliding over the seat

**AIR CUSHION SYSTEM**

works as a climate buffer and reduces condensation

1. 100 % water- and windproof Gore-Tex membrane
2. Knitted Air Cushion net
3. Breathable lining

**rukka** **Air**  
**Cushion**  
 system

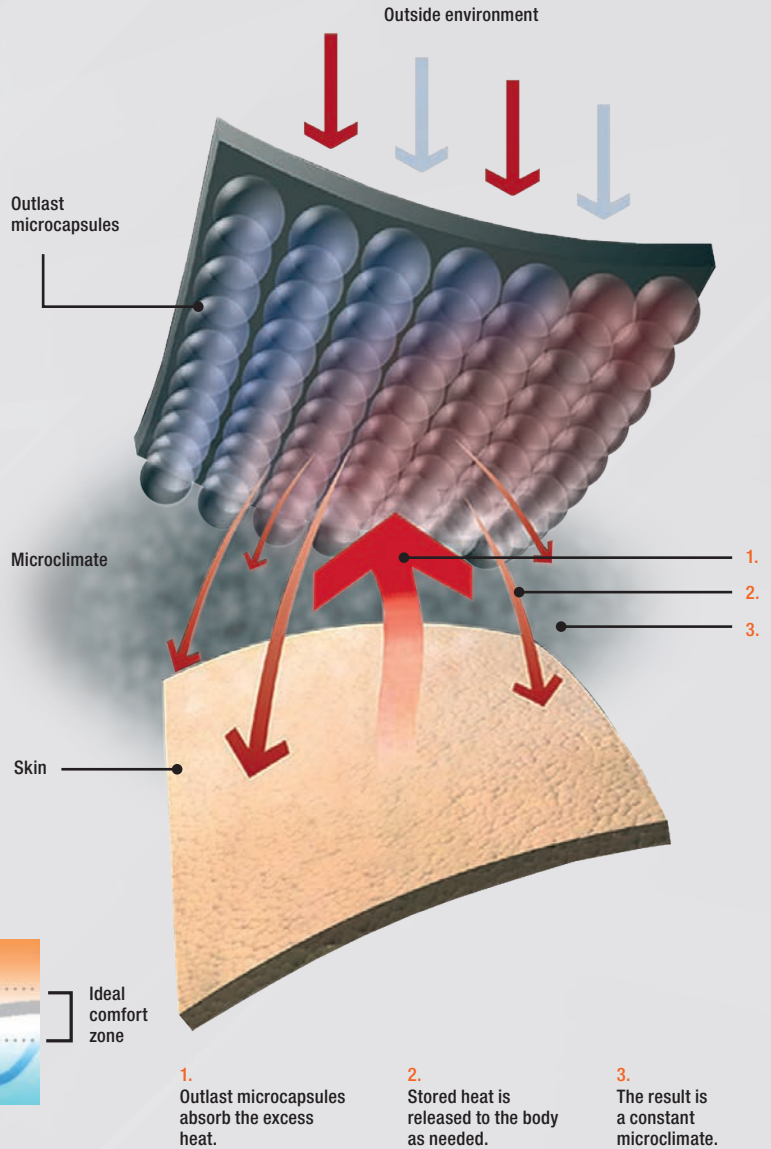

## ADAPTIVE COMFORT

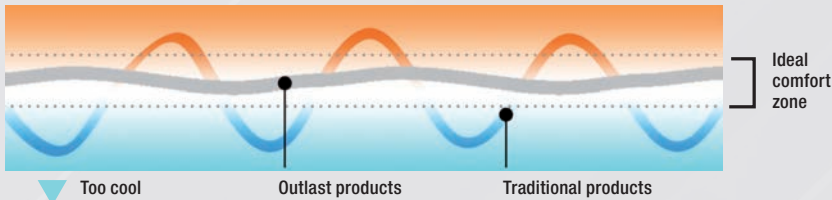

**Not too hot...**  
**Not too cold...**  
**But just right.**

Revolutionary Outlast material contributes to a comfortable thermal balance. It absorbs and releases warmth according to the wearer's individual needs acting as a temperature balancing buffer.

- Outlast works as a thermal shock absorber by slowing the rate of temperature change within a wearer's personal microclimate.
- Outlast reduces the rate at which a person will overheat or get cold.
- Outlast will provide enhanced comfort.
