# TABLE OF CONTENTS

This catalog is not a contractual document. SHARK Helmets therefore reserves the right to modify the characteristics of these products. If any such modifications are deemed necessary, considering the homologation norms existing in each country. This catalog is an international document and each country can abstain from distributing certain models and colors if so desired. All the models are delivered with clear or approved tinted visors.

RETAILERS WORLDWIDE

 Countries where SHARK Helmets is distributed

## SHARK HELMETS PRESENTATION

SHARK Helmets belongs to the 2R Holding group which also includes Bering and Segura brands (clothing for bikers) and Bagster (saddles, luggage, tank covers ...). In 2011, the same passion for motorcycling naturally led the four brands to create a coherent set of Riders equipment. In France and abroad, the group has the power of several brands, all renowned. It capitalizes on the strength and reputation of each of them on their own segment to develop each other on new markets or new targets. It is one of only two players of the market in Europe to offer such comprehensive merchandise. Leader in France, present in many international markets, it supports its development with a strong capacity of innovation for a better performance and safety.

At all levels of the group, you can find the same technical requirements for a wide clientele: from professional to amateur, for racing, road, cross or urban.

- The headquarters and offices in France (Paris, Marseille)
- One factory in France (Normandy), one in Portugal and one in Thailand
- One sourcing office in Asia
- Global distribution
- Export over 50% of revenue
- 8-10% of revenue invested in innovation (teams of engineers, regular deposits of patents ...)

## SHARK HELMETS HISTORY

Boosted by over 25 years of experience, the French brand SHARK Helmets has become one of the world's leading helmet makers. Founded by former professional racers, SHARK Helmets designs helmets that guarantee high levels of performance and safety and that exceed safety standards. SHARK Helmets's ethos is always to push the technical boundaries and innovates so that each and every biker and racer can enjoy the sheer pleasure and freedom of riding in complete safety. From its headquarters in Marseille and its own factories, SHARK Helmets manufactures and sells new models each year. SHARK Helmets are distributed by a network of over 5,000 sales outlets worldwide.

# RESEARCH, INNOVATION & DEVELOPMENT

## Research, innovation and development

In over 25 years, SHARK Helmets has acquired tremendous expertise that is constantly being extended to make sure progress stays on track. The Research & Innovation unit, based at our French head office, is at the leading edge in terms of both technology and facilities.

We use top-performing software applications, the same as those found in the aerospace industry. Our prototypes are in fact built with a next-generation 3D printer inside our laboratory. Numerical crash tests (in FEA format) play a key role during the design of each new product within a simulation setting. This approach also entails CFD (Computational Fluid Dynamics), a specialty that numerically optimizes the helmet's aerodynamics and penetration through air. The end user remains chiefly responsible for developing SHARK Helmets's products.

The company actually bases its model-making on the principle of "Reverse Engineering". Helmets are completely designed for the user's head, with the construction steps circling sequentially in gradually adding each function.

"Design for a Function" is our motto: to ensure that each straight-away, each curve, each function provides utility.

The product therefore is systematically conceived from the standpoint of the end user, for the purpose of always exceeding the most stringent standards and anticipating motorcyclists' needs. In this aim, SHARK Helmets relies on its racing experience and feedback from the most accomplished users in each category. As owner of its production facilities, SHARK Helmets masters the entire creation chain from one end to the other.

The brand thus has the confidence to offer a 5-year warranty on its products and proposes helmets that satisfy the requirements of all riders.

# RACING DIVISION

SHARK Helmets has promoted motorcycle racing as a focus of brand development ever since its creation. With a record that boasts over 60 world championships, SHARK Helmets has sponsored some of the greatest names in racing within both the MotoGP and Superbike disciplines.

And it's the feedback collected from our riders, under extreme conditions of speed, heat and humidity, that has served to draw conclusions leading to major product advances.
