UFO

PLAST

“Do you believe that aliens exist?”

The question remains more current than ever, but as far as I'm concerned there has been proof of their presence for at least 40 years, that is from when I resolved to create Ufo Plast.

The journey began in the lands of Tuscany, where I was born and where, together with my brother, I tried to bring to life fantastical ideas in a small workshop. Hours and hours, even entire nights spent casting, printing, polishing and swearing, like any down-to-earth Tuscan who never gives up, just as those who know me are all too aware of. Maximum dedication to propose items unfamiliar to the market but which in a short time became essentials and the pride of off-road sportsmen.

All this happened a long time ago and achieved results have been a source of enormous satisfaction. However I do not feel as though I have reached the finish line, I feel as though I'm still in the thick of the race, brimming with ideas and dreams yet to be fulfilled, with increasing effectiveness thanks to new technologies. Also thanks especially to a passionate team which I have seen grow and remain united, brilliantly facing the challenges which the market imposes upon leaders of the sector. This extraordinary determination which I have tried to apply to every project and encourage in every single one of my collaborators, has also been nurtured by the unique emotions of world level victories, by the historic names of pilots involved with Ufo Plast and who shall remain protagonists of Motocross and Enduro forever.

Today the greatest satisfaction is that we continue to supply high quality products to young pilots who must grow, just like the most demanding professionals.

A special thank you goes to all those who have chosen and continue to choose Ufo Plast as their sports life partner: our continuous commitment to the production of items for your endeavours is an expression of our gratitude for your approval.

Thank you with all my heart!

Cesareo Vito

INTERCEPTOR II HELMET

INTERCE

INTERCEPTOR III

Interceptor is the helmet by UFO PLAST 100% Made in Italy. Interceptor is Achieved after long and attentive research resulting in better protection, and can be used in combination with the modern Neck Brace.

When planning this helmet particular importance was given to the internal comfort, (fit and ventilation system), to the aggressive and aerodynamic design and to reduced weight. Conceived, realized and optimized for maximum performance with optimum comfort.

For maximum comfort the exterior shell has been constructed in two different sizes and made with the most advanced constructive technology. Different materials have been layered and woven together (Carbon, Aramidic, Fiberglass and Polyester Resin) and inserted in pre-established positions to guarantee the characteristic profile and maximum performance with minimum weight. The particular shape of the inferior shell was studied so as to reduce angles that could collide with the rider's body and to permit the use of the modern Neck Brace.

Interceptor Helmet by Ufo Plast has been constructed with the complex ventilation system M.V.S.

Realized in the finest materials, the pads are fastened to the helmet with snaps and can be completely removed. There are three pads: central pad, left side pad, right side pad.

ONLY X HELMET

ONYX

New Onyx helmet that comes very close to its predecessor (Interceptor), thus expanding the range of helmets off road in the entry-level.

Onyx helmet is made of high-strength polycarbonate. The internal pads offer excellent fit, and they are removable and washable for optimal hygiene.

Rear air extractors, the visor height-adjustable and the strap with double D, make it a very high quality product.

The helmet is available in 4 new graphics.

RECON

BOOTS

Ufo Plast is increasingly synonymous with protection safety, and with this same logic we present you with the E-AHL (exoskeleton ankle hyperextension limit) off-road boot.

This innovative product (*Alberto Barozzi concept patented*) has been exclusively shown to protect the tibial/tarsal compartment and offers users absolute comfort.

This concept has been studied over several years through careful biomechanical analysis. Detailed knowledge of the needs and issues in use have made it possible to identify in detail the points set forth in the product's development.

This "Made in Italy" product has been created by a network of highly skilled professionals who have made it possible to express the concept innovations on the product.

A study of shapes, research of thermoplastic/fabric materials, engineering development, design, highly skilled Italian craftsmanship and strict testing in the laboratory and in the field all have allowed for the creation of this product, with methodological criterion that sets Ufo Plast products apart.

RECON BOOTS

E-AHL

EXOSKELETON ANKLE HYPEREXTENSION LIMIT

RECON E-AHL (Exoskeleton Ankle Hyperextension Limit - Alberto Barozzi patented concept)

- Off-road boot designed and made entirely in Italy
- Cutting-edge technologies and innovative materials
- Revolutionary exoskeleton with Stainless Steel arms is the "protective cell" of the ankle and tibia
- Prevent dangerous twisting of ankles
- Allow to the rider an ideal control of dorsal and plantar foot flexion
- Ensures tibial/tarsal compartment defence
- Highest levels of comfort and performance

The protective foam tip is made of special plastic polymer for high toe protection. Its asymmetrical design has been studied to best suit the grip of the climbing gear lever and when inserting gears.

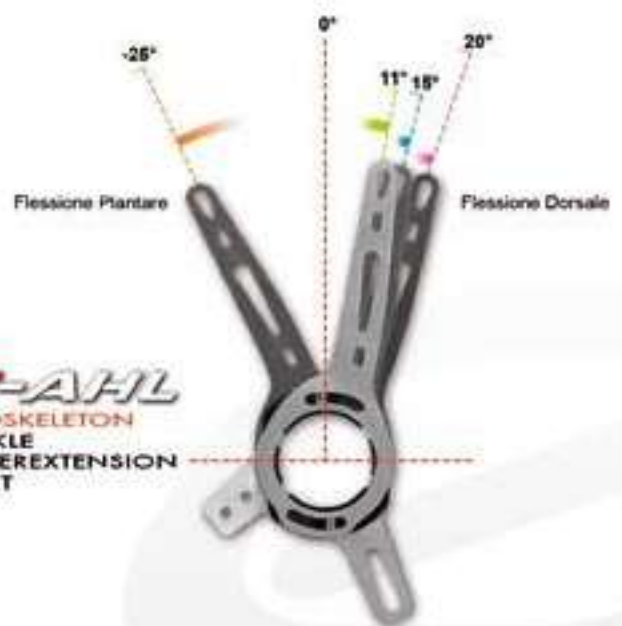

The Heal lug has been designed to offer maximum protection and allow for effective gear changing with the heel in the start up phase.

Technical-functional characteristics:

- 1) Ergonomically developed mid sole for comfort and foot stability. Studied for reduced treading, thus ensuring perfect support on footrests when feet are positioned on their soles.
- 2) **E-AHL** - an innovative stainless steel exoskeleton making up the "protective cell" in the tibial/tarsal compartment, developed with the following special features:
 - a - Pronation and supination foot support through lower arms
 - b - Tibia/fibula support through upper arms
 - c - Dorsiflexion personalisation system using special stoppers: 0° - 15° - 11°
 - d - Biomechanical movement permitting extremely free movement starting immediately with new boots
- 3) Davos Sole - high grip characteristics with a balanced design between motocross and enduro. Surprising lasting wear.
- 4) Upper - **thermoformed BAL** (bioclimatic action low) with structure made from hypoallergenic, antibacterial polyurethane foam, studied to ensure improved comfort, high shock absorption power and proper ankle containment. Its reduced bioclimatic value is obtained thanks to special air "channels."
- 5) Internal boot leg protection dual-compound for increased bike grip.
- 6) **CA system** (calf adjustment) boot leg - with 4 adjustment points to best adapt to calf volume.
- 7) Hooks - in anodised aluminium, with intuitive and efficient adjustment and closure thanks to the integrated "soft touch" component.
- 8) Toe thickness - reduced for easy and effective changing.
- 9) Tip - protective foam made of special plastic polymer for high toe protection. Its asymmetrical design has been studied to best suit the grip of the climbing gear lever and when inserting gears.
- 10) Heal lug - designed to offer maximum protection in the area and allow for effective gear changing with the heel in the start-up phase.
- 11) Vents - dynamic for proper ventilation.
- 12) Sole - in breathable shock-absorbing Eva.
- 13) Internal gaiter - with shape memory, breathable material with a waterproof outer film.
- 14) **ADHM (assembly/disassembly home made)** - independently managed support for substitutions of some components.
- 15) All materials are water resistant and anti-corrosive.

The boot is provided with 15° stoppers for dorsiflexion on a maximum movement of 20°. If necessary, different options include: upper stopper 11° or free movement 0°

FULL SOCKS V2

cod. CA04045

SIZES: 2L (39-41) - 3L (42-44) - 4L (45-47)

COLOR: K

100% MADE IN ITALY

POWERED BY

Full Socks V2 with VEINO-MUSCULAR COMPRESSION TECHNOLOGY

ULTRA COMFORT

Woven fibres renowned for their softness and comfort.

PROTECTION ACHILLES TENDON

The cushioning effect of the 3D.DOTS at the rear of the sock protect the Achilles Tendon from friction and pressure.

THE ARCHTISM SUPPORT

Located in the arch of the foot, it also provides for venous return and recovery.

3D DOTS TECHNOLOGY

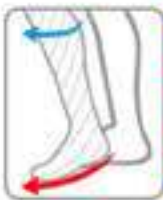

- 3D.DOTS apply acupressure massages that boost blood flow and help absorb shocks. No pressure points, no hot spots.
- 3D.DOTS wick out moisture and enable air to circulate. Feet stay dry and fresh.
- 3D.DOTS cushion the Achilles tendon and the malleolus area and provide maximum grip in the shoe. No frictions, no pressure, no shocks and no slipping.

ANTI FATIGUE

The shock and the vibration absorption on muscles, veins and joints increases resistance to effort.

SIZES: S/M - L/XL - XXL

COLOR: K

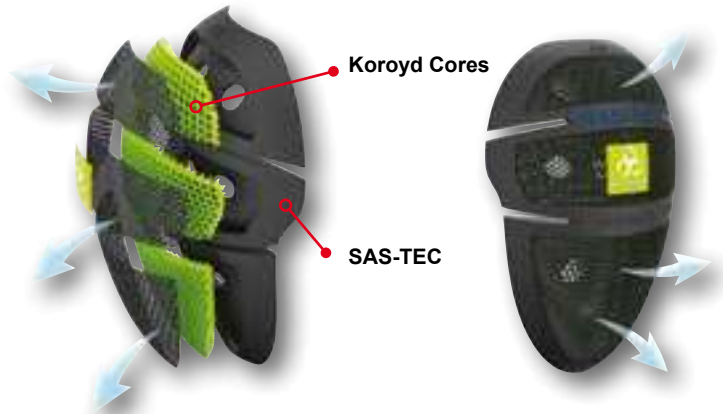

BACK PROTECTOR: CE-EN1621-2
 FRONT PROTECTORS: CE-EN14021
 SHOULDERS GUARDS: CE-EN1621-1
 ELBOW GUARDS: CE-EN1621-1

MADE IN ITALY

ENIGMA Bodyguard with SAS TEC/KOROYD protections
 With their new SKa protectiona series UFO combines the positive features of SAS-TEC foam and Koroyd Cores to something completely new: lightweight, breathable and highest damping capacity.

SAS TEC - KOROYD technology

Elbow and Shoulder guards with SAS TEC / KOROYD Technology

FOR F.M.I. RULES

SAS-TEC
body protection systems

ADULT PROTECTORS

SAS-TEC
body protection systems

SAS-TEC safety made of foam

In contrast to conventional PU foams the viscoelastic PU foam of SAS-TEC is partly made of renewable materials. Its special features include spontaneous response, highest comfort and unique damping performance with excellent nearly linear energy absorption. A very special micro structure of the SAS-TEC foam is responsible for an adaptive damping behavior – the higher the speed of the impact, the higher the resistance of the foam. All these features guarantee the best possible protection for your body.

SAS TEC - KOROYD technology

Back protector with
SAS TEC / KOROYD Technology

Koroyd Cores - Performance and Breathability

The combination of Koroyd's precise extrusion and unique thermal welding process leads to a structure with both extremely efficient and consistent energy absorption properties. Upon high velocity impacts the cores crush in a completely controlled manner, decelerating the energy from the impact and greatly reducing the final trauma levels. Koroyd's completely open cell construction channels airflow around the rider, without limitation.

Koroyd patented technology is integrated into the best sports and protection products that give you the edge.

PROERGO BODYGUARD

 SHOULDERS GUARDS: CE-EN1621-1
 ELBOW GUARDS: CE-EN1621-1

100% MADE IN ITALY

PROERGO Bodyguard with articular restraint system, adjustable body belt and removable sleeves

- Maximum integrability with the Neck Brace
- Removable sleeves
- Great bioclimatic comfort thanks to the exclusive "Sensitive®" fabric
- ANTI-SHOCK MATERIAL INSIDE: Reticulated Polyethylene (100% PE): The 4mm diameter hole with 7.5 mm distance guarantees great transpiration. ELLERES P forato (100% PU ViscoElastico): is a heat-sensitive product which continuously conforming to the shape of the body. Great ability to absorb and distribute shock.
- ANTI-SHOCK MATERIAL OUTSIDE: Made from polyethylene plastic PE with high impact resistance, the external anti-shock material has a "Honeycomb" structure, and it offers extremely effective shock absorption and the right heat dissipation (so as to avoid internal overheating).
- ARTICULAR RESTRAINT "Pro Ergo" has two straps which can be tightened. They start at the shoulders and reach the waist where they are fastened with Hook and loop fastener. The straps cross over in an "X" so that the articulation of the shoulder remains taut at the same time permitting all movements that a motor cyclist has to make (on and off the road).

KNEE WIDTH
reference: centre of the patella

KNEE CIRCUMFERENCE
reference: centre of the patella

Ufo Plast Morpho Fit, a product made entirely in Italy representing a new and innovative cona ceptual response in the range of jointed braces for knee protection in sport. The result of carea ful, constructive cooperation between **Alberto Barozzi Concept**, **Tek Neg** (engineering) and the **UFO PLAST** technical staff, which made it possible to develop a product that embraces a number of technical and functional factors, including:

- Ergonomic structure with high-performance structure characteristics made from a special plastic polymer
- Total containment of the knee joint thanks to:
 - a - medial and lateral collateral ligament support
 - b - anterior and posterior cruciate ligament support
 - c - patella protection
- Proper size adjustment thanks to adjustments available

Color: W

Color: DFLU

- **CPSO** (Condyle Pad Spheric Orientation): Adjustable condyle pads, made of a spherical support for perfect containment of the joint
- Tibial support in two versions can be adjusted, with reference to the subjective morphologic structure of the tibia, for correct adaptation and comfort. **TOP** (Tibia Orientation Position)
- Adjustable containment system for the **ACL** (anterior cruciate ligament). **ACLSS** (Anterior Cruciate Ligament Support System)
- Medial and lateral collateral ligament containment
- Sealed stainless steel structural four-sided joint, for a correct relationship between translation and rotation of the joint and the best integration in the knee flexion-extension movement
- Structural patella cup for effective impact dissipation, thereby limiting the direct impact on the patella
- Telescopic upper structure to protect the rectus femoris - vastus medialis and sartorius muscle
- Adjustable 4-point leg-fastening system for correct positioning
- **HLS** (Hyperextension Limit System): Stoppers to limit hyperextension with variations: 0° - 15° -25°- 35°
- Adjustable fittings for the best adaptation of the straps to the leg
- Heat-welded, hypoallergenic, antibacterial straps with reduced thickness for better containment and comfort
- Thermoformed **BAL** (bioclimatic action low): structure made from hypoallergenic, antibacterial polyurethane foam with bubble wrap texture to ensure the best adherence to the leg and a reduced bioclimatic ratio and high shock absorption power. Easily removable for easy cleaning
- **MFBS** (Morpho Fit Boots System): Interference support with the top of the boot to support the brace
- **ADHM**, (assembly/disassembly home made): Assistance system managed independently thanks to a conceptual engineering system expressed in the creation of the product
- Ergonomic "tube-sock" to enable better application of the brace
- All materials are water resistant and anti-corrosive
- Lightweight (size S/M = 760 gr - size L/XL = 820 gr)

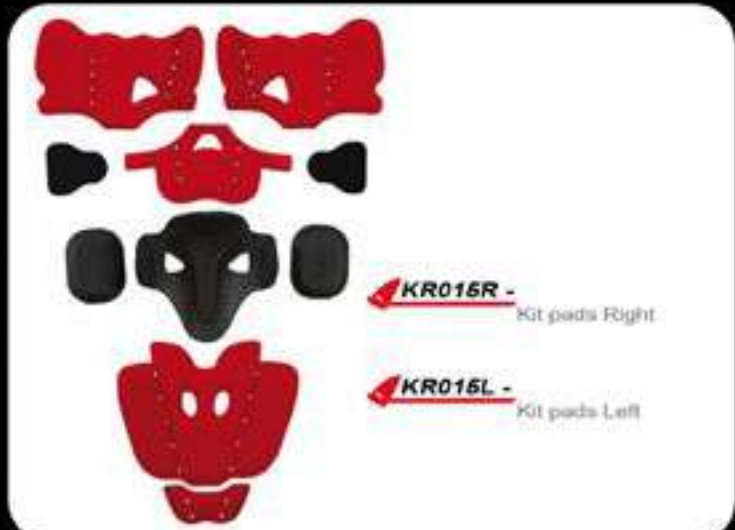

REPLACEMENTS MORPHO FIT KNEE BRACE

100% MADE IN ITALY

In creating Structure, the ADHM (assembly/disassembly home made) system was used. This is a modular concept logic for completely independent assistance.

JACKAL Knee-shin guards

COD. MTP6288

SIZES: S/M - L/XL

COLOR: W

KNEE PROTECTOR: CE-EN1621-1

MADE IN ITALY

JACKAL Knee-Shin Guards with internal STF protections (SAS TEC FOAM).

The Jackal Knee/shin guards for DH a ENDURO, the knee guard is completely open in order to be worn comfortably even without taking off your shoes, with adjustable elastic straps for a perfect fixation to the knee. The Jackal Knee/shin guard is longer than the knee guard Spartan EVO, and cover part of the shin of the rider also.

- Internal protections in STF (SAS TECH FOAM) • Anti-scratch micro-fibre
- Very light weight and extremely protective
- Maximum transpiration and maximum ergonomics
- Lateral padding

- Back supports adjustable in two different positions

Color: W

Color: D

Color: B

Color: A

Color: F

Color: C

NSS neck support has been developed for a better interaction among body, back and shoulders with protections and without protections.

Ufo plast technicians used their great knowledge of the plastic polymers to produce the NSS (coa moulded injected polymers), avoiding the use of dangerous (in case of structural failure) composite fibers.

The side attack allows to wear the NSS with extreme facility and in total autonomy, also after putting the helmet in your head. A safety system allows the maintenance of the closure also case of crash.

TWINWALL

TWINWALL HANDLEBAR

Renthal Twinwalls are the safest and strongest handlebars in the world. Renthal's revolutionary Twinwall handlebar utilizes two tubes, making fatigue failure virtually impossible. The immensely strong Twinwall offers 50% more flex than a traditional steel 7/8 bar. Renthal Twinwalls are currently used by Team Honda USA, Team Kawasaki USA, Red Bull KTM USA, Factory Connection Honda, Pro Circuit Kawasaki, Yamaha of Troy, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki Europe and

TAPERED SERIES

RENTHAL® ULTRA-TACKY™ GRIPS

Renthal® Ultra-Tacky™ grips have been developed to increase traction between the glove and grip, increasing control and reducing rider fatigue. The unique Ultra-Tacky™ compound constantly produces and renews a sticky surface coating which when combined with the Renthal® Soft compound offers an incredibly grippy yet comfortable surface. Suitable for use in all conditions, the grip is particularly applicable where riders are looking for increased control of the handlebars. The sticky surface will last for the lifetime of the grip and if it loses its stickiness at any point, simply wash with clean water and allow the grips to air dry to re-activate.

- Renthal® Dual Compound Construction
- Ultra-Tacky™ outer compound provides increased traction (similar in hardness to Renthal Soft)
- Firm inner compound provides durability at grip ends.
- Sticky surface will last for the lifetime of the grip and can be refreshed at any point with water.

FRONT CHAINWHEELS

Renthal Front Chainwheels are simply the finest front chainwheel on the market today.

Our Front Chainwheels feature: Specially developed Nickel-Chrome-Molybdenum steel, case hardened core refined to give the ultimate combination of strength and hardness.

REAR CHAINWHEELS

Renthal Ultralight™ rear chainwheels are manufactured to extremely tight tolerances from a special material developed to withstand the rigours of Supercross, Motocross and Enduro.

The 7075 T6 aluminium alloy rear chainwheels are 66% lighter than steel, yet incredibly durable. Their advanced tooth profile, concentricity and accuracy of fit provide maximum power transfer and long-life. Renthal's combination of a very high strength base material and an exceptionally hardwearing surface result in significantly increased chainwheel life.

TWINRING

The longest lasting most durable off road sprocket you can buy developed over 5 years. The unique flat face design keeps weight to a minimum and means the TwinRing's as narrow as a regular chainwheel. Inner Ring is high strength Ultralight 7075 T6 Aluminium. Outer Ring is ElectrolessNickel Coated steel Outer is expanded at 200 °C and then fitted to inner, creating a permanent bond for the life of the sprocket

INTELLILEVER

The Renthal Intellilever™ is the first truly unbreakable lever. In the event of a crash the IntelliLever can pivot 90 degrees both up and down as well as 90 degrees forward. CNC machined from billet aluminium, the Intellilever™ is hard anodised with PTFE coated pivot brushing. Adjustable and fits most cable operated clutch systems and popular front brake master cylinders.
