DIAMOND

DIAMOND HELMET

2019

Diamond is the innovative, revolutionary helmet developed by UFO PLAST engineers, created after long and careful search aimed at achieving the highest level of protection and comfort, using the most advanced technologies and materials to protect and make off-road driving more comfortable.

DCS - Diamond Concept Shell

The outer Diamond shell and its original "diamond" design, studied to optimise shell design to maximise shock absorption and dissipation, has been built using the latest technology and is made up of a high percentage of Carbon (over 60%) and Aramid fibre to maximise performance and minimise weight.

RIAS – Rotation Impact Absorbing System is the revolutionary Diamond helmet technology: In addition to dissipating compression-absorbing shocks like traditional helmets (linear impact), the helmet structure combines innovative technology that dissipates the energy associated with rotational acceleration (rotational impact), reducing tension and providing additional protection for some types of impact. This is all possible thanks to the combined work of the different layers of material used: **The main inner shell** in high density EPS is characterised by a very compact, rigid outer surface (in contact with the outer shell). The inner surface has large grooves that offer a dual function: they provide greater airflow and differentiate impact force dissipation, effectively as if the main layer had two different densities. **Inner oscillating shell**, consisting of low density polypropylene foam (PPE) to provide gradual absorption, was designed to rotate inside the helmet, working in conjunction with the Main inner shell. This system enables multi-directional sliding that also dissipates the energy associated with rotational acceleration, so as to improve protection in case of rotational impact.

RIAS – Rotation Impact Absorbing System

LEAS – Limited Extension Anti Shock

The Diamond Helmet is also equipped with foam protections. One of these is located at the bottom of the chin-rest, and the other at the back at the base of the neck. This advanced protection system represents an important advance in the containment of the front and back neck flexion and in impact dissipation in the event of a fall. This system can work in conjunction with modern neck braces.

SVS – Sliding Visor System

UFO PLAST has also designed an exclusive visor adjustment system, incorporating a sliding flap in the middle that adjusts the length of the visor even when moving.

The Diamond Helmet is also equipped with a complex **AES - Air low Extraction System ventilation system**: at the top front, under the visor, there are three large air vents which, in conjunction with the other 4 slots underneath the facial foam, convey fresh air directly into the shell. The EPS interior is channelled for perfect airflow distribution that is conveyed and extracted by four large extractors positioned at the back of the shell: two at the top and two at the bottom. This system guarantees perfect air extraction and excellent heat dissipation.

The Diamond Helmet is fully removable for easier maintenance and cleaning: all components are fixed with Torx imprint aluminium screws (T8).

LEAS – Limited Extension Anti Shock

SVS – Sliding Visor System

AES - Airflow Extraction System

The interior, mounted on the helmet by means of snaps, is made of premium, breathable materials and offers excellent comfort. The inner padding is easy to disassemble and fully removable for washing and to ensure perfect hygiene.

ECPR - Emergency Cheek Pads Removing

Cheek pads are also equipped with a Quick removal system in case of emergency. This allows users to remove cheek pads with the helmet still on, allowing for easier helmet removal in the event of an accident.

Latching system

Diamond helmets are equipped with a chin-strap closing system with double D closure in anodised aluminium with 25 mm tubular band complete with magnetic hooking closing button. The closing band also offers comfortable, adjustable length padding.

ECPR - Emergency Cheek Pads Removing

Latching system

SIACHEN COOLING VEST | GC04427

SIACHEN

COOLING VEST

The SIACHEN evaporative cooling vest products with INUTEQ-DRY® technology is comfortable, full-fashioned and light weighted. No refrigeration or chemicals are required. This product will reduce heat stress and fatigue, allowing you to feel comfortable cool and to perform better. Due to the unique technology system, this product will not become wet or soggy, making it suitable to wear the vest underneath clothing. The INUTEQ-DRY® cooling products are designed to be worn in an environment with an ambient temperature that is not extreme and perform best in low to medium humidity. The level of airflow on the body determines the cooling effect and cooling duration.

Product features:

- Incorporates a unique cooling technology
- Stays 100% dry inside and outside
- Is machine washable and has antibacterial properties
- Is easy to use and re-use
- Is lightweight, non-toxic and durable
- Provides up to 15C / 59C cooling relief below ambient temperature
- Offers up to 3 days of cooling comfort, depending on temperature / airflow / humidity levels

ISTRUZIONI • INSTRUCTIONS

- 1 Insert 0.5 L of fresh water into the opening on the back
- 2 After the operation, close the opening and spread the open vest on a flat surface
- 3 Then pass your hands over the vest to drain the water inside so that it is channeled in all the internal parts
- 4 Before wearing the gilet please expel the exceded water from the opening on the back making it come out of the vest

Once the cooling effect is finished, repeat the operation from point 1 to point 4

KOMBAT PADDED SHORTS | PI02354

SIZES: XS - S - M - L - XL - XXL | Color: A - B

100% MADE IN ITALY

"Kombat" padded shorts for adult with (lateral and back) multi-layer protection made by two layer in "Microshock" material perforated to grant best air flow

CAMO UNDERSHIRTS WITH LONG SLEEVES | MG04407

SIZES: S/M - L/XL - XXL | Color: K

100% MADE IN ITALY

CAMO undershirt with long sleeves is made by collaboration with SIXS®. The configuration of Original Carbon Underwear® allows sweat to be truly taken away from the skin to the outside due to low density zones properly alternating with light pressure zones. This peculiarity ensures the athlete correct thermoregulation and optimum breathability under all conditions.

The low density zones are created by using carbon fiber that not only is extremely hard-wearing and ultralight, but also boasts an enormous thermal insulation capacity. Its fineness in the form of textile fiber, which makes it practically invisible to the human eye, creates those micro cavities that channel sweat to the outside so the skin is left dry. Dryarn®, polyamide fiber and polyurethane fiber, complete the blend and add essential characteristics such as: thermoregulation, water-repellency, bending and wear resistance, stretch and non-deformability.

Thanks to its blend of textile fibers, the Carbon Underwear® fabric is just like a breathable barrier that keeps the body temperature constant under all weather conditions. The patented SIXS weave stitch and the polypropylene found in our fabric create a perfect combination: a lower liquid absorption rate and a greater water vapour permeability than other textile fibers. The Carbon Underwear® fabric has the lowest specific weight of all textile fibers on the market. The Carbon Underwear® fabric respects the skin and protects it from bacteria and pollutant dusts. Eliminating the risk of annoying allergies and unpleasant smells. The Carbon Underwear® fabric dries almost instantly, due to its capacity to not absorb liquids and moisture.

- Constant thermoregulation
- Maximum breathability
- Light as a feather
- Bacteriostatic
- Fast drying

CAMO UNDERSHIRTS WITH SHORT SLEEVES | MG04406

KOROYD CORES

SAS-TEC

The relief semisphere in the back side of the back protector allows an important increase in airflow and effective heat dissipation.

Internal protections with SAS TEC/Koroyd technology. Removable for washing

ENIGMA BODYGUARD | PE02346

Sizes: S/M - L/XL - XXL | Color: K

FOR F.M.I. RULES

CE BACK PROTECTOR: CE-EN1621-2 LEVEL 2
 FRONT PROTECTORS: CE-EN14021
 SHOULDERS GUARDS: CE-EN1621-1
 ELBOW GUARDS: CE-EN1621-1

ENIGMA Bodyguard with SAS TEC/KOROYD protections
 With their new SK-protection-series UFO combines the positive features of SAS-TEC foam and Koroyd Cores to something completely new: lightweight, breathable and highest damping capacity.

SAS-TEC SAS-TEC - Sicurezza fatta di schiuma
 body protection systems A differenza della

SAS-TEC - safety made of foam
 In contrast to conventional PU foams the viscoelastic PU foam of SAS-TEC is partly made of renewable materials. Its special features include spontaneous response, highest comfort and unique damping performance with excellent nearly linear energy absorption. A very special micro structure of the SAS-TEC foam is responsible for an adaptive damping behavior – the higher the speed of the impact, the higher the resistance of the foam. All these features guarantee the best possible protection for your body.

Koroyd Cores - Performance and Breathability The combination of Koroyd's precise extrusion and unique thermal welding process leads to a structure with both extremely efficient and consistent energy absorption properties. Upon high velocity impacts the cores crush in a completely controlled manner, decelerating the energy from the impact and greatly reducing the final trauma levels. Koroyd's completely open cell construction channels airflow around the rider, without limitation. Koroyd patented technology is integrated into the best sports and protection products that give you the edge.

Back protector, Elbow and Shoulder guards with SAS TEC / KOROYD Technology

ULTRALIGHT 2.0 BODYGUARD | PE02375

Sizes: S/M - L/XL - XXL | Color: K

FOR F.M.I. RULES

CE BACK PROTECTOR: CE-EN1621-2 LEVEL 2
 FRONT PROTECTORS: CE-EN14021
 SHOULDERS GUARDS: CE-EN1621-1
 ELBOW GUARDS: CE-EN1621-1

ULTRALIGHT Bodyguard with STF (SAS TEC Foam) protections, totally made from airtex material

- Made with polyester net and Airtex material
- Internal protection in STF (Sas Tec Foam) removable for washing
- Maximum lightness
- Maximum transpiration
- Increased elasticity to absorb shock

PROERGO BODYGUARD | PE02276

Sizes: S/M - L/XL - XXL | Color: W

100% MADE IN ITALY

CE BACK PROTECTOR: CE-EN1621-2 LEVEL 1
 FRONT PROTECTORS: CE-EN14021
 SHOULDERS GUARDS: CE-EN1621-1
 ELBOW GUARDS: CE-EN1621-1

PROERGO Bodyguard with articular restraint system, adjustable body belt and removable sleeves

- Maximum integrability with the Neck Brace
- Removable sleeves
- Great bioclimatic comfort thanks to the exclusive "Sensitive®" fabric
- ANTI-SHOCK MATERIAL INSIDE:
 Reticulated Polyethylene (100% PE): The 4mm diameter hole with 7.5 mm distance guarantees great transpiration.
- ELLERES P forato (100% PU ViscoElastico): is a heat-sensitive product which continuously conforming to the shape of the body. Great ability to absorb and distribute shock.
- ANTI-SHOCK MATERIAL OUTSIDE
 Made from polyethylene plastic PE with high impact resistance, the external anti-shock material has a "Honeycomb" structure, and it offers extremely effective shock absorption and the right heat dissipation (so as to avoid internal overheating).
- ARTICULAR RESTRAINT
 "Pro Ergo" has two straps which can be tightened. They start at the shoulders and reach the waist where they are fastened with Hook and loop fastener. The straps cross over in an "X" so that the articulation of the shoulder remains taut at the same time permitting all movements that a motor cyclist has to make (on and off the road).

- FREEDOM OF MOVEMENT
- PERFORMANCE
- SAFETY

Ufo Plast Morpho Fit, a product made entirely in Italy representing a new and innovative conceptual response in the range of jointed braces for knee protection in sport. The result of careful, constructive cooperation between **Alberto Barozzi Concept**, **Tek Neg** (engineering) and the **UFO PLAST** technical staff, which made it possible to develop a product that embraces a number of technical and functional factors, including:

- Ergonomic structure with high-performance structure characteristics made from a special plastic polymer
- Total containment of the knee joint thanks to:
 - a - medial and lateral collateral ligament support
 - b - anterior and posterior cruciate ligament support
 - c - patella protection
- Proper size adjustment thanks to adjustments available

- **CPSO** (Condyle Pad Spheric Orientation): Adjustable condyle pads, made of a spherical support for perfect containment of the joint
- Tibial support in two versions can be adjusted, with reference to the subjective morphologic structure of the tibia, for correct adaptation and comfort. **TOP** (Tibia Orientation Position)
- Adjustable containment system for the **ACL** (anterior cruciate ligament). **ACLSS** (Anterior Cruciate Ligament Support System)
- Medial and lateral collateral ligament containment
- Sealed stainless steel structural four-sided joint, for a correct relationship between translation and rotation of the joint and the best integration in the knee flexion-extension movement
- Structural patella cup for effective impact dissipation, thereby limiting the direct impact on the patella
- Telescopic upper structure to protect the rectus femoris - vastus medialis and sartorius muscle
- Adjustable 4-point leg-fastening system for correct positioning
- **HLS** (Hyperextension Limit System): Stoppers to limit hyperextension with variations: 0° - 15° -25° -35°
- Adjustable fittings for the best adaptation of the straps to the leg
- Heat-welded, hypoallergenic, antibacterial straps with reduced thickness for better containment and comfort
- Thermoformed **BAL** (bioclimatic action low): structure made from hypoallergenic, antibacterial polyurethane foam with bubble wrap texture to ensure the best adherence to the leg and a reduced bioclimatic ratio and high shock absorption power. Easily removable for easy cleaning
- **MFBS** (Morpho Fit Boots System): Interference support with the top of the boot to support the brace
- **ADHM**, (assembly/disassembly home made): Assistance system managed independently thanks to a conceptual engineering system expressed in the creation of the product
- Ergonomic "tube-sock" to enable better application of the brace
- All materials are water resistant and anti-corrosive
- Lightweight (size S/M = 760 gr - size L/XL = 820 gr)

REPLACEMENTS MORPHO FIT KNEE BRACE

100% MADE IN ITALY

In creating Structure, the ADHM (assembly/disassembly home made) system was used. This is a modular concept logic for completely independent assistance.

JACKAL KNEE-SHIN GUARDS | MTP6288

SIZES: S/M - L/XL | Color: W

MADE IN ITALY **SAS-TEC** body protection systems **CE** KNEE PROTECTOR: CE-EN1621-1

JACKAL Knee-Shin Guards with internal STF protections (SAS TEC FOAM). The Jackal Knee/shin guards for DH - ENDURO, the knee guard is completely open in order to be worn comfortably even without taking off your shoes, with adjustable elastic straps for a perfect fixation to the knee. The Jackal Knee/shin guard is longer than the knee guard Spartan EVO, and cover part of the shin of the rider also.

- Internal protections in STF (SAS TECH FOAM)
- Anti-scratch micro-fibre
- Very light weight and extremely protective
- Maximum transpiration and maximum ergonomics
- Lateral padding

Internal protection in STF (Sas Tec Foam) removable for washing

JACKAL REPLACEMENT | MTP6298

NSS NECK SUPPORT SYSTEM | PC02377

SIZES: One size fits all | Color: B - DFLU

100% MADE IN ITALY

"NSS" Neck Support System with Back supports adjustable in two different positions and fixing shoulder straps

- Great head mobility
- Integration with helmets and body protector
- Great fitting
- Light weight
- Available in 2 new graphics
- Two sizes of thickness of the foam for a better fitting
- Removable cover for washing
- Back supports adjustable in two different positions

NSS neck support has been developed for a better interaction among body, back and shoulders with protections and without protections.

Color: DFLU
NEON COLOR

Color: B

Ufo plast technicians used their great knowledge of the plastic polymers to produce the NSS (co-moulded injected polymers), avoiding the use of dangerous (in case of structural failure) composite fibers.

The side attack allows to wear the NSS with extreme facility and in total autonomy, also after putting the helmet in your head. A safety system allows the maintenance of the closure also case of crash.

Street body belt

A collage of vintage motorcycle racing images in a warm, golden-brown color palette. The background features a large, semi-transparent image of a rider on a dirt bike. Overlaid on this are several smaller, semi-transparent images: a rider on a yellow bike in the top left, a rider on a white bike in the bottom left, and a group of riders on a dirt track in the bottom right. The overall aesthetic is nostalgic and energetic.

ALIEN ICE CARE

Alien Ice Care is a young company that develops and creates innovative devices for cryotherapy, used in post-traumatic and post-surgery. The systems consist of an adjustable support in breathable hypoallergenic fabric, inside which are inserted cooling elements previously solidified.

What happens to the tissues after an injury?

When you stretch a muscle or tear a tendon, an injury to the soft tissue is induced, causing pain in the affected area. Simultaneously it also breaks down also the small blood vessels. The capillaries then disperse blood and serum in the adjacent tissues causing localized swelling.

The pain in the injured area, due to the trauma and swelling, causes hypomotility to the affected area (joint or muscle area) with possible inflammation of the tendons.

The use of medical devices Alien Ice Care, thanks to the localized lowering of temperature,

favour the blood vessels constriction, which reduces further leakage of blood and serum, thus limiting the formation of swelling.

The leakage of liquids also protracts the recovery time and return to everyday life, and in the case of an athlete the time required to return to play.

Alien Ice Care systems are also used after a workout or a rehabilitation session to minimize the loss of inflammatory fluid and/or blood from the capillaries that break during exercise. This application also conducts an important analgesic effect.

PLUS:

- Geometry and structure: the geometry, size and placement of the cooling elements allow the localized lowering of the temperature, focusing on the anatomical areas most affected by the trauma. It avoids the direct cooling of adjacent areas that may be slightly compromised. A pre-shaped design allows easy use and repeatable applications. Furthermore the end user can do regular activities during the treatment.

- Temperature maintenance: according to patient issues it is possible to use different temperatures: 6.5° C and 15° C, even during the same application. The maintenance of temperature, constant for more than one hour, is shown by investigations with thermo-camera.

- Materials used: hypoallergenic, breathable and elastic materials ensure a perfect fit of the support and maintenance of the position, allowing the end user to carry out regular physical activity even during the application of the device. Thanks to the nature of the fabrics and cooling elements the device does not cause frostbite.

- Quick and easy preparation: thanks to the rapid solidification of the cooling elements and practical pockets that receive them.

All Alien Ice Care devices are guaranteed for 3 years.

ELBOW ICECARE

- Usable during sports activities

The support, when it is worn, does not limit any degree of freedom of the shoulder, in this way the limb function is maintained. Inside, five cooling elements are inserted that surround the glenohumeral joint, acromion-clavicular, affecting the surrounding muscle areas: the deltoid, pectoralis minor and major, rhomboid, infraspinatus and part of the trapeze.

Renthal Twinwalls are the safest and strongest handlebars in the world. Renthal's revolutionary Twinwall handlebar utilizes two tubes, making fatigue failure virtually impossible. The immensely strong Twinwall offers 50% more flex than a traditional steel 7/8 bar. Renthal Twinwalls are currently used by Team Honda USA, Team Kawasaki USA, Red Bull KTM USA, Factory Connection Honda, Pro Circuit Kawasaki, Yamaha of Troy, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki Europe and

FATBAR HANDLEBAR

Renthal Fatbars are a tapered, braceless bar design, combining excellent strength and good resilience. The tapered outer wall allows 1 1/8 inch clamping diameter and 7/8 inch at control ends. A 5.0mm wall thickness at the bends is used to increase strength. They have a shot peened and anodised corrosion resistance finish and feature a laser etched positioning grid. Renthal fatbars have been chosen as original equipment by KTM and Suzuki and are used by HRC Honda Japan, Team Suzuki Japan, KHI Kawasaki Japan, Factory Honda Off-road USA, Kawasaki Team Green USA, Team Red Bull KTM Off-road, Team Suzuki Off-road and Montesa

RENTHAL® ULTRA-TACKY™ GRIPS

Renthal® Ultra-Tacky™ grips have been developed to increase traction between the glove and grip, increasing control and reducing rider fatigue. The unique Ultra-Tacky™ compound constantly produces and renews a sticky surface coating which when combined with the Renthal® Soft compound offers an incredibly grippy yet comfortable surface. Suitable for use in all conditions, the grip is particularly applicable where riders are looking for increased control of the handlebars. The sticky surface will last for the lifetime of the grip and if it loses its stickiness at any point, simply wash with clean water and allow the grips to air dry to re-activate.

- Renthal® Dual Compound Construction
- Ultra-Tacky™ outer compound provides increased traction (similar in hardness to Renthal Soft)
- Firm inner compound provides durability at grip ends.
- Sticky surface will last for the lifetime of the grip and can be refreshed at any point with water.

FRONT CHAINWHEELS GROOVED

Renthal grooved off-road front chainwheels are designed to offer a long lasting front chainwheel in a lightweight design which offers maximum power transfer. They are CNC machined from a case hardened and core refined 655M13 nickel chromium steel. Mud grooves are CNC ma-chined into each tooth on both sides to allow mud to flow away from the key contact points between the chain and the chainwheel. This helps reduce wear and increases the drivetrain lifespan.

FRONT CHAINWHEELS STANDARD

Standard front chainwheels are long lasting, hard wearing entry level front chainwheel. Constructed out a specially developed Nickel-Chrome-Molybdenum steel which is case hardened and core refined to give the ultimate combination of strength and hardness.

RED

ORANGE

TWINRING

The longest lasting most durable off-road sprocket you can buy developed over 5 years. The unique flat face design keeps weight to a minimum and means the TwinRing's as narrow as a regular chainwheel. Inner Ring is high strength Ultralight 7075 T6 Aluminium. Outer Ring is ElectrolessNickel Coated steel Outer is expanded at 200 °C and then fitted to inner, creating a permanent bond for the life of the sprocket

REAR CHAINWHEELS

Renthal Ultralight™ rear chainwheels are manufactured to extremely tight tolerances from a special material developed to withstand the rigours of Supercross, Motocross and Enduro. The 7075 T6 aluminium alloy rear chainwheels are 66% lighter than steel, yet incredibly durable. Their advanced tooth profile, concentricity and accuracy of fit provide maximum power transfer and long-life. Renthals combination of a very high strength base material and an exceptionally hardwearing surface result in significantly increased chainwheel life.
