SHARK HELMETS PRESENTATION

SHARK Helmets is owned by the 2R Holding Group, which is specialized in “Riders” equipment (hence the name “2R”) across all segments. Through its motorcycle division, showcased by the company’s 4 complementary high-profile brands (SHARK Helmets, Bering, Bagster and Segura), 2R Holding today enjoys the status of global market leader in supplying the full gamut of motorcycle equipment (helmets, leather and fabric goods, luggage, saddlery, etc.).

In 2016, the Cairn outdoor/ski accessories brand joined the Group’s other brands to create the Outdoor Division and develop a complementary product line for sports enthusiasts in this segment.

The Group is active in many international markets and bases its growth strategy on a strong capacity to innovate as a means of enhancing performance as well as safety. It presently benefits from the solidity of a multi-brand entity (with all brands being highly reputed leaders in their respective fields) and moreover capitalizes on the strength and notoriety of each individual brand in order to expand and conquer new markets.

The “technically sophisticated” products designed and marketed by the Group’s various brands are intended for a very broad clientele, spanning both professionals and amateurs involved in racing, road trips, motocross, urban rides or outdoor sports.

The Group’s headquarters are located in Marseille and its French facilities (plant/office) are set up in Paris, Lyon and Normandy. Its foreign installations include: two plants in Portugal and Thailand, marketing offices in several countries throughout the world, and an Asian sourcing office.

SHARK HELMETS HISTORY

Boosted by over 25 years of experience, the French brand SHARK has become one of the world’s leading helmet makers. Founded by former professional racers, SHARK designs helmets that guarantee high levels of performance and safety and that exceed safety standards. SHARK’s ethos is always to push the technical boundaries and innovate so that each and every biker and racer can enjoy the sheer pleasure and freedom of riding in complete safety. From its headquarters in Marseille and its own factories, SHARK manufactures and sells new models each year. SHARK helmets are distributed by a network of over 5,000 sales outlets worldwide.

RESEARCH, INNOVATION & DEVELOPMENT

STYLING:

At the heart of design

All SHARK helmets are designed in France at our head office, overseen by the Research & Development Unit.

Every year, our teams work on creating new models, at the cutting edge of technology, all of them being designed from scratch, which is what makes our products so unique and innovative.

The end user is the focus of our product creation process. Each SHARK helmet is in essence designed according to the principle of "Reverse engineering": the user's body shape is the starting point in manufacturing all our products.

During this creation process, "Design for a Function" is our motto: each line, each curve, each function serves a purpose.

Our completely original decoration styles are inspired by current market trends across all settings (fashion, automobile, etc.).

INNOVATION:

Improving performance as a means of providing better protection

To develop our helmets, we use the most powerful software applications, which in fact are identical to those preferred in the aerospace and automobile fields.

Our prototypes are produced on a next generation 3D printer set up inside our R&D Unit.

We rely heavily on CFD (Computational Fluid Dynamic) studies in order to optimize the aerodynamic profile of our helmets and their penetration in air, in addition to reducing the "buffeting effect", acoustic nuisances and the aerodynamic drag coefficient (CX).

SAFETY:

Our ultimate goal

In developing our helmets and consistently tweaking them in pursuit of safety and reliability, our Research, Development and Innovation teams enjoy regular contact with many of our partners, including:

The FIM (International Motorcycling Federation) within the scope of "FIM Racing Homologation Program": a standard reserved for competitive motorcycle riding that will be more stringent than the regulatory standards currently in effect.

University teams composed of specialists conducting landmark biomedical studies in terms of accident risk classification and protection of motorcyclists.

UNECE (The United Nations Economic Commission for Europe) along with many Ministries of Transport across the world, in order to dialogue and advance legislation emphasizing end user protection even more. The Standard UNECE 22-05, currently applicable in over 50 countries, is intended to be adapted and harmonized internationally. It has already been accepted by the AMA (American Motorcycle Association) competitions as well as in Australia since 2016.

All integral SHARK helmets tested by the SHARP Program have won at least a 4-star rating, while the upmarket models Race-R Pro, Race-R PRO Carbon and EvoLine Series 3 have all received the maximum 5 stars.

SHARP provides objective information about the safety of helmets to help motorcyclists make an informed choice when buying a helmet.

The SHARP program is based upon the findings of the European Research activity "COST 327", reported in 2001, which is the most comprehensive study of motorcycle crashes ever conducted in Europe.

The ratings are expressed as a simple star rating with 5 stars being the highest and 1 star the lowest.

SHARK Helmets has been relying on motorcycle racing to boost brand development ever since its creation. Now boasting nearly 70 world championship titles, the brand has successfully preserved ties with top international racers spanning disciplines from Moto GP to Endurance, including Superbike.

SHARK Helmets is also heavily involved in various national-level championships, for which it currently equips many racers:

- England: 22 racers in BSB, plus promising young competitors in the British Talent Cup
- Spain: 28 racers competing in the CEV and RFME championships
- France: over 20 racers competing in the FSBK championship.

Throughout the world, our distributors are also showcasing the brand in an array of national competitions in places like Australia, Brazil and the Benelux countries, to name a few.

RACING DIVISION

RACING

SHARK Helmets offers top-end helmets, which are also worn by top-level riders, because there can be no compromise on safety at high speed. These riders are involved in all the product development phases and enable us to constantly innovate.
