DIAMOND
HELMET

Diamond is the innovative, revolutionary helmet developed by UFO PLAST engineers, created after long and careful search aimed at achieving the highest level of protection and comfort, using the most advanced technologies and materials to protect and make off-road driving more comfortable.

DCS - Diamond Concept Shell
The outer Diamond shell and its original "diamond" design, studied to optimise shell design to maximise shock absorption and dissipation, has been built using the latest technology and is made up of a high percentage of Carbon (over 60%) and Aramid fibre to maximise performance and minimise weight.

RIAS - Rotation Impact Absorbing System is the revolutionary Diamond helmet technology: In addition to dissipating compression-absorbing shocks like traditional helmets (linear impact), the helmet structure combines innovative technology that dissipates the energy associated with rotational acceleration (rotational impact), reducing tension and providing additional protection for some types of impact. This is all possible thanks to the combined work of the different layers of material used:
The main inner shell in high density EPS is characterised by a very compact, rigid outer surface (in contact with the outer shell). The inner surface has large grooves that offer a dual function: they provide greater airflow and differentiate impact force dissipation, effectively as if the main layer had two different densities.
Inner oscillating shell, consisting of low density polypropylene foam (PPE) to provide gradual absorption, was designed to rotate inside the helmet, working in conjunction with the Main inner shell. This system enables multi-directional sliding that also dissipates the energy associated with rotational acceleration, so as to improve protection in case of rotational impact.

LEAS – Limited Extension Anti Shock

LEAS – Limited Extension Anti Shock

The Diamond Helmet is also equipped with foam protections. One of these is located at the bottom of the chin-rest, and the other at the back at the base of the neck. This advanced protection system represents an important advance in the containment of the front and back neck flexion and in impact dissipation in the event of a fall. This system can work in conjunction with modern neck braces.

SVS – Sliding Visor System

UFO PLAST has also designed an exclusive visor adjustment system, incorporating a sliding flap in the middle that adjusts the length of the visor even when moving.

The Diamond Helmet is also equipped with a complex **AES - Airflow Extraction System ventilation system**: at the top front, under the visor, there are three large air vents which, in conjunction with the other 4 slots underneath the facial foam, convey fresh air directly into the shell. The EPS interior is channelled for perfect airflow distribution that is conveyed and extracted by four large extractors positioned at the back of the shell: two at the top and two at the bottom. This system guarantees perfect air extraction and excellent heat dissipation.

The Diamond Helmet is fully removable for easier maintenance and cleaning: all components are fixed with Torx imprint aluminium screws (T8).

The interior, mounted on the helmet by means of snaps, is made of premium, breathable materials and offers excellent comfort. The inner padding is easy to disassemble and fully removable for washing and to ensure perfect hygiene.

ECPR - Emergency Cheek Pads Removing

Cheek pads are also equipped with a Quick removal system in case of emergency. This allows users to remove cheek pads with the helmet still on, allowing for easier helmet removal in the event of an accident.

Latching system

Diamond helmets are equipped with a chin-strap closing system with double D closure in anodised aluminium with 25 mm tubular band complete with magnetic hooking closing button. The closing band also offers comfortable, adjustable length padding.

RAPTURE | HE117 (E1)
SIZES: XS - S - M - L - XL

High-strength Polycarbonate
Helmet, RAPTURE model

New Onyx helmet that comes very close to its predecessor (Interceptor), thus expanding the range of helmets off road in the entry-level.
Onyx helmet is made of high-strength polycarbonate. The internal pads offer excellent fit, and they are removable and washable for optimal hygiene.
Rear air extractors, the visor height-adjustable and the strap with double D, make it a very high quality product.
The Onyx helmet is available in 5 new graphics.

RECON BOOTS

Ufo Plast is increasingly synonymous with protection safety, and with this same logic we present you with the E-AHL (exoskeleton ankle hyperextension limit) off-road boot.

This innovative product (*Alberto Barozzi concept patented*) has been exclusively shown to protect the tibial/tarsal compartment and offers users absolute comfort.

This concept has been studied over several years through careful biomechanical analysis. Detailed knowledge of the needs and issues in use have made it possible to identify in detail the points set forth in the product's development.

This "Made in Italy" product has been created by a network of highly skilled professionals who have made it possible to express the concept innovations on the product.

A study of shapes, research of thermoplastic/fabric materials, engineering development, design, highly skilled Italian craftsmanship and strict testing in the laboratory and in the field all have allowed for the creation of this product, with methodological criterion that sets Ufo Plast products apart.

RECON E-AHL (Exoskeleton Ankle Hyperextension Limit - Alberto Barozzi patented concept)

- Off-road boot designed and made entirely in Italy
- Cutting-edge technologies and innovative materials
- Revolutionary exoskeleton with Stainless Steel arms is the "protective cell" of the ankle and tibia
- Prevent dangerous twisting of ankles
- Allow to the rider an ideal control of dorsal and plantar foot flexion
- Ensures tibial/tarsal compartment defence
- Highest levels of comfort and performance

The protective foam tip is made of special plastic polymer for high toe protection. Its asymmetrical design has been studied to best suit the grip of the climbing gear lever and when inserting gears.

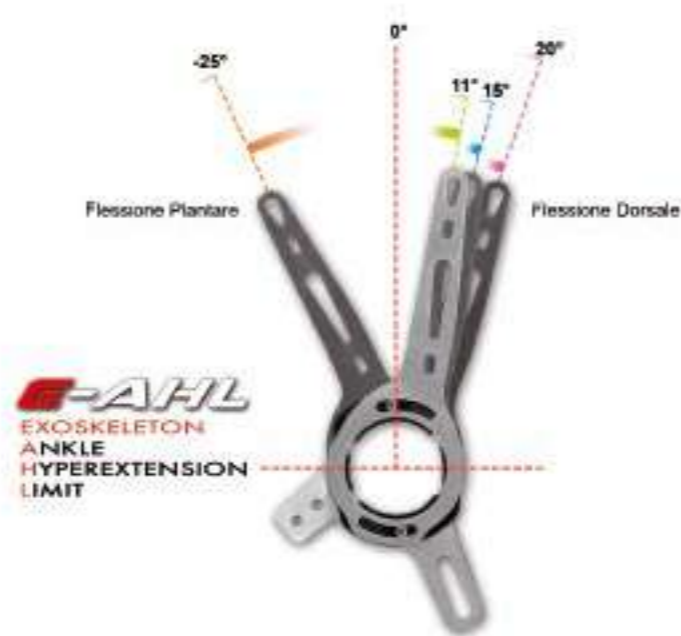

The Heal lug has been designed to offer maximum protection and allow for effective gear changing with the heel in the start-up phase.

Technical-functional characteristics:

- 1) Ergonomically developed mid sole for comfort and foot stability. Studied for reduced treading, thus ensuring perfect support on footrests when feet are positioned on their soles.
- 2) **E-AHL** - an innovative stainless steel exoskeleton making up the "protective cell" in the tibial/tarsal compartment, developed with the following special features:
 - a - Pronation and supination foot support through lower arms
 - b - Tibia/fibula support through upper arms
 - c - Dorsiflexion personalisation system using special stoppers: 0° - 15° std - 11°
 - d - Biomechanical movement permitting extremely free movement starting immediately with new boots
- 3) Davos Sole - high grip characteristics with a balanced design between motocross and enduro. Surprising lasting wear.
- 4) Upper - **thermoformed BAL** (bioclimatic action low) with structure made from hypoallergenic, antibacterial polyurethane foam, studied to ensure improved comfort, high shock absorption power and proper ankle containment. Its reduced bioclimatic value is obtained thanks to special air "channels."
- 5) Internal boot leg protection dual-compound for increased bike grip.
- 6) **CA system** (calf adjustment) boot leg - with 4 adjustment points to best adapt to calf volume.
- 7) Hooks - in anodised aluminium, with intuitive and efficient adjustment and closure thanks to the integrated "soft touch" component.
- 8) Toe thickness - reduced for easy and effective changing.
- 9) Tip - protective foam made of special plastic polymer for high toe protection. Its asymmetrical design has been studied to best suit the grip of the climbing gear lever and when inserting gears.
- 10) Heal lug - designed to offer maximum protection in the area and allow for effective gear changing with the heel in the start-up phase.
- 11) Vents - dynamic for proper ventilation.
- 12) Sole - in breathable shock-absorbing Eva.
- 13) Internal gaiter - with shape memory, breathable material with a waterproof outer film.
- 14) **ADHM (assembly/disassembly home made)** - independently managed support for substitutions of some components.
- 15) All materials are water resistant and anti-corrosive.

The boot is provided with 15° stoppers for dorsiflexion on a maximum movement of 20°. If necessary, different options include: upper stopper 11° or free movement 0°

SIZES: One size fits all | Color: K

**SIACHEN
COOLING VEST**

The SIACHEN evaporative cooling vest products with INUTEQ-DRY® technology is comfortable, full-fashioned and light weighted. No refrigeration or chemicals are required. This product will reduce heat stress and fatigue, allowing you to feel comfortable cool and to perform better. Due to the unique technology system, this product will not become wet or soggy, making it suitable to wear the vest underneath clothing. The INUTEQ-DRY® cooling products are designed to be worn in an environment with an ambient temperature that is not extreme and perform best in low to medium humidity. The level of airflow on the body determines the cooling effect and cooling duration.

Product features:

- Incorporates a unique cooling technology
- Stays 100% dry inside and outside
- Is machine washable and has antibacterial properties
- Is easy to use and re-use
- Is lightweight, non-toxic and durable
- Provides up to 15C / 59C cooling relief below ambient temperature
- Offers up to 3 days of cooling comfort, depending on temperature / airflow / humidity levels

KOMBAT PADDED SHORTS | PI02354

Sizes: XS - S - M - L - XL - XXL | Color: A - B

CAMO UNDERSHIRTS WITH LONG SLEEVES | MG04407

SIZES: S/M - L/XL - XXL | Color: K

100% MADE IN ITALY

CAMO undershirt with long sleeves is made by collaboration with SIXS®. The configuration of Original Carbon Underwear® allows sweat to be truly taken away from the skin to the outside due to low density zones properly alternating with light pressure zones. This peculiarity ensures the athlete correct thermoregulation and optimum breathability under all conditions.

The low density zones are created by using carbon fiber that not only is extremely hard-wearing and ultralight, but also boasts an enormous thermal insulation capacity. Its fineness in the form of textile fiber, which makes it practically invisible to the human eye, creates those micro cavities that channel sweat to the outside so the skin is left dry. Dryarn®, polyamide fiber and polyurethane fiber, complete the blend and add essential characteristics such as: thermoregulation, water-repellency, bending and wear resistance, stretch and non-deformability.

Thanks to its blend of textile fibers, the Carbon Underwear® fabric is just like a breathable barrier that keeps the body temperature constant under all weather conditions. The patented SIXS weave stitch and the polypropylene found in our fabric create a perfect combination: a lower liquid absorption rate and a greater water vapour permeability than other textile fibers. The Carbon Underwear® fabric has the lowest specific weight of all textile fibers on the market. The Carbon Underwear® fabric respects the skin and protects it from bacteria and pollutant dusts. Eliminating the risk of annoying allergies and unpleasant smells. The Carbon Underwear® fabric dries almost instantly, due to its capacity to not absorb liquids and moisture.

- Constant thermoregulation
- Maximum breathability
- Light as a feather
- Bacteriostatic
- Fast drying

FULL SOCKS V2 | CA04045

SIZES: 2L (39-41) - 3L (42-44) - 4L (45-47) | Color: K

100% MADE IN ITALY

Full Socks V2 with VEINO-MUSCULAR COMPRESSION TECHNOLOGY

Woven fibres renewed for their softness and comfort.

The cushioning effect of the 3D.DOTS at the rear of the sock protect the Achilles Tendon from friction and pressure.

Located in the arch of the foot, it also provides for venous return and recovery.

3D DOTS TECHNOLOGY

- 3D.DOTS apply acupressure massages that boost blood flow and help absorb shocks. No pressure points, no hot spots.
- 3D.DOTS wick out moisture and enable air to circulate. Feet stay dry and fresh.
- 3D.DOTS cushion the Achilles tendon and the malleolus area and provide maximum grip in the shoe. No frictions, no pressure, no shocks and no slipping.

The shock and the vibration absorption on muscles, veins and joints increases resist-ance to effort.

Internal protections with SAS TEC/Koroyd technology. Removable for washing

The relief semisphere in the back side of the back protector allows an important increase in airflow and effective heat dissipation.

ENIGMA BODYGUARD | PE02346

Sizes: S/M - L/XL - XXL | Color: K

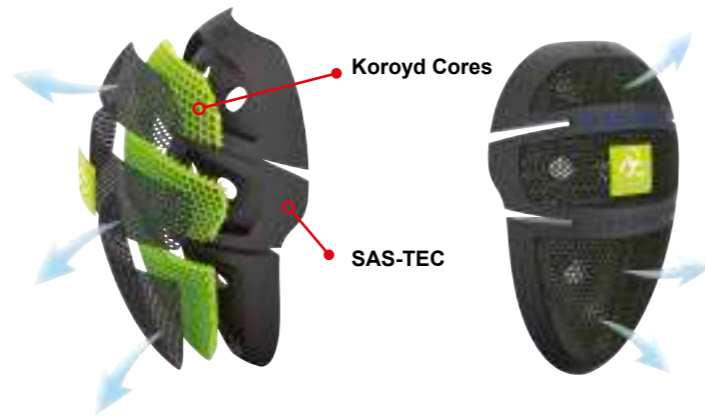

FOR F.M.I. RULES

CE BACK PROTECTOR: CE-EN1621-2 LEVEL 2
 FRONT PROTECTORS: CE-EN14021
 SHOULDERS GUARDS: CE-EN1621-1
 ELBOW GUARDS: CE-EN1621-1

ENIGMA Bodyguard with SAS TEC/KOROYD protections
 With their new SK-protection-series UFO combines the positive features of SAS-TEC foam and Koroyd Cores to something completely new: lightweight, breathable and highest damping capacity.

SAS TEC - KOROYD technology

Elbow and Shoulder guards with SAS TEC / KOROYD Technology

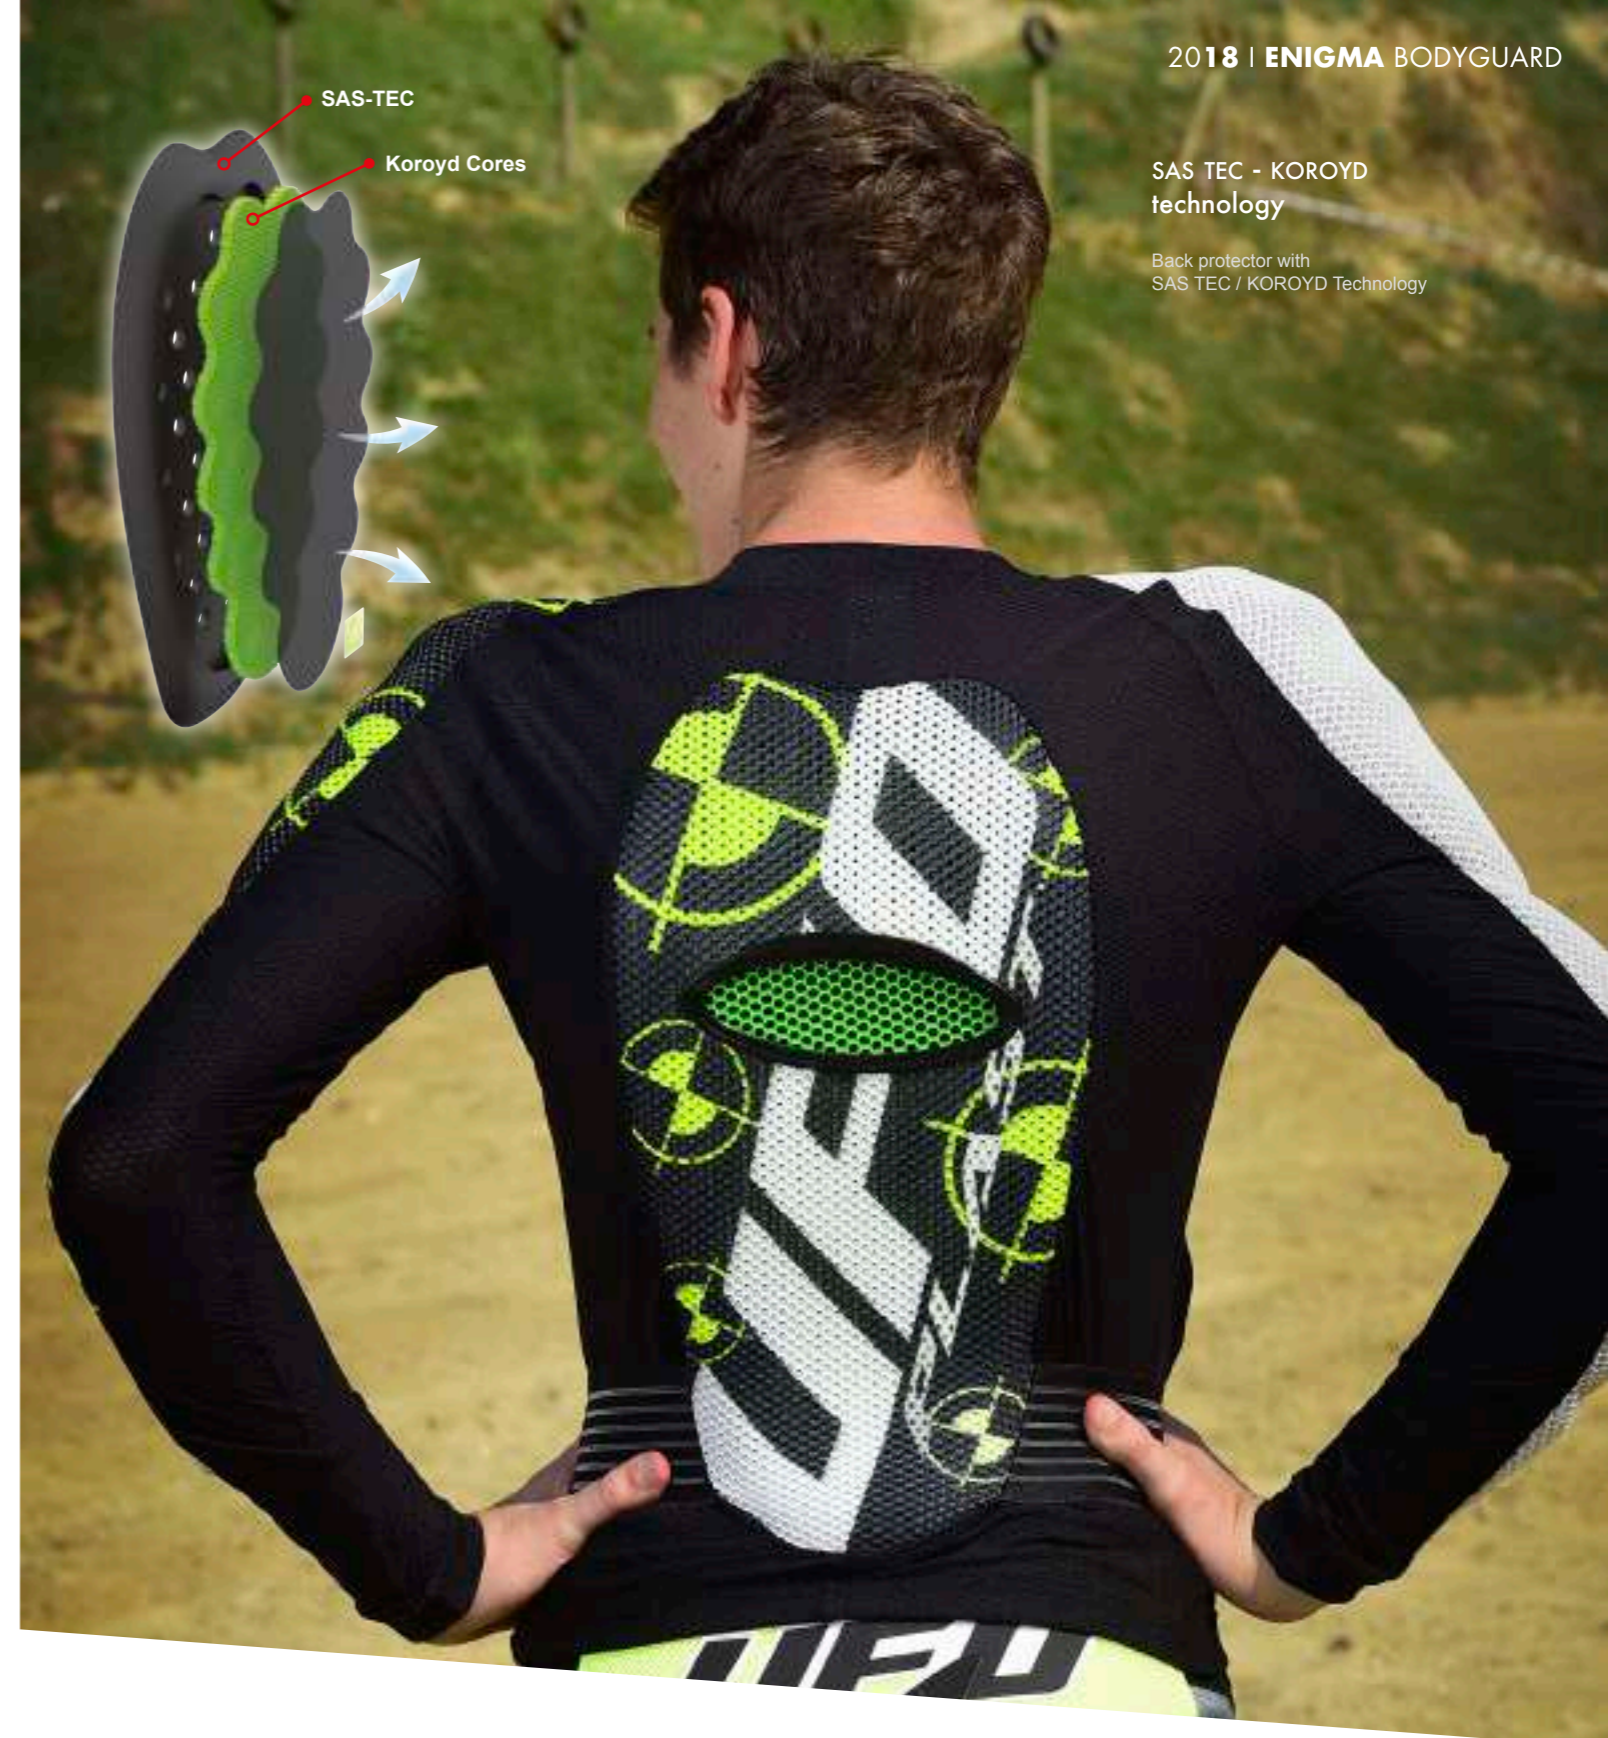

SAS-TEC - safety made of foam

In contrast to conventional PU foams the viscoelastic PU foam of SAS-TEC is partly made of renewable materials. Its special features include spontaneous response, highest comfort and unique damping performance with excellent nearly linear energy absorption. A very special micro structure of the SAS-TEC foam is responsible for an adaptive damping behavior – the higher the speed of the impact, the higher the resistance of the foam. All these features guarantee the best possible protection for your body.

SAS TEC - KOROYD technology

Back protector with SAS TEC / KOROYD Technology

Koroyd Cores - Performance and Breathability

The combination of Koroyd's precise extrusion and unique thermal welding process leads to a structure with both extremely efficient and consistent energy absorption properties. Upon high velocity impacts the cores crush in a completely controlled manner, decelerating the energy from the impact and greatly reducing the final trauma levels. Koroyd's completely open cell construction channels airflow around the rider, without limitation. Koroyd patented technology is integrated into the best sports and protection products that give you the edge.

PROERGO BODYGUARD | PE02276

Sizes: S/M - L/XL - XXL | Color: W

100% MADE IN ITALY

CE BACK PROTECTOR: CE-EN1621-2 LEVEL 1
FRONT PROTECTORS: CE-EN14021
SHOULDERS GUARDS: CE-EN1621-1
ELBOW GUARDS: CE-EN1621-1

PROERGO Bodyguard with articular restraint system, adjustable body belt and removable sleeves

- Maximum integrability with the Neck Brace
- Removable sleeves
- Great bioclimatic comfort thanks to the exclusive "Sensitive®" fabric
- ANTI-SHOCK MATERIAL INSIDE:
Reticulated Polyethylene (100% PE): The 4mm diameter hole with 7.5 mm distance guarantees great transpiration.
- ELLERES P forato (100% PU ViscoElastico): is a heat-sensitive product which continuously conforming to the shape of the body. Great ability to absorb and distribute shock.
- ANTI-SHOCK MATERIAL OUTSIDE
Made from polyethylene plastic PE with high impact resistance, the external anti-shock material has a "Honeycomb" structure, and it offers extremely effective shock absorption and the right heat dissipation (so as to avoid internal overheating).
- ARTICULAR RESTRAINT
"Pro Ergo" has two straps which can be tightened. They start at the shoulders and reach the waist where they are fastened with Hook and loop fastener. The straps cross over in an "X" so that the articulation of the shoulder remains taut at the same time permitting all movements that a motor cyclist has to make (on and off the road).

- FREEDOM OF MOVEMENT
- PERFORMANCE
- SAFETY

Ufo Plast Morpho Fit, a product made entirely in Italy representing a new and innovative conceptual response in the range of jointed braces for knee protection in sport. The result of careful, constructive cooperation between **Alberto Barozzi Concept**, **Tek Neg** (engineering) and the **UFO PLAST** technical staff, which made it possible to develop a product that embraces a number of technical and functional factors, including:

- Ergonomic structure with high-performance structure characteristics made from a special plastic polymer
- Total containment of the knee joint thanks to:
 - a - medial and lateral collateral ligament support
 - b - anterior and posterior cruciate ligament support
 - c - patella protection
- Proper size adjustment thanks to adjustments available

- **CPSO** (Condyle Pad Spheric Orientation): Adjustable condyle pads, made of a spherical support for perfect containment of the joint
- Tibial support in two versions can be adjusted, with reference to the subjective morphologic structure of the tibia, for correct adaptation and comfort. **TOP** (Tibia Orientation Position)
- Adjustable containment system for the **ACL** (anterior cruciate ligament). **ACLSS** (Anterior Cruciate Ligament Support System)
- Medial and lateral collateral ligament containment
- Sealed stainless steel structural four-sided joint, for a correct relationship between translation and rotation of the joint and the best integration in the knee flexion-extension movement
- Structural patella cup for effective impact dissipation, thereby limiting the direct impact on the patella
- Telescopic upper structure to protect the rectus femoris - vastus medialis and sartorius muscle
- Adjustable 4-point leg-fastening system for correct positioning
- **HLS** (Hyperextension Limit System): Stoppers to limit hyperextension with variations: 0° - 15° -25°- 35°
- Adjustable fittings for the best adaptation of the straps to the leg
- Heat-welded, hypoallergenic, antibacterial straps with reduced thickness for better containment and comfort
- Thermoformed **BAL** (bioclimatic action low): structure made from hypoallergenic, antibacterial polyurethane foam with bubble wrap texture to ensure the best adherence to the leg and a reduced bioclimatic ratio and high shock absorption power. Easily removable for easy cleaning
- **MFBS** (Morpho Fit Boots System): Interference support with the top of the boot to support the brace
- **ADHM**, (assembly/disassembly home made): Assistance system managed independently thanks to a conceptual engineering system expressed in the creation of the product
- Ergonomic "tube-sock" to enable better application of the brace
- All materials are water resistant and anti-corrosive
- Lightweight (size S/M = 760 gr - size L/XL = 820 gr)

REPLACEMENTS MORPHO FIT KNEE BRACE

100% MADE IN ITALY

In creating Structure, the ADHM (assembly/disassembly home made) system was used. This is a modular concept logic for completely independent assistance.

JACKAL KNEE-SHIN GUARDS | MTP6288

SIZES: S/M - L/XL | Color: W

MADE IN ITALY **SAS-TEC** body protection systems **CE** KNEE PROTECTOR: CE-EN1621-1

JACKAL Knee-Shin Guards with internal STF protections (SAS TEC FOAM). The Jackal Knee/shin guards for DH - ENDURO, the knee guard is completely open in order to be worn comfortably even without taking off your shoes, with adjustable elastic straps for a perfect fixation to the knee. The Jackal Knee/shin guard is longer than the knee guard Spartan EVO, and cover part of the shin of the rider also.

- Internal protections in STF (SAS TECH FOAM)
- Anti-scratch micro-fibre
- Very light weight and extremely protective
- Maximum transpiration and maximum ergonomics
- Lateral padding

Internal protection in STF (Sas Tec Foam) removable for washing

JACKAL REPLACEMENT | MTP6298

SIZES: S/M - L/XL | Color: W

MADE IN ITALY

Replacement anti-scratch micro-fibre for Jackal Knee-shin guards (pair)

SYNCRON KNEE-SHIN GUARDS | G102348

SIZES: One size fits all | Color: K - W - DFLU

NSS NECK SUPPORT SYSTEM | PC02377

Sizes: One size fits all | Color: B - DFLU

100% MADE IN ITALY

"NSS" Neck Support System with Back supports adjustable in two different positions and fixing shoulder straps

- Great head mobility
- Integration with helmets and body protector
- Great fitting
- Light weight
- Available in 2 new graphics
- Two sizes of thickness of the foam for a better fitting
- Removable cover for washing
- Back supports adjustable in two different positions

NSS neck support has been developed for a better interaction among body, back and shoulders with protections and without protections.

Color: DFLU
NEON COLOR

Color: B

Ufo plast technicians used their great knowledge of the plastic polymers to produce the NSS (co-moulded injected polymers), avoiding the use of dangerous (in case of structural failure) composite fibers.

The side attack allows to wear the NSS with extreme facility and in total autonomy, also after putting the helmet in your head. A safety system allows the maintenance of the closure also case of crash.

TWINWALL

RENTHAL
THE WORLD'S MOST VERSATILE HANDLEBAR

TWINWALL HANDLEBAR

Renthal Twinwalls are the safest and strongest handlebars in the world. Renthal's revolutionary Twinwall handlebar utilizes two tubes, making fatigue failure virtually impossible. The immensely strong Twinwall offers 50% more flex than a traditional steel 7/8 bar. Renthal Twinwalls are currently used by Team Honda USA, Team Kawasaki USA, Red Bull KTM USA, Factory Connection Honda, Pro Circuit Kawasaki, Yamaha of Troy, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki Europe and

All Twinwalls come fitted as standard with a black pad

7/8 HANDLEBAR

The highest quality material, engineering and craftsmanship have allowed Renthal 7/8 bars to win more championships than any other bar in the world. An exclusive aluminium alloy helps make Renthal Handlebars 20% stronger than any other bar in the world. Renthal 7/8 Handlebars are chosen as original equipment by Honda and Kawasaki.

FATBAR

FATBAR HANDLEBAR

Renthal Fatbars are a tapered, braceless bar design, combining excellent strength and good resilience. The tapered outer wall allows 1 1/8 inch clamping diameter and 7/8 inch at control ends. A 5.0mm wall thickness at the bends is used to increase strength. They have a shot peened and anodised corrosion resistance finish and feature a laser etched positioning grid.

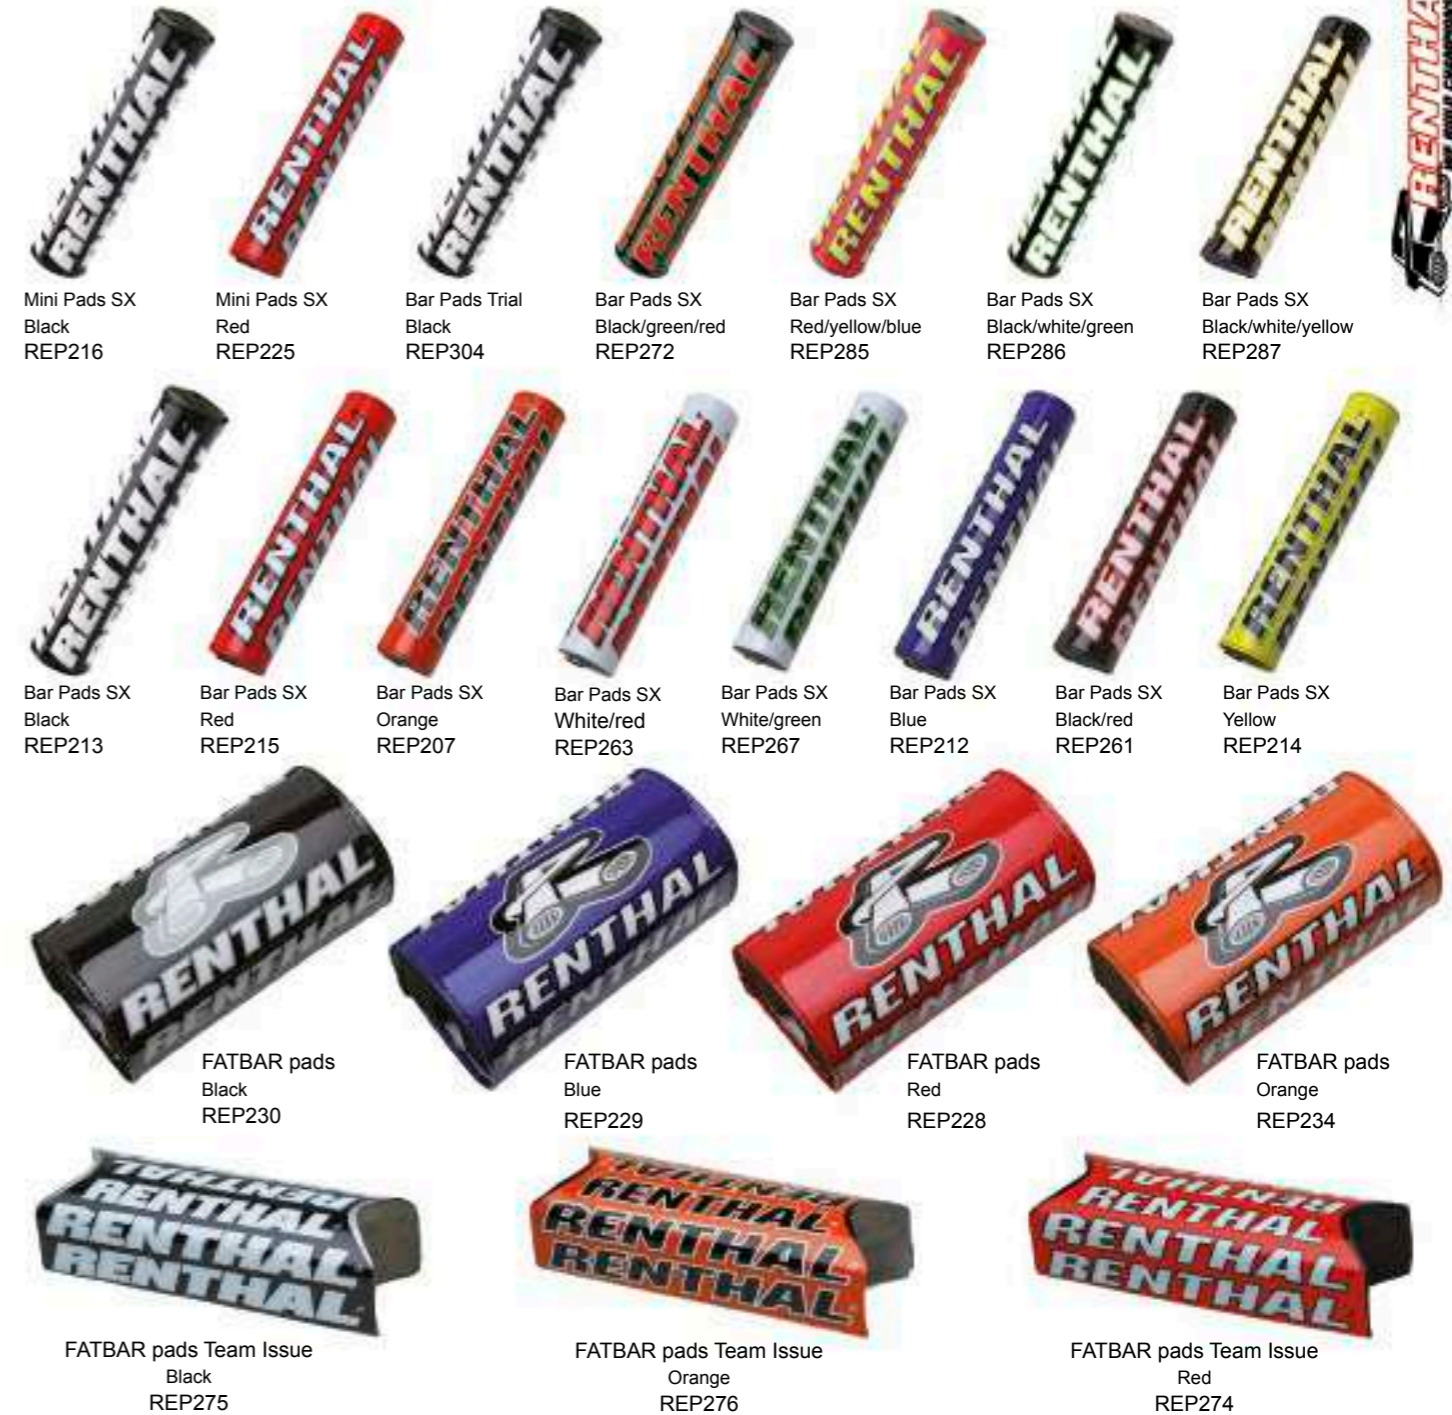

Renthal fatbars have been chosen as original equipment by KTM and Suzuki and are used by HRC Honda Japan, Team Suzuki Japan, KHI Kawasaki Japan, Factory Honda Off-road USA, Kawasaki Team Green USA, Team Red Bull KTM Off-road, Team Suzuki Off-road and Montesa

ULTRA TACKY GRIP TECH

REG197 - DUAL SERIES

REG198 - TAPERED SERIES

RENTHAL® ULTRA-TACKY™ GRIPS

Renthal® Ultra-Tacky™ grips have been developed to increase traction between the glove and grip, increasing control and reducing rider fatigue. The unique Ultra-Tacky™ compound constantly produces and renews a sticky surface coating which when combined with the Renthal® Soft compound offers an incredibly grippy yet comfortable surface. Suitable for use in all conditions, the grip is particularly applicable where riders are looking for increased control of the handlebars. The sticky surface will last for the lifetime of the grip and if it loses its stickiness at any point, simply wash with clean water and allow the grips to air dry to re-activate.

- Renthal® Dual Compound Construction
- Ultra-Tacky™ outer compound provides increased traction (similar in hardness to Renthal Soft)
- Firm inner compound provides durability at grip ends.
- Sticky surface will last for the lifetime of the grip and can be refreshed at any point with water.

DUAL COMPOUND KEVLAR GRIPS
REG165

KEVLAR GRIPS

Renthal has developed a special KEVLAR reinforced grip, with all the properties you would expect from a Renthal grip with the added LIFE EXTENDING properties of KEVLAR. This revolutionary material lasts three times as long as our regular soft material

FRONT CHAINWHEELS GROOVED

Renthal grooved off-road front chainwheels are designed to offer a long lasting front chainwheel in a lightweight design which offers maximum power transfer. They are CNC machined from a case hardened and core refined 655M13 nickel chromium steel. Mud grooves are CNC ma-chined into each tooth on both sides to allow mud to flow away from the key contact points between the chain and the chainwheel. This helps reduce wear and increases the drivetrain lifespan.

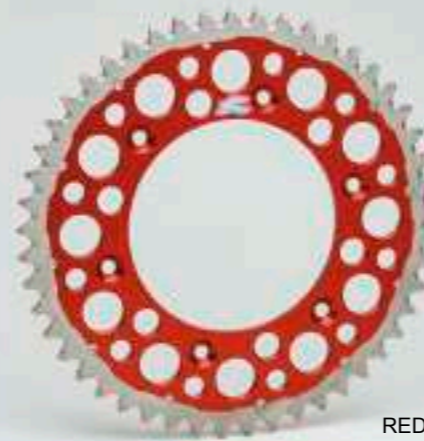

FRONT CHAINWHEELS STANDARD

Standard front chainwheels are long lasting, hard wearing entry level front chainwheel. Constructed out a specially developed Nickel-Chrome-Molybdenum steel which is case hardened and core refined to give the ultimate combination of strength and hardness.

TWINRING

The longest lasting most durable off-road sprocket you can buy developed over 5 years. The unique flat face design keeps weight to a minimum and means the TwinRing's as narrow as a regular chainwheel. Inner Ring is high strength Ultralight 7075 T6 Aluminium. Outer Ring is ElectrolessNickel Coated steel Outer is expanded at 200 °C and then fitted to inner, creating a permanent bond for the life of the sprocket

RED

ORANGE

REAR CHAINWHEELS

Renthal Ultralight™ rear chainwheels are manufactured to extremely tight tolerances from a special material developed to withstand the rigours of Supercross, Motocross and Enduro. The 7075 T6 aluminium alloy rear chainwheels are 66% lighter than steel, yet incredibly durable. Their advanced tooth profile, concentricity and accuracy of fit provide maximum power transfer and long-life. Renthals combination of a very high strength base material and an exceptionally hardwearing surface result in significantly increased chainwheel life.
