Transitions

light intelligent lenses

WANT TO ENHANCE YOUR MOTORCYCLE RIDE?

SHOEI® TRANSITIONS® ADAPTIVE MOTORCYCLE SHIELDS SEAMLESSLY SELF-ADJUST FROM CLEAR TO DARK AND BACK AGAIN WITH CHANGING LIGHT CONDITIONS FOR ENHANCED VISUAL PERFORMANCE THROUGHOUT YOUR RIDE.

SUPERIOR RIDING PERFORMANCE

Whether dominating the race track or out for a pleasure ride, motorcyclists know how important clear, crisp vision is. Traditionally, riders dealt with changing light conditions by carrying two shields (one clear, one tinted) with them at all times.

SHOEI® Transitions® adaptive shields solve this problem, and even enhance vision, by seamlessly adjusting to optimized darkness levels with the changing light.

TRANSITIONS OPTICAL - LEADERS IN PHOTOCROMIC TECHNOLOGY

Transitions Optical has been an industry leader in photochromic technology for 20 years and is known worldwide for its photochromic prescription eyeglasses: Transitions® lenses. The company's continued commitment to innovation has helped Transitions® lenses to become the leading photochromic ophthalmic lens product and the number one eyecare professional-recommended photochromic lenses worldwide.

Transitions® adaptive sunwear is the company's sunwear brand, which includes both prescription and non-prescription sunglass lenses, and motorcycle shields, that automatically darken and lighten in outdoor light. For the first time, with Transitions® adaptive shields, the company is expanding its product offering to non-ophthalmic products, bringing Transitions's® state-of-the-art technology to a broader audience.

Driven by innovation, the company has continually improved its core clear-to-dark product (Transitions® lenses), and has expanded in other areas with additional products that meet consumers' visual needs, including sunwear and everyday products with varying features (lightly tinted to very dark and variable polarization).

Transitions® sunwear products are designed to enhance visual performance outdoors, optimizing the amount of darkness and color for specific outdoor activities like motorcycling, golf, driving, cycling, running, hunting/target shooting, and water sports.

HOW PHOTOCROMICS WORK

Photochromic technology allows visors to automatically and seamlessly change from clear to dark in sunlight. The process works when photochromic dyes embedded into the lens or shield react to UV light, changing levels of darkness with the sun.

When UV light is removed, a chemical reaction driven by ambient heat reconverts the activated photochromic molecules to their original, clear form and the lens fades.

The amount darkening is a function of the competition between the activating and fading chemical reactions, the equilibrium condition established between them, and the specific photochromic molecules and the lens substrate. The more activated photochromic molecules that are present, the darker a lens becomes. The degree of darkness depends on the level of available UV radiation driving the activation reaction and the temperature of the lens, which drives the fade reaction.

TESTIMONIALS

Transitions® adaptive visors have been well-received in the motorcycle industry. A recent review by *Roadracing World* magazine said the visor was "Most excellent", "Worth the price of admission", and made an "amazing difference" in the reviewer's ride.¹

PRODUCT DETAILS AND UV PROTECTION

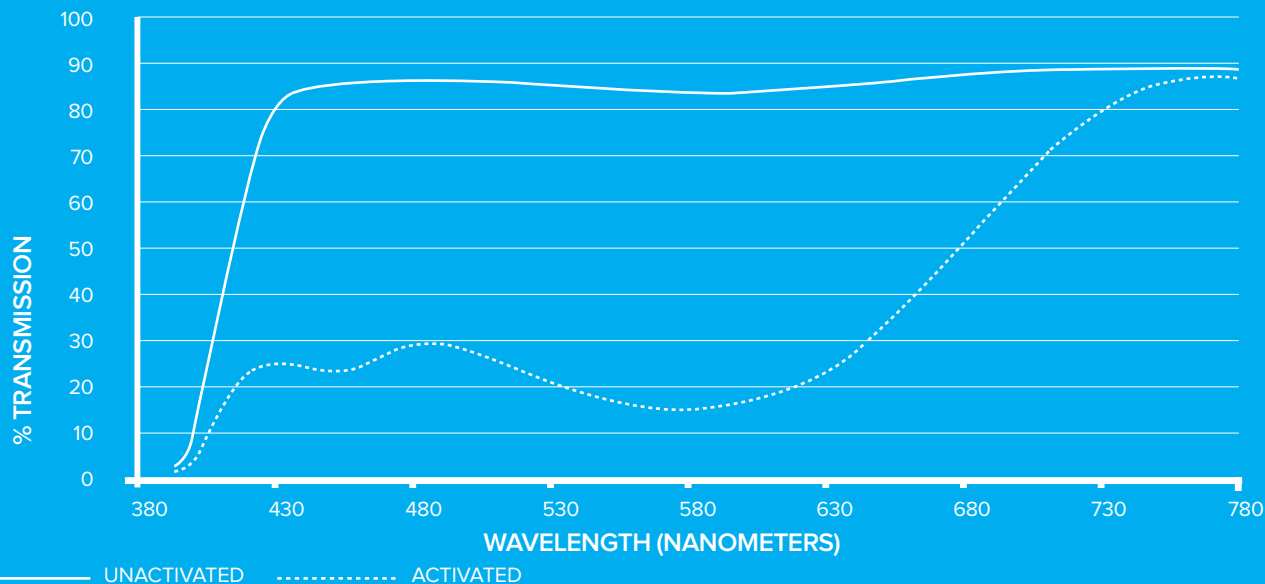

Transitions® adaptive sunwear products have a range of light transmission levels, all optimized for the specific activity the product is designed for. Specifically, the SHOEI® Transitions® adaptive shield:

- Non-activated — virtually clear
- Activated — darkens to a 15% light transmission level at 72° Fahrenheit and 23° Celsius
- Full activation in two minutes
- Fades to 50% transmission in two minutes
- Like all Transitions® products, the shield blocks 100% of UV rays

TEMPERATURE

Like all photochromic products, temperature can cause fluctuation in performance. UV rays activate the photochromic molecules through a photochemical process — this makes the shield darken. The fade back reaction is actually driven by heat — so in extremely hot temperatures, the photochromic molecules are actually fading back while they are activating — this prevents the shield from fully darkening. Transitions® lens technology is the most advanced in the industry, and is the least temperature sensitive, but there will be some performance variables depending on the temperature.

SPECTRAL CURVE DATA

STANDARDS

SHOEI® Transitions® adaptive shields are designed to meet International Standards of Performance for driving.

- Category as per ISO 8980-3
 - Non-Activated — Category 0
 - Activated — Category 3
- Traffic Signal recognition as per ISO 14889
- 100% protection from UVA and UVB as per ISO 8980-3
- 100% protection from UVA and UVB as per ANSI Z80.3
- Impact resistant as per US FDA Impact Resistant Regulation 21 CFR 801.410
- Impact resistant as per ANSI Z87.1
- Impact resistant as per ISO 14889 Section 5.2

PROOFS AND SUBSTANTIATION

- Transitions® lenses reduce squinting, eye fatigue and help prevent against eye strain.²
- Outside, Transitions® lenses reduce glare and enable riders to distinguish contrast more easily.³

**AMP UP YOUR RIDE WITH CUSTOM COMMUNICATION RECOMMENDED BY SHOEI
FOR THE J-CRUISE II, NEOTEC II, & GT-AIR II**

CREATED EXCLUSIVELY TO INTEGRATE WITH THE SHOEI J-CRUISE II, NEOTEC II, AND GT-AIR II

Optimal Integration

Specially designed for the J-Cruise II, GT-Air II, and NEOTEC II, the all-new optional SENA SRL/SRL2 Communication System seamlessly integrates with ease and precision. Jointly designed by SENA and SHOEI, the SRL/SRL2 is sleek in appearance and installs effortlessly, allowing for the helmet's advanced safety and performance to remain intact.

With a simple 3-button control, riders can pair to their smart phones to listen to music, hear GPS directions, talk on the phone and more. The intelligent Audio Multitasking feature allows you to simultaneously listen to music and talk to other riders via intercom, and the Universal Intercom technology makes the SRL/SRL2 compatible with other non-SENA Bluetooth systems.

COMMUNICATION IS OUR GAME

Connectivity Simplified

A dual Bluetooth chip allows for up to 8 intercom connections as well as simultaneously listen to music and talking to other riders via Intercom using Audio Multitasking. When audio comes through the Intercom, music will automatically decrease in volume, and return to a normal volume when riders stop talking over the Intercom. Simply pair the SRL or SRL 2 with your smartphone to stream music, listen to GPS directions, and take and make phone calls.

THE SRL SYSTEMS DO IT ALL

A Feature Set to Keep You Moving In the Right Direction

Take your ride up a notch with the stellar feature set of the SRL. In addition to the Universal and Group Intercom features, the SRL offers music sharing and Sena's Advanced Noise Control technology. Smart volume regulates the volume of your music when the environment outside of your helmet changes due to wind noise or increased speed. Built in FM radio lets riders easily scan through and save up to ten radio stations.

VERSATILE CONNECTIVITY MAKES FOR VERSATILE CAPABILITIES

Stay Connected and In Control With the Sena Smartphone App

Linking the SRL systems with the Sena Smartphone App (for iPhone and Android) allows you to configure device settings and access our quick guide at the click of a button. The SRL systems can also easily connect to the Sena Ride Connected App to intercom with a virtually limitless amount of riders over an infinite range, so long as you are connected to a mobile network.

FM RADIO

Built-in FM radio with RDS AF (Radio Data System Alternate Frequencies)
Radio region: Worldwide
Radio frequency specifications: 76 - 108MHz
10 preset station memory with automatic scan function

SHOEI BACKPACK 2.0

- Interior laptop compartment fits most 17" laptops/tablets
- Padded panels keep your electronics safe from impact
- The main compartment fits your favorite SHOEI hat, extra layers, and swag from the races
- Removable shield holder fits most SHOEI helmet shields
- Adjustable, padded shoulder straps keep the wearer comfortable on and off the motorcycle
- Hidden three-point buckle and flap system can cradle your SHOEI helmet while walking around
- Padded back panels keep the wearer comfortable on and off the motorcycle
- Side pockets with stretch netting can store your beverage
- An organizational bellows pocket can expand to hold all of your essentials like keys, pens, an iPod, etc.
- Soft, lined media pockets inside the main compartment and a media port at the top make listening to your media player easy
- An adjustable waist strap and chest strap helps to keep the bag fitting snug
- Reflective piping on the backside and shoulder straps help keep you visible at night
