INTEGRATOR

THE NEW

INTERCEPTOR HELMETS MADE IN ITALY

Interceptor is the helmet by UFO PLAST 100% Made in Italy. Interceptor is Achieved after long and attentive research resulting in better protection, and can be used in combination with the modern Neck Brace.

When planning this helmet particular importance was given to the internal comfort, (fit and ventilation system), to the aggressive and aerodynamic design and to reduced weight. Conceived, realized and optimized for maximum performance with optimum comfort.

For maximum comfort the exterior shell has been constructed in two different sizes and made with the most advanced constructive technology. Different materials have been layered and woven together (Carbon, Aramidic, Fiberglass and Polyester Resin) and inserted in pre-established positions to guarantee the characteristic profile and maximum performance with minimum weight. The particular shape of the inferior shell was studied so as to reduce angles that could collide with the rider's body and to permit the use of the modern Neck Brace.

Interceptor Helmet by Ufo Plast has been constructed with the complex ventilation system M.V.S.

HELMETS

TAGLIE/SIZES:					
XS	S	M	L	XL	XXL
53-54 cm	55-56 cm	57-58 cm	59-60 cm	61-62 cm	63 cm

Interceptor Helmet by Ufo Plast has been constructed with a complex ventilation system, the Multi Vent System (M.V.S.): positioned towards the front are numerous air vents that direct fresh air to the head, the interior in EPS is canalized for a perfect distribution of the airflow. The heat inside the helmet it is dissipated by 3 vents on the upper part of the helmet which are capable of extraction even with a low flow of air and by two large vents located towards the lower back of the helmet. This guarantees complete air circulation.

HELMETS

Realized in the finest materials, the pads are fastened to the helmet with snaps and can be completely removed. There are three pads: central pad, left side pad, right side pad.

Fast removable system for pads (in case of emergency).

New Interceptor internal Mouthpiece is removable to clean filter

High strength Polycarbonate Helmet a SOLIDUS model

SIZES:

XS	S	M	L	XL
53-54 cm	55-56 cm	57-58 cm	59-60 cm	61-62 cm

Spectra is a helmet that comes very close to its predecessor (Interceptor), thus expanding the range of helmets off road in the entry level. Spectra helmet is made of high strength polycarbonate. The internal pads offer excellent fit, and they are removable and washable for optimal hygiene. A rear air extractor, the visor height-adjustable and the strap with double D, make it a very high quality product. The helmet is available in 3 new graphics.

E-AHL

EXOSKELETON ANKLE HYPEREXTENSION LIMIT

RECON BOOTS

Ufo Plast is increasingly synonymous with protection safety, and with this same logic we present you with the E-AHL (exoskeleton ankle hyperextension limit) off-road boot.

This innovative product (*Alberto Barozzi concept patented*) has been exclusively shown to protect the tibial/tarsal compartment and offers users absolute comfort.

This concept has been studied over several years through careful biomechanical analysis. Detailed knowledge of the needs and issues in use have made it possible to identify in detail the points set forth in the product's development.

This "Made in Italy" product has been created by a network of highly skilled professionals who have made it possible to express the concept innovations on the product.

A study of shapes, research of thermoplastic/fabric materials, engineering development, design, highly skilled Italian craftsmanship and strict testing in the laboratory and in the field all have allowed for the creation of this product, with methodological criterion that sets Ufo Plast products apart.

Technical-functional characteristics:

- 1) Ergonomically developed mid sole for comfort and foot stability. Studied for reduced treading, thus ensuring perfect support on footrests when feet are positioned on their soles.
- 2) **E-AHL** - an innovative stainless steel exoskeleton making up the "protective cell" in the tibial/tarsal compartment, developed with the following special features:
 - a - Pronation and supination foot support through lower arms
 - b - Tibia/fibula support through upper arms
 - c - Dorsiflexion personalisation system using special stoppers: 0° - 15° std - 11°
 - d - Biomechanical movement permitting extremely free movement starting immediately with new boots
- 3) Davos Sole - high grip characteristics with a balanced design between motocross and enduro. Surprising lasting wear.
- 4) Upper - **thermoformed BAL** (bioclimatic action low) with structure made from hypoallergenic, antibacterial polyurethane foam, studied to ensure improved comfort, high shock absorption power and proper ankle containment. Its reduced bioclimatic value is obtained thanks to special air "channels."
- 5) Internal boot leg protection dual-compound for increased bike grip.
- 6) **CA system** (calf adjustment) boot leg - with 4 adjustment points to best adapt to calf volume.
- 7) Hooks - in anodised aluminium, with intuitive and efficient adjustment and closure thanks to the integrated "soft touch" component.
- 8) Toe thickness - reduced for easy and effective changing.
- 9) Tip - protective foam made of special plastic polymer for high toe protection. Its asymmetrical design has been studied to best suit the grip of the climbing gear lever and when inserting gears.
- 10) Heal lug - designed to offer maximum protection in the area and allow for effective gear changing with the heel in the start-up phase.
- 11) Vents - dynamic for proper ventilation.
- 12) Sole - in breathable shock-absorbing Eva.
- 13) Internal gaiter - with shape memory, breathable material with a waterproof outer film.
- 14) **ADHM (assembly/disassembly home made)** - independently managed support for substitutions of some components.
- 15) All materials are water resistant and anti-corrosive.

The Heal lug has been designed to offer maximum protection and allow for effective gear changing with the heel in the start up phase.

The protective foam tip is made of special plastic polymer for high toe protection. Its asymmetrical design has been studied to best suit the grip of the climbing gear lever and when inserting gears.

- RECON E-AHL (Exoskeleton Ankle Hyperextension Limit - Alberto Barozzi patented concept)
- Off-road boot designed and made entirely in Italy
 - Cutting-edge technologies and innovative materials
 - Revolutionary exoskeleton with Stainless Steel arms is the "protective cell" of the ankle and tibia
 - Prevent dangerous twisting of ankles
 - Allow to the rider an ideal control of dorsal and plantar foot flexion
 - Ensures tibial/tarsal compartment defence
 - Highest levels of comfort and performance

The boot is provided with 15° stoppers for dorsiflexion on a maximum movement of 20°. If necessary, different options include: upper stopper 11° or free movement 0°

SAS-TEC
 body protection systems

SASa TEC a safety made of foam

In contrast to conventional PU foams the viscoelastic PU foam of SAS-TEC is partly made of renewable materials. Its special features include spontaneous response, highest comfort and unique damping performance with excellent nearly linear energy absorption. A very special micro structure of the SAS-TEC foam is responsible for an adaptive damping behavior – the higher the speed of the impact, the higher the resistance of the foam. All these features guarantee the best possible protection for your body.

SAS TEC - KORROYD technology

Back protector with SAS TEC / KORROYD Technology

Koroyd Cores - Performance and Breathability

The combination of Koroyd's precise extrusion and unique thermal welding process leads to a structure with both extremely efficient and consistent energy absorption properties. Upon high velocity impacts the cores crush in a completely controlled manner, decelerating the energy from the impact and greatly reducing the final trauma levels. Koroyd's completely open cell construction channels airflow around the rider, without limitation. Koroyd patented technology is integrated into the best sports and protection products that give you the edge.

CYBORG BODYGUARD

cod. PE02343

SIZES/TAGLIE: S/M - L/XL - XXL

COLOR: K

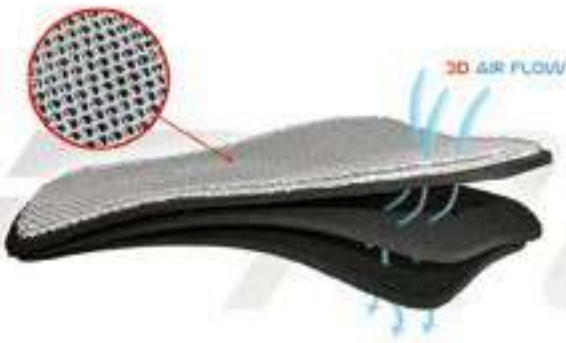

BACK PROTECTOR: CE-EN1621-2
FRONT PROTECTORS: CE-EN14021

100% MADE IN ITALY

CYBORG Bodyguard with shoulders and arm support are equipped with internal (front, lateral and back) 3D Astromemory (Astrotech®) protections

FOR F.M.I. RULES

- Made with Meryl® and Airnet material
- Great comfort, lightness and transpiration
- 3D Astromemory (Astrotech®) internal protections are with high capacity of transpiration and increased elasticity to absorb shock
- Protections are removable for washing
- Lateral protections for the spleen and liver are totally
- Arm support is removable

 ELBOW GUARDS: CE-EN1621-1

100% MADE IN ITALY

PROERGO Bodyguard with articular restraint system, adjustable body belt and removable sleeves

- Maximum integrability with the Neck Brace
- Removable sleeves
- Great bioclimatic comfort thanks to the exclusive "Sensitive®" fabric
- ANTI-SHOCK MATERIAL INSIDE:
 - Reticulated Polyethylene (100% PE): The 4mm diameter hole with 7.5 mm distance guarantees great transpiration.
 - ELLERES P forato (100% PU ViscoElastico): is a heat-sensitive product which continuously conforming to the shape of the body. Great ability to absorb and distribute shock.
- ANTI-SHOCK MATERIAL OUTSIDE
 - Made from polyethylene plastic PE with high impact resistance, the external anti-shock material has a "Honeycomb" structure, and it offers extremely effective shock absorption and the right heat dissipation (so as to avoid internal overheating).
- ARTICULAR RESTRAINT
 - "Pro Ergo" has two straps which can be tightened. They start at the shoulders and reach the waist where they are fastened with Hook and loop fastener.
 - The straps cross over in an "X" so that the articulation of the shoulder remains taut at the same time permitting all movements that a motor cyclist has to make (on and off the road).

ADULT PROTECTORS

Ufo Plast Morpho Fit, a product made entirely in Italy representing a new and innovative conceptual response in the range of jointed braces for knee protection in sport. The result of careful, constructive cooperation between **Alberto Barozzi Concept**, **Tek Neg** (engineering) and the **UFO PLAST** technical staff, which made it possible to develop a product that embraces a number of technical and functional factors, including:

- Ergonomic structure with high-performance structure characteristics made from a special plastic polymer
- Total containment of the knee joint thanks to:
 - a - medial and lateral collateral ligament support
 - b - anterior and posterior cruciate ligament support
 - c - patella protection
- Proper size adjustment thanks to adjustments available

- **CPSO** (Condyle Pad Spheric Orientation): Adjustable condyle pads, made of a spherical support for perfect containment of the joint
- Tibial support in two versions can be adjusted, with reference to the subjective morphologic structure of the tibia, for correct adaptation and comfort. **TOP** (Tibia Orientation Position)
- Adjustable containment system for the **ACL** (anterior cruciate ligament). **ACLSS** (Anterior Cruciate Ligament Support System)
- Medial and lateral collateral ligament containment
- Sealed stainless steel structural four-sided joint, for a correct relationship between translation and rotation of the joint and the best integration in the knee flexion-extension movement
- Structural patella cup for effective impact dissipation, thereby limiting the direct impact on the patella
- Telescopic upper structure to protect the rectus femoris - vastus medialis and sartorius muscle
- Adjustable 4-point leg-fastening system for correct positioning
- **HLS** (Hyperextension Limit System): Stoppers to limit hyperextension with variations: 0° - 15° -25°-35°
- Adjustable fittings for the best adaptation of the straps to the leg
- Heat-welded, hypoallergenic, antibacterial straps with reduced thickness for better containment and comfort
- Thermoformed **BAL** (bioclimatic action low): structure made from hypoallergenic, antibacterial polyurethane foam with bubble wrap texture to ensure the best adherence to the leg and a reduced bioclimatic ratio and high shock absorption power. Easily removable for easy cleaning
- **MFBS** (Morpho Fit Boots System): Interference support with the top of the boot to support the brace
- **ADHM**, (assembly/disassembly home made): Assistance system managed independently thanks to a conceptual engineering system expressed in the creation of the product
- Ergonomic "tube-sock" to enable better application of the brace
- All materials are water resistant and anti-corrosive
- Lightweight (size S/M = 760 gr - size L/XL = 820 gr)

ADULT PROTECTORS

REPLACEMENTS MORPHO FIT KNEE BRACE

100% MADE IN ITALY

In creating Structure, the ADHM (assembly/disassembly home made) system was used. This is a modular concept logic for completely independent assistance.

Color: C

ADULT PROTECTORS

NSS neck support has been developed for a better interaction among body, back and shoulders with protections and without protections.

Ufo plast technicians used their great knowledge of the plastic polymers to produce the NSS (co-moulded injected polymers), avoiding the use of dangerous (in case of structural failure) composite fibers.

The side attack allows to wear the NSS with extreme facility and in total autonomy, also after putting the helmet in your head. A safety system allows the maintenance of the closure also case of crash.

TWINWALL HANDLEBAR

Renthal Twinwalls are the safest and strongest handlebars in the world. Renthal's revolutionary Twinwall handlebar utilizes two tubes, making fatigue failure virtually impossible.

The immensely strong Twinwall offers 50% more flex than a traditional steel 7/8 bar. Renthal Twinwalls are currently used by Team Honda USA, Team Kawasaki USA, Red Bull KTM USA, Factory Connection Honda, Pro Circuit Kawasaki, Yamaha of Troy, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki Europe and

Factory KTM Europe.

FATBAR

FATBAR HANDLEBAR

BARMOUNTS

RECL001 - HONDA, KAWASAKI, SUZUKI

RECL018 - YAMAHA

Renthal Fatbars are a tapered, braceless bar design, combining excellent strength and good resilience. The tapered outer wall allows 1 1/8 inch clamping diameter and 7/8 inch at control ends. A 5.0mm wall thickness at the bends is used to increase strength. They have a shot peened and anodised corrosion resistance finish and feature a laser etched positioning grid.

Renthal fatbars have been chosen as original equipment by KTM and Suzuki and are used by HRC Honda Japan, Team Suzuki Japan, KHI Kawasaki Japan, Factory Honda Off-road USA, Kawasaki Team Green USA, Team Red Bull KTM Off-road, Team Suzuki Off-road and Montesa

Honda.

ULTRA TACKY GRIP TECH

G197 -
DUAL SERIES

G198 -
TAPERED SERIES

RENTHAL® ULTRA-TACKY™ GRIPS

Renthal® Ultra-Tacky™ grips have been developed to increase traction between the glove and grip, increasing control and reducing rider fatigue. The unique Ultra-Tacky™ compound constantly produces and renews a sticky surface coating which when combined with the Renthal® Soft compound offers an incredibly grippy yet comfortable surface. Suitable for use in all conditions, the grip is particularly applicable where riders are looking for increased control of the handlebars. The sticky surface will last for the lifetime of the grip and if it loses its stickiness at any point, simply wash with clean water and allow the grips to air dry to reactivate.

- Renthal® Dual Compound Construction
- Ultra-Tacky™ outer compound provides increased traction (similar in hardness to Renthal Soft)
- Firm inner compound provides durability at grip ends.
- Sticky surface will last for the lifetime of the grip and can be refreshed at any point with water.

FRONT CHAINWHEELS

Renthal Front Chainwheels are simply the finest front chainwheel on the market today.

Our Front Chainwheels feature: Specially developed Nickel-Chrome-Molybdenum steel, case hardened core refined to give the ultimate combination of strength and hardness.

REAR CHAINWHEELS

Renthal Ultralight™ rear chainwheels are manufactured to extremely tight tolerances from a special material developed to withstand the rigours of Supercross, Motocross and Enduro.

The 7075 T6 aluminium alloy rear chainwheels are 66% lighter than steel, yet incredibly durable. Their advanced tooth profile, concentricity and accuracy of fit provide maximum power transfer and long-life. Renthal's combination of a very high strength base material and an exceptionally hardwearing surface result in significantly increased chainwheel life.

TWIRING

The longest lasting most durable off road sprocket you can buy developed over 5 years. The unique flat face design keeps weight to a minimum and means the TwinRing's as narrow as a regular chainwheel. Inner Ring is high strength Ultralight 7075 T6 Aluminium. Outer Ring is ElectrolessNickel Coated steel Outer is expanded at 200 °C and then fitted to inner, creating a permanent bond for the life of the sprocket

RENTHAL
THE WORLD'S BEST PERFORMANCE

INTELLILEVER

The Renthal Intellilever™ is the first truly unbreakable lever. In the event of a crash the IntelliLever can pivot 90 degrees both up and down as well as 90 degrees forward. CNC machined from billet aluminium, the IntelliLever™ is hard anodised with PTFE coated pivot brushing. Adjustable and fits most cable operated clutch systems and popular front brake master cylinders.

SPARTAN EVO Knee guards

cod. MTP6289

Sizes: S/M - L/XL

Color: W

KNEE PROTECTOR: CE-EN1621-1

MADE IN ITALY

SPARTAN Knee-Shin Guards with internal STF protections (SAS TEC FOAM)

The Spartan EVO Knee guards is completely open in order to be worn comfortably even without taking off your shoes, with adjustable elastic straps for a perfect fixation to the knee.

- Internal protections in STF (SAS TECH FOAM)
- Anti-scratch micro-fibre
- Very light weight and extremely protective
- Maximum transpiration and maximum ergonomics
- Lateral padding

Internal protection in STF (Sas Tec Foam) removable for washing

JACKAL Knee-Shin guards

cod. MTP6288

Sizes: S/M - L/XL

Color: W

KNEE PROTECTOR: CE-EN1621-1

MADE IN ITALY

JACKAL Knee-Shin Guards with internal STF protections (SAS TEC FOAM)

The Jackal Knee/shin guards for DH - ENDURO, the knee guard is completely open in order to be worn comfortably even without taking off your shoes, with adjustable elastic straps for a perfect fixation to the knee. The Jackal Knee/shin guard is longer than the knee guard Spartan EVO, and cover part of the shin of the rider also.

- Internal protections in STF (SAS TECH FOAM)
- Anti-scratch micro-fibre
- Very light weight and extremely protective
- Maximum transpiration and maximum ergonomics
- Lateral padding

Internal protection in STF (Sas Tec Foam) removable for washing

MTB-BMX PROTECTORS

MTB FATBAR HANDLEBAR

Il Fatbar è il miglior prodotto per offrire il massimo di leggerezza, resistenza e durata. È realizzato in alluminio 7075 T6 con un diametro di 31,8 mm. È disponibile in diverse versioni: standard, con o senza il tubo di cambio e con o senza il tubo di freno. È anche disponibile in versione personalizzata.

MTB FATBAR LITE HANDLEBAR

Il Fatbar LITE è il massimo della leggerezza in pieno piombo da 31,8 mm. Questo prodotto è stato studiato con una lunghezza di 440 mm, una costruzione in alluminio 7075 T6 e un diametro di 31,8 mm. È disponibile in diverse versioni: standard, con o senza il tubo di cambio e con o senza il tubo di freno. È anche disponibile in versione personalizzata.

MTB FATBAR CARBON

Il Fatbar Carbon è il massimo della leggerezza in pieno piombo da 31,8 mm. Questo prodotto è stato studiato con una lunghezza di 440 mm, una costruzione in carbonio e un diametro di 31,8 mm. È disponibile in diverse versioni: standard, con o senza il tubo di cambio e con o senza il tubo di freno. È anche disponibile in versione personalizzata.

MTB FATBAR CARBON LITE

Il Fatbar Carbon Lite è il massimo della leggerezza in pieno piombo da 31,8 mm. Questo prodotto è stato studiato con una lunghezza di 440 mm, una costruzione in carbonio e un diametro di 31,8 mm. È disponibile in diverse versioni: standard, con o senza il tubo di cambio e con o senza il tubo di freno. È anche disponibile in versione personalizzata.

INTEGRA STEM

• RESTM200-BKAG

Il nuovo stem RESTM200-BKAG è stato studiato apposta per il nuovo tubo a un pezzo, che è stato ottimizzato per il nuovo design. Ha una forma che si integra perfettamente con il tubo. La geometria dello stem è pensata per essere dritta in modo da non creare alcun tipo di stress. È un stem che si lavora in un unico pezzo, con un unico punto di saldatura che si trova nella parte superiore dello stem, dove si trova la parte superiore della piaga.
