XKCHROME

MOTORCYCLE, CAR, OFFROAD & MARINE

Designed and Engineered in USA - Patent Pending

THE DESIGN

XKchrome is a revolutionary product that pushes LED lighting into a new era. Using the visually stunning, easy-to-use mobile app and bluetooth 4.0, you can customize everything at your in-gertips. XKchrome utilizes various sensors in your phone to bring dynamics to the light. The Chameleon feature instantly changes your vehicle to whatever color you see. The Music Sync feature makes the light dance to what-ever rhythm you hear. With XKchrome, the vehicle essentially becomes part of you and extends your self-expression into whole new dimensions.

THEME 🎨

Over 15 themes included, plus advanced theme DIY creator.

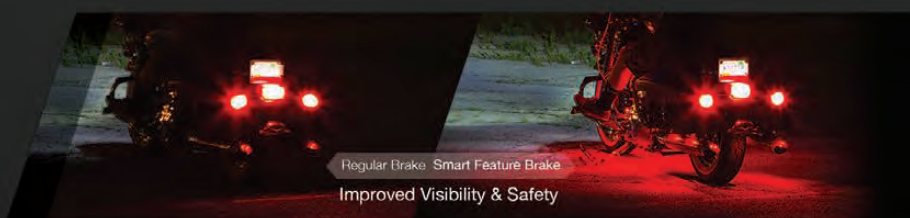

FEATURES

MULTI-ZONE 🎨

Each controller contains two independent zones that can run different colors/themes.

MUSIC SYNC 🎵

Sync light to the beat of your favorite music, played from your device or soundw picked up via mic.

GET THE APP

CAMERA 📷

Capture colors with camera in real time.

SPEED 🚀

Sync light to the speed or acceleration of the vehicle.

XK TITAN

3-ZONE HIGH POWER APP CONTROLLER

HIGH OUTPUT

- Zone 3: 300W max
- Zone 2: 100W max
- Zone 1: 100W max

SMART SENSOR

Use 12V+ signal (brake/reverse/fog) to trigger user-defined program.

MULTI-FUNCTION SWITCH

DIY up to 3 presets and save to the controller. Use switch to select saved presets without app.

ONE CONTROLLER FOR ALL YOUR LED LIGHTS

UNIVERSAL FOR ALL 12V LEDS

XKTITAN is compatible with all 12V DC single color LEDs with its max power capacity.

MULTI-ZONE CONTROL

Each light zone can be independently assigned with various patterns (Strobe/Fade/Breath) or turned ON/OFF.

BUILD YOUR OWN PRESETS

Custom build various presets for different scenarios such as "Emergency", "Off-road", or "On-road". Switch between presets with switch or app. In addition, a special preset can be triggered by sensor wire.

SYNC LIGHT TO MUSIC

Sync all your LED lights to songs in your phone and instantly ignite an outdoor party! XK TITAN's advanced algorithm dynamically analyzes the song to maximize the visual beats to any kind of music. The app can also use mic to sync to radio or ambient sound.

CAR / TRUCK

THE DESIGN

XKGLow's car/truck led lights are specifically designed for the versatility and ease of automotive light customization. The 2nd generation plug-n-play waterproof plug design dramatically improves the convenience of mounting and endurance of tough road conditions. The low profile reinforced light tube allows user to contour any vehicle shape, and the unique integrated plug design minimize the blind light spot while creating even and continuous light effect.

EMERGENCY

Dual color underglow kit designed for emergency and lawenforcement vehicles.

PRODUCT SERIES

SINGLE COLOR

One of XKGLow's most popular and cost-effective kits. Now featuring 7 color options and 2-nd generation waterproof design.

MILLION COLOR

DESIGN

With our Razor Pro light bar series, we set out to design the next generation light bars that exceed the market's best products. This includes even our most popular Razor series in brightness, efficiency, and durability. We upgraded the genuine CREE LED chips from 5w to 10w and completely reengineered the circuit and heat distribution system. This will ensure our lights can endure the toughest of environments, the Razor Pro lights went through a series of vigorous tests ranging from a polar freeze, boiling heat, high speed crashes and high altitude drops. The result is a light bar you can depend on for years to come.

DESIGN

The Razor-Series light bars leads the industry in low profile performance LED lighting with its genuine 5W cree LED, IP68 waterproof and single row design. The flood/spot combo design provides both wide angle and long distance light beam. Our durable aluminum housings feature custom, over-sized heat sinks which keep the temperature down and allow our LEDs to run both brighter and longer. All Razor Light Bars receive a high quality powder coat finish, and 5 year warranty.

MARINE

THE DESIGN

XKGLOW offers a full line-up for marine LED lighting upgrade. From the latest IP68 underwater transom RGB lighting to the low-profile interior LED strips and pods, you can control them all via the advanced XKchrome app, cast beautiful LED colors into the water and control it with holiday themes or music beats, turning your boat to an instant party. You could even turn the trailer into airstrip with our unique boat trailer runway lighting. Playing light with water has never been so fun.

TRANSOM LIGHT

Ultra bright color changing underwater light + XKchrome app features.
