# DEFENCE & COMFORT

HIGH PERFORMANCE MOTORCYCLING OUTFITS AND ACCESSORIES

2019

## ACTIVE SAFETY THROUGH ENHANCED COMFORT

Rukka motorcycling garments are designed and manufactured according to the Rukka Defence & Comfort performance standards to meet even the strictest criteria set for weather-proofing and riding comfort.

Rukka motorcycling garments carry the Rukka Air protectors with a few exceptions (R.O.R., StrechDry, Jump-In). The breathable shoulder, elbow, knee, shin and hip protectors meet the CE norm EN 1621-1 2012 and function equally in all weather conditions. The elastic protector divides the possible impact into a wide area and acts as a shock absorber.

With the reflective materials, Rukka introduces another feature for enhanced safety. Under normal daylight conditions, these Rukka materials appear "normal", but if directly lit by vehicle headlights in the dark, they reflect the light glaring white.

Each outfit functions best in a defined comfort area. Either hot or cold, rainy or sunny - various technologies are benefitted for various riding conditions. Appropriate underwear, accessories and technology solutions enhance the individual experience.

## WATERPROOF LAMINATES UNIQUE PROTECTION, COMFORT AND FUNCTIONALITY

### UNIQUE PROTECTION, COMFORT AND FUNCTIONALITY

Gore-Tex Pro for 100% water- and windproofness, durability and breathability.

Water- and windproofness and breathability are guaranteed by 3-layer Gore-Tex Pro with Armacor product technology. This advanced material mix achieves excellent tear and abrasion resistance and thereby exceedingly good protection.

The ArmaProtection technology also benefits the temperature-regulating Outlast® material, thus contributing to a comfortable thermal balance. Outlast® absorbs and releases warmth according to the wearer's individual needs acting as a temperature-balancing buffer.

AirCushion System on the inside of the seat area reduces condensation and acts as a climate buffer. Enhances comfort on long rides. Keprotec Antiglides stops annoying sliding over the seat.

The patented breathable Rukka Air protectors for maximum active and passive safety.

Reflectors as standard.

# AIRPOWER TECHNOLOGY

## EVEN FOR HOT RIDING CONDITIONS ENHANCED COMFORT

### ENHANCED COMFORT FOR HOT RIDING CONDITIONS AND GORE-TEX SHELLS FOR WET WEATHER

AirPower Technology benefits Cordura AFT material, that has been developed by Rukka in collaboration with DuPont to meet the safety standards for motorcycling. High-performance polyamide fibres form the basis of a lightweight, extremely tear- and abrasion-resistant design.

The Cordura AFT uses a knitted mesh structure that is experienced especially comfortable when riding in hot climate.

Attachable Gore-Tex shell jackets and shell trousers are durable, breathable and 100% water- and windproof.

The breathable Rukka Air protectors for maximum active and passive safety.

AirCushion System on the inside of the seat area reduces condensation and acts as a climate buffer. Enhances comfort on long rides. Kepron Antiglides stops annoying sliding over the seat.

3M Scotchlite reflectors as standard.

*Note! See details in individual product descriptions.  
Check individual care instructions from the product.*

## SPORT ■ ALLROAD ■ COMMUTING COMBINATION OF GORE-TEX AND CORDURA

### SPORT ■ ALLROAD ■ COMMUTING

The extremely abrasion-resistant polyamide fabric Cordura 500 is used as upper material for the robust Rukka motorcycling outfits.

Gore-Tex for 100% water- and windproofness, durability and breathability.

Detachable thermal lining enhances the comfort for a wider range of weather conditions.

Temperature regulating Outlast® material.

The breathable Rukka Air protectors for maximum active and passive safety.

AirCushion System on the inside of the seat area reduces condensation and acts as a climate buffer. Enhances comfort on long rides. Keptec Antiglide stops annoying sliding over the seat.

3M Scotchlite reflectors as standard.

*Note! See details in individual product descriptions.  
Check individual care instructions from the product.*

## GREAT GEAR TO MATCH YOUR URBAN LIFESTYLE

### URBAN & LIFESTYLE

Developed to appeal to riders of classic and custom motorcycles, the Urban collection offers a great balance of style and function.

The collection offers a range of classically styled motorcycle jackets, pants, gloves & accessories that are safe and comfortable for everyday riding

As with any item of riding gear, function is just as important as form. Close attention to detail and testing ensures the performance on the bike, a great balance of style and protection and highly functional, feature-packed products.

Available in two colourways of brown or black. The nature of waxed cotton and leather ensure that the products will develop a patina that will complement any classic ride.

# RUKKA D30 AIR PROTECTORS

## PATENTED, CE APPROVED AND BREATHABLE PROTECTOR

D30® Air is a patented protective material that combines enhanced chemistry with product engineering to produce high performance shock absorption and impact protection solutions.

A brand New D30® Air material has been developed especially for the Rukka protectors. This New material has some unique characteristics that provide enhanced versatile and flexible protection.

### THE BENEFITS OF D30® AIR:

- High performance shock absorption
- Trusted protection
- Maximum flexibility
- Comfortable and breathable
- Tested according to CE-standards

D30® and Rukka worked together to develop a unique D30® material only for Rukka which was then used in the production of an exclusively designed range of Rukka limb, back and chest protector components.

## D30® LPI & CPI PROTECTORS

RUKKA D30 AIR PROTECTORS

LVL = LEVEL

# HOW D30<sup>®</sup> AIR WORKS

The material contains intelligent molecules that flow freely when moving but on shock lock together to absorb impact energy, instantly returning to their flexible state.

D30<sup>®</sup> Air does not go hard when hit, the molecules lock together to absorb and spread the force, significantly reducing the effect of impact.

D30<sup>®</sup> Air disperses the force of impact, drastically reducing transmitted force and minimizing the risk of injury or equipment damage.

The protective qualities are retained after repetitive impact.

Comfort, flexibility and protection are always present.

Outlast® Temperature Regulation stores and releases body heat. It works to keep the wearer's temperature not too hot... not too cold... but just right, over a broad range of environments and activity levels.

Elastic material ensures the best possible functionality. Windproof microlayer on front of the jacket, and fleece inner surface keeps you warm even under extreme weather conditions. Fleece transfers the body's extra moisture away from the skin making the wearer feel comfortable.

SIZES: shirt: S - 3XL, pants S - 3XL

COLOUR: 993 black/blue, 990 black (990 only in pants)

Outlast® Temperature Regulation stores and releases body heat.  
It works to keep the wearer's temperature not too hot... not too cold... but just right, over a broad range of environments and activity levels.  
When your activity level or the outside temperature increase, the Outlast® thermocules that contain the phase change paraffin begin to change from a solid to a liquid which provides you with a comfortable sensation of thermal equilibrium. The energy required to activate this process comes from your warm body or the rising ambient temperature.  
When you begin to cool down, Outlast® thermocules begin to change back from a liquid to solid. In this phase change, the energy that was absorbed by the thermocules while you were active is returned to you.  
With the new moisturetransferring material Outlast® functions in active use too.

## WS MASADA

SHIRT 3 70497 227 R

## WS MASAGO

LONG JOHNS 3 70498 227 R

Underwear to protect against wind. Front covered with Gore Windstopper. Other parts made of lightweight 100% polyester allowing the body moisture to pass away from the skin creating ideal body temperature balance and comfort during the riding.

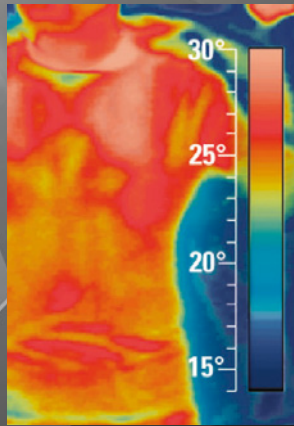

SIZES: | S-3XL COLOUR: | 990 black

COL 990

COL 990

The blue areas show that this fabric cannot withstand wind. Although the outside temperature remains the same, you will quickly start to feel cold. This is the windchill effect.

The red areas show that the Windstopper fabric can block the wind. You remain comfortable and warm and can maintain your level of physical activity.
